What Annie Wilson does is illegal and dangerous: She crosses political refugees from Central America into the United States. A member of the Sanctuary Movement, she is one of a network of religious activists and layworkers who are risking imprisonment by running a modern-day Underground Railroad, smuggling aliens into the country, harboring them in churches and synagogues near the border, and then transporting them north where other Sanctuary workers help them settle into new lives. One of the largest demonstrations of civil disobedience since the Vietnam War, the movement is composed primarily of male clerics and women volunteers.

"The family we're picking up today is from El Salvador," says Annie Wilson as we head toward a "safe house" in a certain Mexican town approximately a hundred miles from Tucson. "The Quaker who's been leading them up through Mexico says they're 'high risk.' The husband was a union organizer in San Salvador, and he's on death lists. The wife's brother was accused of being a guerrilla, and he was picked up by the police and 'disappeared.' They had a difficult trip. The wife contracted tyhoid en route, and the baby is sick, too. We have a church in the north lined up to take responsibility for them. But first we have to get them into the United States, and that's always complicated. Over the years, I must have brought seventy people through, and on each run something goes wrong."

We arrive at the safe house where the refugees are waiting. "Ah, you have come for us," a thin dark man says in halting English. He is Carlos Diaz, thirty, a former teacher and father of the family. "We have waited many days for you, and now we must leave at once. Some men have been following us, perhaps since Mexico City."

"I'm not sure I can cross you today," Annie answers. "Maybe tomorrow. Driving down, we saw many Border Patrol cars. I've never seen so many. You know it's best for all if we don't take unnecessary risks."

"No, no . . . we must go soon," demands Carlos Diaz. "To stay is dangerous."

Annie looks outside and spots a spooky-looking stranger, loitering and watching. "Okay, we'll try it," she says to Carlos. "I'll have to check the holes in the fence first to find the best route."

For the next hour, Annie drives her borrowed yellow Datsun station wagon along the U.S.-Mexico frontier, searching for the safest point of entry. Though the ten-foot-high-steel-mesh barrier is loaded with electronic sensors that trigger alarms when jarred, the fence has many gaping holes. Annie picks an opening concealed from a nearby road, then drives to the official border checkpoint.

"What was the purpose of your visit to Mexico?" a U.S. Customs official inquires.

"Shopping," Annie answers nonchalantly.

Back in the U.S. Annie checks the road on the other side of her crossing spot. Noting that a Border Patrol squad car cruises by every three minutes or so, she concludes that her move will have to be fast. "I'd rather not be doing this here and in this way, but going seems to be safer than staying," she says. She telephones a Sanctuary supporter in Mexico, informs him in code of the location of the crossing point and asks him to guide the group there.

At the appointed moment, Annie is waiting on the American side of the border, her car's motor running. With lightning speed, five refugees dash through the fence and into the small Datsun with the tinted windows. Annie takes off. She is no more than a hundred yards down the road when a Border Patrol paddy wagon speeds toward her.

"La Migra! La Migra!" the refugees scream, calling the slang name of the immigration police.

"Down, back there!" Annie shouts in Spanish. "Get to the floor."

The paddy wagon roars past the Datsun, ignoring Annie and her passengers.

"The Lord protects . . ." Annie exclaims. It is as much a wish as a hope.

To smuggle or harbor an illegal alien is a crime punishable by up to five years in prison per count. Nevertheless, Sanctuary has brought more than three thousand Central Americans into the United States. Officially, the congregations of two hundred churches and synagogues from coast to coast—nearly fifty thousand individuals—have committed themselves to this act of conscience.

Who are the Sanctuarians?

"They are individuals who do not agree with United States policy in Central America and who have found an effective and media-attractive way of publicizing their opinions," charges Ambassador H. Eugene Douglas, U.S. coordinator for Refugee Affairs. "While some supporters' motivations may be innocent and nonpolitical, others are not."

"Quite the contrary," countercharges New Mexico Congressman Bill Richardson, chair of the Hispanic Caucus. "The Sanctuary Movement is a religious and moral reaction to a grave injustice—the deportation of Central American refugees back to conditions of civil war."

Sanctuary founder John Fife, forty-five, pastor of Tucson's Southside Presbyterian Church, describes his group more simply: "We are citizens who saw refugees in our midst, who saw that the laws were being administered unfairly against them, and who realized that to save lives we had to become civilly disobedient against the administration of those laws."

The Sanctuary Movement is one response to the civil and military disorders currently shaking Central America. In Guatemala, El Salvador and Nicaragua, where civil wars rage, nearly a million and a half people, by conservative estimate, have left their countries as refugees or been displaced. Many of them exist in refugee camps within their own countries or in Mexico and Honduras; hundreds of thousands have made their way to greater safety within the United States. Though overt acts of war have created part of the refugee problems, severe human rights violations, particularly in Guatemala and El Salvador, have also contributed; death squads, torture and disappearances of citizens are everyday facts of life in those countries. The Sanctuarians say that international law and human compassion require Americans to provide safe harbor for these refugees. The official voice of the U.S. government contends that most Central Americans come to the U.S. not as political refugees, but as economic ones.

Speaking against a law that would ban deportations to El Salvador, Elliott Abrams, Assistant Secretary of State for Human Rights and Humanitarian Affairs, recently stated: "El Salvador is a country troubled by poverty, violence, overpopulation and a history of oppression. For a number of years, Salvadorans have looked for economic opportunity elsewhere. . . . Some groups argue that illegal aliens who are sent back to El Salvador meet persecution and often death. Obviously, we do not believe these claims or we would not deport these people."

But Annie Wilson, who risks prison on a weekly basis to bring Salvadorans into the United States, believes the claims. "The refugee issue has become politicized," she says. "Our government welcomes the victims of communist regimes, but it turns a blind eye to the Guatemalans and Salvadorans because we are friends with their governments. In Sanctuary, we try only to bring across Central Americans who have been threatened and who stand a good chance of being killed if they remain at home—dissenters, peasants who have witnessed massacres, church workers serving the poor. Almost none of these people can get into the United States legally because our government rarely grants political asylum to the victims of terror committed in countries that we're aligned with. About 3 percent of all Salvadorans and fewer than one percent of all Guatemalans who apply are granted political asylum and are able to remain in the U.S., as compared with 12 percent of Nicaraguans and 33 percent of Poles. I'm not a partisan political type. I've helped refugees who came here escaping Southeast Asian communism. I . . . we . . . do this as caring human beings, as Christians who put our faith into action. As neighbors."

The Sanctuary Movement developed under the burning Arizona skies in 1980 after thirteen middle-class Salvadorans died in the desert just west of Tucson. After walking from Mexico, they had been abandoned there by a "coyote," a professional smuggler. This incident brought to the surface something that Tucsonans had long been suspecting: Thousands of Central Americans were suddenly flooding into the United States, some of them literally appearing on Tucsonans' own front lawns.

"What can we do to help these sojourners?" Tucson's clerical community asked. Different people came up with different answers. Jim Corbett, a retired rancher and a Quaker, responded by assisting Central Americans across the border; Rev. John Fife visited the prisons and provided funding for legal aid to captured Salvadorans and Guatemalans hoping to remain in the United States as political refugees.

Fife saw countless Central Americans deported back into war zones. It wasn't that the U.S. didn't have legal provision for the admission of these refugees, he decided it was that the laws were being administered without regard to the realities of the lives of Guatemalans and Salvadorans. "In a situation of routinized terror, Central Americans

[1] Some details about Annie Wilson and her run into Mexico have been altered to protect her anonymity.

were being asked to provide detailed documentation of threats against them," Fife recalls. "It wasn't unusual to hear of cases where a Salvadoran would be asked to produce a copy of the 'death list' he was supposed to be on. It struck me that Central Americans stand a better chance of surviving in the United States, and of not being deported, if they don't apply for political asylum."

Thus, Fife joined Corbett's smuggling operation. Together, the two men went out and organized a movement that was nonviolent, ecumenical, and staffed by male clergy and women—dozens of women.

"Women are Sanctuary's unsung heroes," says John Fife. "Oh, the newspapers give a lot of attention to clergymen like myself, but those who've done the riskiest jobs, at the border have been the women." (Of sixteen indicted in January, eleven were women.) "Our women are particularly heroic because they have the most to lose—the young mother with children risking jail."

Annie Wilson herself often ponders the dilemma of putting her liberty on the line for a moral issue. "Sometimes, what I'm doing scares me," she says."In church the other day, I wondered, 'Am I being selfish? Will my children have to pay for my conscience?' Sometimes my husband says, 'Stop—it's too dangerous.' But then I think about what the refugees are going through, that they could be killed if they are deported to their home countries. Besides, I'm not the only woman in this situation doing this."

Mary K. Doan-Espinoza, thirty-one, mother of four, coordinator of religious education of the Sacred Heart Parish of Nogales, Arizona, daughter of the former mayor of that border town, wife of a diesel parts salesman, joined Sanctuary precisely because she is a woman and a mother. One morning in 1983, Mary K. was sitting in her church office when she was approached by a sad, foreign woman, who appeared out of nowhere.

"May I kindly have a glass of water for myself and my two children?" this woman asked. When Mary K. returned with milk and cookies, the woman burst into tears.

"Do you see these little ones?" she asked. "I used to have five. One day, some people came to my house and told me to come to the school right away. They said something had happened to my children. When I got there, I saw many, many children's bodies stacked up in a row. The soldiers had shot them because someone said the son of a guerrilla was going to that school. They did not know which child they were looking for so they killed many children—including mine."

Full of impassioned anger, Mary K. contacted a Sanctuary member who'd visited her church. "I've lived in Nogales all my life and the border is nothing to me," she said. "Call me whenever you need help."

Mary K. Doan-Espinoza soon became a kind of underground legend. She "helped" in a thousand ways, legal and illegal: bringing food and clothing to Central Americans detained in Mexican jails, making trips into Mexico for refugees, offering shelter to all who appeared at the door of her church.

With time, rumors of Mary K.'s clandestine activities began to circulate. A clerk working at the Sacred Heart quit rather than labor alongside the notorious Mrs. Doan-Espinoza. The Brownie Scouts asked Mary K. to resign as troop leader. Mary K.'s husband complained: "My friends are making fun of me because of you. If we ever get a divorce, you'll know why. You shouldn't be doing this. You should just do your job and come home."

"If these people were your cousins and your brothers, you'd want me to do this," Mary K. answered. "If there were a war here, we would want strangers to act like Christians and to help us. Try to understand."

And when neighbors refused to understand, she told them this: "If you knew that your wife and your children were going to be killed, you'd look for a safe haven, too. If we all start wondering about what everybody thinks, then we'll never do what's right."

Doing the moral thing was also the roof of Peggy Hutchison's motivation. Hutchison, thirty, a Methodist layworker, graduate student at the University of Arizona and staff member of Tucson Metropolitan Ministries, became involved with Sanctury in the early 1980's. She went to the local prisons to interpret for attorneys aiding captured Salvadorans and Guatemalans. "Working in the prisons was shattering," Peggy Hutchison recalls. "I'd help these innocent, frigthened people with their applications for political asylum and nothing happened. I witnessed a lot of rights abuses—terrified Guatemalans not knowing what they were doing, signing papers agreeing to voluntary departure. I was working with an awful lot of people who told me that they'd be killed if they got deported to Salvador or Guatemala and, of course, they were deported."

After visting the prisons for several months, Peggy began to have nightmares. Finally: "I felt I had no choice. If I was to be true to my faith and my morals, then I had to go beyond the paralegal ministry." Peggy joined Jim Corbett's underground railroad.

The smuggling was hard for her: Between a full-time job, graduate school and an ongoing relationship with her fiance, Michael Elsner, no week ever had enough hours in it. Despite the hardship, Peggy felt an obligation to continue to help the refugees: On one of the first trips, we were rescuing young people from El Salvador, people my age, and they began to talk about everyone they knew back home. 'Did you know Manuel?' 'Oh, yes he was found dismembered with his eyes gouged out.' 'And did you know Carmen?' 'Oh, yes, she was the pregnant woman the National Guard picked up and disappeared.' These people moved me so much I came to feel that no exertion was too great for them."

Meanwhile, the government had begun to act against the Sanctuary Movement. "There is no provision in American law for 'sanctury,' "Ruth Ann Meyers, district director of the Immigration and Naturalization Service in Phoenix says. "The law does not say that it's okay for good people to violate the law for 'good reasons,' but not okay for bad people."

In 1983, Jesus Cruz, a citizen of Mexico and now a lawful permanent resident of the U.S. was hired by the Immigration and Naturalization Service as an informant, and infiltrated the Sanctuary Movement. His body wired with a hidden tape recorder, Cruz began to attend services at Tucson's Southside Presbyterian Church and to drive down to Nogales where he spent time with Mary K. Doan-Espinoza. He expressed his extreme concern for clandestine activities on behalf of Sancturay. "I thought he was a very kind man," Mary K. says, but there was always something strange about him—he was always pushing things that meant trouble. He was always asking questions about who was involved—and how."

On January 14, 1985, Donald Reno, Special Assistant U.S. Attorney in Phoenix, announced indictments against sixteen Sanctuarians on seventy-one separate charges of smuggling, harboring and conspiracy; twenty-four other members of the movement were named as unindicted co-conspirators. Of those indicted, most had spoken with Jesus Cruz—Mary K. Doan-Espinoza, Jim Corbett, several other women and the Reverend John Fife were among those named. Peggy Hutchison, who'd never worked with Cruz, was also indicted.

Mary K.'s reaction was fiery: "How dare the government go into churches to spy on people? Churches are for shelter and peace. We did what the Lord wanted us to do. There's protection in that." But just in case the Lord did not protect, Mary K. began to make provision for her children, in the event she had to go to prison.

For Peggy Hutchison, the indictment brought on a period of introspection. What would happen to her if she had to do a long prison term? ("It's hard to think of myself as a criminal.") Would she be able to marry Michael and have children with him? ("I'm thirty years old—what if the sentence is long?") Was there a way to make the best of a prison experience? ("Perhaps I could use the time to finish my master's degree?")

Two weeks after her indictment, Peggy flew out to Los Angeles to give a speech on Sanctuary at L.A. City College. After her talk, she was approached by a young Salvadoran woman, who asked, "Peggy, do you remember me?" Peggy did. Years ago, when she had first begun to make her runs into Mexico, Peggy had brought this woman, her mother, aunts and sisters into the United States. Theirs was a heartbreaking story. They were catechists—religious teachers using the catechism to instruct the poor—persecuted for their religion. The father of the family had been taken away, tortured and killed; soldiers had raped the mother in front of the children. After six months of wandering from convent to convent in El Salvador and Mexico, the family was finally sent to Sanctuary. "I came here today because you must know what has happened to us," said this young Salvadoran as she hugged Peggy Hutchison in the college lecture hall. "We are safe. The babies are well. And we want you to know that we will never forget what you've done for us. We want you to know that we love you and that we are your sisters."

When Peggy returned to Tucson later that week she was cheerful, optimistic. "My friend reminded me of something that the refugees all know," Peggy says. "That it's important to feel pain, but also important to celebrate joy—and most of all, it's urgent to make connections, no matter what is in the way." It was in that spirit that, on May 26, 1985, Peggy married Michael Elsner.

When Peggy Hutchison, John Fife, Mary K. Doan-Espinoza and their colleagues go to trial in Phoenix this month, Peggy will particularly remember something her Salvadoran friend told her that afternoon in Los Angeles: "To have courage. Because in Central America, the last part of a person to die is their hope."

SUPERFUND REAUTHORIZATION

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KINDNESS. Mr. Speaker, last week the House considered a compromise Superfund reauthorization bill. I, for one, was pleased that we finally brought this critical legislation to the floor and wish to compliment those members and staff of the committees involved for the excellent work that was done. Within the parameters of what we were able to consider on the Judiciary Committee, I felt we made significant progress in addressing several key issues. However, I would be remiss if I did not mention those areas in which I believe additional work could still be done.

Perhaps one of the most important issues within the entire Superfund Program was the establishment of a citizen suit provision. Although I supported the compromise bill on this and all other points, I feel the House might want to call special attention to certain portions of this provision in its conference negotiations with the other body. Although the Commerce and Public Works Committees, along with Judiciary, all reported citizen suit provisions, they were vastly different in scope and impact. The substitute bill contains portions of each of the three committee versions and attempts to balance the rights of citizens with the need to have prompt cleanup of sites without needless and expensive litigation.

Despite the substantial efforts of those involved in the compromise negotiations to encourage and facilitate greater use of preenforcement settlement negotiations as an element of the Government's cleanup program, the substitute approach still could leave some question as to whether citizens can bring their actions during active negotiations by the Federal Government or by a State which has given notice of its intent to bring suit. States and private citizens are not obliged to observe the negotiation procedures applicable to the Federal Government. Time prohibited us from adding appropriate language in the compromise substitute to address this issue, but I would hope language to solve the problem could be worked out in conference with the Senate.

Mr. Speaker, you will recall that there was at least one remaining area of disagreement concerning the critical issue of the claims being created by this new citizen suit language. The Judiciary amendment to the orginal bill provided grounds for citizens suit against any person is "has contributed or is contributing to the actual or threatened release of any hazardous substance from a facility, if such release may present an imminent and substantial endangerment to health or the environment." The compromise version provides for suit against any person who "has contributed or is contributing to the release or threatened release of any hazardous substance from a hazardous waste disposal site, if such release or threatened release may present an imminent and substantial endangerment to public health or the environment." Our colleague from Kansas, Mr. GLICKMAN, offered an amendment to return to the original language as reported by the Judiciary Committee. Unfortunately, I had to oppose his amendment as I believe the compromise approach better serves the interests of balancing the rights of citizens with the need to assure prompt cleanup of waste sites.

The substitute bill also included several bars to citizens suits. These bars would wisely prohibit suit in cases where they would impede prompt cleanup. Although the substitute bill makes constructive changes from the citizen suit provision reported by the Judiciary Committee, it still may present the opportunity for abuse based on the "imminent and substantial endangerment" language. I believe the House conferees should attempt to limit any attempts to expand the readings of what may present an "imminent and substantial endangerment," A mere risk of injury to health or the environment, which need not be immediate or irreparable, has been held sufficient to substain a cause of action for mandatory injunctive relief. Clearly, such readings should be discouraged in light of the potential impact they have on Federal court case load and on the parties involved.

Absent this, such precedents might be used under the substitute citizens suit language to bring claims involving very limited, attenuated or remote environmental dangers posing no significant or even potential danger to human health. Various estimates of the number of unpermitted, uncontrolled waste sites in the United States—many or most of which pose no danger to health—run as high as 25,000 to 30,000. I am concerned that these sites will afford a ready vehicle for frivolous or vague Federal claims to which pendent State personal injury claims, requiring jury trials in Federal courts, might also be added.

My second principal concern is that of liability affecting response action contractors—those people who clean up our Nation's hazardous waste disposal sites.

At present, insurance availability for contractors is diminishing, limits of coverage have been reducing, and premium rates have been increasing—some by as much as 50 to 200 percent. Insurance industry sources estimate that only 10 percent of contractors market needs are currently being met and that by January 1986 no insurance will be available at all. The present lack of insurance is already causing a reduction in the number of qualified contractors willing to participate in Superfund cleanups. As insurance becomes increasingly unavailable over the next year, availability of qualified contractors could diminish to the point of being acute. As a result, the Superfund Cleanup Program could come to an abrupt halt.

Although the substitute bill still requires fine tuning, it goes a long way toward addressing most of the concerns I have and it is still my hope, as well as my understanding, that what is in the bill will be maintained through conference with the Senate. The substitute bill would authorize the EPA Administrator to indemnify contractors—including subcontractors—against any liability arising out of the contractor's performance, provided that reasonable efforts are made to obtain liability insurance. The indemnification covers only liability which was not the result of gross negligence, or intentional misconduct on the part of the contractor. Therefore, the amendment allows EPA to provide contractors with indemnity coverage equivalent to liability insurance. This provision in combination with the existing standard of liability for contractors contained in the substitute should provide adequate incentive for contractors to continue to participate in Superfund cleanups.

Furthermore, numerous safeguards are built in to insure the provision does not become a serious drain to the Treasury, including mandatory deductibles and ceilings on indemnification.

Mr. Speaker, during the recent House consideration of the bill, my good friend from Nebraska, Mr. DAUB, offered an amendment which attempted to put some teeth into the causal nexus requirements in Superfund. Although I was constrained to vote against the amendment, I felt, given the way in which courts around the country have interpreted Superfund's existing causal nexus requirements, this amendment had special importance if Superfund's liability scheme is to be brought into line with traditional notions of American tort law.

Two especially important and widely quoted cases, U.S. versus Wade and U.S. versus South Carolina Recycling & Disposal, Inc. set forth the notion that traditional causal nexus is not required under section 107 of Superfund. In the introduction to the court's opinion in South Carolina Recycling, it was noted that direct causal connection between a generator's substances and the costs was not required. In Wade, the court stated that:

> The only required nexus between the defendant and the site is that the defendant have (sic) dumped his waste there and that the hazardous substances found in the defendant's waste are also found at the site.

Inasmuch as traditional notions of proximate cause require a far greater connection than this, I have concern that innocent parties—especially small business—could be held unfairly liable under such a scheme given the combination of it with joint and several liability. Such liabilty schemes can serve to frustrate, rather than encourage, proper waste disposal. Such a burden is particularly harsh when it is imposed on small businesses who do not have the resources to maintain long and costly court battles. This is unfair, Mr. Speaker, and should be addressed in conference.

Finally, Mr. Speaker, I must state my strong opposition to a Federal cause of action for personal injury and property damage. Our colleague from Massachusetts, Mr. FRANK, offered an amendment to pro-

vide such a cause of action and I was pleased to see this House again reject this ill-conceived notion as it did in last year's Superfund legislation.

To begin, my opposition to a Federal cause of action is based on the fact that Superfund is a cleanup law, not a compensation law. The bill being considered by the House today is focused on cleanup activities and all of the committees which worked on the bill specifically excluded a Federal cause of action. Such a proposal should have had an airing in the Committee on the Judiciary.

Additionally, I might just note a couple of other points I consider important for the House to examine:

First, proponents fail to recognize that liability under the Frank proposal would be triggered by such nonevents as the mere deposit or storing of a hazardous substance. Consequently, given the liability standard of near absolute, joint and several liability imposed by the amendment, liability could attach to a party without that party having contributed to the event that actually causes the harm.

Second, one of the so-called defenses provides relief from liability if the defendant established by a preponderance of the evidence that it took precautions against foreseeable acts or omissions of any (such) third party and the consequences that could foreseeably result from such acts or omissions.

This effectively casts each party to a site in the role of insurer of all other site users/participants. This is almost certainly an impossible task to meet and provides absolutely no meaningful relief. In fact, each site user not only becomes liable for the actions of all concurrent users but all past users—over which control is absolutely impossible.

Third, persons held liable under the amendment include:

Any person who owned or operated the facility at which the release occurred at the time any hazardous substance was disposed of at such facility.

This means that past site owners/operators can be held liable for damages for substances that were not even disposed of when they owned or operated the site.

Fourth, pain and suffering are compensable except to the extent that they are a result of an individual's unreasonable fear of physical injury, illness, or death. This departs from long-established tort law which has never granted relief for speculative damages. The Frank amendment language would cast Federal courts into the role of determining what reasonable fear might be in any given circumstance, hence requiring them to speculate as to what any persons damages may or may not be.

Fifth, the Frank amendment would effectively repeal rule 23 of the Federal Rules of Civil Procedure. By requiring that actions under the title arising from the same release be certified as a class, differences between each individual's condition "in the class" are ignored.

Sixth, lastly, proponents of this cause of action have specifically exempted the United States, States and local governments from liability under this statement. The Congressional Budget Office last year stated that the potential liability of the United States under such a cause of action would be impossible to estimate and could add significantly to the costs of the Federal Government. By specifically removing the United States, States and local governments from this liability, the proponents have admitted that liability under this title is essentially indefensible given its scheme of near absolute, joint, several and noncausal nexus liability. Given this admission, can Congress truly entertain such a proposal?

Thank you, Mr. Speaker.

S. SGT. THOMAS DAVIS' LOSS FELT BY MANY

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FLORIO. Mr. Speaker, 1 week ago today the airliner carrying members of the Sinai Peacekeeping Force crashed in Newfoundland, Canada. On that plane was S. Sgt. Thomas E. Davis of Woodbury, NJ.

Thomas Davis was a constituent of mine in the First Congressional District of New Jersey. He had joined the Army 12 years ago and was a proud member of the 101st Airborne Division, the "Screaming Eagles" based at Fort Campbell, KY. The loss of 28-year-old S. Sgt. Davis will be felt by many of us in the First District and I, too, want to offer my condolences to the Davis family. All of us, here in this House and in south Jersey share their grief in these difficult times.

Mr. Speaker, I would like to share the following article with my colleagues. It is from the Gloucester County Times. The words offer a small insight into the sacrifices and pain being felt by the many who loved Thomas Davis. He was a soldier on a mission of peace and we all share in his family's feelings.

The article follows:

[From the Gloucester County (NJ) Times, Dec. 15, 1985]

FOR DAVISES, TIME TO GRIEVE

(By Jim Six)

WOODBURY.—An officer and a sergeant from Fort Dix knocked on the door of Donnell Davis' Ford Avenue home here about 1:30 a.m. Friday bearing the sad news they had been waiting for.

Many hours after a woman at the Army Casualty Desk had told them Thursday afternoon their son, Staff Sgt. Thomas E. Davis, has been on the Arrow Airlines DC-8 that crashed in Newfoundland, the Army representatives had come to confirm the news personally.

Since then, the family has heard no more from the military.

"It's just a matter of waiting," Davis said Saturday. "We have a phone number to call, but they said they'd contact us within 72 hours, so I guess I'll wait until Sunday to call."

The only news he's heard about the arrival of the crash victims at Dover Air Force Base in Delaware has come from television, Davis said.

"We're playing everything by ear," he admitted. He does not know whether the family will go to Dover when the time comes. The bodies of those killed in the accident are not expected to begin arriving at the military base until at least Monday.

Media attention had subsided by Saturday, he said.

"The television people were very nice. They admitted it was terribly awkward to come here," he said.

Davis, who is vice president of the Woodbury Board of Education, said he and his wife and four other sons had been keeping as busy as possible.

"It has taken our minds off it to talk. We've had people at the house since Thursday. By the time we go to bed, we're very tired. It's better than sitting around alone," Davis said.

Rep. James J. Florio, D-1st Dist., called to offer condolences on Saturday, Davis said.

Davis' 28-year-old son, Thomas, joined the Army almost 12 years ago and served about eight of those years in Germany. Davis said he called his son's finance, Marian Lanio, in West Berlin Thursday night to break the news to her.

Thomas had been stationed in a remote outpost in the Sinai Desert for five months as part of a peace-keeping mission. Members of the 3rd Batallion, 502nd Infantry, 101st Airborne Division's "Screaming Eagles" were being returned to Fort Campbell, Ky., in three groups. One flight arrived more than a week ago, and another is scheduled to arrive in Kentucky on Wednesday.

Thomas Davis had called his parents only 35 minutes before the chartered jetliner crash on takeoff at Gander International Airport Thursday morning. In his letters, Thomas wrote that the Sinai duty had been frightening and that servicemen often had to remain armed everywhere they went.

Davis last saw his son on July 4 for a party before he left for Egypt. He had sent his son a plane ticket so he could return from Kentucky on Dec. 21.

TIME FOR THE UNITED STATES TO GET SERIOUS ABOUT NAMIBIA

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SILJANDER. Mr. Speaker, United States policy in Africa in general, and in southern Africa in particular, appears to have blown in the direction of every fresh burst of oratory in the United Nations. U.S. interests, both national and strategic, appear to have been ignored at every turn. Given the fact of increasing chaos and impotence of the United Nations as well as its tilt toward the Communist world, it is increasingly apparent to all that it is high time for a change. It is certainly to be hoped that President Reagan and his administration will take a new look at Namibia and see where United States interests lie and alter our foreign affairs approach accordingly. Among these interests are the rich mineral wealth of the areas as well as the strategic port of Walvis Bay. For that

reason, I include at this point in the RECORD a letter I received from a Cabinet minister of Namibia's Government of National Unity on the subject of Namibia which I think bears repeating to the American people.

MINISTRY OF INFORMATION,
Windhoek, December 18, 1985.

Hon. MARK SILJANDER,
Member of Congress, Washington, DC.

DEAR CONGRESSMAN SILJANDER: The people and government of Namibia appeal to you and other members of Congress, who, like yourself, have achieved positions of power and leadership. We know the leadership position you enjoy did not happen by chance—the American political system distributes its rewards and honors only to those who earn them.

South Africa transferred to Namibia's Multi-Party Conference of internal political leaders all its governmental powers over the territory, on June 17, 1985, and Namibia's people exercised their God-given and inalienable right of self-determination, established their own legislative assembly and established a cabinet of ministers to administer Namibia's Transitional Government of National Unity (TGNU).

Namibia needs your help and advice. That is why I make bold to write this letter to you. We believe U.S. national security and, to some extent, American prosperity are linked to the fate of our country. Such matters are too important to be left exclusively in the hands of the United Nations and the diplomatic bureaucracy.

The United Nations General Assembly in recent years has become dominated by the mob rule of a Third World majority in close alliance with the Soviet bloc. U.S taxpayers contribute 25 percent of the annual U.N. budget (over $6 billion for this year).

The noted Washington Post editorialist Philip Geyelin, in a column captioned "United Nations: An Outrage" (Wash. Post, Aug. 19, 1980), described the United Nations as:

". . . a brawling, sprawling global bureaucracy whose governing bodies routinely violate their own rules—an institution in which a full two-thirds of its 159 General Assembly votes represents less than 10 percent of the world population and for which a small minority of 30 practicing democracies contributes more than two-thirds of its financial support. The United Nations, in short, is an institutional outrage, a moral swamp. It operates much of the time by the mob rule of a Third World majority in close alliance with its Communist bloc."

The U.N. helps finance (using in part U.S. dollars) the South West Africa People's Organization (SWAPO), a Soviet bloc terrorist force based in Marxist Angola across our North border.

SWAPO was once a legitimate internal liberation movement, but has become a senseless anachronism. SWAPO, armed by Russia, is trying to seize Namibia (and its vast uranium, gold, diamond, copper, zinc, gas and other mineral resources) by violence and terrorist attacks. The deep water port on our West coast could be used as a base for Russian nuclear submarines to bisect the oil lifeline from the Persian Gulf to the U.S. and NATO countries in Europe. Namibia is clearly the target of a Soviet takeover campaign. SWAPO terrorists use Russian land mines and automatic rifles to commit violent atrocities against the black civilian population of Namibia. Murder and abduction are standard SWAPO methods of operation. If SWAPO succeeds, Namibia will be dragged behind the Soviet "iron curain" which has fallen around Angola and other countries in Africa.

Nothing better illustrates the moral bankruptcy of the U.N. than its current obsessive and racist campaign to force a U.N. supervised election in Namibia rigged so that SWAPO, the Soviet-bloc terrorist cat's paw and surrogate, can win control in Namibia. U.S. taxpayers and the free world will be the losers if Namibia is forced by violence into the Russian orbit. Namibians prefer their existing government to SWAPO and the Russians, pending the time when a truly impartial U.N. can supervise the election of a constituent assembly. Namibia's 11 major population groups (who speak 8 languages, 29 dialects, and of whom the white group is only 11 percent of the total) are all proportionally represented in the present government and will never accede to a U.N. election which favors SWAPO. Ultimately we want full independence and international recognition.

As Churchill once said to Hitler, we say to SWAPO and its Soviet surrogates: "We will have no truce or parley with you or the grisly gang who work your wicked will. You do your worst, we will do our best, until in God's good time the U.S. and the West come, in their own interest, to our aid and support."

Namibia was first colonized by Germany in the 1880's, then taken over by the British in 1915 during World War I, later in 1920 mandated by the League of Nations as a trust territory to South Africa. The U.N. has no lawful jurisdiction over Namibia, any more than it has jurisdiction over U.S. territories, except as we Namibians may agree. Neither the U.N. charter nor the League of Nations Covenant provides any mechanism for involuntary transfer of a League trust territory to the U.N. which nonetheless for years has sought such control. Our interim government has all legislative and executive powers enjoyed by American territories.

Vital national security interests of Namibia as well as the United States are being seriously endangered by the last ditch effort of the United Nations General Assembly to stage a "human rights spectacular" at the U.N. by threatening sanctions unless Namibia agrees to a U.N. supervised election "rigged" for a victory by the South West Africa People's Organization (SWAPO). We refuse to be a pawn in the game of Soviet geopolitics.

We say, wake up, America! Today it is Namibia, yesterday Central America, Cuba, Afghanistan, and Vietnam, tomorrow—where next? U.S. taxpayers in aiding SWAPO are financing their own destruction. The United Nations General Assembly to some extent has become an enemy of the United States, as it is of Namibia. It is time to blow the whistle on the U.N.—and save millions a year for U.S. taxpayers.

Can you discuss with your colleagues in the U.S. Congress our hope that they will stop the flow of U.S. tax dollars through the U.N. to SWAPO? By helping our people and government, you will be serving the national security interest of the U.S. and all Americans. We are your friends. We admire the U.S. as a symbol of hope and freedom in the world. God bless America and its good works.

Sincerely yours,

——— ———.

THE ASBURY PARK PRESS ON THE SAKHAROV CASE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COURTER. Mr. Speaker, I would like to call my colleagues' attention to the following editorial from the Asbury Park (NJ) Press, which concerns the treatment of the Andrei Sakharov and Yelena Bonner at the hands of the Soviet KGB. The Sakharov case is a shocking demonstration of perhaps the most inhuman aspect of an inhuman regime: the systematic denial of freedom of internal movement and departure from the Soviet Union. The Soviet commentator, Georgi Arbatov, recently admitted, in a rare moment of candor, that this policy is necessary to prevent a large-scale exodus from the Socialist paradise. The Soviet defector comedian, Yakov Smirnov, jokes about this situation when he asks his audience to compare American and Soviet credit cards: the advertisement for the American Express card is "Don't leave home without it," but with the Soviet Express Card, it's simply "Don't leave home." It is black humor, to be sure, but it helps to ensure that we never forget the 300 million unfortunate souls who are prisoners in their own homeland.

[From Asbury (NJ) Park Press]

A CHILLING PICTURE: SOVIET "HUMANITARIAN" ACT IS A SHAM

The Soviet government, which has always controlled its own domestic media, has discovered the art of manipulating the world press to its own benefit. Among a number of actions instigated by Mikhail Gorbachev prior to his summit meeting with Ronald Reagan, was the announcement that Yelena Bonner Wife of Nobel Prize winner Andrei Sakharov, would be released from exile in Gorky to receive medical treatment in the West.

The world community was supposed to be favorably impressed by this 'humanitarian' gesture, even though the permission to travel had been granted only after frequent hunger strikes by Dr. Sakharov and was long overdue by any standard of civilized decency. The fact that the action was taken in conjunction with the summit meetings only underscores the blatant attempt by the communists to influence world opinion.

While part of the agreement for Mrs. Bonner to travel includes a ban on speaking to the press, the couple's relatives in the West have been able to give a chilling picture of Sakharov's life in Gorky. The KGB monitors every move, and during hunger strikes he is force-fed by holding his nose shut until his mouth opens, an excruciatingly painful procedure. Witnesses say he looks greatly aged and has lost more than 40 pounds.

Despite the recent cosmetic attempts to improve thier totalitarian image, the Soviets still preside over one of the most repressive governments in the world, unable to tolerate dissident opinions from even the most distinguished of its citizens. If they really want the trust of the world community, let them release Dr. Sakharov and give more than lip service to the issue of human

rights. Only then will the West begin to take seriously the rectitude of Soviet intentions.

A TRIBUTE AND FAREWELL TO TOMMY WINEBRENNER

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. HAMMERSCHMIDT. Mr. Speaker, I am pleased to join with my colleagues in expressing my deep appreciation for the valuable assistance Tommy Winebrenner has given to many of us over the years. Throughout his service of 32 years, Tommy has proven to be loyal, hardworking, and dependable. He could always be counted on to keep us abreast of the latest floor action and to give his insightful predictions as to when other matters would be coming up. Always able to provide an explanation, his comprehensive understanding of floor procedure so often helped us to get done what needed to be done. And when faced with a barrage of questions amid the ongoing, complex and sometimes harried floor activity and a multitude of conversations flowing about the room, Tommy's worthy answers were always offered with much patience and a pleasant demeanor.

During my period of service on the hill—being 13 years shy of Tommy's 32—I have never known a day on Capitol Hill without him. Indeed, I hold a personal respect for Tommy, both as a human being and a coworker, who so willingly guided me through moments of uncertainty, which, I think, every Member encounters, especially during those early years. Tommy, I will be forever appreciative of your stabilizing, but unimposing, presence over the past 19 years. I wish you much luck in all you endeavor. You will be missed.

A BILL TO CREDIT YEARS OF SERVICE TO THE CIVIL SERVICE RETIREMENT SYSTEM FOR SERVICE IN AGRICULTURE EXPERIMENT STATIONS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. WOLF. Mr. Speaker, during my tenure in Congress, I have been a strong supporter of fair and equitable retirement benefits for all Federal employees. It is extremely important that we reward our career Federal employees for their contribution and dedication to the operation of this great Nation's Government.

In this spirit, I am introducing legislation today which would permit Federal employees and retirees to receive Federal retirement credit for years of employment in Department of Agriculture agricultural experiment stations. These Federal employees received little, if any, retirement credit of any type for their vital service to the Federal Government.

The eligible Federal employees and retirees who would be able to take advantage of this legislation join other groups, such as members of the Peace Corps, Radio Free Europe employees, and County Agricultural Stabilization and Conservation Committee members in receiving this type of credit. This group, like predecessor groups who have received civil service retirement credit, were funded by, supervised by, and given assignments by Federal agencies and employees to such an extent that they were treated as Federal employees. This legislation would help correct the benefit deficiency situation encountered by these Federal workers during noncreditable service periods of employment for the Federal Government.

I urge my colleagues to join me in this important effort.

SECTION-BY-SECTION ANALYSIS

(A bill to credit years of service to the Civil Service Retirement System for Service performed in Agriculture Experiment Stations.)

SECTION 1—SERVICE FOR WHICH CREDIT MAY BE ALLOWED

This bill credits, under coverage of the Civil Service Retirement System, years of service done in Agriculture Experiment Stations.

The Office of Personnel Management will request confirmation of service for persons covered in this act from the employing state agenices. Service performed before January 1, 1984, will be entitled to receive Civil Service Retirement Credit.

SECTION 2—ANNUITY REDUCTION

This section explains annuity reductions and calls for offset of any retirement funds received from other retirement fund sources as a result of years of service credited under this legislation.

SECTION 3—EFFECTIVE DATE

The section designates the effective date of this legislation as the first day of the first month after expiration of the 30-day period beginning on the date of enactment of this legislation. It also explains computation of annuities commencing before, on, or after the effective date.

H.R. 4005

A bill to amend section 8332 of title 5, United States Code, to allow periods of certain service performed as an employee of a State or an instrumentality of a State to be creditable for civil service retirement

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SERVICE FOR WHICH CREDIT MAY BE ALLOWED.

(a) SERVICE MADE CREDITABLE.—Section 8332(b) of title 5, United States Code, is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (12);

(2) by striking out the period at the end of the second paragraph (13) and inserting in lieu thereof "; and"; and

(3) by adding after such paragraph (13) the following:

"(15) subject to sections 8334(c) and 8339(i) of this title and subsection (n)(2) of this section, service performed before January 1, 1984, by an individual in the employ of a State whose principal duties related to the carrying out of a Federal-State cooperative program described in subsection (n) of this section, only if he later becomes subject to this subchapter.".

(b) CERTIFICATION.—Section 8332(b) of title 5, United States Code, is further amended by adding at the end thereof the following new sentence: "The Office of Personnel Management shall accept the certification of the head of the appropriate State employing agency, or his designee, concerning the service referred to in paragraph (15) of this subsection.".

(c) FEDERAL-STATE COOPERATIVE PROGRAM.—Section 8332 of title 5, United States Code, is amended by adding at the end thereof the following:

"(n)(1) The Federal-State cooperative program described in this subsection for which creditable service is allowable under subsection (b)(15) of this section is the Federal-State cooperative program of agricultural experiment stations authorized by the Act entitled 'An act to establish agricultural experiment stations in connection with the colleges established in the several States under the provisions of an act approved July second, eighteen hundred and sixty-two, and of the acts supplementary thereto, approved March 2, 1887 (7 U.S.C. 361a-361i).

"(2) Service creditable under subsection (b)(15) of this section with respect to any employee shall not exceed the lesser of—

"(A) the aggregate period of creditable service performed by such employee under this section before the effective date of this subsection; or

"(B) ten years.

"(3) For the purpose of this subsection and subsection (b)(15) of this section, 'State' includes the fifty States and Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territories of the Pacific Islands, the territories of Hawaii and Alaska prior to statehood, and the District of Columbia.".

SEC. 2. ANNUITY REDUCTION.

Section 8339 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(o) An annuity which is computed in part on the basis of service described in section 8332(b)(15) of this title shall be reduced by the portion of any annuity the annuitant or his survivor receives from a State on account of such service or by that portion of any social security benefits the annuitant or his survivor receives on account of such service.".

SEC. 3. EFFECTIVE DATE.

(a) EFFECTIVE DATE.—The amendments made by this Act shall take effect the first day of the first month which begins after the expiration of the 30-day period beginning on the date of the enactment of this Act.

(b) COMPUTATION OF ANNUITIES COMMENCING ON OR AFTER EFFECTIVE DATE.—An annuity or survivor annuity—

(1) which is based on the service of an individual who performed service described in section 8332(b)(15) of title 5, United States Code, as amended by this Act, and

(2) which commences on or after the effective date of the amendments made by this Act,

shall be computed in accordance with such amendments.

(c) COMPUTATION OF ANNUITIES COMMENCING BEFORE EFFECTIVE DATE.—

(1) An annuity or survivor annuity—

(A) which is based on the service of an individual who performed service described in

section 8332(b)(15) of title 5, United States Code, as amended by this Act, and

(B) the commencement date of which is before the effective date of the amendments made by this Act.

shall be recomputed in accordance with the amendments made by this Act, if application therefor is made to the Office of Personnel Management within 12 months after the date of the enactment of this Act.

(2) Any change in an annuity or survivor annuity resulting from a recomputation under paragraph (1) shall be effective beginning on the first day of the first month which begins after the expiration of the 30-day period beginning on the date such application is made.

(d) TERMS.—For purposes of this section, a reference to an "annuity" or "survivor annuity" shall be considered to be a reference to an annuity or survivor annuity under subchapter III of chapter 83 of title 5, United States Code.

NATIONAL FETAL ALCOHOL SYNDROME AWARENESS WEEK

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COATS. Mr. Speaker, the week of January 12 will be commemorated as "National Fetal Alcohol Syndrome Awareness Week." Fetal alcohol syndrome is the name given to the combination of birth defects seen in those newborns suffering from the effects of the high levels of alcohol absorbed into their developing systems directly from their mother's bloodstream. It is the third most common cause of mental retardation. It increases both the risk of a baby being born at low birth weight, and of that baby's failure to catch up during the entire developmental process. It affects thousands of babies born each year, and tens of thousands more are born suffering from less severe fetal alcohol effects. Millions of dollars each year are spent caring for the infants born suffering from this syndrome, and for the children who carry the effects of these births defects with them throughout their lives. And yet, it is entirely preventable.

Representatives from several national groups that are concerned with women's and children's health have formed a coalition to bring greater attention to this problem. Just as recent efforts that have publicized the dangers of drinking and driving have helped to reduce the number of alcohol related traffic accidents, so too can public awareness help to prevent the high incidence of babies born suffering the tragic effects of fetal alcohol syndrome.

As the House sponsor of this legislation, I would like to commend the representatives of the National Council on Alcoholism, the National Institute on Alcohol Abuse and Alcoholism, the National Clearinghouse on Alcohol Information, the American Academy of Pediatrics, the American Medical Association, the March of Dimes, the Healthy Mothers/Healthy Babies Coalition, the Public Health Service of the Surgeon General's staff, the Center for Science in the Public Interest and all of the people who have worked in this effort to reduce the incidence of alcohol related birth defects.

Many efforts are underway to highlight the importance of alcohol awareness for pregnant women. Public service announcements will be aired, information pamphlets will be distributed to doctors' offices, and, in some States, warning signs, similar to those seen on cigarette packages, will be posted in bars and liquor stores. This is one instance where, simply by calling attention to the problem, we can do much to solve the problem itself.

A TRIBUTE TO ANTONIO MEUCCI

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DIOGUARDI. Mr. Speaker, it is with immense pride and pleasure that I rise today to pay tribute to a great American, Antonio Meucci, an Italian immigrant scientist.

The telephone is undoubtedly one of the greatest inventions of the 19th century. Picturing the United States and the world today without telephones is unfathomable. And when Americans ponder this invention's development, usually only one name comes to mind: Alexander Graham Bell. However, I believe that the name Antonio Meucci should ring a bell.

According to the Italian Historical Society, on December 28, 1871, Antonio Meucci visited the patent office and filed a temporary patent for his "telefono" invention, 5 years before Alexander Graham Bell. In 1874, Meucci did not have the money for renewal, and his temporary patent expired. Twelve years later, in 1886, it was ruled by the Supreme Court that Meucci had priority to the invention of the telephone. However, the Court's decision was ultimately set-aside.

Mr. Speaker, I believe that Antonio Meucci should be provided the credit and recognition he so richly deserves for his contribution to the development of modern day communications. The next time someone considers the origin of the telephone the name Antonio Meucci should come to mind.

On December 28, 1985, the Italian Historical Society of America will be hosting the 15th Annual Antonio Meucci Testimonial Luncheon. I join those attending this event in saluting this great Italian American.

Thank you, Mr. Speaker.

HUMAN RIGHTS IN IRAN

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TOWNS. Mr. Speaker, one of the most moving experiences I have had as a Member of this body was listening to the accounts of three Iranian citizens who escaped from various prisons in Iran. While the human rights reporting in Iran is very sketchy, it is important to give broad exposure to the testimony of actual victims who have managed to escape the country. I am enclosing for my colleagues' review a recent statement made in conjunction with their visit to the Washington, DC area. I commend it to my colleagues' attention.

Tuesday, December 10, marked the anniversary of the adoption and proclamation of the Universal Declaration of Human Rights by the United Nations General Assembly.

Several international human rights organizations have cited the Khomeini regime as having the worst record of gross violations of human rights, the degree of horror and brutality of which are unprecedented in Iranian history. Since June 1981, 50,000 dissidents have been executed, and 140,000 political prisoners are subjected to systematic and repeated torture.

Rarely does a better opportunity present itself to understand the crucial importance of respect for human rights than that of meeting and talking with actual victims of torture and imprisonment by the Khomeini regime, Mr. Hossein Dadkhah, Ms. Narges Shayesteh and Ms. Mojgan Homayounfar, recently testified before the U.N. Commission on Human Rights and the European Parliament. Their testimony was instrumental in the subsequent adoption on December 6 by the U.N. General Assembly, which rarely examines the human rights situation of a particular country, of a resolution condemning human rights abuses in Iran.

These three victims, in their own words, "represent the pain and suffering being inflicted upon 140,000 others." They are here to "tell the stories of those who have gone before the firing squads."

Mr. Hossein Dadkhah, born November 1, 1955, still suffers from the effects of the tortures he endured while in Tehran's Evin Prison. His feet were particularly affected and several toes had to be amputated as a result of irreperable injury. Mr. Dadkhah's wife and brother were both executed by the regime. His parents were arrested and severely beaten, the psychological trauma causing both to suffer nervous breakdowns. His eighteen-month-old child has been taken by the regime, and his wereabouts are unknown.

Ms. Narges Shayesteh, a former teacher, was born on May 15, 1959. She was imprisoned for two and a half years. The effects of torture are still evident on her nose, hands, knees, and chest, where during a five hour session Khomeini's Guards branded her with fifteen cigarettes.

Ms. Mojgan Homayounfar, born on October 24, 1961, is a former student of fine arts and a teacher. During her three year imprisonment one of her legs was amputated and the other crushed. Confined to a wheel chair, Ms. Homayounfar suffers a variety of effects as a result of her ordeal.

These three victims are concerned that international exposure of the Khomeini regime's atrocities plays a crucial role on reducing the number of executions and the extent of torture. In Ms. Shayesteh's words, "If because of a brief speech in a foreign parliament or an interview, one person is going to receive fewer lashes or one less person is executed, it is worth all the effort." She adds, "I have been in those prisons."

Ms. Homayounfar urges, "every humanitarian individual and organization to expose these atrocities, and thus contribute to the cause of humanity."

Mr. Dadkhah emphasizes that, "We are the exceptions; we have gotten out. But 50,000 others have been executed, and 140,000 more may also be executed unless we do something about it."

HONORING CLAUDE J. FARINHA

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FAZIO. Mr. Speaker, I rise today to pay tribute to a close personal friend and outstanding civil servant, Mr. Claude Farinha. After 35 years of distinguished service in the Federal Government, Claude recently announced his plans to retire on February 28, 1986.

Claude Farinha's record in the Federal work force speaks for itself. Not only have his skills, dedication, and commitment made him one of our Nation's leading civil servants, they have also resulted in his selection for two prestigious awards. In 1977, Claude received the Air Force Association's Citation of Honor as its "Outstanding Civilian of the Year." Furthermore, in September 1980, President Carter recognized Claude's numerous achievements by conferring upon him the highest recognition a Federal employee can receive—the Distinguished Executive Rank.

Serving as Deputy Director of Materiel Management at the Sacramento Air Logistics Center since 1975, Claude has developed McClellan Air Force Base into the most progressive center in the logistics command system. During this 10-year tenure, he has also masterfully directed a work force of 2,300 and managed an immense annual logistics budget. While Claude's leadership skills will be sorely missed, there is no question that his efforts have built a solid framework for continued growth and success at McClellan.

Mr. Speaker, Claude Farinha has been a tremendous asset to the Federal Government, McClellan Air Force Base, and the Sacramento community. I would like to extend my personal thanks and appreciation to Claude, his wife, Shirley, and their three daughters—Jana Lee, Lori Lee, and Sheri Ann. I wish all of them the very best of luck.

BOMBING AND ARSON AT ABORTION CLINICS AND FAMILY PLANNING CENTERS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. EDWARDS of California. Mr. Speaker, for the past 3 years, abortion clinics and family planning centers across the country have been plagued by numerous bombings and arson incidents. These violent actions are deplorable, regardless of one's view on abortion and birth control. I recommend for my colleagues' attention two recent articles on this matter, one an editorial in the New York Times and the other a column by Judy Mann in the Washington Post.

[From the New York Times, Dec. 18, 1985]

ABORTION BOMBERS' CHRISTMAS MESSAGE

The Christmas season is many things to many people. To America's domestic terrorists it is, as it was last year, prime time to escalate the battle against a woman's legal right to a safe abortion.

Last week a small bomb went off at the Manhattan Women's Medical Center. Because a caller had warned the police bomb squad, the building was evacuated in time.

No anonymous caller, however, warned a Portland, Ore., women's health center that the large package in its mail a few weeks ago was a bomb big enough to kill. Fortunately a staff worker had been trained to spot suspicious packages and called the police. Portland's postal authorities then found three other mail bombs, addressed to two abortion clinics and a Planned Parenthood clinic that doesn't even perform abortions.

The Portland police believe the bombs are intended to rally opposition to Senator Bob Packwood, a supporter of abortion rights who will be seeking a fourth term next year. The Senator has won sufficient popularity that he can probably survive the attacks, but the staffs and patients at those clinics have no such defense. Except for chance, the anti-abortion bombers might now be claiming their first fatalities.

During the last two years, there have been 50 bombing and arson incidents at abortion and family-planning clinics, nearly twice as many as in the previous six years. Those responsible claim to be championing life. What they're really doing with their explosives, fires and threats is saying to women: "Not your choice, lady Ours."

[From the Washington (DC) Post, Dec. 18, 1985]

AN UPSURGE OF VIOLENCE

(By Judy Mann)

On the Monday after Thanksgiving, a package about the size of a shoebox arrived at the Women's Feminist Health Center in Portland, Ore. It carried a Portland postmark. The center has been the target of threats, vandalism and frequent demonstrations by antiabortionists, and workers have been trained to watch for suspicious packages and envelopes. They called the police, who defused a bomb that a police spokesman said was powerful enough to kill.

Police defused three similar bombs in packages at Portland's main post office. One package was address to Dr. Peter Bours of suburban Forest Grove, wo was the topic of a major magazine article recently on the harassment he was getting for performing abortions. He is a member of the board of Oregon's chapter of the National Abortion Rights Action League. Another package was addressed to the Lovejoy Surgicenter in Portland, where abortions are performed, and the third to a Planned Parenthood clinic, which does not perform abortions, but which dispenses contraceptives.

"To our knowledge, it's the first time there's been a letter bomb," said a NARAL spokeswoman.

She also said clinic bombings resumed in October, with little or no media coverage. She cited four incidents; On Oct. 30, the Delta Women's Clinic in Baton Rouge was burned to the ground by arsonists, and another clinic was burned. On Oct. 26, the Hallmark Clinic in Charlotte, N.C., was the target of arsonists, and on Oct. 19, the Coram Women's Center in Suffolk County, N.Y., was bombed.

"We consider it terrorism," said the NARAL spokeswoman. "We consider it legitimate news. This is very, very serious."

Indeed, it is. On Dec. 10, the Manhattan Women's Medical Center was bombed. A NARAL spokeswoman said the incident occurred in midafternoon while procedures were being performed. She said someone called the police emergency number and asked them to evacuate the clinic. Then police got a second call and were told the clinic was not being evacuated fast enough. Shortly thereafter, a bomb went off in a second-floor bathroom. Damage was not extensive, she said, and no one was injured, although a receptionist was still in the building.

"You're torn between hoping this is an isolated nut in Oregon and the memory of what was happening this time of year a yeasr ago," said Nanette Falkenberg, executive director of NARAL. "Is this a re-escalation of what was going on?" There were at least 24 bombing or arson attacks on abortion facilities in 1984, with the attacks increasing in frequency and severity during the Christmas season, prompting President Reagan to order an all-out federal effort in early January to find those responsible. He did not, however, order the FBI to take over the investigations, which have been the responsibility of the Bureau of Alcohol, Tobacco and Firearms. The FBI investigates bombings when terrorist groups are suspected.

"Two things are different about the Oregon and Manhattan [incidents]," Falkenberg said. "Both involved tactics we haven't seen before. They were both clearly targeted to hurt people in the clinics. Before, they [the bombs] went off at night," when the clinics were empty. "In Manhattan they called, but it came very close to having people in the clinics."

She said the Oregon NARAL affiliate had called for a moratorium on picketing at clinics through the New Year to "tone down the level of debate" during the season but that the suggestion had been declined.

"I think as you increase the tone and level of hysteria around the issue, as you push the edge of the mainstream of a movement, the people who are already on the fringe, it gives them permission to move further and further out," said Falkenberg.

Her explanation for the turn to violence against the clinics that has occurred in the past couple of years makes sense. Prochoice organizations have documented numerous incidents of harassment outside clinics and of people who work in clinics. Peaceful dissent has given way to threats and intimidation. In Fairfax County, for example, antiabortionists are trying to organize a boycott of Fairfax Hospital and have urged sympathizers not to donate to its blood bank in an attempt to stop abortions from being performed at the hospital. This is nothing less than an attack on the community's blood bank.

Extremism has bred fanaticism, and with the incidents in Oregon and Manhattan it has bred terrorism. Before somebody gets killed, we had best be willing to recognize that this is what we're dealing with now, and address the problem as the threat to the social order that it is.

A BALANCED BUDGET BILL THAT SAYS YES

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GUNDERSON. Mr. Speaker, for the past few months we have been engaged in a fierce struggle with the proponents of negativism, the advocates of "no." They say, "No, we can't balance the budget; no, we can't guarantee our children and grandchildren that they will not be saddled with trillions and trillions of dollars of debt; no, we can't assure our senior citizens that we will be responsible today so that tomorrow there will be funds for pensions and retirement programs; and, no, we can't find a way to responsibly take control of a budget process that has run wild."

Last week, Congress and the President met the pessimists head on by passing and signing a balanced budget bill that says "yes." Yes, we can make Government work. Yes, we can solve our problems. We can ensure an economically secure nation. We can make the hard choices and the difficult sacrifices necessary to ensure that our Nation will move forward to meet the challenges of the future, instead of sliding back into the irresponsible policies of the past.

It takes only a moment to see that those past policies would provide America with an unacceptable future. Those policies have already resulted in:

A Government spending $24 for every $19 it raises in taxes and other forms of revenue;

A national debt that would require $7,000 from every single man, woman and child living in the United States, if it were to be paid off today;

A Federal Government that removes from the private sector, because of borrowing needs, an amount every year equivalent to 5 percent of all produced and all services rendered in the United States; and

The $130 billion in interest payments on the debt for 1985 alone.

While there are parts of Gramm-Rudman that I am less than pleased with, the fact remains that the bill will contribute in a number of important ways to the battle against the Federal deficit:

Fiscal responsibility will be a part of the budget process from the very outset as the President will be required to submit annual budgets in which the projected deficits do not exceed specified levels. Starting with a budget proposal that is already within reasonable funding limits will make it all that much easier for Congress to come up with a finished product that stays within the deficit guidelines. These specified levels will be gradually decreased, until 1991, when the maximum allowable Federal budget deficit will be zero.

The bill includes provisions establishing a new, accelerated timetable for the budget process. In recent years, Congress has dragged its feet, oftentimes waiting until as late as October to finally pass a budget. Time after time, temporary extensions must be passed so that Government agencies won't have to close their doors. At this very moment, Congress is preparing to pass its fourth continuing resolution of the year, required because of its inability to complete the appropriation process in a timely manner. The result has been increased costs, inefficient expenditures, and an inability for agencies and departments to adequately plan for the fiscal year. Under Gramm-Rudman, Congress would complete action on the budget by April 15, with the House completing action on regular appropriations bills by June 30.

Up to now, there has been a lot more talk about deficit reduction than concrete action to bring down the deficit. With the passage of Gramm-Rudman, we will see more than just talk. The first major event under the budget regime will come February 1, when automatic cuts for fiscal year 1986 are announced. These automatic cuts will take effect March 1, unless Congress and the President come to terms and voluntarily enact cuts based on agreed upon spending priorities.

While it is important that the United States maintain a strong and effective military, it is also important that the Pentagon do its fair share for deficit reduction. If nondefense programs alone had to shoulder the burden of budget cuts, hundreds of worthwhile programs would have to be axed. Under Gramm-Rudman, any automatic cuts would be divided equally between defense and nondefense programs.

As long as Congress did nothing to discourage the notion that the Federal Government had a magic money tree with an infinite supply of greenbacks, there was little incentive to cut wasteful and inefficient spending practices. Why cut the fat when all you have to do is get Uncle Sam to dole out more money? The Gramm-Rudman bill makes it clear that Uncle Sam's pockets have been picked clean. Knowing that they will not be rewarded for waste with increased appropriations, agencies receiving Federal funds will hopefully have all the incentive they need to put an end to $600 toilet seats, inefficient procurement practices, and duplication of services.

In passing Gramm-Rudman, Congress is not forsaking those individuals most in need of Government help. A variety of programs for children, elderly and the Nation's poorest will be protected from automatic cuts. Social Security benefits, child nutrition programs, Medicaid and veterans' compensation are among the programs that are exempted from automatic cuts. Certain critical health programs are protected, through provisions that set maximum permissible reductions at no more than 1 percent in fiscal year 1986 and 2 percent in fiscal year 1987.

It is my hope that automatic cuts will not become necessary. Each year Congress will have at least two opportunities to do its job by making careful and rational choices about the programs that will receive cuts. Only if Congress fails to meet the deficit-reduction objectives, will automatic cuts come into play.

America today is at a turning point. For too long we've been stalled in history, repeating mistakes of yesterday because our leaders have been afraid to see a new tomorrow. That tomorrow is upon us. We must not let the pessimists convince us otherwise. The future will be ours if we dare to work for it. The people of this Nation are ready to move forward and effectively address the problem of the deficit. With the signing of Gramm-Rudman, Congress has made it known that it too is ready to do its part in moving our Nation ahead.

ILL-CONCEIVED AND ARBITRARY CUTS MUST BE FOUGHT

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DOWNEY of New York. Mr. Speaker, the Gramm-Rudman budget slashing has begun; arbitrary and ill-conceived cuts in the vital Juvenile Justice and Delinquency Prevention Program have already been announced.

No one could ever accuse this Justice Department of failing to respond to congressional action. When it comes to cutting funds they are so quick off the mark that they've started slashing even before the Congress has mandated any cuts. They are freezing dollars appropriated by the elected representatives of the people of this country. The administration is usually a bit more subtle in promoting its true intentions; it is rare that we can see such a blatant example of their priorities.

Prevention. We all know that it's the best way to avoid the slippery slope of crime, drug abuse, and wasted lives that too many of our young people find themselves on. But those who talk a good anticrime game at the White House and Justice Department have, over the past 5 years, managed to gut a program whose goals they supposedly support.

Those who receive grants from the juvenile justice and delinquency office—the YMCA, Girl Scouts, and Children's Defense Fund, to name just a few—will find themselves without the funds to pursue needed crime prevention programs.

Is this administration writing off America's youth? We have been told again and again that it is morning in America. But let's face the facts. Our youth are our most precious resource. If this philosophy of government continues unabated, it's time for mourning in America.

PHARMACEUTICAL EXPERT AMENDMENTS OF 1985

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GALLO. Mr. Speaker, I am pleased to be joining my distinguished colleague,

Congressman MADIGAN, in cosponsoring the Pharmaceutical Export Amendments of 1985, legislation that establishes conditions for the export of drugs.

It is clear that our current policy prohibiting the export of new drugs and other important pharmaceuticals has had an adverse impact on the U.S. economy and more specifically, on the competitive position of American firms in the international market.

This restrictive policy has cost the United States jobs, capital investment, and has forced American pharmaceutical companies to conduct important research and develop new technology outside the United States.

The United States is the only country that is prohibited from exporting drugs that are lawfully marketed in the importing country but which are not yet approved in the United States. There seems to be little sense to this policy when the drugs in question are available to the importing country by other foreign manufacturers. As supporters of this legislation in the House and in the Senate have pointed out, this policy does not prohibit foreign consumers from gaining access to these drugs, it only locks the United States out of the competition for jobs and revenues.

Specifically, my district and the State of New Jersey has many pharmaceutical companies that are eager to serve the world market and to devote adequate resources to develop drugs that address the needs of other countries.

While questions have been raised about the ethical and health implications of exporting new drugs, this legislation has been carefully crafted to provide numerous safeguards to protect foreign consumers.

I commend Congressman MADIGAN for introducing this legislation, and Senator HATCH for moving swiftly on similar legislation in the Senate, and I urge my colleagues to support it.

MAYOR KENNETH A. GIBSON HONORED BY THE JEWISH NATIONAL FUND

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. RODINO. Mr. Speaker, it is with great pride that I bring to your attention a special event that will take place in West Orange, NJ, early next year. On January 12, 1986, the Jewish National Fund will be honoring a very close friend of mine—Mayor Kenneth A. Gibson of my hometown of Newark. This tribute is in recognition of Mayor Gibson's steadfast opposition to anti-Semitism, his strong commitment to advancing harmony and understanding among the different peoples and ethnic groups of our Nation, and his loyal support of the democratic state of Israel.

As the mayor of Newark since 1970—which gives him the longest tenure as mayor in the city's history—Kenneth Gibson has emerged as a national spokesman and advocate for urban America. In Newark, he has successfully initiated programs in housing, health, public works and welfare, and he has been singularly responsible for increasing the efficiency and capabilities of the city's departments and agencies. Just as important, Mayor Gibson has set a tone in our city—of fairness, tolerance, progress, and compassion. He is always ready to promote good and ever alert to condemn injustice.

The Jewish National Fund is an agency dedicated to what one might call the greening of Israel. It is responsible for land reclamation, soil improvement, afforestation, and laying the infrastructure for new communities in Israel. The proceeds from Mayor Gibson's tribute will go toward the purchase of trees to be planted in Israel's Independence Park—in honor of Mayor Gibson.

It is only fitting that the Jewish National Fund has chosen Kenneth Gibson as its honoree. For Mayor Gibson is an unyielding proponent of the same principles of democracy, freedom, and human rights which undergird the State of Israel and make it a close ally of the United States. I have known Ken Gibson for a good many years, and I admire the strength of his convictions and his abiding sense of justice. There are few men in public life more worthy of recognition than he, and the Jewish National Fund deserves great praise that I extend my congratulations to my good friend and mayor, Kenneth A. Gibson.

CONFERENCE AGREEMENT ON 1985 FARM BILL

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. ROWLAND of Georgia. Mr. Speaker, after many months of deliberation, Congress has finally passed the 1985 farm bill.

I commend the House and Senate conferees for their diligence in bringing this agreement before us today. Although the bill leaves a great deal to be desired in addressing the problems which face our farm economy, I do hope it will at least help keep some family farmers going.

Everyone will not be in agreement with all sections of the bill; however, it will give our farmers some idea in making plans for their farming operations. Farmers have been working in an atmosphere of uncertainty for too long, and now we can provide them with some guidance for future actions.

As maintained in the farm bill agreement, I, along with peanut producers in Georgia, am pleased to see this program continued without any major changes. This is one farm program that, is safe to say, has worked well.

Also, in the agreement is the "whole herd buyout" which I supported in the House due to the support of the Georgia dairy farmers. Until the rules and regulations of this concept are developed by the Secretary of Agriculture, we will not be able to predict its success. However, what I do know, Mr. Speaker, is that my dairy farmers were behind this plan because it seemed to be the best approach offered, and a way to help them through these hard-pressed times.

What I heard from my soybean farmers was disappointment when they learned that the Senate proposal to provide payments based on $1 a bushel or $35 an acre for the 1985 crop was not maintained in the conference agreement. Due to the adverse weather conditions caused by Hurricane Kate, our soybean crop, along with cotton and pecans, suffered a great loss, and additional funding would have assisted them in dealing with Mother Nature's wrath which they face this year.

On a positive note, as a supporter of the conservation reserve program, I am pleased we have agreed on this concept which will protect one of our valuable resources, our Nation's soil, by returning the land to less-intensive uses with the planting of grasses and trees.

These past few weeks, Congress has dealt with many crucial issues. Today is no exception. With this action, we will be offering our farmers, if not a solution, at least hope for the future.

SYRIAN SAM MISSILES: A THREAT TO ISRAEL AND MIDEAST PEACE

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. WOLPE. Mr. Speaker, reports from Israel confirming the placement by Syria of advanced Soviet-made surface-to-air [SAM] missiles is a dangerous development that threatens peace in the region. I wholeheartedly endorse Israel's expressed concern that the missiles be removed from Lebanon and the Syrian-Israeli border.

Syria's actions are an extreme provocation. By extending a hostile air warfare shield over the Galilee and southern Lebanon, the Syrian SAM's inhibit Israel's ability to patrol its northern frontier in order to deter terrorist attacks.

Israel poses no threat to Lebanon or Syria. Israel has withdrawn unilaterally from Lebanon. Israel has scrupulously observed the 1974 disengagement agreement with Syria on the Golan Heights. Israel has no interest but the protection of its civilian population. Syria and radical forces in Lebanon, however, give every encouragement to terrorist attacks on Israeli civilian and military targets.

Recently, Syrian President Assad has hinted that he may be prepared to enter the peace process, in conjunction with Jordan. But by deploying the most sophisticated missiles on Israel's borders, threatening Israel's security, Assad is engaging in dangerous intimidation that undercuts any con-

tention that Syria is interested in peace with Israel.

The United States should back Israel fully in this latest crisis—these missiles should be removed.

VERN SCHAFER CELEBRATES 30 YEARS

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. LEWIS of California. Mr. Speaker, Mr. Vern Schafer, founder and president of Colton Piano and Organ Supermarts, is celebrating his 30th anniversary.

It all started in 1950, when Vern was helping his uncle deliver pianos. Soon, Vern was buying old pianos and repairing them to sell to dealers.

Eventually, Vern opened his first store in a converted radiator shop in Colton, CA. As the business grew up, he recognized the need for a larger facility, so he purchased an old dance hall and bowling alley to expand his operation. As his business continued to grow, this enterprising young man took over a Ford agency dealership site, and ultimately bought the old city hall and jail in Colton. When the redevelopment started in the downtown area, Vern was forced to relocate his lucrative business. He seized the opportunity to invest in some land close to Interstate 10. At this location, close to the San Bernardino Freeway, Vern built the first piano supermart, a building which presently covers more than 31,000 square feet. This piano supermart concept was so successful in Colton that, with Vern's business talents, there are now 10 supermarts in California.

In spite of this extraordinary expansion, Vern has been insistent upon keeping his business a family business. His oldest son, Charles, was his right-hand man for many years before his death a few years ago. Currently, Vern is assisted in his operations by his four children: Vern III, James, Debbie, and Virginia.

Vern started manufacturing the Schafer & Sons piano and they have been given as prizes on many quiz shows. His pianos have been spotlighted on the Johnny Carson Tonight Show, featuring the NBC Orchestra, on the popular television series Dynasty, and countless other television productions. Eighty-five percent of his sales are Schafer & Sons products.

Vern has always been a fan of old Western towns and has, therefore, collected Western type memorabilia over the years. When he recalled that Wyatt Earp was the marshal of Colton, Vern built an authentic replica of an old Western town there and named it Movie Frontier Town. Many television films and commercials have been filmed at this location in Colton. The San Bernardino County Sheriff's rodeo and numerous other Western events take place in there as well.

Mr. Speaker, it is indeed an honor for me to represent this truly remarkable man. I ask you and my colleagues here in the House of Representatives to join with me, family, and friends in wishing a happy 30 years to Mr. Vern Schafer, a man who has brought music into the lives and homes of millions.

TAX REFORM BILL

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. CLINGER. Mr. Speaker, the analysis of the changes made to the intangible drilling cost [IDC] deduction in the Rostenkowski tax reform proposal should be clarified to recognize an important point.

The blanket statement that 85 percent of the IDC deduction is retained by the oil and gas industry is only partially true. In a large percentage of wells drilled in the United States today, a significant portion of the IDC's are spent for activities which occur after the casing point but before production from the well is assured. For example, in the Appalachian Basin, roughly 35 percent of the IDC expenses are attributed to such costs. This means that the actual percentage of IDC's retained for oil and gas wells in the East under the Rostenkowski proposal actually equals only 65 percent of the current deduction.

Specifically, wells throughout the Appalachian Basin must be worked through a process which requires perforation of the casing and stimulation of the potential producing zone to determine whether the well will actually produce commercial volumes of oil and gas.

The failure of the Ways and Means Committee to recognize this important distinction between oil and gas drilling practices in various regions of the country must be raised and should be addressed before this legislation is ultimately approved, and I intend to bring this problem to the attention of the other body when they begin consideration of the tax bill next year.

"ZERO TOLERANCE—THE NAVY'S MISGUIDED APPROACH"

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday December 19, 1985

Mr. FISH. Mr. Speaker, it is reported that Secretary of the Navy John Lehman has cracked down on drug abuse by Navy personnel, successfully reducing the incidence of drug abuse from 48 to 3 percent. Urinalysis is required of all Navy personnel. Punishment followed positive findings; discharge for repeaters. However, those who admitted drug use before a test have been offered amnesty and rehabilitation. This tough policy, therefore, has allowed an individual a chance for rehabilitation and continued useful service.

It has come to my attention that Secretary of the Navy Lehman has instituted an additional drug policy known as "Zero Tolerance," resulting in court martial and possible dishonorable discharge for a first offense by senior enlisted and officer personnel.

Mr. Speaker, chemical dependence is a disease, recognized as such by the American Medical Association, the American Psychiatric Association, and all State medical associations and licensing boards. Rehabilitation, not punishment, is the accepted, recognized response. The Navy's policy is contrary to good medical practice, self-defeating and unnecessarily costly.

The zero tolerance policy is particularly disturbing as applied to Navy health care professionals. Talented individuals in whom the taxpayers have a substantial investment can be separated from the service in disgrace. This policy is not only costly, but it is not a deterrent to others. The particular vulnerability of physicians to chemical dependence is unquestioned. Those Navy physicians reluctant to seek help because of the harsh consequences, continue to practice to the jeopardy of patients in their care.

The zero tolerance policy is directly contradictory to the expressed goal of the Assistant Secretary of Defense for Health Affairs, Dr. William Mayer. In a publication "HEALTH MATTERS," Vol. 1, No. 3, July 1985, entitled "Health Care Providers," Dr. Mayer cites Public Law 92-129 as requiring that DOD identify, treat and rehabilitate all military personnel who are considered chemically dependent. He supports the claim that physicians are a high risk to develop the disease and argues the folly of separating additional health care professionals who could be successfully rehabilitated, and in their place recruit from a population at equal risk. Despite the excellent rehabilitation programs provided by the Navy, current policy opts for court martial rather than rehabilitation.

The Army's program for impaired health care professionals is progressive, realistic, compassionate and provides a method of closely monitored re-entry. The Navy would be well-advised to pursue the Army's policy of early intervention, which keeps the chemically dependent within the system.

Mr. Speaker, Dr. Mayer's memorandum entitled "HEALTH MATTERS" follows in full.

HEALTH MATTERS

VOLUME 1, NUMBER 3, JULY 1985

Impaired Health Care Providers

This is another in a series of reports and commentaries on a wide range of issues in military medicine which concern and affect those of us who serve in DOD Health Affairs. Your own suggestions and input are welcomed in future issues.

The American Medical Association has stated ". . . it is the ethical responsibility of any physician who knows of an apparent problem in a colleague to take affirmative action to seek treatment or rehabilitation for his fellow physician." Fifty State medical associations either have developed or are developing an impaired health care provider program. Public Law 92-129 requires that DOD identify, treat and rehabilitate all

military personnel who are considered chemically dependent.

Physicians, as a result of their training and professional experience, have been shown to be particularly vulnerable to becoming addicted because of the propensity for self-diagnosis and self-medication. The daily accessibility of prescription drugs creates fertile ground for misuse. In addition, medical professionals are often no better educated about the disease of alcoholism and other addictive disorders than other professionals.

We must do more than simply eliminate people from the Services who become impaired emotionally or chemically. To separate physicians, nurses and other health care professionals who have become addicted but could be successfully rehabilitated, and then recruit from a population that will be at equal risk is shortsighted.

Prevention to reduce the incidence and occurrence of new cases, identification of impairment, and intervention and treatment of providers to eliminate the potentially destructive consequences of chemical dependency and emotional impairment are of the highest priority in our efforts to maintain quality of care. Guidance regarding impaired health care providers should be incorporated into service quality assurance programs.

Impairment can become progressive if ignored. Medical and professional societies across the country recognize that only with coercion and confrontation will treatment be effective. When legal action is not required, a nonpunitive approach with emphasis on confidentiality will help promote effective impaired health care provider programs.

It is important to publicize the legitimacy of prevention, identification and treatment. Impaired physicians, nurses and other health care professionals are sometimes reluctant to seek help on their own accord. Too often, we have failed to accept the ethical responsibility of an affirmative posture. Hesitancy to act fosters denial of the problem and could result in needless tragedy.

A DOD Directive providing further guidance will be developed by a Joint-Service group in the near future regarding incorporation of a health care provider program into MTF quality assurance programs. In the meantime, I am communicating through this medium to alert you to the importance of this issue and to enlist your help.

WILLIAM MAYER, M.D.,
Assistant Secretary of Defense (Health Affairs), Washington, DC.

Mr. Speaker, I urge Secretary Lehman, at the very minimum, in simple fairness, to put a hold on the continued implementation of the zero tolerance policy as it pertains to health providers, until the study alluded to by Mr. Mayer is finalized.

HOUSE OF REPRESENTATIVES—*Friday, December 20, 1985*

(Legislative day of Thrusday, December 19, 1985)

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore [Mr. WRIGHT] at 1 o'clock and 30 minutes p.m. on Friday, December 20, 1985.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Let us pray in the words of St. Francis:

Lord, make me an instrument of thy peace,
Where there is hatred, let me sow love;
Where there is injury, pardon;
Where there is doubt, faith;
Where there is despair, hope;
Where there is darkness, light; and
Where there is sadness, joy.
O, Divine Master, grant that I may not so much seek to be consoled as to console;
To be understood as to understand;
To be loved as to love,
For it is in giving that we receive;
It is in pardoning that we are pardoned.
And it is in dying that we are born to eternal life.

Amen.

AUTHORIZING THE CHAIR TO DECLARE RECESSES ANY TIME DURING THIS LEGISLATIVE DAY

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that it shall be in order for the Chair to declare recesses any time during this legislative day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

CONVENING OF 2D SESSION OF THE 99TH CONGRESS

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 255), relative to the convening of the 2d session of the 99th Congress, and I ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 255

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the second regular session of the Ninety-ninth Congress shall begin at 12 o'clock meridian on Tuesday, January 21, 1986.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members be permitted 5 legislative days in which to extend their remarks and to include therein extraneous material on the Senate bill, S. 1840, travel allowance to Government employees.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EXTENDING FOR A TEMPORARY PERIOD CERTAIN TAX PROVISIONS

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4006) to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985," with Senate amendments thereto, and concur in the Senate amendments with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendments and the House amendment to the Senate amendments, as follows:

Senate amendments:

Strike out all after the enacting clause and insert:

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "and before December 20, 1985" and inserting in lieu thereof "and before March 15, 1986".

SEC. 2. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding section 2271) is amended by striking out "December 19, 1985" and inserting in lieu thereof "March 14, 1986".

SEC. 3. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out "December 19, 1985" each place it appears and inserting in lieu thereof "March 14, 1986".

SEC. 4. EXTENSION OF MEDICARE PHYSICIAN PAYMENT PROVISIONS.

Section 5 of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out subsection (a), and by striking out "December 19, 1985' in subsection (c) and inserting in lieu thereof "March 14, 1986".

Amend the title so as to read: "An Act to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program.".

House amendment to the Senate amendments:

In lieu of the matter proposed to be inserted by the amendment insert the following:

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "December 20, 1985" and inserting in lieu thereof "March 15, 1986".

SEC. 2. EXTENSION OF MEDICARE HOSPITAL AND PHYSICIAN PAYMENT PROVISIONS.

Section 5(c) of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out "December 19, 1985" and inserting in lieu thereof "March 14, 1986".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall take effect on December 19, 1985. As an exercise of authority under the commerce, taxation, and other powers under the Constitution, the amendment made by section 1 shall be treated for purposes of all Federal and State laws as enacted on December 19, 1985.

Mr. FRENZEL (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. ALEXANDER). Is there objection to the request of the gentleman from Minnesota?

Mr. PICKLE. Mr. Speaker, reserving the right to object, I want to ask the chairman of the Committee on Ways and Means or the gentleman on the minority side what this motion does so that we can understand what our options are.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. Under my reservation, I yield to the gentleman from Illinois, the chairman of the Committee on Ways and Means.

Mr. ROSTENKOWSKI. I thank the gentleman for yielding.

Mr. Speaker, yesterday the House approved and sent to the Senate a bill, H.R. 4006, that extended through March 15, 1986, certain tax, Medicare and other provisions which expired either at midnight last night and others that expire at the end of this year. These provisions are addressed on a permanent basis in the tax reform bill or the reconciliation conference report also adopted by the House yesterday.

The Senate passed H.R. 4006 with an amendment that stripped out all of the House extensions but the four provisions that expired last night: First, the 16-cent tobacco tax; second, the Trade Adjustment Assistance Program; third, borrowing authority for the railroad unemployment fund; and fourth, Medicare reimbursement provisions for physicians. However, the Senate amendment did not include the extension of Medicare hospital reimbursement provisions that also expired last night, and which were included in the House passed bill. Unfortunately, the Senate amendment did not include the extension of many important tax provisions which are scheduled to expire at the end of this year.

Mr. Speaker, I am asking that the House return H.R. 4006 to the Senate with a further amendment which would include: First, the extension of the Medicare hospital reimbursement provision previously passed by the House; and second, make the extension of the cigarette excise tax effective as of midnight last night. This latter provision is necessary to prevent imposition of automatic cigarette excise taxes increases under various State laws. These provisions are identical to two of the provisions included in the version of H.R. 4006 originally passed by the House last night. In fact, this will be the fifth time we have extended these identical two provisions. The House amendment does not extend the railroad unemployment fund or trade assistance amendments.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. PICKLE. Further reserving the right to object, Mr. Speaker, apparently this resolution extends only two parts of the previous legislation, the tax on cigarettes and the Medicare provision. I take it then there is no inclusion, no intent to do anything about the research and development credits, or solar credits, or other energy credits, or the targeted job credits, or other expiring provisions that we had asked for and so desperately need.

Mr. Speaker, can the gentleman tell me why they are not included in this particular package?

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the chairman of the committee.

Mr. ROSTENKOWKSI. I thank the gentleman for yielding.

Mr. Speaker, we tried last night to provide relief for not just the two items that the gentleman mentioned, but many other amendments, and the other body just refused to accept those. It is my understanding that these two will be accepted and that the others, for some reason unknown to me, are not acceptable.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. Further reserving the right to object, I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

I want to second what the chairman has suggested. We had, I think, 13 items in our extender bill including some very important items, and the most important to me was the extension of the R&D tax credit.

The other body rejected those, sent us back the four. There have been some extended telephone negotiations and some face-to-face negotiations today. We are led to believe that these two, that is, the amendment offered by the gentleman from Illinois, will likely be accepted by the other body. They are important, they are all that we can accomplish at this time before the House adjourns, and, like the gentleman from Texas, I mourn the fact that we cannot do the R&D tax credit, and I hope that we will be able to extend it retroactively when the House meets next year.

Mr. PICKLE. Further reserving the right to object, I do not think there is anything more important to the Nation than a continuation of these R&D credits. There seemed to be general consensus among both sides that they ought to be renewed. Some 240 Members on the House side endorsed legislation to extend the R&D credits, and yet in the offer going over today we have none of those except the two that have been mentioned. I wonder if the chairman of the committee or the gentleman from the minority could tell us if there is any prospect that the other body might add some of these credits instead of just the two listed?

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield further?

Mr. PICKLE. Further reserving the right to object, I yield to the chairman.

Mr. ROSTENKOWSKI. I thank the gentleman for yielding.

Mr. Speaker, I cannot make a judgment about what the other body will do. I do not think they can make a judgment about what they are going to do. But I certainly understand the gentleman's position, and I would only suggest that when we return next year, we can, if it is agreeable, make retroactively the R&D credits and whatever other provisions are neglected to be accepted by the other body. That is only a commitment that I can make.

Mr. PICKLE. I appreciate that, and I am going to remember that and read the RECORD carefully, because I appreciate that cooperation.

Mr. ROSTENKOWSKI. If the gentleman will yield further, is the gentleman suggesting that the Chair does not cooperate with the gentleman from Texas?

Mr. PICKLE. The gentleman is concerned that this is not in the legislation. The gentleman said he is going to try to get this renewed early next year if we do not do it this afternoon, and to make the renewal retroactive. Now that is a comment given in the spirit of Christmas, and I appreciate that.

Mr. RANGEL. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. Further reserving the right to object. I yield to the gentleman from New York.

Mr. RANGEL. I thank the gentleman for yielding.

Mr. Speaker, I assume our distinguished chairman is including the targeted jobs credit for consideration of this type of priority in the New Year. But the reason I asked the gentleman to yield was because I do not understand who is talking with the other body. It seems as though there are two different issues that they are considering in the other body. One, of course, is the extensions, and I have to accept the chairman's word that he has done the best he could, and we have no control over the decisions that they have made, and it has to stop somewhere. But right now somebody in this House is negotiating with the other body as relates to the reconciliation bill. Right now somebody in this House is talking about the value-added tax, they are talking about programs that are essential to the poor of this country, to the sick of this country, and decisions are being made now as to whether or not some agreement can be fashioned that would allow both Houses to conclude their work.

What I am hoping my chairman would be able to respond is: Are we included in those negotiations? Are the extensions included in those negotiations? Or are we operating just on two separate tracks, one for the extension of the tax provisions and the other with Senator PACKWOOD as relates to reconciliation?

Mr. PICKLE. I cannot respond to that. I can ask the gentleman, though, since I yielded to him from my time and he made reference to the fact that somebody is talking about the value-

added tax, that I would request the gentleman not to use that phrase on my time. It is an excise tax, just like about a dozen other excise taxes, and I acknowledge the little chicanery used yesterday to defeat this measure on that score. But I do not want it on my time.

Mr. DAUB. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

I know in our mind the results of the debate last night and early this morning are still fresh in our memory. I am sympathetic to what my friend from New York said relative to other negotiations that may be ongoing at the present time, particularly with respect to programs that will resolve in reconciliation with still yet the opportunity for the other body to recede and allow that measure to go to the White House. I understand how important those provisions are to the gentleman from New York. They are important to me.

But on the particular matter before the House at this time, I say to the gentleman from Texas I, too, was very much interested in the R&D credit. I was particularly interested in the energy credits, and I was particularly interested in railroad unemployment and in the educational assistance provisions that the chairman was kind enough to include in the extender of present law to March 15 that we had sent from this body to the other body last might.

I understand negotiations at this point leave us with only the two in an amendment to the amendment which we are now considering. My question, Mr. PICKLE, to the chairman, if I might have the ability to do that through the gentleman, is whether or not there is a likelihood that the other body may, once we conclude our business now, add other matters to this amendment.

Mr. PICKLE. I would be happy to yield to the chairman, the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. I thank the gentleman for yielding.

Mr. Speaker, once again I say to my colleagues I have no idea; in the discussions that I have had, it has never been indicated that they will. These two items that I am bringing up are brought up mainly because of a disruption that would be caused should we not extend the provisions of Medicare and of the cigarette tax.

Mr. DAUB. I thank the gentleman. I do intend to support this particular unanimous-consent request and say in conclusion to my friend from Texas I share his concern and would imagine that we are not at this point able to predict what the other body may do with this amendment, but perhaps there is still some room for encouragement before the conclusion of the House's business.

I thank the gentleman for his time.

□ 1355

Mr. PICKLE. Further reserving the right to object, I will yield to the gentleman from New York and then I will make a concluding statement.

Mr. RANGEL. Would the gentleman from Texas be kind enough to yield to our chairman to see whether I can get some response to my question; and that is, is the extension bill included in the negotiation as relates to the reconciliation package which is being considered by both bodies?

Mr. ROSTENKOWSKI. I have not negotiated in any other area but here, Mr. RANGEL. I do not know of any other negotiations that are taking place. I am not a part of them.

Mr. FRENZEL. Will the gentleman yield?

Mr. PICKLE. I will yield in just a minute. Can the gentleman from New York indicate to me what negotiations are going on?

Mr. RANGEL. Well, it is clear to me that we had a reconciliation bill going on right now that certain parts of the bill the Senate has disagreed with the House and that we are trying to work out something right now to see whether or not agreement can be reached.

Now, the gentlemen on the other side of this aisle are fully aware of the fact, because some of the Members from the other side have come over here to talk with them.

I do not know what is on the bargaining list, but it is abundantly clear that some of these extensions are not on it; and if the chairman of the committee that has jurisdiction over these programs that affect the lives of our sick and poor, are not incorporated in the discussion on the other side, then I do not know who the devil is doing the talking.

Mr. PICKLE. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

As far as the minority is concerned, the reconciliation is a dead duck, and it is not our intention over here to do any more work on that or to accept other items from the Senate which would require careful review and analysis. We obviously are lacking in numbers here today.

There is a question of a veto on the reconciliation and it seems to me that at least from our standpoint over here, we are not looking to revive the reconciliation until next year.

So I think the gentleman could expect that there would be an objection, were a unanimous-consent request made and in the case of a motion, there would be a request for a rollcall vote.

Mr. PICKLE. Mr. Speaker, further reserving the right to object, I will conclude on this statement.

It seems to me a tragedy that the two bodies could not agree on a reconciliation bill. We have a possibility to make savings to start now and in the next 3 years; a savings of approximately $75 to $80 billion.

That opportunity is lost; at least, it is delayed for 30, 60, 90 days. I personally do not believe that the American people are going to understand that, and they are going to take us to task; and they ought to, because we have not met our responsibilities.

It is my further hope that as this measure advances, that the other body would consider adding to this particular request those expiring items or the principal items that we had sent to them, as the chairman had outlined originally.

That would specifically include the research and development credits and the solar energy and geothermal energy credits, and the targeted job credit. I would hope the other body would consider that, because if we do not, we leave here on Christmas Eve, so to speak, not having done our duty; and I think that the American people are going to ask us why.

Mr. FRENZEL. Reserving the right to object, Mr. Speaker, I yield to the gentleman from California.

Mr. MATSUI. I thank the gentleman from Minnesota for yielding.

Mr. Speaker, what I would like to find out, if anybody who has been negotiating with the Senate can tell me is, what rationale was given for not accepting the targeted jobs credit, the R&D credits and the solar energy credits.

Was there any rationale given, or was it just that they felt that they did not want to talk about it?

Mr. FRENZEL. It is beyond my ability to ascribe any rationale to actions of the other body. I think they are going to have to explain their own temporary dimentia. I cannot.

Mr. MATSUI. I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Illinois?

Mr. FRENZEL. Mr. Speaker, I reserve the right to object, and I yield to my colleague from Louisiana.

Mr. ROEMER. I thank my colleague for yielding.

The gentleman made an interesting statement that, as far as the minority is concerned, reconciliation is dead.

Mr. FRENZEL. Well, if I might interrupt for a moment, perhaps I overstated that in spreading to the minority; but I do know that there are Mem-

bers here who are going to object if some new version is brought back.

So it seems to me that it is practically dead if not technically dead.

I yield to the gentleman.

Mr. ROEMER. I thank the gentleman for his statement. I wonder if, in addition, the gentleman inferred or maybe said explicitly, that one of the reasons for reservations on the part of the minority was the fact that there was a veto lurking in the part of reconciliation. Am I right in saying that?

Mr. FRENZEL. No; that was simply an explanation of the conditions. It was not a rationale for a decision to do something or not do something here.

Mr. ROEMER. If the gentleman will yield further, the gentleman speaks so well——

Mr. FRENZEL. No; just so often.

Mr. ROEMER. Well, that, too. For the minority, I wonder if the gentleman could assess the minority's feeling on the dollars involved in reconciliation, an involvement that we are not taking advantage of for another 30, 60, 90 days or longer.

For example, if there are $65 billion or $70 billion in savings in the bill, and we delay that kind of savings for a certain length of time, the interest costs on that loss of opportunity savings is enormous; and I know the minority has established an excellent reputation of being concerned about how we spend our money around here.

It seems that we are spending money now by dilly-dallying on the reconciliation, and it could amount to more than the proposed savings from the veto on the part of the President.

Mr. FRENZEL. I thank the gentleman for his contribution; and he has been a great opponent of deficits; and so I know the gentleman means what he is saying.

All we are trying to do in the bill that is pending before us is to save a half a billion dollars which will occur by reason of extending the cigarette taxes.

With respect to the reconciliation bill, I think we can probably talk about that later on 1 minute or whatever. My personal feeling has been I do not speak for the minority, first of all. My personal feeling is that the bill saves not $80, not $65, but $27 billion over 3 years. I think it has lots of flaws in it.

My personal objection to bringing it back is that we have move to between the two Houses I think three times in the last 24 hours. It is beginning to get complicated. We need the time to look it over; the whole House deserves a chance to make decisions about it; it would have to be done under unanimous consent. My judgment is that that is a bad way to do it.

Mr. ROEMER. Would the gentleman yield for a final question, and I will leave him alone, I promise.

Mr. FRENZEL. Well, I do not feel you are harassing me. I yield to the gentleman for as long as he wants.

Mr. ROEMER. I would not do that. Where I am from, $27 billion is a lot of money. We ought to save it.

Mr. FRENZEL. I thank the gentleman. I yield to the distinguished gentleman from Nebraska [Mr. DAUB].

□ 1400

Mr. DAUB. Mr. Speaker, I say in response to the gentleman from Louisiana [Mr. ROEMER], who is so articulate and who has been such a champion of the opportunity to save and reduce our deficit, that indeed the opportunity to do all that is not lost, for just as we passed reconciliation for fiscal year 1985 in April 1986, we still have the same opportunity to do so again. It does seem to me, however, that reconciliation was resolved by this body. We decided, but for the broad-based excise or value-added tax and the proponents of that idea here in this body, that those savings should go forward. But for that occurrence last night in this debate, I think we would have the savings the gentleman was seeking.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois for concurrence in the Senate amendment with an amendment?

There was no objection.

The SPEAKER pro tempore. Without objection, the Senate amendment to the title of the House bill is concurred in with an amendment reflecting the action just taken by the House, as follows: "An act to extend until March 15, 1986, the application of certain tobacco excise taxes and certain Medicare reimbursement provisions."

There was no objection.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and concurrent resolutions of the House of the following titles:

H.R. 1404. An act to establish the Eastern Shore of Virginia National Wildlife Refuge and the National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, VA;

H.R. 2651. An act to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska;

H.R. 3931. To designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, MA, as the "Captain John Foster Williams Coast Guard Building";

H. Con. Res. 263. Concurrent resolution to rescind the approval of H. Con. Res. 262, correcting the enrollment of H.J. Res. 187, and directing the Clerk of the House of Representatives to make a correction in the enrollment of the joint resolution, H.J. Res. 187; and

H. Con. Res. 264. Concurrent resolution to correct the enrollment of H.R. 2100.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the text of the bill (H.R. 1083) "An act to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes."

A RAGING EPIDEMIC THAT CAN BE STOPPED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, today 52 Americans will die from burns. Seventeen of them are children. Burns, in fact, are the second leading cause of accidental death among children under the age of 14. A majority of the others who will die today are the disabled and the elderly. Their danger of dying of burns are five times higher than the chance of our other citizens.

Another 2,740 Americans will be injured with 371 of them suffering serious enough injuries to require hospitalization. The property damages to American homes and businesses from fires today will amount to $57.7 million. And no one can estimate the psychological harm that the survivors endure as they set about rebuilding their shattered lives and property. Many of the most seriously injured will never fully recover even after rehabilitation. Burn victims have an alarming record of suicide even long after the fire.

This is a terrible record. It is the worst of any industrialized nation in the world.

Our country faces many serious problems. Fortunately, we can do something about this epidemic. We can save lives, eliminate suffering by educating our citizens. Recent studies conclude that 75 percent of all burns could be prevented if children and adults knew about proper safety precautions.

For this reason I have introduced House Joint Resolution 481, designating the week of February 9 through February 15, 1986, as "National Burn Awareness Week". I hope that my colleagues will join me in sponsoring in this important measure.

A SUGGESTED CHANGE IN THOMAS JEFFERSON'S RULE

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, I know it is premature to be discussing the ques-

tion of rules changes of this body for the next session, but I do not want to let the opportunity pass without suggesting that the time has come for us to change that rule which provides that when this House is in session, we are the only people in America who cannot tell the truth about the U.S. Senate, and vice versa. The constraints in this debate have been obvious, and they are unnecessary.

A couple of hundred years ago there was a proposal that said the Houses ought not to comment on each other. It has become very clear that it has become difficult to transact business and impossible to transmit intelligent information while we have that constraint.

So I hope that in the session that begins in 1987 we will change that archaic rule and we will be able in the House and Senate to talk about each other and to stop this pretense that each is off on some other planet somewhere uninfluenced by and uninfluenceable by the other.

Mr. Speaker, it is clear the time has come, without any disrespect to the great memory of Thomas Jefferson, to change his rule.

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House earlier today, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 2 o'clock and 3 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 1830

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore [Mr. WRIGHT] at 6 o'clock and 30 minutes p.m.

REPORT OF COMMITTEE TO INFORM THE PRESIDENT

The SPEAKER pro tempore. The Chair will receive the report of the committee to call upon the President. The committee will please come forward and report to the House its findings.

Mr. FOLEY. Mr. Speaker, your committee appointed to join the committee of the Senate to inform the President that Congress is ready to adjourn and to ask him if he has any communications to make to the Congress has performed that duty. The President has directed us to say that he has no further communications to make to the Congress.

The SPEAKER pro tempore. Did the President seem disappointed that we were adjourning?

Mr. FOLEY. Mr. Speaker, I am sure that my colleague, the gentleman from California [Mr. LEWIS], will agree that the President seemed delighted that we were adjourning.

The SPEAKER pro tempore. I hope you wished him a merry Christmas for all of us.

Mr. FOLEY. Mr. Speaker, in addition to saying that he had no further communications to make to the Congress, the President asked us to express to all the Members of the House of Representatives his warmest wishes from himself and Mrs. Reagan for a Merry Christmas, happy holidays, and a happy new year.

Mr. LEWIS of California. And he particularly wished us to convey his warmest wishes to you, Mr. Speaker.

The SPEAKER pro tempore. I am thrilled and delighted. It warms the cockles of my heart, and it makes me feel better in the Christmas season.

FURTHER ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair could recognize any Member who is swollen up with speech to address the House for 1 minute.

While waiting for a message from the Senate, let me express on behalf of all the Members to all of the staff our grateful thanks for your dedicated and diligent work all year long. You labor in the dim dusk beyond the glamour and glitter of applause and recognition, but without you this institution could not function. So on behalf of all the Members, I want to express to all those who make the work go on from day to day and keep this place functioning our appreciation. It is so infrequently expressed. We wish all of you and all your families and loved ones a very happy holiday season and a successful year.

The gentleman from Mississippi [Mr. MONTGOMERY] has just returned from Fort Campbell, and the Chair wonders if he might have a report to give us about his journey there.

REPORT ON CEREMONIES FOR 248 AMERICAN SOLDIERS KILLED IN NEWFOUNDLAND AIR CRASH

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, you appointed me, as well as Congressman SKELTON of Missouri and Representative BLAZ of Guam to represent you, Mr. Speaker, and the House of Representatives at a ceremony today, the last ceremony for the 248 Americans who lost their lives in Newfoundland in the airplane crash.

This was a memorial service, and, Mr. Speaker, it was very, very impressive. We did get to meet the families and talk to some of the families. Of course, it was with great sadness, but I saw a lot of strength in the families there. It was very, very cold weather; it was snowing. The ceremonies took place outside in Kentucky and Tennessee, but all of the families were there.

There were 17,000 101st Airborne Division personnel lined up in front of us at the platform, and the families of those Americans who had lost their lives were there. The Secretary of the Army made a splendid address, as well as the Chief of Staff of the Army and the commander of the 101st Infantry Division.

Mr. Speaker, let me say that what I saw there today would touch all people of this country that a terrible tragedy like this happened, yet the families have in effect accepted their sadness that has come to them. I saw no bitterness toward anyone pertaining to what happened.

I might say that I saw some of our finest American soldiers and troops there. Not only can they do their jobs, but when something comes up like this, they know how to take care of their own. It was a great privilege for me to go there, and I want to thank you, Mr. Speaker, for giving me the opportunity.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution and concurrent resolution of the House of the following titles:

H.J. Res. 495. Joint Resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes; and

H. Con. Res. 267. Concurrent Resolution providing for a sine die adjournment of the 1st session of the 99th Congress.

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate to the bill (H.R. 4006) "An Act to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law whch would otherwise expire at the end of 1985."

The message also announced that the Senate insist upon its amendment to the amendment of the House to the bill (H.R. 3128) "An Act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process," and request a conference with the House on the disagreeing votes of the two Houses thereon, and appoints the fol-

lowing Senators to be conferees on the part of the Senate:

Senate committee	Republican conferees	Democratic conferees
Budget—general conferees.	Domenici, Armstrong, Kassebaum, Boschwitz, Symms.	Chiles, Hollings, Johnston, Sasser, Metzenbaum.
Agriculture	Helms, Dole, Lugar, Cochran.	Zorinsky, Leahy, Melcher.
Armed Services	Goldwater	Nunn.
Banking	Garn, Heinz, Hecht	Proxmire, Reigle.
Commerce	Danforth, Packwood, Goldwater, Pressler, Gorton, Stevens.	Hollings, Long, Inouye, Ford, Riegle.
Environment and Public Works.	Stafford, Chafee, Simpson, Symms.	Bentsen, Burdick, Lautenberg.
Finance—general conferees.	Packwood, Roth, Danforth, Chafee.	Long, Bentsen, Matsunaga.
Finance—for PBGC and ERISA subconference only.	Packwood, Chafee, Heinz	Mitchell, Moynihan.
Finance—for CHAMPUS, Medicare, subconference only.	Durenberger	Baucus.
Finance—for private health insurance coverage, subconference only.	Heinz, Wallop, Durenberger.	Baucus, Pryor.
Governmental Affairs	Roth, Stevens, Mathias, Cohen.	Eagleton, Levin, Gore.
Labor and Human Resources—general conferees.	Hatch, Stafford, Quayle	Kennedy, Pell.
Labor and Human Resources—for PBGC and ERISA, subconference only.	Hatch, Nickles, Thurmond	Kennedy, Metzenbaum.
Small Business	Weicker, Gorton	Bumpers.
Veterans' Affairs	Murkowski, Simpson	Cranston.
Energy Committee—general conferees.	McClure, Domenici, Wallop	Johnston, Ford.
Energy Committee conferees on title VI, sec. 6701 only.	McClure, Hatfield, Domenici.	Johnston, Ford.
Commerce conferees on title VI, sec. 6701 only.	Danforth, Packwood, Goldwater.	Hollings, Long.

DESIGNATION OF MEMBERS TO RESOLVE OUTSTANDING CONFLICTS RELATING TO THE CALIFORNIA OUTER CONTINENTAL SHELF

The SPEKAER pro tempore. Pursuant to section 149 of Public Law 99-190, the Chair, without objection, designates the following Members of the House to resolve the outstanding conflicts with respect to the future leasing and protection of lands on the California Outer Continental Shelf for oil and gas exploration and development with the Secretary of the Interior:

Mr. YATES;
Mr. UDALL;
Mr. LOWRY of Washington;
Mr. PANETTA;
Mr. BOSCO;
Mrs. BOXER;
Mr. LEVINE of California;
Mr. REGULA;
Mr. LUJAN;
Mr. FIELDS;
Mr. DANNEMEYER;
Mr. LUNGREN; AND
Mr. LOWERY of California.

There was no objection.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WEISS) to revise and extend their remarks and include extraneous material:)

Mr. PANETTA, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WEISS) and to include extraneous matter:)

Mr. FASCELL.
Mr. KASTENMEIER.
Mr. LEHMAN of Florida.
Mr. HOYER.
Mr. BARNES in three instances.
Mr. MINETA.
Mr. SIKORSKI.

ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

H.R 1890. An act to provide for an equitable waiver in the compromise and collection of Federal claims.

H.R. 3974. An act to provide for temporary family housing or temporary housing allowances for dependents of members of the Armed Forces who die on or after December 12, 1985, and for other purposes; and

H.R. 4006. An act to extend until March 15, 1986, the application of certain tobacco excise taxes and certain Medicare reimbursement provisions.

SENATE ENROLLED BILL SIGNED

The SPEAKER pro tempore announced his signature to an enrolled bill of the Senate of the following title:

S. 1706. An act to authorize the Architect of the Capitol and Secretary of Transportation, in consultation with the Chief Justice of the United States, to study alternatives for construction of a building adjacent to Union Station in the District of Columbia, and for other purposes.

ADJOURNMENT SINE DIE

Mr. FOLEY. Mr. Speaker, pursuant to the provisions of House Concurrent Resolution 267, I move that the House do now adjourn sine die.

The SPEAKER pro tempore. The question is on the motion to adjourn.

Those in favor say "aye," those opposed "no."

In the opinion of the Chair, the "ayes" have it.

Mr. DAUB. Mr. Speaker, would it be in order to request a division on that particular matter?

The SPEAKER pro tempore. Those in favor will rise and remain standing until counted.

The "ayes" will be seated. The "noes" will rise.

There being a considerable number of "ayes" and no "noes," the "ayes" have it.

So the motion was agreed to.

The SPEAKER pro tempore. In accordance with the provisions of House Concurrent Resolution 267, the Chair declares the 1st session of the 99th Congress adjourned sine die.

Thereupon (at 6 o'clock and 40 minutes p.m.), pursuant to House Concurrent Resolution 267, the House adjourned sine die.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2424. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Air Force's proposed lease of defense articles to the Federal Republic of Germany (Transmittal No. 11-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ST GERMAIN: Committee on Banking, Finance and Urban Affairs. H.R. 3498. A bill to stabilize international currency markets in support of fair global competition; with an amendment Rept. 99-456. Referred to the Committee of the Whole House on the State of the Union.

Mr. ST GERMAIN: Committee on Banking, Finance and Urban Affairs. H.R. 3667. A bill to eliminate unfair and predacious export financing practices; with an amendment. (Rept. 99-457 Pt. 1) Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, the following action was taken by the Speaker:

H.R. 3667. Referred to the Committee on Foreign Affairs for a period ending not later than February 7, 1986 for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(i), rule X.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONYERS:

H.R. 4007. A bill to amend section 3500 of title 18, United States Code, to provide more useful discovery rights for defendants in

criminal cases; to the Committee on the Judiciary.

By Mr. STANGELAND:

H.R. 4008. A bill to stimulate employment through the creation of rural enterprise zones; jointly, to the Committees on Ways and Means, the Judiciary, and Banking, Finance and Urban Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of Colorado:

H.R. 4009. A bill for the relief of Isaako Uili; to the Committee on the Judiciary.

By Mr. LELAND:

H.R. 4010. A bill to provide that section 6248 of title 10, United States Code, shall not apply to an award of a medal of honor to Francisco R. Cortez or Richard G. Perez, and for other purposes; to the Committee on Armed Services.

By Mr. SEIBERLING:

H.R. 4011. A bill for the relief of Robert Julius Funesti; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 97: Mr. STUMP and Mr. MCCAIN.

H.R. 469: Mr. FRANKLIN and Mr. ARMEY.

H.R. 471: Mr. JONES of North Carolina.

H.R. 864: Mr. PETRI.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED AFTER SINE DIE ADJOURNMENT

The SPEAKER pro tempore announced his signature to an enrolled bill and joint resolution of the Senate of the following titles:

S. 1840. An act to amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes; and

S.J. Res. 255. Joint resolution relative to the convening of the 2d session of the 99th Congress.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT AFTER SINE DIE ADJOURNMENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and a joint resolution of the House of the following titles:

December 20, 1985:

H.R. 2100. An act to extend and revise agricultural price support and related programs, to provide for agricultural export resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes;

H.R. 1890. An act to provide for an equitable waiver in the compromise and collection of Federal claims;

H.R. 3974. An act to provide for temporary family housing or temporary housing allowances for dependents of members of the Armed Forces who die on or after December 12, 1985, and for other purposes; and

H.R. 4006. An act to extend until March 15, 1986, the application of certain tobacco excise taxes and certain Medicare reimbursement provisions.

December 24, 1985:

H.J. Res. 495. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes; and

H.R. 3718. An act to waive the period of Congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House of Dec. 19, 1985, the following report was filed on Dec. 30, 1985.]

Mr. BROOKS: Committee on Government Operations. Report on investigation of civil rights enforcement by the Office for Civil Rights at the Department of Education (Rept. 99-458). Referred to the Committee of the Whole House on the State of the Union.

SENATE—*Friday, December 20, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, our Holy Father, we should not be here today. But here we are! Some Senators went home last evening thinking voting was over and adjournment imminent. We need You, Lord—Your guidance—Your grace—Your wisdom. Help the Senators find a way which will prevent inordinate delays and frustrated purposes. Help the Senate to understand itself. It is almost as if it is victim of its own power—as though it uses its own power against itself. Here are 100 leaders, each trusted and sent by the people of his State—each, one among millions. It seems inconceivable, Lord, that a body with such resources cannot find a way to remedy a process with which all are dissatisfied. Great God, for whom nothing is impossible, work Your will in our midst. The Senators desperately need rest and change. They need their families and their families need them. Intervene, gracious Lord, transform this next week—this next month—into a bright, happy, beautiful time of renewal and restoration for Senators and their families. In the name of Him who promised rest unto our souls. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

THE BUDGET RECONCILIATION CONFERENCE REPORT

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each. We are down to one major item. That is, how we deal with the reconciliation conference report. The RECORD will reflect the House rejected the report on two occasions. We are now in the process of determining how many Senators are in the area. Surprisingly, there is a great number. Many spend Christimas here and then go home.

I can only tell my colleagues that we are meeting at this very moment discussing the present situation with the White House, OMB, and others concerning their objections to material that is now in the reconciliation conference report.

We would hope to dispose of the matter early, but I would not make any prediction. By early, I mean by 1 or 2 o'clock.

I would guess, based on conversations with the Republican leader in the House, Mr. MICHEL, and the Democratic leader of the House by telephone, that they might have difficulty in finding a quorum of House Members today. But, again, that is a matter that they will have to address if, in fact, the conference report is returned to the House with some amendment. We would appear to have a couple of options; one would be to table the Senate amendment and send it to the White House, and the other would be to insist on our amendments, as I understand. Another would be to amend it and send it back. There are probably several additional options of which I am not aware.

I can only tell my colleagues we appreciate their willingness to help resolve this matter. In my view, it is very important. It represents a year's work for many in this Chamber, particularly the Budget Committee; also, every other committee, committee chairman, and ranking member who have been working on Federal spending and the budget process since last January.

So it is not something about which we can say, "Well, we can just put it off. It does not make any difference." So far as I am concerned, there are real savings in this package.

There probably are a number of programs and other things tucked into the reconciliation that should not be there. But, overall, it does reflect and represent substantial savings. We hope we can resolve our differences so that we can leave here knowing we have made a contribution to reducing the deficit and reducing Federal spending.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The distinguished minority leader is recognized.

Mr. BYRD. Mr. President, I sympathize with the distinguished majority leader, certainly. I also sympathize with all the rest of us. Not only the majority has a responsibility to do whatever is doable, but the rest of us have some responsibilities also.

For the benefit of the majority leader, I think he should know that, on our side we could produce, in a half-hour or maybe an hour, 21 Senators. We might be able to raise that to 30 or 31, but I am beginning to doubt it. I told the press here this morning that I thought we could produce somewhere between 30 and 35 Democrats. But two Senators that we thought we might be able to count on, have since peeled off. So I do not think we can gamble too far or too long and hope to get a quorum. I would guess that within a couple of hours we will not only have reached our top strength on this side but we may, by then, be in danger of losing Senators.

Several Senators have stayed overnight but some of them will be leaving today and others will not be leaving today. If that information will help the distinguished majority leader, fine.

I personally think that while we may have a quorum—or we probably can get a quorum within a half-hour—I would think we ought not delay beyond that or there will not be a quorum.

We have sent this package to the House twice, and twice they have rejected it. I personally feel that to send it back again will be just love's labor lost. It will be an act in futility. In the meanwhile, we here will continue to lose bodies.

We can recede from the Senate's amendment or we can table the Senate's amendment, if we have the votes. If the distinguished majority leader would want to go either of those ways, that would be an action which, if it succeeded, would send the package straight down to the President for his consideration. It would save $79.5 billion, I am told.

The distinguished ranking Member, the Senator from Louisiana, [Mr. JOHNSTON] can go into the details far better than I can. He has been in the conference and I am not a conferee. But here is an opportunity to reduce the deficit by $79.5 billion over the next 3 years. It is the surest thing within our immediate reach that we can do to reduce the deficit. I am afraid that if we miss that chance and wait until we come back on January 21, Gramm-Rudman will be staring us right in the face and we will have lost our golden opportunity to reduce the deficit by a very sizable figure.

We have experienced similar problems at the end of a session with the House before. It is not anything new from that standpoint.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

While I favored the resolution as it went to the House, and I voted for it twice, I do not think there is anything to be gained by continuing to engage in what, up to now, have been very conscientious and sincere efforts but futile ones. I think the handwriting is pretty much on the wall. It seems to me we ought to grasp the opportunity, if we really want to reduce the deficit—and do it now—and send this bill down to the White House, either by receding from the Senate amendment or tabling the Senate amendment, and get out of here.

Mr. President, how much time do I have remaining?

The PRESIDENT pro tempore. The distinguished Democratic leader has 4 minutes.

Mr. BYRD. I thank the distinguished President pro tempore, the Chair.

I yield to the distinguished Senator from Louisiana [Mr. JOHNSTON], the ranking member of the Committee on Finance.

Mr. JOHNSTON. I thank my distinguished leader.

Mr. President, it is an interesting and peculiar phenomenon, the extent to which personal and physical limitations affect the course of this country—things like pride and anger and fatigue greatly affect the procedings, both here and in the other body. Late last night, as our pride was somewhat hurt in the Senate, feeling that the House had backed out on a deal, the anger at that having been done and the fatigue overlaying the whole thing made this whole exercise look almost fruitless and it was easy last night for some of us to say in the deeper reaches of our minds and beings, "To heck with it, let's say no, bury this piece of legislation, and go home and forget it, and blame them for it"—them being the House. And indeed, the House was pointing similar fingers at the Senate, talking about "We cannot let the other body do that to us."

It was really, frankly, Mr. President, somewhat of a sorry spectacle, when you consider the stakes that this Nation has in this piece of legislation.

We have here maybe not our last best chance to cut the budget, but certainly our first best chance to cut the budget since Gramm-Rudman: $83 billion in cuts over 3 years or, if you take out the so-called value-added tax, $79.5 billion in cuts in the budget. That represents a real and substantial opportunity to get that deficit down.

I think what we need to understand is that we are not going to have unlimited opportunities in terms of time to cut the deficit, to cut the budget. This is a capitalistic economy and every capitalistic economy ever known in the history of the world and that ever will exist in the history of the world has been a cyclical one with relative booms and relative busts. The average time of a recovery in this country, I am told, is some 44 months. There are others postwar that have stretched, if I recall correctly, for 8½ or 9 years. This recovery has already stretched for a much longer time than the average and we all hope it will last a lot longer. But the lesson of history is strong and it indicates that we do not have an unlimited time to cut this deficit because the only time you can cut the deficit is when you are in a recovery.

Once you get on the downswing, once you get in a recession and slow down, the advice from economists is unanimous: You can no longer raise taxes, you can no longer cut spending because to do so would sink you deeper and deeper into the morass of a recession. So here, in late December 1985, we have a chance to cut $79 billion to $83 billion depending on whether you include the VAT in a package that has been agreed to that has been carefully crafted, that has involved hundreds of hours of Senators' work and thousands of hours of staff work, and has been carefuly put together.

It is not perfect. It has some flaws, of course. No major piece of legislation in the history of this body has ever moved through here without flaws and imperfections. It is as close to a really good bill as we are capable, with our human frailties, of doing. Because of the lateness of the hour, because we are all wanting to get home for Christmas, because of our pride or because of our anger or because of a whole range of human emotions, I hope neither we nor the House will allow ourselves to miss the opportunity to cut $79.5 billion from this deficit.

When the history of 1985 is written, they will not talk about who was right or who was wrong and whether they live up to their deal between the Finance Committee and the Ways and Means Committee but they may write that this was the Congress that squandered its opportunities, that this was the administration that came in with a strong economy and a relatively small deficit and squandered it, spent money they did not have, lived on borrowed money, and with every opportunity that came along, they let politics interfere. That is what could be written on the history of 1985 and of this Congress.

I hope that will not be so. It needs not be so. There are ways to work this out. I am not exactly sure—I have my own views of how it can be done, how it should be done. But as far as I am concerned, Mr. President, there are a number of acceptable ways and I expect there are a number of acceptable ways in the House that they would accept.

The point is, Mr. President, we dare not lose this opportunity because if this reconciliation bill does down, we will have lost the opportunity for reconciliation. We will be coming back here on January 21 and we really will not get going, as Congresses never do get going, for at least a week. The first week we get going, on February 5, the President will drop his bomb. That is the first budget post-Gramm-Rudman, where you are going to see programs wiped out and where you are going to see, I believe, a degree of deep acrimony—at least, if not acrimony, then strong ideological confrontation between the White House and the Congress about spending priorities.

In the process of that, you will have lost the opportunity for reconciliation. No one who knows this process with whom I have talked thinks you can reconstruct reconciliation in January or February. You can have it in December. You can have it today, if we will. You cannot have it in January or February. All you can have in January or February is a deep ideological fight about Gramm-Rudman, and in the meantime for every day that you lose this opportunity you lose a $50 million cut in the deficit. I hope we will not lose that opportunity, Mr. President. I stand ready, as do colleagues on this side of the aisle, to support any reasonable action to get this bill. Time is awasting. I hope we will not lose our opportunity.

Mr. BENTSEN. Mr. President, I ask unanimous consent to proceed for an additional 5 minutes.

The PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I share the concern of my friend from Louisiana concerning reconciliation. There is no question but what we have brought about some very major savings in the budget and closed the deficit substantially by what we have done. We are talking about a situation where if we do not pass a reconciliation bill, you are going to have a $52-million-a-day savings that will be lost until the time when we might reconvene and reconsider this bill. We have gone into some areas that are very contentious, changes on Medicare, on education, on black lung. The whole list of such things has been fought out in countless subconference meetings during the reconciliation process. At this point, reconciliation has worked, if we can wrap it up. The unfortunate part of it is that what you have seen happen on the House side is that they have stripped out Superfund and the means by which to pay for it. They have chosen to try to put that burden on a very limited number of industries and companies.

Actually, toxic waste happens to be a societal problem, and you have an incredible number of companies and industries which contribute to it. People say, "Well, let's put it on the oil indus-

try" or "Let's put it on the chemical industry." That is not where it stops.

Now, what you saw in the bill that was passed in the Senate and passed in the Finance Committee was one that kept a major part of the burden of paying for the cleaning up of toxic waste still on the chemical industry, but, then, it spread the rest of the burden across all manufacturing companies. What you saw come out of the conference is a bill that excluded companies that were manufacturing less than $10 million a year. We cut out the small manufacturers.

The excise tax is a very limited application and will have less than 30,000 companies affected by it. People will say it is a value-added tax. Well, if it is like a value-added tax, it is not like value-added taxes I have ever seen. I worked on this piece of legislation, as the principal sponsor in the Finance Committee. The model that I chose to start with is the Canadian manufacturers' excise tax, and that is what we worked on.

These toxic waste sites have to be cleaned up, and to see the House version of the Superfund come through with a good amount of it from general revenue is highly irresponsible. To talk about a situation where you have an enormous deficit like we have now and then raise the amount of money from $1.5 billion to $10 billion and say you are going to get a bunch of it from general revenue does not make sense to me.

I think we ought to clean up these toxic waste sites. We ought to address it promptly. We ought to move ahead on it. We ought to accelerate what the EPA has done in that regard but pay for it as we go, and that is what the Senate version did.

Unfortunately, you have the opposition of thousands and thousands of companies which were on the EPA list as contributors to toxic waste and said, "We do not want to pay for it." Take food companies like General Foods, like Beatrice, and you can see toxic wastes that are contributed. You can go to a so-called clean industry, high technology, like you see out in Silicon Valley, and you will find one of the worst toxic waste sites in the entire United States, the Stringfellow site. Much of the waste there was created by acid and solvents being used to make computer chips. I can give you example after example across this Nation.

So we said, "You ought to pay your share." And we talked about eight one-hundredths of 1 percent. That is not a heavy burden for any of these companies.

Then we did another thing. We said, "All right, if we are talking about cleaning up these sites and we are having our companies pay for it, then those companies that send in competing products to them ought to pay some of the burden also." So we said that the tax will go on those imports from other countries' manufactured products that would normally contribute to toxic waste in their manufacturing. And we said on those products that are manufactured by our companies which are shipped abroad, it would be taken off. When you see the kind of trade deficit we have in this country today, approaching $140 billion, $150 billion—$120 billion last year and $70 billion the year before that, you can see the trend line it is on. It is important that we do as we have been doing, adding additional environmental controls to try to see that we have clean air and clean water in this country. We do things that other countries are not doing in that regard. Then, we ought to try to even the playing field. This kind of an excise tax does just that.

Now, after we agree to the excise tax on this side and we agree to it in the conference, then the House digs in its heels and rejects it. I think that is unfortunate. I think they do a disservice when they take that point of view. So I feel very strongly that once you give in on a number of things, as we did as Senate conferees—some of us would want to move to a national standard on DRG's, on what is paid under Medicare and move as quickly as we can, but we slowed down on that to take care of the concerns of the House Members. That is just one measure of the concessions we made in arriving at a compromise to try to get something on which we could agree. In turn, they gave in to us in a good part of the Superfund. That was the trade. Now what they are saying in effect, when they say, "Let's take apart Superfund," they are saying, "Well, now, you gave us all those things. We want to keep those, but we want to refight the deal on Superfund."

We may end up having to do that at some point because we are losing Members on both sides, and the pressures are with them. The pressures are always with those who want to stall. That is what we are being subjected to. I have a serious question in my mind whether you still have a quorum on the House side. As this thing continues today, I am sure we will end up without a quorum in the Senate. So those kinds of pressures may force us to yield, and we may end up having to have an additional conference next year on Superfund and the means by which we raise the tax to pay it. But if we do that, we will certainly be keeping in mind what we did in this conference and the price we have had to pay to arrive at this result.

CLARIFICATION OF STATUS OF TEXTILE LEGISLATION

Mr. HOLLINGS. Mr. President, I rise momentarily, while the leadership is about to arrange the business for the day, to correct the record relative to an Associated Press story in the morning Washington Post, entitled "Telecommunications Bill Throttled in the Senate," whereby—and I quote—"HOLLINGS said his objection represented retaliation for DANFORTH's refusal to help him get the textile bill approved in the Missouri Senator's Trade Subcommittee."

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks the Associated Press article to which I have referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. HOLLINGS. Mr. President, that is the exact opposite. That is what Senator DANFORTH said. What I had tried to do in my interview with the author of that particular AP story, Mike Robinson, is relate to him exactly what has been occurring in trade and tell him my objection was not to calling the telecommunications bill. On the contrary, I encouraged its call because it was my opportunity, when the bill is called, to thereupon add the textile amendment and get a vote.

My intent and my purpose is one of serious intent and serious purpose.

After the veto of the textile bill by the President of the United States, a coalition of industry and labor—the business leadership and the labor leaders—have convened once again, with the hope of submitting a slightly changed bill which would enhance the support for the bill on the House side, in the hope of producing a bill that would be veto proof. This is a matter of ongoing negotiations and draftsmanship. It's currently underway. Pending the drafting of that particular bill, to be presented as early as we possibly can in January, it is the intent of this Senator to get the vehicle through this so-called filibuster on the Senate side. That vehicle will be our current textile bill.

We faced a filibuster from the word go, since we introduced this bill in March of this year. The article is correct, that the textile trade bill has been bottled up in the subcommittee of the Finance Committee chaired by the Senator from Missouri.

I relate back now to July, because what we are being accused of and is now called retaliation was not labeled so in July. What really occurred is that, back in July, the distinguished Senator from Missouri said: "Your textile bill will not see the light of day." The distinguished Senator from Missouri is exactly right. It has not seen the light of day, in the sense that it is still in his subcommittee.

I thereupon said: "Well, Senator, playing this game on top of the table, my only recourse is to put my textile

bill as an amendment to another bill. Under a constitutional provision, revenue measures originate in the House. Necessarily, we have to have a House-passed bill or a House title. So you have a trade bill, S. 1404. I put the amendment on the desk, to be printed, to S. 1404."

I put the amendment on the Micronesia bill. And I so informed the majority leader, Senator DOLE, so that he would be aware of it, that we would offer our textile bill when that particular measure was called. And I so notified the distinguished chairman of the Commerce Committee and the chairman of the Subcommittee on Trade, the Senator from Missouri [Mr. DANFORTH].

I also added this particular point, as I have just stated: He is my chairman in Commerce, and I am the ranking minority member, and we have had the best of working relationships. The truth is that he is very angry. I do not have any doubt that he says it is retaliation, because he told me that over the telephone.

I said: "Jack, you just don't understand that the fight has just begun. I told you at the time, we first discussed this, that we were going to continue to try."

I have been on this particular issue for some 30 years now, and the distinguished Presiding Officer, my senior colleague, Senator THURMOND, has been working on this particular problem for years.

When Senator DANFORTH said that the telecommunications industry has hit a crisis, I said, "Welcome to the club." We hit a crisis back in the 1950's, under the Eisenhower administration. But, be that as it may, I said, "Our only recourse is to get that kind of measure."

To substantiate the statement I made then to Senator DANFORTH, who was taking it personally as a matter of anger and retaliation, he had the distinguished Senator from Texas [Mr. BENTSEN], who is the ranking minority member on Finance, call me. Senator BENTSEN was on the floor earlier this morning.

I said: "LLOYD, I'm going to call the textile amendment on our Democratic trade bill." We had a Democratic caucus on a trade measure earlier in the year, under the leadership of the Senator from Texas. A good portion of the bill, I think a substantial part, is the trade council measure I've offered for some time now.

I said that on that particular bill, if we call it, I would want to call my textile amendment. I would call my textile amendment on S. 1404. I would call my textile amendment on any other trade measure, because what we need is one more vote to get it over to the other body.

The purpose is not to delay. The delay is not with the Senator from South Carolina who is now speaking. The delay is a filibuster on the other side of the aisle.

The request of this Senator is to bring up the telecommunications bill, not throttle it in the Senate. Any thing else is absolutely false. Bring it up, call it now, give me the opportunity, give me 5 minutes to a side, give me a voice vote. I am trying to get the telecommunications bill called up for consideration, not stop it. I am not trying to retaliate. That would be stupid, that would be foolish, that would hurt our textile cause, if, on one particular turn, in the course of legislation in Congress, we became spiteful and sat back and said, "If we can't pass ours, nobody is going to pass theirs." That's not my approach and I renounce it. If trade is to be discussed on the Senate floor, then I intend to call up my textile bill. The attitude is on this Senator's part, please call your trade bill, so that we will have an opportunity. Because I do not get that opportunity, as a member of the minority, because the majority is holding my bill up in the Finance Committee and have held it up all year long, and they informed me, "It will not see the light of day."

So we are not trying to be spiteful or to retaliate. On the contrary, I pursued this particular course in July. I went to the Senator from Missouri, notified him of my intention, and I then put my bill on his bill that was on the desk, S. 1404. No sooner had I left the Chamber, than the distinguished Senator from Missouri took the floor and asked unanimous consent that in the consideration of S. 1404, only amendments that pertain to Japan would be in order. It was he who made the unanimous-consent request at that particular time, in midsummer, that no other amendments would be in order. Since I had told him about my textile amendment, which would affect all the trading partners, some 34 countries, his request was, ipso facto, that the textile bill would be out of order. He was the one who made the unanimous-consent request at that particular time, and the leadership on the Democratic side objected for me thank goodness because I had left the floor and was walking back to my office.

So much for that. It was not retaliation then. It was a maneuver to try to bring to the floor for consideration a measure we have, of serious intent and purpose, to present one more time so that in the beginning of next year, we can ultimately pass a stronger bill, in the sense of it being veto proof and perhaps approved. And, on the other hand, we seek to continue the educational process in this body, in the other body, in the administration in the National Government if you will, Mr. President with respect to international trade.

There is a terrible misunderstanding. The whole idea of free trade is out of the whole cloth. It is not free; it is not fair. It is competitive trade—competition.

It was competitive trade under David Ricardo in 1817 when he was talking about the comparative advantage. He was talking about the comparative advantage with producing countries.

A century later, when talked about under Smoot-Hawley, it was the competitive advantage there, and our friend Cordell Hull picked up the call in reciprocity competition, reciprocal free trade.

The goal is always to free the atmosphere and free up the competition as much as possible.

I am for free trade. You are for free trade. Everybody is for free trade. How do you obtain it?

Since World War II, fat, rich, and happy United States of America thought the way to do it was set the example. That if we did not put up any kind of barriers, if we did not retaliate to the barriers placed against us, to the trade practices, to the governmental provisions, to the protectionisms of the trading partners, but if we sat back and said we are not going to retaliate, what we are going to do is set the example, maybe that would bring about free trade. It's been a failure, clear and simple. And it's become progressively worse. Witness the record high trade imbalance. We cannot let it get go much longer or it will doom us all.

It is almost like arms control. If we do not build any arms—like monkeys on the treadmill—the Soviets will not build any arms.

We know from bitter experience in arms control it was only when we voted the ABM that we obtained the ABM Treaty. It was only when we said that we are going to build up the SDI and continue with it that they came back to the peace table.

Now in a corresponding way, in international trade we have tried all the cajoling, persuading, imploring, and visits to Japan and the high-level meetings between the heads of state. It does not work. We are going down the tubes internationally in this particular competition. Clearly we need a different response.

So it has been my suggestion to emulate the example set by Franklin Delano Roosevelt in the days of the Depression when in order to keep the banks open he closed the doors, in order to save agriculture he plowed under the crops.

Herein, in order to remove a barrier, we are going to have to raise a barrier and then remove them both. We are going to have to get down on the playing field and compete through our Government. Competitive trade, not free trade, not fair trade. Let us talk

realistically. This is a very dynamic international competition in which we now persist. We must engage ourselves in it.

Our trouble is the United States is not down on the playing field at the behest of the multinationals. We are up in the grandstands, shouting free trade, free trade, protectionism, protectionism, and trade war, when the trade war down on the field is in the fourth quarter and we are about to lose it all. We must join the competition.

Why do the multinationals take their plants and jobs offshore? Because it is to their economic benefit. They are not only producing economically without the requirement of a standard of living over in their offshore facilities. They receive protection from Taiwan, where they produce. Protection where they have joined up in coproduction with the Japanese. Protection in Singapore. Protection in Hong Kong. And, instead of retaliation on their part what we find, for example, looking at what happens is that the Japanese, for example, taking Japanese textiles as an example, is that the Japanese sell $1.5 billion in textiles to Hong Kong. But, they import zero dollars in texiles from Hong Kong. Where's the reciprocity in that arrangement? What's fare about that trade?

The United States of America imports 1.05 billion square yards of textile products from Hong Kong, and we export nearly zero to the "free trade country," said the Senator from Missouri, "of Hong Kong." Hong Kong is a trading dock out there. That is not a country. It is a shipment point, it is a warehouse and a dock and a boat facility to off load the production of the People's Republic of China. And we import millions of square yards from the PRC in addition to the billion plus from Hong Kong.

To talk spuriously about free competition and let the market forces operate, do not forget the governmental and the political requirements in the cost of production.

Speaking to those requirements, let's use the example before us. We are debating today about toxic waste on the reconciliation bill. I think now it is approximately $7½ billion, or whatever it is, that we are going to put on American industry. As we put the $7½ billion, it is an additional cost of production that will go on the American textile manufacturer, and any other manufacturer in the Nation. Republicans and Democrats all agree we should clean up the toxic waste. Just as we all agree that there should be a minimum wage. We should all agree to social security. We should all agree to unemploment compensation, to a safe place to work, safe machinery, clean air, clean water. This is the American standard of living. We're proud of it. Our people enjoy tremendous benefits because of it. Our Nation is widely respected because of it. I don't want to see our standard of living diminished.

Incidentally, we had no standard of living in 1930 under Smoot-Hawley. You cannot give a historical sense to our colleagues in Congress when they jump up and down and say we are going back to Smoot-Hawley if you pass my textile bill. We did not have clean air, clean water, minimum wage, Social Security. None. We did not mandate a standard of living in 1930 as we do today.

But over the 50-year period, beginning with Social Security in 1935, we have enunciated over those 50 years an American standard of living.

Under this American standard, that we all believe in so strongly, in the world of international competition, we must give protection to it. There must be a substantial base so there will not be any dumping, so we will not have any selling at less than cost, or pretatory pricing, or other "sharp practices," in governmental trade barriers to us. Otherwise we just continue to force America's industry to go overseas.

Mr. President, we take that particular standard of living and we talk about protection. That is the fundamental of government here. We have Social Security to protect us from the ravages of old age. We have unemployment compensation to protect us from the loss of a job. We have safe machinery and other laws to protect the worker in the workplace. We have clean air, clean water, to protect the air we breathe, the water we drink; the Army to protect us from without; the FBI to protect us from enemies from within.

The fundamental of government is to protect, with the oath of the Senator and the President as he took in the rotunda earlier this year down the hall in the Capitol, "I hereby pledge to preserve and protect and defend." He takes that solemn oath, we understand, in the rotunda but we walk 100 yards down the hall to the Senate Chamber and if you mention the word "protect," a bunch of Senators just go into a stitch, "Oh, heavens no, we cannot have protectionism, protectionism," because the multinationals through the editorialists have sold that shibboleth. No such thing as free trade exists. It is competitive trade. But as long as they can continue to persuade the uneducated that it is just a simple thing and all we need to do is set the example we will continue to slide—that all we need to do is to put in a bill like this telecommunications bill which says, "Go to Japan, just to Japan, and in 18 months if Japan does not do something about this, then we are going to start enforcing our laws." That says to the Japanese competitor, and I do not blame Japan, "I have 18 more months to continue to violate, to continue to protect, to continue to give advantage, to continue to extinguish American markets that have been established over this 30-year period." It's a green light to continue.

So that is the wrong message to send to MITI, the Ministry of International Trade and Industry in Japan. They know how to translate all of these so-called high-level meetings and implorations and so-called threats. They just take it out of the whole cloth and they watch the legislation, and as long as the Japanese lawyers can get into the White House, as reported in the press on last Saturday morning less than a week ago, and change around the decision of the Secretary of Commerce; as long as they continue to run through the halls of Congress and into the various hearing rooms, and protect Japanese production and do it so successfully, the Japanese will continue to prevail, take over the international market, destroy the American standard of living and our capacity as a world power. That's the threat we face.

We are not a third world country. On the contrary, Mr. President, we are a world power and there are certain capacities that we must maintain if we are going to continue as a world power. We must have the capacity to produce steel, glass, rubber, and textiles. Under the Kennedy administration we had a series of hearings at the Cabinet level, and the executive finding was that next to steel, textiles was the most important to our national security. We could not send the American soldier to war in a Japanese uniform.

So it is, that we have to maintain this production capacity and not go the way of England as the Ivy League economists tell us. That we should look forward to a service economy and quit producing wealth but handle it and be a big financial center for the rest of the world.

We are losing out, not in textiles alone. It is telecommunications, it is leather, it is steel, shoes, rubber, sporting goods, hand tools, machine tools, semiconductors.

It is the productive capacity of America and Americans out there, and I have traveled the 50 States, see it, understand it, appreciate it, and they are totally frustrated and nonplussed by the actions here of their Washington Government.

They could not understand how we, a competitive group, and the only way you get into this Senate and Congress and into the Presidency is that you are a competitor. You fundamentally start the day either tempting fate too much or his dessert is small who fails to put it to the test and win or lose it all. That is the creed of competition here. That is what made America great and

continues to hold it strong. Competitive free enterprise.

But, we have the wrong leadership on this particular score. They think it is a momentary political thing, perhaps, against the President. They think it is a momentary Democratic issue for the 1986 or 1988 campaigns. They think it is a little, old, small industry bill that comes from a Southern State.

We had the distinguished Senator from the State of Washington, stand up and say we are pitting the East against the West, starting a civil war. That is a total misunderstanding.

This is a national industry of labor and management, of East and West, North and South, and that is why it has overcome all of these particular parliamentary obstacles and obstacle courses they have put in our way—these procedural hurdles. That is why we have succeeded thus far.

So, Mr. President, in correcting this particular record, as the AP writer writes, in his story, he says, "But bickering in the aftermath"—this is not the aftermath, this is the "foremath." This is the beginning, not the aftermath. This is the beginning of the textile debate. It continues on. We are just starting the fight.

The article stated that Senator DANFORTH said that he would "be curious to know whether or not the administration asked the Senator to take this position."

The administration has asked this Senator to take his position outside of the U.S. Senate. The President of the United States has been on the telephone trying to get an opponent to replace this Senator from South Carolina. So that is the position that the White House has asked this Senator to take—not any position whatever on trade and competition and textiles and jobs. I have never conferred with them. I am not granted that opportunity with respect to these important matters.

"Hollings said his objection represented retaliation for Danforth's refusal to help him get the textile bill approved," says the article. The truth is that is what the Senator from Missouri said. He feels like it is personal and it is retaliation. I can assure him it is not. Call up a Democrat trade bill, call up S. 1404, call up the bipartisan bill. I put everybody on notice. This is the only recourse, when you are a Member of the minority, to take every opportunity to get a vote. When the U.S. Senate discusses trade then this Senator will being up textiles. It's too important and integral to trade not too.

It is not to hold up the bill of the Senator from Missouri. He is holding up his own bill. All he has to do is agree I get a vote. He can call up telecommunications. It is not my filibuster. It is not a filibuster on this side of the aisle. I am not holding it in his subcommittee. I am not holding it in the Finance Committee. My request is reasonable. Give me a vote. No time, just vote on both sides; take a voice vote. You can pass the telecommunications bill and I would welcome it. I am not throttling it. I would welcome the telecommunications bill to be called up, then it would afford an opportunity just to get me a vote on what has been voted upon already five times, up or down, after long debate in this U.S. Senate.

So my request is not to throttle or to retaliate, but to go along and help some trade bill get to the floor. It is the Senator from Missouri that is throttling his own measure by throttling me in that particular subcommittee. We have overwhelming support for my bill and we cannot even get it reported out.

Mr. President, I thank the distinguished Presiding Officer any my colleagues in the Senate on the floor this morning.

THE RECONCILIATION BILL

I commend the Senator from Louisiana on another point in his handling of our reconciliation bill. This is a serious matter that fits right into our Gramm-Rudman-Hollings initiative. If we are going to start—and that was the decision made by both bodies and the President of the United States, that we are going to return the fiscal affairs of this Government to the black—here we have, some say $66 billion, others say $79 billion, but there is no doubt that there are many billions of dollars to be saved in this reconciliation bill. And we should press forward with this bill and get those critical budget savings, and not bog it down to a peripheral matter with respect to a highly contested, highly inflammatory issue like toxic waste.

We should keep our eye on the target. And the target is to follow through and keep the word, say what we mean and mean what we say. The U.S. House of Representatives and the U.S. Senate both said we should save these moneys. So 98 percent of reconciliation really is ready to be agreed upon. This particular body has voted overwhelmingly, with only two dissenting votes.

So I appreciate the Senator from Louisiana the Senator from Texas, and those handling the reconciliation bill for sticking to their guns and seeing if we cannot compromise in the context of at least rescuing these savings. If not, dreadful and really traumatic action will be required at the very, very beginning here of 1986, in January and in February—draconian is the word they use in Washington—of cuts that have to be made and that sets us off on almost, again, another impossible political task.

We want to see Gramm-Rudman-Hollings work. We want to see the discipline get set. Let us not upset this possibility for success here at the last minute with respect to throwing over a $66 billion savings in reconciliation that both bodies have agreed upon. Let us try our dead level best to get together here, if nothing else but under the Christmas spirit.

I noticed in the news reports where some prisoners escaped from the prison yard on yesterday afternoon or yesterday morning in Greenville, SC, with the use of a helicopter. Maybe my wife can hijack a helicopter and get me out of this "prison" and get me home for Christmas. I do not know how you get out of this place. I am going to stick with you, I say to the Senator from Louisiana, but I do not know how long. This body does believe in Christmas, does it not?

I have a note from the distinguished Presiding Officer, and I ask unanimous consent that the various amendments that I have placed on the desk to these bills with my particular name also include my senior Senator's name, the Senator from South Carolina, and our President pro tempore, the present Presiding Officer.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(EXHIBIT No. 1)

[From the Washington Post, Dec. 20, 1985]

TELECOMMUNICATIONS BILL THROTTLED IN SENATE

(By Mike Robinson)

Last-minute efforts to bring up legislation to aid the telecommunications industry were swiftly throttled in the Senate yesterday in the aftermath of a fight over textile imports.

The move followed a call Wednesday by Majority Leader Robert J. Dole (R.-Kan.) for quick action on the telecommuncations bill because "the trade imbalance with Japan has been escalating at an alarming rate" and that nation's import barriers "remain in place."

But bickering in the aftermath of the textile debate defeated efforts by Sen. John Danforth (R.-Mo.), chairman of the Senate Finance Committee's international trade panel, to bring up the telecommunications bill for a vote.

Under Senate rules, action on the bill, sponsored by Danforth and Sen. Lloyd Bentsen (D-Tex.), was impossible without unanimous consent. Sen. Ernest Hollings (D-S.C.), who was a chief sponsor of the vetoed textile bill, objected to consideration of the measure, in effect killing chances of any further major trade action before the Senate's recess.

"Some of the senator's positions will be greeted with delight by the Japanese," said Danforth, who is planning to visit Japan. He said he would "be curious to know whether or not the administration asked the senator to take this position."

Hollings said he agreed that telecommunications equipment exporters need help from Congress in penetrating the Japanese market. "I'm a cosponsor of this bill," Hollings said. But he added that the telecommunications industry was one of many, including textile and apparel makers, that deserve trade relief.

Hollings said his objection represented retaliation for Danforth's refusal to help him get the textile bill approved in the Missouri senator's trade subcommittee.

President Reagan vetoed the textile bill Tuesday after the Senate bypassed Danforth's subcommittee and passed the measure.

The telecommunications bill, opposed by the White House, would require the administration to open talks aimed at breaking down alleged Japanese barriers to U.S. equipment imports and retaliate unless they produced results.

THE BUDGET RECONCILIATION CONFERENCE REPORT

Mr. JOHNSTON. Mr. President, if I may answer my distinguished colleague, first of all I would like to thank him for his generous remarks, which I am sure were activated by the spirit of the Christmas season. I do appreciate that generosity.

Yes, we do believe in Christmas. But there is a grinch around here somewhere that is trying to steal the spirit of Christmas and kill this reconciliation bill. I hope, instead, that we can bury Mr. Grinch, in the spirit of not only the holiday season but in the spirit of trying to help this country out, which needs a nice present in the form of a cut in its gargantuan-sized deficit. The best Christmas present we could give this country, its economy and its people, is to pass the instant legislation.

Mr. President, I might say that there are a number of motions that can be made at this time, the first of which, of course, would be to move to the conference report, which is highly privileged and nondebatable. There is also a motion that can be made to table the Senate amendment, which also would be nondebatable. And through two quick slices we could be at the question at hand. I would like to say we are not doing that, and we are not doing that because there is a bipartisan effort to try to find a way to pass this bill.

So I want simply to remark to my colleagues who are listening on the squawk boxes that we are trying every way possible to find a way to pass reconciliation that will be both agreeable to the House, that will preserve the great savings—some $79 billion altogether, if you take out the value-added tax, or $83 billion if you leave it in—to keep those savings and to allow us to pass the legislation.

And I simply want to underline the fact that it is bipartisan, that it is an effort where on this side of the aisle we are not trying to use any legislative tricks, and certainly not even the arsenal of weapons that are available, and legitimate. And, indeed, our friends on the other side of the aisle, I think, are totally confident that we will not, which is the reason they have left the floor to go off to negotiate, and leave us to our own devices.

But I simply mention that because we want to find a way to make this bill become law, and to do it I hope before we lose too many more of our colleagues to the holiday travel schedules.

Mr. President, I see the distinguished Senator from Nebraska.

I yield the floor.

Mr. EXON. Mr. President, I think we are all too much short-tempered today, due to the fact that we have been working very long and very hard to come to some kind of an agreement, to still handle a series of measures. This Senator, as the Senate knows very well, was most unhappy, and not pleased with the farm bill that was passed. There was some consideration given at that time whether or not to have extended debate on the farm bill.

It seemed to me while that might have attracted some headlines around the country and it may have been good for publicity back home, it was not the rational, reasonable thing to do because at one time or another after we exhaust all the parliamentary procedures of the U.S. Senate and all of the parliamentary procedures of the House of Representatives in that regard, when the two parliamentary procedures of the two Houses get into the middle of a fray, we have the debacle that we have right now.

I think this whole procedure is very unfair. It is very unfair to the principals. It is very unfair, I think, to those of use who have stayed here while, according to some of the remarks on the floor this morning, maybe we would have difficulty in even getting a quorum in the U.S. Senate.

Last night the parade of our colleagues in the House of Representatives who were over here tuning in on what we were doing, and justifiably so because they were concerned, told me that after the gavel fell last night, even though the House of Representatives has not adjourned sine die, there is no way that they could get a quorum in that body. It seems to me this is, indeed, telltale lesson in how not to legislate.

It seems to me the suggestion that was made earlier this morning on the floor of the U.S. Senate by the minority leader, the distinguished Senator from West Virginia, is the only way out of the morass that we are in at the present time. I simply do not understand—and I would like to ask the question of the Senate and the Senate leadership. Why are we not taking the reasonable way out of this difficult situation as outlined by the minority leader this morning?

I simply say the same suggestion was made last evening, but we could not do that because of some strongly held views and some strongly held wills relating back, of course, primarily to some disagreement with regard to what the conference committee did or did not do, and who was in good faith and who was in bad faith with regard to agreements that were supposedly tentatively worked out in the conference between the House and the Senate.

There are an awful lot of personalities involved in this, Mr. President, I am not sure that personalities should be that strongly involved when we are taking meaningful legislation of this type.

During the debacle and countering debacles last night, this Senator had the first chance ever to watch the debate in the House of Representatives on television. While this Senator has generally been a supporter of television in the U.S. Senate, after watching the so-called debate in the House of Representatives last night where there were cheers, there were hisses, there were boos, and there was handclapping, I do not know about television in the U.S. Senate. If it is as bad as that, then I am very fearful there may be some youngsters around the United States that stayed up late enough last night to see that program. If they did, it probably had more of an ill-effect on them as far as representative government is concerned than if they stayed up late watching X-rated movies. [Laughter.]

It just seems to me, Mr. President, very seriously that the system here, checks and balances, if we will, between the House and the Senate have deteriorated primarily as a result of the clash of strong personalities, and that we are almost threatening to break down the system.

I wonder what the Founding Fathers would have thought of a system today where we may or may not have a quorum in the U.S. Senate, and we probably do not have a quorum in the House of Representatives if we were considering passage and how to get around the passage of a fundamental piece of legislation.

This piece of legislation would make, I guess, the largest cuts in Government, and we are all concerned about reducing the deficit and getting on with the business of attacking reduction in the national debt, but it seems to me that the founders would have been shocked. They would have been surprised. They would have been dismayed. They probably would have taken time out even if the Christmas Day was upon them to make corrections to stop the kind of nonsense that seems to be going on here between the supposedly most deliberative body in the world, the U.S. Senate, and our colleagues across the way.

Another thing strikes my mind in that regard. Basically, it has been my feeling that fundraising measures should basically originate in the House of Representatives. Here we are in the U.S. Senate tied up today on whether

or not we are going to have a value-added tax for the first time in our history as a part of our fundraising mechanism.

I have not made any final determination as to whether I am for or against a value-added tax per se. But I remind all that it is a significant step across a significant line that we have never done before. Here we are still moving to see if we cannot by hook or crook or parliamentary procedures, or one chicken being stronger than the other chicken in our game of chicken not before Easter, but before Christmas, try to do things that we should not be doing.

It seems to me whether you are for or against a value-added tax, that pales by comparison with the situation that confronts us. The reconciliation package that has been generally agreed on—and while it is not perfect, I support it, and I think Members in both bodies support reconciliation—has in it other important legislation.

I wonder how it looks to the people of America today when by failure to act by midnight last night we have in effect repealed the 8-cent tax on tobacco products now at a time when we need more revenue in this Government. Are we wise in not acting to preserve at least a tax on tobacco products as a means of legitimate revenue? That is not new revenue. That is revenue that we have had for a long, long time. But by our fumbling, by our bungling, and by our failure to at some time recognize the Congress has to work its will, we fumbled that away.

I do not know what all of the controversies are with regard to this legislation. But I would just say that there seems to be quite a test of wills. It is not of any interest to this Senator whether Mr. PACKWOOD or Mr. ROSTENKOWSKI becomes the next Speaker of the House of Representatives. I do not believe that should be a legitimate part of a discussion, if it is, as to whether or not we continue to pitter and patter, and mumbling and bumbling through here now.

It seems to me, with a questionable lack of a quorum in the U.S. Senate, that we could simply suggest that we could probably dispense of this whole matter in a hurry if someone insisted on seeing whether or not we have a quorum present.

Likewise, such action could be taken in the House of Representatives.

So before someone comes up with that particularly wise move that might be necessary, I would think it would be in the interest of all parties to move as expeditiously as possible on the suggestion made by the majority leader.

The suggestion made by the majority leader would only allow us to pass reconciliation as generally agreed to by both bodies. The only thing it would eliminate would be the value-added tax.

Once again, I think that is a tax that deserves a lot of consideration, a lot of committee action, first in the House of Representatives and then over here in the Senate.

It seems to me that we would best follow the dictates of the procedures and best follow the dictates of wisdom if we would take action quickly on the suggestion made by the majority leader and then move about our business, which is sine die adjournment.

Having said that, like all of my colleagues I would very much like to go home to Nebraska where all of the family will be gathered this evening, except the father and the grandfather. That is important.

But more important, Mr. President, is the obligation that we assumed when we took our oath of office to move ahead with the business of the Senate. It seems to me that until we move on the suggestion made by the minority leader, which is the only way out of the morass that we are presently in as far as is known at this moment, until maybe something else is hatched in the closed-door sessions going on right now, we are going to continue to be looked upon as a body that seems never to know where it is going and when it gets to a place where it thinks it is does not know what to do.

Mr. President, although some of the remarks I have made this morning are in jest, it does seem to me that we ought to try and destroy, if we possibly can, the videotape recordings of the House of Representatives last night. I think we should, as best we can, assure that the people would not see things of that nature. I believe the people of the United States, while in polls they do not seem to hold the Members of Congress in particularly high esteem, expect us, by and large, in retrospect, to do a more manageable job of passing laws than they saw last night in the House of Representatives and which they will be hearing about through actions or no actions today on the floor of the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. DOLE. Mr. President, I move that the Senate stand in recess subject to the call of the Chair.

The motion was agreed to, and at 12:59 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 3:52 p.m., when called to order by the Presiding Officer [Mr. GORTON].

OMNIBUS BUDGET RECONCILIATION ACT

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3128.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the amendment of the House to the amendment of the Senate to the bill (H.R. 3128) entitled "An Act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process.".

Mr. DOLE. Mr. President, first, let me apologize to my colleagues for this Friday afternoon session. I hope we can dispose of the remaining business in a fairly brief time because I know the weather is not good and I know many Members have to change their plans. This is, I think, a most important issue, one that I understand we shall have some debate on. We shall have the experts on both sides who have been the real principals in this effort over the past 11 months speak to some of these specific issues.

We have had a series of meeting today, and a series of conversations with White House officials and, OMB officials. I have just spoken with Don Regan, the President's Chief of Staff, in an effort to determine what the President's attitude might be toward this bill in its present form.

The President is presently on his way by car to Camp David because of weather. Shortly before he left the White House, less than 30 or 40 minutes ago, there was a staff discussion with the President about the reconciliation conference report. I am at liberty to indicate that the President advised the staff, in particular the Chief of Staff, Don Regan, that if, as he said before, certain objectionable provisions are removed from the conference report, he would accept it, with one caveat. Apparently, there are a number of little new entitlement programs buried in the conference report and they may not have all been discovered—a new vision care program, other Medicaid Programs for unwed parents, and perhaps a number of programs that they are not quite certain of. But basically, these are the same programs that the President has called to our attention a number of times: The trade adjustment tariff, the OCS Lands Act, section 8(g), AFDC, Medicaid and food stamp quality control revisions, elimi-

nation of Medicare cost-saving regulations, the value-added tax on Superfund, Medicaid Program expansion which will increase State and Federal costs; and, as I said, the ones that we cannot quite identify completely are the various expansions of Medicare and Medicaid that may have been added by Representative WAXMAN in the conference.

Mr. President, this has been a bipartisan effort and I hope it continues to be a bipartisan effort—most of us in the Senate have struggled with this process all year long. Too long—I think most of us would agree, particularly the distinguished chairman of the Budget Committee and the distinguished Senator from Florida [Mr. CHILES], who is necessarily absent, and also Senator JOHNSTON, who has been substituting for Senator CHILES since his illness.

We have three or four options. Probably none of them are very good. I assume the easiest one, which would get us out of here the quickest, would be simply either to recede to the House or to strike the Senate amendment and send it to the President. But, based on information that I have, that would probably mean a Presidential veto. It would mean that our efforts and the efforts of all the others on the House side, Democrats and Republicans, would have been for naught.

There may be other options. One would be to have unanimous consent, which I shall propose in a few moments, that the Senate recede from its amendments and concur in the House amendment with a further amendment consisting of the conference report on H.R. 3128 with the following sections stricken—then I shall repeat those later.

That would take unanimous consent and I am advised that we not obtain such consent. I believe the option that we should pursue, then, because I still hope we can achieve some savings, the third option. That would be to insist on the amendment—and request a conference with the House.

That is not for the purpose of going back and trying to sustain our position or the Senate position on financing the Superfund. As the distinguished Senator from Oregon, the Chairman of the Finance Committee (Mr. PACKWOOD) will explain, that issue has been decided. He is willing to give that up. But it is an effort to go back to conference with Members of the House to try to resolve these five issues—five out of hundreds—that will permit the President to sign this bill and permit us to achieve some savings.

To be very realistic, there is a rather broad difference between OMB figures and our figures on the savings in the reconciliation conference report. We are advised that OMB has advised the President that the total savings over a 3-year period is around $8 billion, and maybe another $8 billion in revenues.

Well, we have been advised by the CBO and the Budget Committee that the savings amount to about $55 billion now based upon the fact that the farm bill is passed and there are $7 billion savings in the farm bill that can no longer be credited here. There are a couple of other similar instances, as the budget chairman will discuss later. So our range goes from $55 billion to as high as $82 billion. But we have to keep in mind that some of those have already been achieved in other legislation, so they have to be subtracted.

We happen to believe that we may be more accurate than OMB, but they are the ones who advise the President. So the President is faced with the decision on whether or not to sign a bill which saves only $8 billion over 3 years and has about the same amount of increased revenues—whether he should sign that bill if it includes a lot of new programs and goes back and undoes a lot of the reforms we made in 1981.

He does not believe that is very good policy. There has been a black lung provision added that not only raises taxes but provides forgiveness that costs about $2 billion this was never passed by the Senate. It was part of the agreement the distinguished chairman of the Senate Finance Committee made in the conference, and those who made the agreement in effect undercut the agreement on the House floor last evening. But in an effort to resolve it, that is the process, the procedure that we will attempt to follow.

Now, I know that other things can be done, maybe others have other plans. I know the motion to table the Senate amendment has priority and that may be made.

At the present time, I would ask unanimous consent that the Senate recede from its amendment and concur in the House amendment with a further amendment consisting of the conference report on H.R. 3128, with the following sections stricken: First, section 12301 relating to AFDC and medicaid quality control studies and penalty moratorium; second, sections 13001 through 13011 relating to trade adjustment assistance; third, section 13203(b) relating to a 5-year moratorium on interest accruals with respect to the indebtedness of the black lung disability trust fund; fourth, subtitle B of title XIII relating to Superfund and its revenue sources; and fifth, sections 8001 through 8101 relating to Outer Continental Shelf Lands Act.

The PRESIDING OFFICER (Mr. GORTON). Is there objection?

Mr. JOHNSTON. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from Louisiana reserves the right to object.

Mr. JOHNSTON. For the last almost 24 hours, we have been engaged in this negotiation about how we were going to get this deficit down. On this side of the aisle, I do not think there is anyone who can say we have not been cooperative. We have not been particularly brought into the process, I must say, but to the extent we have, we have offered the hand of cooperation, repeating that over and over again privately, here on the floor, and in the majority leader's office, when permitted to come at our request—at every instance of the time offering the hand of cooperation. It was not Senators on this side of the aisle who made the decision as to the strategy last night in sending back to the House the bill with the same amendment which they had turned down previously. This strategy was available to us last night when we could still amend. Rather than using that strategy of amending and putting these amendments back on the bill and sending it back to the House, we used up on motion of the majority leader and the chairman of the Senate Finance Committee our chance to amend by insisting again upon the same amendment.

Full cooperation, we tried that. It did not work. It lost by an even larger margin.

Now, this morning, we came in again offering full cooperation, saying, "We need a bill; the American people need a bill. We will do what we can to get it."

This strategy was suggested to us earlier. I personally said, "I will do what I can to help get it"—not because I like these amendments. Indeed, it was a different package when previously discussed. This is the first time I have even heard about all the elements of this package.

That is the kind of bipartisanship you get. You get something sprung at you out on the floor of the Senate without even discussing it with you. Nevertheless, as the package last existed, we were asked, "Will you try to sell it?" I said, "I will do the best I can." The leader, BOB BYRD, said he would do the best he could, and indeed we convened a caucus for that purpose. In the meantime, we called the leadership of the House and they say they have lost a quorum, it takes unanimous consent, and a number have already announced publicly and others privately. Congressman FRENZEL has already made a speech saying he would object to any change.

So, Mr. President, make no mistake about it, this strategy, however good it might have been at any one time, is no strategy now. It does not get you a bill. It is some kind of tactic, and I do not know what the tactic is or what its purpose is other than to elicit an objection from us, which will soon be coming because we are not going to be

a party to bearing this bill, not after all the time and effort we have put in on this side of the aisle, not to mention the gargantuan efforts that Senator DOMENICI and others have put in in fashioning what is not a perfect bill but it is a good bill.

It is $79 billion worth of savings without the so-called Superfund tax. And if all it is $8 billion, I want to tell you we better shut down the CBO, do away with that agency of Government because it is not worth what we are paying them if they are that far off.

In any event, Mr. President, with that reservation and for those reasons, I object.

The PRESIDING OFFICER. Objection is heard. The majority leader.

Mr. DOLE. Mr. President, I regret that there is objection. I must say it was no surprise. We have had some prior discussion of this matter. We met in the minority leader's office, so there has been bipartisan discussion. My own view is that we are going to be gone for 30 days. It is not our problem if the House may not have a quorum. We have a quorum. We have about 40 of our Members here and I think there are 30-some Democrats here, so that is not our problem. We are here prepared to go to conference this afternoon on five very minor issues that can be resolved in 30 minutes. Now, if the House is gone, they say, "Oh, we can't do it, we left town," I do not believe that is our problem. We have enough problems of our own, but that is not one of them.

Do we want a bill? I hope so. I think so, because there has been a strong bipartisan effort following the May 10 vote, which was 50 to 49, with only one member of the other party voting for real deficit reduction. We can argue that at a later time. But it seems to me that now we need to try to complete the process, keep it alive, see if we can salvage something, if not today, when we come back or maybe even prior to that time the conferees could meet and see if they could resolve it.

I assume the conferees could meet informally while the rest of us are working at other places in January.

But in any event, I move that we insist on the Senate amendment.

Mr. JOHNSTON. Mr. President, point of order. Is that a 1-hour time agreement?

The PRESIDING OFFICER. It is a 30-minute motion equally divided.

Mr. JOHNSTON. That is to insist on the Senate amendment and return it to conference?

Mr. DOLE. It is the first part. Then I would request the conference, appointment of conferees following this.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD addressed the Chair.

Mr. DOLE. Mr. President, let me yield such time as he may consume to the Senator.

First, let me designate the distinguished Senator from New Mexico to allocate the time.

Mr. DOMENICI. How much time does the Senator desire? Fifteen minutes?

Mr. PACKWOOD. Five or 6 minutes.

Mr. DOMENICI. I yield 5 or 6 minutes.

Mr. PACKWOOD. Mr. President, let me explain partially the situation we find ourselves in today and why we got here and why the Senate feels a bit unfairly treated.

I feel very bad that we are going to give up not only just the Superfund funding, we are giving up on the Superfund Program. It is out, gone. It is going to be funded. It is not going to be funded under the tax that expired for the last 5 years. It is not going to be funded under the taxes for the next 5 years until it is resolved. That the funding of Superfund is now out, the Senate is not going to insist on its position on this issue when we go back to conference.

But as we were bargaining in conference with the House, as in all conferences, there is a give and take.

The House had very close votes in committee and on the floor on its method of funding the Superfund. In committee, the chairman of the Ways and Means Committee lost the vote as to the way he wanted to fund Superfund. On the floor of the House, as I recall, by only a 14-vote margin, he won it.

There was a slight anomaly, I thought, in the entire reconciliation process when there was no Superfund provision at all in the House bill, but under the rules, the Ways and Means Committee was credited with the revenues toward meeting their total. No bill, no revenues, a credit toward meeting their total.

So, if anyone wonders how you can come up from $3 to $13 billion, understand how funny money moves very easily in this body.

We went into negotiations and had the Superfund provision in our reconciliation bill.

In what I would imagine to have been a very dicey situation among the House conferees on Superfund, by a 9-to-4 vote, the House conferees offered to the Senate in essence what had been very close to the Ways and Means Committee position, absent only the fact that there was no funding out of general funds and no waste end tax.

The House said, "We will go along with the Senate," and the Senate really was going along with the House Ways and Means Committee position.

Involved in all these situations were the issues of black lung; Medicaid; AFDC; poor persons in families with unemployed parents and whether they were going to be eligible for welfare; whether or not State and local employees were going to be covered under Medicare; and trade.

There were other issues which the President does not like, such as intercontinental shelf, but I had nothing to do with that.

There was give and take, and the Senate gave on positions it would not otherwise have given on, such as black lung, State and local government coverage under Medicare, in which the Senate position raised $4.7 billion and the House provision $500 million. But in the give and take, we gave. We concluded the conference.

As with all conferences, you win some and you lose some. We came back to the Senate and we acted on the conference report, 78 to 1.

The House then went back and, in an irritation and fit of pique because they were mad, having lost their Superfund tax method among their own conferees, the majority asked for a rule in the House to strip out the method of Superfund financing that had been agreed to in the conference—stripping only that out—sending to the Senate a bill that now had things in it that the Senate would not have agreed to had the bargain of the conferees not been broken.

We gave up things to get things; and the House said, "No, we're going to throw out the things we gave up because we didn't like it anyway, and you can take it or leave it, with all the provisions you never would have given."

It is going to make it difficult for the Finance Committee and the Ways and Means Committee and other committees to reach honorable conclusions if, at the end, one can say, "We are not going to honor the contract.

So I am prepared to give up on the Superfund. That is for another day. We will fight that another day. But we need to go back to conference now basically on spending issues that were added in the conference, which would not have been added but for the Superfund financing agreement, and see if we can undo those so that the bill is acceptable to the President. I hope we can. I hope the conference concludes an agreement and that the agreement will be honorably kept by both sides.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. I yield myself 7 minutes.

Mr. President, in recent days and weeks, we have had a lot of conversation in this body about the quality of life, about the deterioration in the Senate and its customs and its great traditions. We all feel, in a very real sense, that that which has made this the greatest deliberative body in the world has somehow been lost or de-

graded or destroyed or that, in the process of modern times somehow we are losing it.

I can tell you that last night, as I watched the House of Representatives, I was not proud of that institution. All the pettiness of politics, it seems to me rose to the surface last night in the House of Representatives—personal interest, deep partisanship, a challenge to the Senate, like the comment over and over again, "We are not going to let them do that to us," and that kind of thing.

The national interest, it seems, got lost last night in the House of Representatives—somehow buried in what seemed to be a political contest or personal contest, will against will, political future against political future. The tiredness of the moment or the emotion of the moment seemed to have gotten lost last night, and we all know what happened in the votes.

It seems, Mr. President, that, in a little more dignified way, we may be ready to do that and again demonstrate that in the U.S. Senate today. I hope not. My words today would go to appeal to the national interest, to appeal to Senators on the basis of not whether it is good for the President or whether it is good for this party or that, but whether it is good for the country.

In my judgment, the motion that the majority leader has made would kill this bill. Make no mistake about it. You can argue that. You might sell it to such part of the American people as reads newspapers. Maybe it would not be interpreted like that. But we know that is so.

Why is that so? Because it comes back in February or late January or early February, and then what happens? February 5, the President's budget comes up. Prior to that time there will be all kinds of leaks about all these programs that will have to be eliminated or decimated because of the requirements of Gramm-Rudman. We all know that. We know the acrimonious atmosphere, the deep ideological differences.

We are going to be at a watershed, a crossroad, when we come back in January or February, and we are going to decide, for the first time, whether all this rhetoric about cutting budgets is real, whether people can really measure up to that. It is not going to be easy.

All these easy things we have done in these past few years, like cutting taxes, raising defense, spreading the goody bag out for everyone and not really cutting anything, all that is in the past. Now it is going to be tough, and it is in that kind of atmosphere that this conference committee would have to deal.

What is the House going to do? The House would be asked in that conference to cut further, to do away with such goodies, if that is the word, that are contained in this bill in order that you can have a lower starting point for Gramm-Rudman. Are they going to want to do that? The House thinks that domestic programs have been cut too much already. And so what happens if they turn this conference down? You move it from about 95 to 1, domestic over defense cuts, to 50-50 domestic-defense so you can move a lot of these uncomfortable cuts over to defense just by defeating this conference report.

In the atmosphere of January and February, do you not think that is going to be done? Do you not think someone along the way is going to figure this out? Of course, they are.

We are going to be well into the budget process by January and February, and it is going to be impossible to cut this thing.

If your real motive is to save the President embarrassment of having to veto, go along with it. It is a nice cute way. I mean, it is a nice neat sort of way. Say let us go back and cut some more and go to conference.

But we know that is not so. We know it is going to kill the bill if we do that.

We are going to have a chance when this debate is over in one fell swoop to send this bill to the President. By moving to table, and we will at the end of this debate, you can, without going to the House; it will go straight to the President. You would pass any other intervening action. And that bill would save $79.5 billion, according to CBO, and it would not contain the Superfund tax which is the President's No. 1 objecton. It may not be his whole objection. But it is his No. 1 objection.

Many of us have talked privately and publicly to the effect that the President would not dare veto this bill, not $79½ billion right on the eve of the inauguration of Gramm-Rudman. I do not believe he would unless he gets very bad advice.

Mr. President, we are going to have a chance to do that, $79½ billion. Oh, you can call it $8 billion. If you call it only $8 billion, do you realize what that says about the reputation of CBO? Has CBO been denigrated in their reputations around this place?

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. JOHNSTON. So far we say their $79 billion in savings are only $8 billion. I mean, do we really believe that? Of course we do not.

We have been acting on the recommendations of CBO bipartisan and with a solid track record around here the whole while. They say $79½ billion. It is $50 million a day savings. For every day we wait, just since last night we lose $50 million. In another 30 days we will have lost $1½ billion.

You say that is not much. Well, it is a lot more than we have saved lately.

Mr. President, we have a chance to have some real savings, not phony savings, real savings, savings now, not savings off somewhere in the future. That has been our problem around here. It is always talk savings now but not save now, not cut now. This is a cut now today, December 20. We can cut today. Or at least we can give the President the chance to sign these cuts.

If we miss the opportunity, Mr. President, we have hurt this country, in my judgment.

You may be able to escape the political blame for it by saying "I didn't mean to kill this bill, I only wanted to make a better bill. I wanted to make it a better bill, send it back to conference." Inside the beltway, at least inside this body, we know that means kill the bill.

Mr. President, I hope we will not do that. It is not a perfect bill. There never was a complicated perfect bill that I know anything about that has passed this body.

If you want to wait for a perfect bill, you will not get it between now and next Christmas. They do not come like that. They are political compromises. But this one meets the targets. It has been a great bipartisan product.

The distinguished Senator from New Mexico has led us well on this matter. I hope we will not let it go down the drain here on the eve of Christmas.

I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, let me make a couple of points. First of all, the distinguished Senator from Louisiana makes one point that I think we ought to all agree on. It is in the national interest that a substantial portion of this bill become law.

I am convinced. I was beginning to wonder about it 10 or 12 days ago, but I am convinced totally today that unless we do what the distinguished majority leader recommends here, the national interest will not be served because I am convinced we will not get a bill. We must send this bill to conference, even if that conference may not begin until late January or early February.

I am now absolutely convinced that regardless of what we say and regardless of what we contend, the President will veto this bill if we adopt the amendment, if we follow the path he suggests, and that is when the motion to table is made, if we vote for it, we are all finished. I am convinced we well may have no bill.

I am not one who shies away from a legitimate confrontation with the President. But I do not think we gain an awful lot by running around for 3 or 4 months and say he should not have vetoed it.

Let me tell you, ladies and gentlemen of the Senate, we are somewhat to blame for the position we are in.

Do you remember late in the debate when the distinguished minority leader raised the concern about extraneous material? He was concerned that he said we ought to amend the Budget Act because, as a matter of fact, the reconciliation bill has no limits as to what people can do with it in their respective committees so long as they add some and subtract some and perform the accounting and estimating pursuant to the CBO baseline rules.

And we and the House, aside from the problem that the distinguished chairman of the Finance Committee raises that we have $4 billion in program add-ons as a compromise for the now removed Superfund program, but with the spending increases still in the bill, aside from that, there are literally scores of programs that do not belong in this bill.

As I say, some will say, "Well, where have you been?" Let me tell you the way the rules are there is nothing we could do about it.

The distinguished chairman of the Budget Committee and his entire entourage of Members turned this bill over to the committees and they worked their will. I might say, considering the nature of the problem, there is an awful lot of good reform in this bill that is going to go down the drain if we do not send it back to conference and at least let them try to salvage a substantial portion in January.

There is reform in the veterans' program that is totally acceptable to the House that will never be done in an election year. There is reform that was done by the Government Operation Committee with reference to the Federal employees that will never occur, and I could go through a list of 15 or 20 like that that are gone. As a matter of fact, let me talk a moment about the argument about how much do you save. Frankly, the $8 billion that the OMB director is talking about in savings and $8 billion in taxes for a total of $16 billion in reduction are patently absurd, but they do make a point, that since we have now passed three or four other bills that take credit for portions of these savings and change the law, it is probably somewhere between $50 billion and $60 billion, including the taxes, that we will save if we pass this bill.

But I am convinced that when we added scores of new programs, in particular those that the distinguished majority leader suggests we take out of this bill by unanimous consent, which was objected to, we put this in the position where the President not only will veto it but I think he will have at least an equal opportunity and perhaps more convincing the American people that we should not have put all those things in this bill and that to some extent by doing it the way we have, and the House is guilty also—I am not saying just the Senate—that we have made somewhat of a mockery out of a process that is supposed to be saving money and curtailing programs of this Government.

If I were not convinced of that, I would be here arguing the other way.

I ask unanimous consent to have printed in the RECORD for anyone who is interested a list of the disputes as to how much we are actually saving and how much they contend in the White House through OMB that we are saving, and I will repeat that I think the savings is about $50 billion over the next 3 years giving credit to some things that have already passed in appropriations or in the farm bill that should have been in this when we started this process.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Possible disputes on scoring resolved

Savings (gross)	$83.038
Offsets and minor registration already passed	−9.016
Subtotal	74.022
Agricultural credit (in farm bill)	−6.8
Subtotal	67.2
OCS (8g): (not a policy change)	−1.4
Subtotal	65.8
Highways (in app. bill)	−2.5
Subtotal	63.3
Medicare hospital reimbursement (can be done by regulation)	−4.0
Subtotal	59.3
IRS and Customs collections (dispute on scoring)	−3.3
Subtotal	56.0
Out-year civilian pay (can be done later, in theory)	−5.0
Total savings (if all allowances made for scorekeeping)	51.0
Net revenues	10.2

Mr. DOMENICI. Having said that, I do not want to mislead anyone. It will be very difficult in January and February to get this job done. We will be engulfed in a new budget. Gramm-Rudman will be staring us in the face in terms of a $144 billion deficit target for fiscal year 1987. The President will have already sent us a budget, but I am convinced that even if there is a slight chance we should do it, we should. Because I do not think there is any chance that we will get it by passing this bill as it now stands.

So I believe that, while there are many good reforms in it, we clearly should not have passed trade adjustment in confrontation with a 6-week-old letter of the President saying, "Do not put it in." I do not think we should have passed the 5-year moratorium on interest and accruals on the black lung indebtedness that will cost $2 billion. I do not think we should have changed the quality control under Medicaid and AFDC. Those were savings. We changed them.

I do not think we should have put the Superfund, as we planned to do it in this bill, in the manner that it originally came to us. But we did not take the President very seriously until about now. I think that is kind of too bad. I think we have to do what the majority leader suggested and give it at least a chance to survive.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. DOMENICI. I reserve the remainder of my time.

Mr. JOHNSTON. Mr. President, I yield 1 minute to the distinguished Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I think the chairman of the Finance Committee got a raw deal, but that is not the issue. I think there is a lot of junk in this bill and I pointed that out last night just before we all voted on it, and that is not the issue, because we knew there were a lot of things in there that were not so good.

There are two issues. One is that by sending this back to a conference committee, do we avoid a Presidential veto? And the answer to that is, no. If we send it to the conference, the bill is going to be dead. It is a new form of Presidential veto. It is a veto without sending a bill to the White House. Some of the President's people come up and say, "Look, we are going to veto this," so we shunt it off to conference.

The real issue, as far as I am concerned, and the reason I am going to vote for the motion to be propounded by the Senator from Louisiana, is very simple. This is the same bill we voted for last night 78 to 1, except for one thing. We are taking out a tax provision. It is, in every other respect, the same bill we voted for last night.

So the only reason to vote against it is that we are that much in love with the tax provision, and I am not. So I am going to support the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I yield 1 minute to the distinguished Senator from Nebraska.

Mr. EXON. Mr. President, obviously we are so restricted on time that we cannot debate this. I cannot begin to say what I wanted to say in 1 minute, but then that will make everyone happy.

I associate myself with the remarks of my distinguishd colleague and member of the Budget Committee, the Senator from Colorado. If you vote the way the leadership has asked you to vote, you kill the bill. I cannot understand how the same people that recommended that we vote for this 78 to 1, the same people who asked us to

send this back over there twice—and I was here both times and agreed to send it back by voice vote, although I had some serious concerns about the value-added tax—the same people now are telling us this would be a disaster unless we make three or four changes that the President of the United States has to have before he signs the bill. It is all nonsence. Let us not go along with the majority leader.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time?

Mr. STEVENS. Will the Senator from Louisiana yield to me for a question to him?

Mr. JOHNSTON. Yes, I yield.

Mr. STEVENS. Mr. President, the Senator from Louisiana has worked long and hard to solve some of the problems for the States that have substantial oil and gas production. But I would ask him this question: If we do not find a way to get this bill down to the President, it is my understanding that, when he submits his budget in January, all of the savings that would come by virtue of the entitlement changes that are in this bill must go into his budget, because he is compelled to spend that money. When he does that, he has to make corresponding changes to the budget in order to comply with the target of Gramm-Rudman-Hollings, as I understand it. That means that the Coast Guard is going to lose money, all of the parks in the Bureau of Land Management, all of the civilian agencies that the Senator from Louisiana and I have worked very hard on, and the Department of Defense, also, that he and I worked very hard on, are going to be cut, cut down because of the real savings in this bill.

Now, is there not some way that we can find a way to get together here before we vote on the majority leader's motion and find some way to see if we can get this bill in a fashion that we can agree on in a bipartisan way to accomplish the objective the minority leader wanted to accomplish weeks ago and take advantage of the reduction in that budget that is going to come in January? Has the Senator really thought about the impact on the programs we have worked so hard on if this bill is not signed?

The President says he is not going to sign it. The Senator from Louisiana says, "Send it down to him so he will veto it." I happen to believe that man at 1600 Pennsylvania Avenue. He never told me he was going to do something and then did not do it. I tell you, I think he will veto it. I think the Senator from Louisiana would like to see a solution and I would like to see a solution. Is there not some way we can work out that solution tonight?

Mr. JOHNSTON. Mr. President, I believe the answer to that question is by voting for the motion to table the Senate amendment and sending this bill down to the President, I believe that cooler heads and he will sign the bill.

Mr. President, I yield the remainder of my time to the distinguished Senator from West Virginia.

The PRESIDING OFFICER. The Democratic leader is recognized.

Mr. BYRD. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. BYRD. Mr. President, in 2 minutes, let me just say that twice we on this side have supported the effort to send the Senate amendment to the House of Representatives for conference action. Twice the House has rejected the Senate amendment, and the House is going to reject it if we send it back again. It is a way to kill this bill. It is a way to let Mr. Reagan avoid having to face up to the question as to whether he will sign a bill making budget deficit reduction now.

A motion now to table the Senate amendment will send this measure to the White House immediately. We are fast losing a quorum. We may still have a quorum here now. But this is the 20th day of December. Does anyone around here really believe that there will be more Senators here tomorrow; that there will be more Senators here on Monday; that there will be more Senators on Tuesday? Does anyone here really believe the House of Representatives will take this up again? They have twice spoken. They have twice rejected this amendment. Does anyone really believe the House will establish a quorum and take this amendment up again? No.

If we send this back to conference, that is the end of this measure, because the House is not going to accept this Senate amendment. In the meantime, we will have lost a quorum.

I say, let the President veto this measure if he wishes to do so. He has that power under the Constitution. But we have a responsibility, too. This is our chance to pass a budget deficit reduction that will amount to $79 billion, according to the CBO; there is some question, but what baselines are the OMB using? That is what I would like to know. They can come up with different positions and different figures anytime it suits their convenience.

But I say the responsibility is on this Senate now to act and to act decisively. I hope the distinguished Senator from Louisiana will move, when the time has expired on both sides, to table the Senate amendment. We have tried it. We have stood by it. We do not want to see this bill killed.

The question is: Do we want deficit reduction, and do we want it now? This is our chance.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired. The Senator from New Mexico has 1 minute remaining.

Mr. DOMENICI. Mr. President, I am going to use my 1 minute and tell the Senate I do not think anybody around here has worked harder to make this process work than the Senator from New Mexico. I did not put all these provisions in this bill, and everybody knows that. Our procedure is that the committees do their work. If there is any blame, it is that we, 3 or 4 weeks ago, on this side and on that side, decided we could use this reconciliation to do anything we wanted. We decided we would add new programs so long as the addition of programs did not eat up the savings that we found somewhere. Maybe we have learned a lesson; maybe we have not.

Frankly, the issue is no longer the Superfund tax. It is the five or six or seven programs that we probably either should not have put in or went a little bit overboard on. But, at least, I believe the President will veto it and we will not get a chance to realize any of those.

I want to say to the Senator from Louisiana that I appreciate his work. He did a masterful job all the way through. I wish we could be here today getting it finished. I think we might in January and February.

So I hope the Senator's motion does not prevail.

The PRESIDING OFFICER. All time on the motion has expired.

Mr. JOHNSTON. Mr. President, I move to table the Senate amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I ask unanimous consent that the Chair secure order, maintain order, and that the clerk announce the vote of each Senator as it is called.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion of the Senator from Louisiana to lay on the table the amendment of the Senate to the reconciliation bill. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from Alabama [Mr. DENTON], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Washington [Mr. EVANS], the Senator from Utah [Mr. GARN], the Senator from Iowa [Mr. GRASSLEY], the Senator from Oregon [Mr. HATFIELD], the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Idaho [Mr. MCCLURE], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Virginia [Mr. TRIBLE], and the Senator from Connecticut [Mr. NICKLES] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "nay."

Mr. BYRD. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from Oklahoma [Mr. BOREN], the Senator from North Dakota [Mr. BURDICK], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Connecticut [Mr. DODD], the Senator from Missouri [Mr. EAGLETON], the Senator from Colorado [Mr. HART], the Senator from Massachusetts [Mr. KENNEDY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Montana [Mr. MELCHER], the Senator from Ohio [Mr. METZENBAUM], the Senator from New York [Mr. MOYNIHAN], the Senator from Georgia [Mr. NUNN], the Senator from Rhode Island [Mr. PELL], the Senator from Arkansas [Mr. PRYOR], the Senator from Michigan [Mr. RIEGLE], the Senator from Maryland [Mr. SARBANES], the Senator from Illinois [Mr. SIMON], and the Senator from Nebraska [Mr. ZORINSKY] are necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] and the Senator from North Dakota [Mr. BURDICK] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 29, nays 35, as follows:

[Rollcall Vote No. 380 Leg.]

YEAS—29

Armstrong	Glenn	Long
Baucus	Gore	Matsunaga
Bentsen	Harkin	McConnell
Bingaman	Heflin	Mitchell
Bradley	Hollings	Nickles
Bumpers	Inouye	Proxmire
Byrd	Johnston	Rockefeller
DeConcini	Kerry	Sasser
Exon	Leahy	Stennis
Ford	Levin	

NAYS—35

Abdnor	Hatch	Roth
Andrews	Hecht	Rudman
Boschwitz	Heinz	Simpson
Chafee	Helms	Specter
Cochran	Kassebaum	Stafford
D'Amato	Kasten	Stevens
Danforth	Laxalt	Symms
Dole	Lugar	Thurmond
Domenici	Mattingly	Wallop
Goldwater	Packwood	Warner
Gorton	Pressler	Wilson
Gramm	Quayle	

NOT VOTING—36

Biden	Evans	Metzenbaum
Boren	Garn	Moynihan
Burdick	Grassley	Murkowski
Chiles	Hart	Nunn
Cohen	Hatfield	Pell
Cranston	Hawkins	Pryor
Denton	Humphrey	Riegle
Dixon	Kennedy	Sarbanes
Dodd	Lautenberg	Simon
Durenberger	Mathias	Trible
Eagleton	McClure	Weicker
East	Melcher	Zorinsky

So the motion to lay on the table was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the motion to insist.

Mr. BYRD. Mr. President, how much time remains on the vote?

The PRESIDING OFFICER. All time has expired on the vote.

The question is on agreeing to the motion.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask that further proceedings under the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. the Senate will be in order.

The question is on agreeing to the motion to insist.

Mr. JOHNSTON. Mr. President, I move to recede from the Senate amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I ask that there be a time agreement of 10 minutes, 5 minutes on a side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, what this motion would do would be to have the Senate concur in the action of the House of Representatives, which is to say we would adopt the action the Senate approved here by 79 to 1, with one exception, and that is to excise or take from our bill the so-called Supefund tax, the excise tax that was objectionable in the House of Representatives. That is all this motion would do. If passed, this motion would send to the President a bill directly so that he by his signature could save $79½ billion. Every day delayed is $50 million in the meantime.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, we are going to check to see if the distinguished chairman of the Finance Committee desires some time but let me just say to the Senate, if I understand this correctly, this is just another way of voting on the same issue we disposed of on the motion to table. If the motion of the distinguished Senator from Louisiana prevails, and if the House approves it, this bill goes to the President just as it would have gone to the President had the motion to table prevailed. I think we made the arguments that that would be an act of futility and in the national interest we ought to salvage whatever opportunity we have to get a major reconciliation bill and that it is far better served if we send this bill back to conference.

They will have time in January and February to decide whether we can get a conference report that would salvage substantial portions of the amount of money saved and taxes imposed in this measure.

I reserve the remainder of my time.

Mr. JOHNSTON. Mr. President, I yield 1 minute to the distinguished Senator from Texas.

Mr. BENTSEN. Mr. President, what we are talking about is that if we do not do it this way and we come back and try to change this reconciliation measure in any way, we are told that there is no quorum in the House of Representatives. They are operating under unanimous consent. So what we have done in this situation, I think, is a rather cynical move to get it over there and let it die. When you do that, you give up 74 billion dollars' worth of savings. It is the same vote we had the other day by 78-to-1, and we are sending it there to die, supposedly, to put the responsibility on the House of Representatives.

Frankly, that is what brought about Gramm-Rudman. I saw a lot of people who voted for it and said they were against it but had to vote for it to exercise discipline. This shows that we are not exercising our responsibility in the U.S. Senate, and it brings discredit to this institution.

I can tell you what the press is going to write: "Once again, the Congress of the United States ended up quarreling with itself and would not face up to

making the cuts that have to be made in a responsible way to save money for the taxpayers of this country."

Mr. LONG. Mr. President, will the Senator yield?

Mr. BENTSEN. I yield.

Mr. LONG. If this motion carries, we will be receding on the amendment of the Senate. That is the Superfund tax.

Mr. BENTSEN. That is right. I say to my friend that I do not think anyone worked harder than I did on the Superfund. I feel very strongly about it. But I feel that we will fight that one another day. I think that with all the work we have done in the subcommittees, and arriving finally at a compromise and an agreement, we should carry it out.

Mr. LONG. I supported the Senator in that matter every step of the way, as did most of us on this side of the aisle, but it is obvious to me that we cannot preavail on that. There is no way on Earth we can prevail on that matter. The House voted on it twice and defeated it by a larger vote the second time. Apparently, the House is not going to have a quorum, anyway. That means it is the end of it.

Mr. BENTSEN. We should understand that, as we cast this vote, we are sending it over there to die, because they do not have a quorum.

Mr. EXON. Mr. President, the inconsistency of the Senate Republican leadership on this issue is amazing.

Last night, the Republican leadership in the House successfully led the effort to knock out the VAT, thus making it possible for the President to consider signing the bill to cut up to $80 billion.

Now, today, the confused Republican Senate leadership lead the Senate fight to scuttle the Republican leadership in the House. These are the same people who claim they want budget reductions and balanced budgets. They invented and gave birth to the Gramm-Rudman fraud.

The Republican Senate leadership, when it came to put their votes where their rhetoric was, ignored these budget cuts and put it all off again.

Budget reduction leadership is not talk and posturing. It can only be accomplished by the courage to do and not delay.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield to the Senator from Oregon.

Mr. PACKWOOD. Mr. President, let us not be mistaken about this being sent to die. It is being sent to conference, and there are four or five issues. This is not something that is going to take weeks and weeks, and it is not going to take the legion-sized number of conferees we had to do it. Will the House recede on AFDC, quality control? Will they recede on unemployed parents? Will they recede on some of the new spending programs that were added? I do not know. But this is not being sent back to die, so far as this conferee is concerned. I hope it is going back to strike an honest bargain.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield the remainder of our time to the majority leader.

Mr. DOLE. Mr. President, I want to indicate that I hope we will all vote "no" on this and see what we can salvage in another conference.

I think the President made it rather clear that he would like to accommodate us if we would knock out some of these spending programs.

I think that those talking about Gramm-Rudman should be looking at spending programs, the additional money for black lung. It was a House provision. A lot of new programs were added on the House side in reconciliation.

So I hope the motion will not prevail.

I want to determine whether or not we can assume that this will be the last rollcall vote. Members on both sides have been asking me, and I do not know. We are prepared to suggest that we can do all the rest by voice vote. I am not certain.

Mr. JOHNSTON. Mr. President, we are prepared to state that on this side.

Mr. DOLE. If we prevail on this vote, I will request a conference and the appointment of conferees, and I do not think we need rollcall votes on that. I do not want anybody to leave and wonder why they were not properly advised.

Mr. FORD. Does this mean we will voice vote the black lung provision that you want to take out of the House bill?

Mr. DOLE. No, we are going to conference.

Mr. FORD. We are going to conference on that. We do not vote on black lung.

Mr. DOLE. We are not going to vote on the cigarette tax extension, either.

Mr. FORD. I understand that, but it comes next, I hope.

Mr. DOLE. Maybe.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute.

Mr. JOHNSTON. Mr. President, I yield to the distinguished minority leader.

Mr. BYRD. Mr. President, let there be no doubt about it: If this loses, we will go to the motion to insist, and that will send the reconciliation package back over there, and that will be the cemetery. That is where reconciliation will die.

The distinguished majority leader said it is "not our problem" as to whether the House has a quorum. It is a problem for those of us who want to see budget deficit reduction now.

Some Senators say the President will veto this bill if it goes to him. We can say that is "not our problem"; let the President make the decision. Is that what we are trying to avoid?

If we want budget reduction now, this is the easiest and quickest way of getting it. If we vote it down, remember, Gramm-Rudman will be here, and it will be all the tougher because we did not take the right action to send this bill immediately to the President of the United States.

I will not press for rollcall vote, but I will have the record show that I voted against the motion to insist.

Mr. DOLE. That would be true on the request for a conference and the appointment of conferees.

Mr. BYRD. On the motion to insist. I will vote "no" on the motion to insist.

Mr. DOLE. I assure my colleagues that following that, I will request a conference.

Mr. BYRD. I will support the motion to name conferees. The die will have been cast. The Senate will have to reappoint them.

Mr. DOLE. After this vote, there will be a voice vote on a motion to insist, and a voice on requesting a conference, and a voice vote on appointing conferees.

Mr. BUMPERS. Mr. President, I do not presume to take over the job of the majority leader, but would he entertain the suggestion to have unanimous consent, so that some of us can leave, so that we will know that this is the last rollcall vote?

Mr. DOLE. Yes. I make that unanimous consent request, that following the disposition of—well, I do not know whether we can do that. I do not know who is going to prevail.

Mr. BYRD. That is a constitutional matter. I do not think we can enter into any consent agreement that the vote must be by voice. I will not insist on rollcall votes. I want the record to show that I will vote against the motion to insist on the Senate amendment and go back to conference.

Mr. DOLE. Let us all keep our hands down, and nobody will get the yeas and nays.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. LONG. I will support the idea of a voice vote, but can we have it understood that we will simply have the same conferees we had before? That way, there will be no need for a vote.

Mr. DOLE. There is a slight difference, because I think Senator CHILES, at the request of that side, has been substituted. He will be here in January. That is the only change.

Mr. LONG. That is fine.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the motion of the Senator from Louisiana.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from Alabama [Mr. DENTON], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Washington [Mr. EVANS], the Senator from Utah [Mr. GARN], the Senator from Iowa [Mr. GRASSLEY], the Senator from Oregon [Mr. HATFIELD], the Senator from Florida [Mrs. HAWKINS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Idaho [Mr. MCCLURE], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Virginia [Mr. TRIBLE], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

Mr. BYRD. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from Oklahoma [Mr. BOREN], the Senator from North Dakota [Mr. BURDICK], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Connecticut [Mr. DODD], the Senator from Missouri [Mr. EAGLETON], the Senator from Colorado [Mr. HART], the Senator from Massachusetts [Mr. KENNEDY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Montana [Mr. MELCHER], the Senator from Ohio [Mr. METZENBAUM], the Senator from New York [Mr. MOYNIHAN], the Senator from Georgia [Mr. NUNN], the Senator from Rhode Island [Mr. PELL], the Senator from Arkansas [Mr. PRYOR], the Senator from Michigan [Mr. RIEGLE], the Senator from Illinois [Mr. SIMON], and the Senator from Nebraska [Mr. ZORINSKY] are necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK] and the Senator from Rhode Island [Mr. PELL] would each vote "yea."

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 30, nays 35, as follows:

[Rollcall Vote No. 381 Leg.]

YEAS—30

Armstrong	Bumpers	Glenn
Baucus	Byrd	Gore
Bentsen	DeConcini	Harkin
Bingaman	Exon	Heflin
Bradley	Ford	Hollings
Inouye	Long	Proxmire
Johnston	Matsunaga	Rockefeller
Kerry	McConnell	Sarbanes
Leahy	Mitchell	Sasser
Levin	Nickles	Stennis

NAYS—35

Abdnor	Hatch	Roth
Andrews	Hecht	Rudman
Boschwitz	Heinz	Simpson
Chafee	Helms	Specter
Cochran	Kassebaum	Stafford
D'Amato	Kasten	Stevens
Danforth	Laxalt	Symms
Dole	Lugar	Thurmond
Domenici	Mattingly	Wallop
Goldwater	Packwood	Warner
Gorton	Pressler	Wilson
Gramm	Quayle	

NOT VOTING—35

Biden	Evans	Metzenbaum
Boren	Garn	Moynihan
Burdick	Grassley	Murkowski
Chiles	Hart	Nunn
Cohen	Hatfield	Pell
Cranston	Hawkins	Pryor
Denton	Humphrey	Riegle
Dixon	Kennedy	Simon
Dodd	Lautenberg	Trible
Durenberger	Mathias	Weicker
Eagleton	McClure	Zorinsky
East	Melcher	

So the motion was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The quesion now is on the motion to insist.

Mr. BYRD. Mr. President, we have a general understanding that no one who was present at the time will make a request for the yeas and nays.

I ask that the RECORD show that I will vote no on the motion to insist and there are other Senators who want that same privilege. I ask unanimous consent that they may show that in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The following Senators asked that they be recorded as voting "No" on the motion to insist: Senators ROCKEFELLER, EXON, JOHNSTON, and DECONCINI.

The PRESIDING OFFICER. The question is on agreeing to the motion to insist.

The motion was agreed to.

Mr. DOLE. Mr. President, I request a conference with the House and that the Chair be instructed to appoint conferees.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Clerk will state the names of the conferees.

Mr. DOLE. Mr. President, are the conferees the same as has previously been appointed, with one exception?

The PRESIDING OFFICER. With one exception, they are——

Mr. DOLE. I ask that they be approved without further reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER (Mr. WALLOP) appointed:

From the Committee on the Budget—General conferees: Messrs. Domenici, Armstrong, Mrs. Kassebaum, Messrs. Boschwitz, Symms, Chiles, Hollings, Johnston, and Sasser.

From the Committee on Agriculture, Nutrition and Forestry: Messrs. Helms, Dole, Lugar, Cochran, Zorinsky, Leahy, and Melcher.

From the Committee on Armed Services: Messrs. Goldwater and Nunn.

From the Committee on Banking, Housing and Urban Affairs: Messrs. Garn, Heinz, Proxmire, and Riegle.

From the Committee on Commerce, Science and Transportation: Messrs. Danforth, Packwood, Goldwater, Pressler, Gorton, Stevens, Hollings, Long, Inouye, Ford, and Riegle.

From the Committee on Commerce, Science, and Transportation for the consideration of sec. 6701 of title VI only: Messrs. Danforth, Packwood, Goldwater, Hollings, and Long.

From the Committee on Energy and Natural Resources: Messrs. McClure, Domenici, Wallop, Johnston, and Ford.

From the Committee on Energy and Natural Resources for the consideration of sec. 6701 of title VI only: Messrs. McClure, Hatfield, Domenici, Johnston, and Ford.

From the Committee on Environment and Public Works: Messrs. Stafford, Chafee, Simpson, Symms, Bentsen, Burdick, and Lautenberg.

From the Committee on Finance—General Conferees: Messrs. Packwood, Roth, Danforth, Chafee, Long, Bentsen, and Matsunaga.

From the Committee on Finance—For PBGC and ERISA Subconference only: Messrs. Packwood, Chafee, Heinz, Mitchell, and Moynihan.

From the Committee on Finance—For CHAMPU's Medical Subconference only: Messrs. Durenberger and Baucus.

From the Committee on Finance—For private health insurance coverage subconference only: Messrs. Heinz, Wallop, Durenberger, Baucus, and Pryor.

From the Committee on Governmental Affairs: Messrs. Roth, Stevens, Mathias, Cohen, Eagleton, Levin, and Gore.

From the Committee on Labor and Human Resources—General conferees: Messrs. Hatch, Stafford, Quayle, Kennedy, and Pell.

From the Committee on Labor and Human Resources—For PBGC and ERISA subconference only: Messrs. Hatch, Nickles, Thurmond, Kennedy, and Metzenbaum.

From the Committee on Small Business: Messrs. Weicker, Gorton, and Bumpers.

From the Committee on Veterans' Affairs: Messrs. Murkowski, Simpson, and Cranston.

Conferees on the Part of the Senate.

Mr. DOLE. Mr. President, I want to thank again my colleagues for their patience and understanding. I really believe that we have reached the right result. I know it is difficult for those who have been conferees to look forward to going back to conference. But I am advised by the distinguished chairman of the Finance Committee, and the chairman of the Budget Committee that they believe there may be some opportunity to still achieve some savings.

The President is on record now of indicating that he will sign the measure if we take care of these six programs, with one caveat. There may be some more entitlement programs which are added that have not yet been discovered by the President's advisers.

So it seems to me that we have an opportunity, and I hope we can reach a quick agreement when we come back. Or, if the House is prepared to go to conference now, I assume we can round up a few people that might even do that. But that would be highly unlikely.

In praise of Senators ROCKEFELLER and BYRD for their efforts to achieve compromise on financing of Black Lung Trust Fund.

Mr. MATSUNAGA. Mr. President, as a member of the Senate Finance Committee, I have worked long and hard with my colleagues on the reconciliation legislation that we are attempting to pass in final form today. One issue that has been especially difficult is the large deficit of the Black Lung Disability Trust Fund. For many months, Senate and House members have disagreed over what approach should be taken to solve this problem.

My distinguished colleague, the junior Senator from West Virginia, Mr. ROCKEFELLER, entered into the deliberations as soon as the problem was identified. For many months, he has played a pivotal role in bringing concerned Members of Congress, coal industry officials, and the United Mine Workers of America together to form a consensus on an equitable and responsible solution to the Black Lung Trust Fund deficit.

As a conferee on reconciliation legislation, I was constantly briefed by Senator ROCKEFELLER in the recent months on this important matter. Although the coal industry and coal miners are not part of my fine State of Hawaii, I have sympathized with my colleagues who represent States whose economies are directly linked to the coal industry. In particular, I felt that our Nation should not retreat from its obligation to provide relief to the victims of the crippling disease of black lung.

With Senator ROCKEFELLER's advice and assistance, I decided to back a compromise that is now in the final reconciliation bill. It was nuclear whether the Senate and House leadership would agree to the compromise until the final hours of our deliberations. But fortunately, the arguments on behalf of the compromise plan convinced the conferees to adopt it.

I supported this compromise because I was convinced it will restore the solvency of the Black Lung Trust Fund. Thanks to the leadership of concerned Senators including Senator ROCKEFELLER, we have taken responsible action in time to avoid significant harm to the Black Lung Program.

There are others to congratulate for the efforts that were made on behalf of this provision of the reconciliation legislation. In particular, our distinguished minority leader, the senior Senator from West Virginia, Mr. BYRD, who helped a great deal to reach this positive outcome.

The people of West Virginia are indeed well represented in the U.S. Senate.

Mr. SASSER. Mr. President, as we now await final resolution of the conference report on the budget reconciliation bill, I would like to take just a few minutes to talk about one provision in the bill that I feel is both a major disappointment and ill-advised; namely, the banking provisions dealing with the Urban Development Action Grant Program.

I support the reconciliation bill. Overall, it represents much needed deficit reduction to the tune of some $83 billion over the next 3 years; $20 billion this year alone.

Differences between the House and Senate banking conferees regarding major housing authorization provisions has led to a situation where UDAG formula changes, which have tediously been negotiated over an extended period of time, are basically being held hostage. This is most unfortunate to the many communities around this Nation which have been bypassed over the past several years by a formula which unduly works to the advantage of cities in certain regions of the country to the detriment of other regions such as cities in the sunbelt, including my State of Tennessee.

A tremendous amount of time and effort has gone into assuring formula changes which will guarantee both the continuation and efectiveness of this important public/private partnership initiative. Those of us who wanted to restore UDAG's original mission, to restore its definition as a truly action-oriented program, undertook these negotiations some 2 years ago. We have finally produced a compromise which is a compromise in the truest sense of the word, it is bipartisan, spans all regions of the country, and crosses philosophical and ideological lines.

UDAG's original mission has not changed. It is to provide a chance for distressed ubran communities to stem the tide of decay, and to do it with a unique public-private partnership approach. It is "to assist cities and counties which are experiencing severe economic distress to help stimulate economic development activity needed to aid in economic recovery." This commitment would come from a community's own citizens, its own businesses, its own State and local governments.

In times of fiscal and budgetary austerity, this is exactly the kind of initiative that we should be striving for. I regret that the changes that I and others including Senators RIEGLE, HEINZ, GRASSLEY, and D'AMATO have worked so hard to achieve are not included in this bill.

I do not know whether this reconciliation bill will be passed before we adjourn sine die today. But I would just like to state for the record that whatever happens here today, I will be back on this floor at the earliest possible time next year pressing for changes which will preserve the essential mission of the UDAG Program while at the same time trying to make changes in the distribution formula which are fairer and more equitable.

Mr. GORTON. Mr. President, one of the provisions of the reconciliation bill is intended to control Federal motor vehicle costs, so as to produce budget savings. I am concerned about the impact of this proposal on the Bonneville Power Administration (BPA). The BPA is principally financed by electric rate charges, and so reductions in its costs would be passed on through lower rates, rather than showing up as Federal budget savings. Given the exemption of the Tennessee Valley Authority and the Postal Service from this provision, as well as report language indicating that the purpose of the provision is to produce budget savings, I would anticipate that the Administrator of General Services would apply the act's requirements to vehicles the elimination of which would produce budget savings.

In addition, many of the vehicles of the BPA are special purpose vehicles used for electric system operation and maintenance, and are not supplied by GSA nor readily available for lease in the private sector. Such vehicles are clearly intended to be exempt from the act.

I ask unanimous consent that a letter from myself to Senator ROTH, the chairman of the Government Affairs Committee, and his reply to me, agreeing with this point, appear at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, December 6, 1985.

Hon. WILLIAM V. ROTH, Jr.,
U.S. Senator, Washington, DC.

DEAR BILL: I'm writing to let you know my concern that Amendment 857 to the Senate budget reconciliation bill—dealing with federal motor vehicle expenditure control—would have a substantial adverse effect on the Bonneville Power Administration [BPA], an effect that I don't believe the sponsor of the amendment intended. For these reasons I'm asking your support for a clarification of the definition of "motor vehicles" contained in the amendment.

As you know, the BPA is one of six federal power marketing agencies. It constructs, operates and maintains the electrical transmission system in the Pacific Northwest. Approximately 90% of its fleet is off-road and special purpose vehicles, used in the field.

These vehicles are required by the BPA in order to provide a reliable regional transmission network.

It is BPA policy to turn first to the General Services Administration [GSA] for their vehicle needs, and to purchase only those vehicles which GSA does not have available. There is no private sector alternative source for such specialized equipment. In addition, BPA is already in the process of conducting an A-76 study of its motor vehicle maintenance activities, to analyze whether these could be contracted to the private sector.

Given the unique characteristics of the BPA fleet, applying the requirements of Amendment 857 would result in a substantial paperwork burden to the agency with no real benefits through lower vehicle costs. I therefore ask your help in modifying the language to exclude such specialized field vehicles required by the six federal power marketing agencies from this amendment.

Attached is proposed bill and report which would seem to solve the problem.

Thank you for your attention.

Sincerely,

SLADE GORTON.

U.S. SENATE,
Washington, DC, December 17, 1985.

Hon. SLADE GORTON,
U.S. Senate, Washington, DC.

DEAR SLADE: I am responding to your December 6, 1985 letter regarding the Federal motor vehicle expenditure control provision included in the Senate budget reconciliation bill. You said this provision could have a substantial adverse impact on the paperwork burden to the agency with no real benefits through lower vehicle costs. We have reached agreement with the House, and I wanted to let you know the result now because of the uncertainty about when the conference report will be approved by the Congress.

The motor vehicle expenditure control provision in the final bill contains modifications that should allay your concerns. First, we simplified the data collection, study and reporting requirements which should reduce the paperwork burden, not only on BPA but also all Federal agencies subject to the provision. Second, we provided in the definition of "motor vehicle" that the Administrator of General Services could exempt from the provision's requirements "any other special purpose vehicle." This language was included to permit exclusion of field vehicles such as those required by Bonneville Power and the other five power marketing agencies. Therefore, I would expect the Administrator to act favorably on any request from these agencies for an exemption of their special purpose vehicles.

Sincerely,

WILLIAM ROTH, JR.
Chairman.

Mr. BENTSEN. Mr. President, there is no one in this Chamber more disturbed than I am by the failure of the other body to abide by the conference agreement, which was negotiated in good faith over many weeks.

But we must be realistic and deal with the options that confront us, and from what I can see those options are very limited. To be more precise, I believe they have been narrowed down to two.

We can either send a budget reconciliation bill to the White House or not.

Let me tell you what it means if the U.S. Senate fails to send a bill to the White House.

It means that the U.S. Senate will be responsible for adding $52 million to the Federal deficit every day that legislation is not signed into law.

We're talking here, after all, about legislation that will reduce the Federal deficit by more than $18 billion during the current fiscal year and by $74 billion over the next 3 years.

(So far as my own State of Texas is concerned, the budget reconciliation bill also ends a long controversy over revenues from offshore oil and gas. My State's economy is struggling and our State finances are strained. This legislation would provide $456 million to our State treasury immediately—money we need immediately—and a total of $772.4 million over the next 10 years. I fought hard in the Senate to insure Texas a fair share of these funds. We won that debate and we should carry out that decision.

It was only 1 week ago that the Senate approved legislation intended to eliminate the Federal deficit by 1991. Yesterday we voted for this legislation by a vote of 78 to 1. We are today facing our first hard choices on budget reduction since Gramm-Rudman was signed into law and a failure to act now—however persuasive the arguments might seem—would get this effort off on the wrong foot.

Mr. President, in my view we have no choice but to bring about this saving to the taxpayers and approve the budget reconciliation legislation sent to the Senate by the House of Representatives.

Thank you.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business for not to extend beyond the hour of 6:30 p.m. this evening.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONRAIL

Mr. DOLE. Mr. President, when we return in January, unless there is something unforeseen which happens, and I do not anticipate anything, it will be the intention of the majority leader to turn to Conrail as the first order of legislative business.

That is a matter of extreme interest to many of my colleagues, and to the Secretary of Transportation.

I think the distinguished chairman of the Commerce Committee wanted to make some comments.

Mr. DANFORTH. Mr. President, let me express my appreciation to the majority leader for that announcement.

The offer of Norfolk Southern Corp. to buy Conrail expires at the end of the year. I met recently with the CEO of Norfolk Southern, Robert B. Claytor, to discuss the status of the sale of Conrail legislation (S. 638). I told Mr. Claytor that while the Senate will not have time to consider the matter fully this session, it is my intention to bring S. 638 to the floor as the pending business when we reconvene in January. On the basis of this assurance, Mr. Claytor has indicated that he considers this to be substantial progress and has committed that Norfolk Southern is willing to extend its agreement with the Department of Transportation long enough to allow the necessary consideration and a vote on S. 638.

SINE DIE ADJOURNMENT

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 267, the adjournment resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

A concurrent resolution (H. Con. Res. 267), providing for a sine die adjournment of the first session of the 99th Congress.

There being no objection, the Senate proceeded to the immediate consideration of the concurrent resolution.

Mr. BYRD. Mr. President, may I ask the distinguished majority leader a question?

Does this resolution have in it the common provisions that have been put into such adjournment resolutions recently allowing the House and Senate to call themselves back?

Mr. DOLE. It does contain that language.

Mr. BYRD. I thank the distinguished majority leader.

Mr. DOLE. Mr. President, can we have that portion of it read? I think it is important.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

SEC. 2. The Speaker of the House, after consultation with the Minority Leader of the House, and the Majority Leader of the Senate, after consultation with the Minority Leader of the Senate, acting jointly, shall notify the Members of the House and Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 267) was agreed to.

Mr. DOLE. Mr. president, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR TUESDAY, JANUARY 21, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes the 99th Congress, the 2d session, on Tuesday, January 21, 1986, that the reading of the Journal be dispensed with, that no resolution come over under the rule, and that the call of the calendar be dispensed with.

THE PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the Senator from Wisconsin, Mr. PROXMIRE, be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that following the special order, there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with Senators permitted to speak therein for not more than 5 minutes each, and, provided further, that the morning hour be deemed to have expired.

THE PRESIDING OFFICER. Without objection, it is so ordered.

FILING OF COMMITTEE REPORTS

Mr. DOLE. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until January 21, 1986, that committees be authorized to file reports between the hours of 10 a.m. and 3 p.m. on Wednesday, January 8, 1986.

THE PRESIDING OFFICER. Without objection, it is so ordered.

TEMPORARY EXTENSION OF CERTAIN PROGRAMS RELATING TO HOUSING

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Joint Resolution 495, relating to housing programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 495), to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

There being no objection, the Senate proceeded to the immediate consideration of the joint resolution.

The PRESIDING OFFICER. The question is on the joint resolution.

The joint resolution was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TEMPORARY EXTENSION OF CERTAIN TAX PROVISION

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4006.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 4006) entitled "An Act to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985", with the following amendments:

In lieu of the matter inserted by the amendment of the Senate to the text of said bill, insert:

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "December 20, 1985" and inserting in lieu thereof "March 15, 1986".

SEC. 2. EXTENSION OF MEDICARE HOSPITAL AND PHYSICIAN PAYMENT PROVISIONS.

Section 5(c) of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out "December 19, 1985" and inserting in lieu thereof "March 14, 1986".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall take effect on December 19, 1985. As an exercise of authority under the commerce, taxation, and other powers under the Constitution, the amendment made by section 1 shall be treated for purposes of all Federal and State laws as enacted on December 19, 1985.

In lieu of the matter inserted by the amendment of the Senate to the title of the aforesaid bill, insert: "An Act to extend until March 15, 1986, the application of certain tobacco excise taxes and certain medicare reimbursement provisions.".

Mr. DOLE. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATSUNAGA. Mr. President, will the majority leader yield?

Mr. DOLE. I am happy to yield to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I had intended to offer to this bill an amendment to extend the tax credits for renewable energy such as solar and geothermal projects. But, after consulting with the chairman of the Finance Committee, with the majority leader, and with the minority leader, I decided against offering the amendment because it would have put the tobacco and Medicare tax extensions in jeopardy. This is true because the House does not have a quorum, and it would have taken just one single voice to defeat the bill.

I was told that we could take up the matter of the renewable energy credits early next year which would be made retroactive to January 1 anyway.

I wish to express my deep appreciation to the chairman.

Mr. PACKWOOD. Mr. President, could I address the point raised by the Senator from Hawaii? As he knows, I have been a long supporter of this program. There are a good many other programs that are expiring. It would be my hope that any of those that are kept would be kept retroactive when they expire at the end of this year.

Mr. MATSUNAGA. I thank the chairman. I yield the floor.

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, I would like to inquire of the distinguished minority leader if he is in a position to confirm the following military nominations for posthumous promotions reported from the committee today: In the Army, to be captain, Lt. John K. Kosh, Lt. Paul D. Long, Lt. Joey McCarty, and Lt. Barry C. Powell.

To be chief warrant officer 4, CWO-3 Robert A. Bowen.

Mr. BYRD. Mr. President, I believe that these were officers who were on the plane which crashed. Not only do we not have any objection on this side, but we also support the request that the nominations be confirmed for posthumous promotion.

Mr. DOLE. Mr. President, I want to join the distinguished minority leader in urging the confirmation of the promotions.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider and confirm the nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the nomina-

tions be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection the nominations are considered and confirmed en bloc.

The nominations confirmed en bloc are as follows:

The following named officers for posthoumous promotion to the grade indicated under the provisions of article II, section 2, clause 2 of the Constitution of the United States of America:

ARMY

To be captain

Lt. John K. Kosh, [redacted]
Lt. Paul D. Long, [redacted]
Lt. Joey McCarty, [redacted]
Lt. Barry C. Powell, [redacted]

To be CWO-4, CWO-3 Robert A. Bowen, [redacted]

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

YEAR-END WRAP-UP

Mr. DOLE. Mr. President, I know that most everyone is tired and anxious to leave. But before we adjourn, I would like to say a word of thanks to some of the many, many people who help lighten my workload, and make being majority leader, if not a cakewalk, a more pleasant experience.

First, ALAN SIMPSON, the assistant majority leader, whose ready sense of humor and canny insights have helped us out of many legislative thickets. And whose willingness to step in for me, when necessary has been of immeasurable help.

All of the Republican leadership, STROM THURMOND, President pro tempore, JOHN CHAFEE, the chairman of the Republican Conference, BILL ARMSTRONG, the chairman of the Republican Policy Committee, and JOHN HEINZ, the chairman of the Senatorial Committee, all have been of enormous assistance through this session.

And while we have had our differences, I want to offer my gratitude to the Democratic leader, the distinguished Senator from West Virginia BOB BYRD. Throughout the session he has been both approachable and forthright. Because of this and his willingnesss to act as a mediator we were able to come to resolution on many difficult issues.

Thanks also to the Secretary of the Senate, Jo-Anne Coe and her staff, including those in the office of the official reporters and those in the Parliamentarian's office who work under the fine direction of Bob Dove; the Sergeant at Arms, Ernest Garcia and everyone in his office; the secretary to the majority, Howard Greene and his staff, John Tuck, Elizabeth Baldwin, and the entire legislative scheduling and Cloakroom staff. And or course, the pages.

Rev. Richard Halverson, the Senate Chaplain, provides solace and inspiration to us day after day, and for this I offer my appreciation.

Finally, a special word of thanks to my staff, both those in my personal office and the majority leader's staff. Without their efforts, many of the achievements the Senate can point to would not have come about, or fallen short.

ACCOMPLISHMENT OF 1985

Mr. President, I think the Senate, and Congress for the matter, has many reasons to leave Washington feeling proud. This was a year when Congress took the initiative, set the agenda, and grappled with difficult, controversial, but imperative issues.

When we convened last January each of us had our personal legislative agendas. But, I believe all of us shared one overriding goal—a goal imposed upon us, I might add, by the American public. That was to finally come to terms with the perilous Federal deficit.

For some months, it may have looked like the Senate was on the road to nowhere. But, after many twists and turns, we finally adopted a budget resolution calling for historic deficit reductions. And in response to continued frustration over the deficit, passed the Gramm-Rudman-Hollings balanced budget plan. The capstone to the year's deficit-cutting efforts came just today, when we agreed to the budget reconciliation package—putting into effect as much as $83 billion in deficit reductions—approximately $69 billion in outlays over 3 years, and $14 billion in additional revenues. I am very disappointed that we were unable to reach final agreement with the House because of the debate on the financing of Superfund.

The whole tone and tenor of this session was set by the deficit. Almost every action we took, whether it was authorizing defense programs, or providing credit for American farmers, was touched by the deficit.

Gone are the days when Congress had the luxury of creating new Federal programs. Today we must live with the realities of retrenchment. We, like it or not, are charged with deciding what the Federal Government's role really is. Those decisions are not easy ones. And we have only just begun to confront them.

Next year's challenges will be monumental. But we should not give short shrift to what Congress, through its determination, achieved this year. No longer can the American people doubt that we are serious about putting our fiscal house in order; 1981 marked a turning point in our Nation's economic history. Congress did not change course in 1985, but it shifted into high gear. And we will stay in high gear until we have guaranteed, through responsible fiscal policies, that economic growth and prosperity are here to stay.

While economic concerns were the focus of this session, questions of national and world-wide security were also central. And I believe our record, on the defense budget, aid to the Nicaraguan Contras, South Africa, the Jordan arms sale, the compact of free associations, and many others, is one that sustains our country's commitment to perserving world peace.

Congress also passed historic reforms in agriculture policy. The farm bill, which we cleared yesterday, sets a new direction by reducing support for basic commodities, increasing funds for export promotion and farm credit programs, and extends the Food Stamp Program. And the farm credit bill, should provide farmers with the credit aid they need by shoring "P," the multibillion dollar Farm Credit System.

The Senate also dealt with issues long overdue for action—the foreign aid authorization bill, gun control, nominations to the Legal Services Corporation. And while Congress did not complete work on several major issues, the Senate-passed Superfund, immigration, and clean water legislation.

Mr. President, the list of measures and issues, considered or adopted by the Senate is long and impressive. And rather than go on, at this point I would ask unanimous consent to insert in the RECORD a summary, prepared by each of the committees, of this session's accomplishments.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON AGRICULTURE, NUTRITION AND FORESTRY DURING THE 1st Session of the 99th CONGRESS

The Committee on Agriculture, Nutrition, and Forestry guided by its distinguished chairman, Senator JESSE HELMS, has developed in the first session of the 99th Congress agricultural programs that will signficantly affect the Nation and the world. Congress has an important role to play as partner with the farm community in strengthening the farm economy and in assuring farmers and ranchers the greatest possible opportunities for operating profitable farm and ranching businesses.

During the first session of the 99th Congress, the committee conducted nine confirmation hearings on Presidential appointments, and reported favorably on every nomination.

The committee received and reviewed 25 reports on various Department of Agriculture functions; 99 bills, resolutions, and amendments were referred to the committee and its six subcommittees; and six reports on legislation were filed. The committee conducted 27 hearings, six field hearings, and four subcommittee hearings relating to farm legislation and executive branch appointments. The committee conducted 49 legislative drafting sessions over 38 different days, and 12 sessions in conference over 8 days.

The committee's work during the first session of the 99th Congress was centered around the Food Security Act of 1985, otherwise known as the farm bill. Other legislation included a bill to defer the wheat referendum, and the reporting of several measures which were subsequently incorporated into the farm bill.

The farm bill reauthorized price and income support and production control programs for the 1986–90 crops of wheat, feed grains, unplant cotton, rice, soybeans, sugar and peanuts, as well as for production of dairy products, honey and wool and mohair. It also included major legislation and reauthorization for:

Public Law 480, the Food for Peace Program;

Other key farm export programs, including authorization of an intermediate farm credit program;

Authorization of a 40-million acre conservation reserve to retire highly erodible acres from producing a compromise on the status of clear title regarding mortgaged commodities;

The Food Stamp and Nutrition Programs;

Major modifications in annual welfare legislation; and

The first restructuring in legislation governing application of the cargo preference laws to agricultural exports.

In addition, the committee reported legislation fulfilling its obligations under the reconciliation procedures of the Budget Act, reducing spending in agricultural functions by $7.9 billion over 3 years. This legislation included modifications in export programs, agricultural credit programs, and the Food Stamp Program. These provisions were subsequently included in the farm bill.

Also, legislation reforming the Farm Credit System was passed by the Senate under committee direction. This legislation provided for the restructuring of the Farm Credit System revamped and increased the regulatory authority of the Farm Credit Administration and authorized Federal assistance to the system should that prove necessary.

Further, under the committee direction the Senate-passed legislation to extend certain expiring child nutrition programs, with a conference on similar legislation passed by the House of Representatives to be held early in the second session of the 99th Congress.

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON APPROPRIATIONS DURING THE 1ST SESSION OF THE 99TH CONGRESS

The 1st session of the 99th Congress has been an extremely busy one for the Committee on Appropriations. During the year, 18 separate appropriations measures were considered and passed by the Senate.

Although none of the 13 regular appropriations bills were enacted prior to the start of the fiscal year, 6 of these measures have subsequently become law. These included: the energy and water development; Commerce, Justice, State, judiciary; legislative, Housing and Urban Development; Transportation; Labor, Health and Human Services; and finally, the military construction appropriations bills. Extreme budgetary constraints confronting the Congress, and the attendant difficult choices and priorities, have resulted in prolonged delays in the consideration of budget and appropriation legislation.

It was not until September that the guidance on overall budgetary allocations was provided to the committee. This allocation represented an unprecedented degree of expenditure stringency. The committee met this challenge and has succeeded in reporting to the Senate all 13 regular appropriations bills, and 10 of these bills were subsequently passed by the Senate. In addition to the six appropriations bills noted above, the Senate also passed the following appropriations bills: Agriculture, rural development, and related agencies; Housing and Urban Development; Treasury; Postal Services; and finally the District of Columbia appropriations bill.

Unfortunately, the very heavy Senate schedule this fall precluded final action on all these separate measures. During debate on the final continuing resolution, however, the Senate was able to express its will on the remaining appropriations legislation and again the actions recommended by the committee have yielded appropriations for fiscal year 1986 within the total budget allocation for budget authority within its jurisdiction.

SUMMARY OF ACTIVITIES—1985 OF THE SENATE COMMITTEE ON ARMED SERVICES DURING THE 1st Session of the 99TH CONGRESS

The Senate Committee on Armed Services consists of 19 members: Senator Barry Goldwater (R-AZ), Strom Thurmond (R-SC), John W. Warner (R-VA), Gordon J. Humphrey (R-NH), William S. Cohen (R-ME), Dan Quayle, (R-IN), John P. East (R-NC), Pete Wilson (R-CA), Jeremiah Denton (R-AL), Phil Gramm (R-TX), Sam Nunn (D-GA), John C. Stennis (D-MS), Gary Hart (D-CO), J. James Exon (D-NE), Carl Levin (D-MI), Edward M. Kennedy (D-MA), Jeff Bingaman (D-NM), Alan J. Dixon (D-IL), and John Glenn (D-OH). There are currently six subcommittees: Military Construction, Strategic and Theater Nuclear Forces, Preparedness, Sea Power and Force Projection, Manpower and Personnel, and Defense Acquisition Policy.

There were 66 Senate bills, resolutions and joint resolutions and 6 House bills referred to the Committee in 1985. Five of these bills were enacted into public law.

The Committee devoted a great deal of time to an analysis of the FY 1986 Department of Defense Authorization Bill. A total of 59 hearings and 14 markups were held by the Committee and its subcommittees on this bill. Conference was completed on July 26, 1985, after two weeks of intense deliberation. The bill was signed into law by the President on November 8, 1985. The bill includes authorizations for procurement, research and development, operation and maintenance, stock funds, special foreign currency programs, and various other legislative provisions for the Department of Defense. When combined with the effects of other defense funding legislation, the conference bill authorized appropriations of approximately $302.5 billion in budget authority for the FY 1986 National Defense function, a reduction of $19.7 billion from the President's request. This amount is consistent with the funding level approved by the Congress in the First Concurrent Budget Resolution, and represents inflation-only growth over final funding approved for FY 1985.

During the meetings of the Committee to discuss tactical warfare issues the focus was to continue the essential modernization of our conventional forces and to strive to achieve the most efficient and economic production rates of tactical systems.

The Subcommittee on Strategic and Theater Nuclear Forces conducted 12 hearings during February and March in connection with the FY 1986 Defense Authorization bill. These hearings focused on U.S. strategic offensive force programs; the Strategic Defense Initiative; strategic command, control and communications; theater nuclear forces; and the binary chemical modernization program. The members received several classified briefings on Soviet capabilities.

This Subcommittee also conducted two hearings on the serious issue of Soviet treaty violations. These hearings addressed the actual violations and their implications for U.S. national security. The Subcommittee began to focus on the issue of how the U.S. should respond to Soviet treaty violations, and will continue to study this issue next year.

The meetings of the Subcommittee on Preparedness concentrated on the readiness of the United States military capability. The readiness review was conducted in conjunction with the oversight of the operation and maintenance and ammunition portions of the DOD budget request. In making recommendations on the level of DOD authorizations for these two areas of the budget, military capability was also examined. Specific areas of the concern upon which this subcommittee focused during 1985 were: the increasing overhead costs involved in supporting the expanded defense buildup; the shortfalls in ammunition stockpiles and production base; procedures for estimating current and future O&M funding requirements, trends in military capability; force readiness and force sustainability; and review of potential cases of waste and abuse in the accounts under the responsibility of the Preparedness Subcommittee.

There were 8 hearings of the Subcommittee on Sea Power and Force Projection in 1985. The full Committee was also briefed in January on the Navy's "Forward Maritime Strategy." During February and March, the Sea Power and Force Projection Subcommittee held additional hearings beginning with a classified assessment of the current global maritime threat to U.S. interests. Subsequent hearings addressed such issues as the Navy's global commitments, the U.S. fleets' readiness and sustainability, and the Air Force airlift program. The subcommittee also held a hearing in October to consider Senate Bill S. 535, the "National Shipbuilding Industrial Base Act of 1985."

In the 15 meetings of the Subcommittee on Manpower and Personnel, the Committee embarked upon a course to make more efficient use of compensation funds. The committee recommended that military retirement be restructured so that more compensation would be available for use during active duty careers. Specific legislation to effectuate these changes will be considered by the Committee early in 1986. At the

same time, the Committee took action to improve a number of special and incentive pays and to improve the quality of life for military personnel. The Committee also conducted a number of hearings on the military health care system, and continues to work with the Department of Defense in the formulation of programs which will improve that system's ability to provide top quality health care to military personnel and their families.

The Defense Acquisition Policy Subcommittee held ten hearings in 1985 on defense acquisition issues. The first two hearings, on January 30 and February 20, were devoted to receiving testimony on the strengths and weaknesses of the defense acquisition system from defense industry executives and procurement experts. Four additional hearings in March addressed the issues of increasing the professionalism of the acquisition workforce, the audit practices of the Department of Defense, the employment of former DOD acquisition personnel and the cost estimating procedures used by the Department of Defense. Finally, the Subcommittee held four oversight hearings during October and November on the implementation of the 1984 defense acquisition legislation.

The Subcommittee on Military Construction analyzed the Fiscal Year 1986 Military Construction Authorization Bill, which, as enacted, authorized $9.2 billion to replace outmoded and dilapidated operations, maintenance and training facilities as well as much needed family housing. Construction in support of new weapons as well as new missions accounted for $3.5 billion of the total. This year the Congress also passed legislation making it easier to close down unneeded and inefficient military bases and legislation promoting innovative alternative financing methods.

In May 1985, Senator Goldwater and Senator Nunn formed a Task Force on Defense Organization to focus the work of the Armed Services Committee on the organization and decision-making procedures of the Department of Defense and the Congress. The Task Force is co-chaired by Senator Goldwater and Senator Nunn and consists of Senators Cohen, Quayle, Wilson, Gramm, Bingaman, Levin and Kennedy. Almost two years earlier, Senator John Tower and the late Senator Scoop Jackson, directed the Committee staff to prepare a comprehensive study of this complex issue. Under the guidance of the Task Force, the staff completed and released its study, entitled Defense Organization; The Need for Change, on October 16, 1985.

In November, the Armed Services Committee initiated a lengthy series of hearings on the organization of the Defense Department and the Congress. The Committee held a total of 10 hearings in which it took testimony from 27 witnesses, and expects to consider legislation on this issue early in the second session of the 99th Congress.

Over the course of the past year the Committee reviewed the qualifications of and made recommendations to the Senate on thirteen Presidential nominees. Among these nominees were Admiral William J. Crowe, Jr. to be Chairman of the Joint Chiefs of Staff and John E. Krings to be the Director of Operational Test and Evaluation, a new position created by Public Law 98-94. The Committee also acted on 52,310 military nominations in the Army, Navy, Marine Corps and Air Force. All of these nominations were confirmed by the Senate.

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

During the first session of the 99th Congress the Senate Committee on Banking, Housing, and Urban Affairs, under the Chairmanship of Senator Jake Garn (R-Utah) continued its efforts to address significant issues raised in the rapidly changing financial services marketplace.

At the end of the 98th Congress the Senate Banking Committee brought together S. 2851, The Financial Services Competitive Equity Act, which passed the Senate 89 to 5, and sent the passed version on to the House but ended with the adjournment of the 98th Congress.

The size of the passing margin reflects the pressing need for legislation to continue addressing the competitive issues, consumer protection, and the regulatory issues raised by the constant changes in our financial services industry.

Chairman Garn says the Senate Banking Committee does not have to start all over again. Most of the issues defined in S. 2851 have not changed since the 89 to 5 vote last September. Modifications, if any, will be considered.

Members of both Houses consider the deposit insurance reform issue as the priority in the 2nd session and will command detailed attention at the full Committee level.

During the 1st session of the 99th Congress the full Committee and its Subcommittee held a total of 52 days of oversight and legislative hearings, having 289 witnesses testifying and contributing ideas to proposed legislation.

The Senate Banking Committee continued its oversight hearings on monetary policy for the first session of the 99th Congress in the calendar year of 1985. Two hearings were held, the first on February 20, 1985 and the second on July 16, 1985. Discussions were centered on Domestic and International economic developments, monetary aggregates, interest rates and velocity. The Committee continued its practice of inviting officials from the regulatory agencies and private economists to assist the members in their deliberations. Reports of the two hearings conducted by the Committee are:

Senate Report 99-22, April 2, 1985.

Senate Report 99-149, October 4, 1985.

The 52 days of hearings not only included the deposit insurance reform issue but also 9 days of oversight hearings on the Comprehensive Reform in the Financial Services Industry, etc.

In view of the fact that no banking legislation passed into law during the 1st session of the 99th Congress, the Senate and House Banking Committees emphasize that the legislative pace during the 2nd session will pick up around April 1987, with a bill hopefully being signed into law by the President in July 1986.

ACTIVITIES OF THE SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

During the first half of the 99th Congress the Subcommittee focused its attention on all areas of housing and urban affairs. Every aspect of the issues charged to the Housing Subcommittee was examined in light of the President's budget proposal and the crippling deficits currently facing the United States.

The full Committee held three hearings: March 22, March 25 and April 15, on housing and urban affairs. Numerous representatives of transportation, community development, rural housing, as well as the Secretary of HUD and the head of the Office of Management and Budget testified before the Committee.

Under the Budget Reconciliation Act (S. 1730), four issues within the Subcommittee's area of responsibility were addressed:

(1) Section 108 Community Development Loan Guarantee Program: This saves the Federal Government $250 million annually, the same result as eradicating the program (the Administration's original proposal). It prohibits the Federal Financing Bank from purchasing notes or other obligations guaranteed under Section 108 of the Community Development Block Grant Program after June 30, 1986, and requires the Secretary of HUD by July 1, 1986, to take the actions necessary to provide for the financing by the private sector of loans guaranteed under Section 108. It also authorizes $1.279 billion in fiscal year 1986 for public housing operating subsidies.

(2) Rural Housing Authorization: This section provides that the aggregate principal amount of loans that may be guaranteed or insured in fiscal year 1986 may not exceed $2,146,600,000 to be allocated as follows: Sec. 502 homeownership loans $1,209.6 million; Sec. 515 rental loans $900 million; Sec. 514 farmworker housing loans $19 million; Sec. 524 site loans $1 million; and, Sec. 504 repair loans $17 million.

Management of Insured and Guaranteed Loans: (a) Prohibits rural housing loans made directly by private lenders and insured by the Farmers Home Administration from being sold to the Federal Financing Bank; (b) Provides that each insured or guaranteed loan contain an agreement by FmHA to pay the difference between the interest rate paid by the borrower and the full private market rate of interests. (c) Provides for protection of the borrowers' rights by requiring that the loan be assigned to the Secretary in the event of a substantial default but before foreclosure. Congress intends that the FmHA follow the practices of private mortgage bankers and lenders with regard to defining substantial defaults and that the full forebearance provisions under existing law be extended to the borrower; (d) Provdes that the rights available to the borrower prior to the enactment of this provision will continue; (e) further provides for a loss reserve account of not less than 5 percent of the loans sold to the public and makes other conforming changes in existing law.

(3) Operating Subsidies: The level of funding for public housing operating subsidies for fiscal year 1986 was set at $1.279 billion (the same amount as provided in the HUD Appropriations Act 99-160).

(4) Public and Indian Housing Loan Debt Forgiveness: Provides that loans made for public and Indian housing, as well as modernization assistance, will be forgiven at the end of each fiscal year. It also gives direction for the use of the budget authority in the HUD Independent Appropriations Act of 1986, P.L. 99-160, which provides funds for new public housing development and modernization on the basis of long-term financing through sales of tax-exempt securities issued by public housing authorities. The conferees action in meeting the reconciliation directive concerning public housing debt forgiveness leaves open the possibility that if tax-exempt financing is not possible in the future the financing mechanism provided for in this section will be used. if this approach is used the conferees intend that any budget authority not needed to fund the 7,000 additional public and Indian hous-

ing units or provide the level of modernization activity assumed by the Appropriations Committee will be rescinded.

These matters were settled when the Budget Reconciliation Act was voted on and passed, December 19, 1985.

Many of the Federal Housing Act mortgage programs, Home Mortgage Disclosure Act, crime and flood insurance programs, and entitlement communities were scheduled to, and did expire on September 30, 1985. The Senate voted on a temporary extension of these programs on October 20 to extend through November throught November 14 and 15. When that extension ran out, the Senate once again extended the same programs through December 15 and 16.

A third proposal to extend these programs through March 17, 1986 was voted and passed on December 19, along with the other requirements under the Budget Reconciliation.

The Subcommittee did not consider any Presidential nominations. Any nominations considered were taken up by the full Committee on Banking, Housing and Urban Affairs.

SUBCOMMITTEE ON INTERNATIONAL FINANCE AND MONETARY POLICY

REAUTHORIZATION AND AMENDMENT OF THE EXPORT ADMINISTRATION ACT OF 1979

Authorities under the Export Administration Act of 1979 expired on March 30, 1984. The Committee gave priority to enactment of reauthorization legislation early in this session. On July 12, 1985, the President signed Public Law 99-64, renewing authorities under the EAA through September 30, 1989 and making numerous amendments to the Act. These amendments would significantly tighten up the enforcement of national security export controls, improve the organization among Government agencies for administering and enforcing export controls, remove outdated controls, streamline the processing of export license applications, and provide greater predictability to export administration, thereby promoting the reliability of U.S. exporters.

The legislation adopted reflected work begun in the 98th Congress but which was still in conference at the time of sine die adjournment in 1984. These amendments represent the most extensive revision of our export control laws since the adoption of the Export Control Act of 1948.

ANTI-APARTHEID ACT OF 1985

One of the first items of business before the subcommittee was consideration of legislative options to address the growing problem of apartheid in South Africa. One hearing was held in the full committee, on April 16, and two hearings were held in the Subcommittee on International Finance and Monetary Policy, on May 24 and June 13. Legislation reported by the Committee on Foreign Relations and adopted by the Senate, and the imposition of sanctions against the Government of South Africa by President Reagan, made further action by the Committee during the Session unnecessary.

LENDING TO SOVIET BLOC COUNTRIES

The dramatic resumption of private bank lending to the Soviet Union and its allies—totaling approximately $1.7 billion loaned or syndicated by U.S. banks in 1985—and the lack of non-emergency authority for the President to regulate such lending prompted Senators Garn, Proxmire, D'Amato, Mattingly, and Hecht to sponsor S. 812, the Financial Export Control Act. This bill, introduced on March 28, would amend the Export Administration Act of 1979 to give the President discretionary authority to control the making of loans and other transfers of capital to the countries to which exports are prohibited for national security purposes under the Act.

Two hearings were held on the legislation in the Full Committee, on September 26 and December 4, with further action to be taken in the Second Session.

MIXED CREDIT WARCHEST

Significant progress has been achieved in recent years to limit official export credits as elements in international export competition. One area where progress has not been seen is in efforts to eliminate the practice of promoting export sales by offering credits with very concessional terms, made possible by mixing foreign aid grant money with the official export credit. As competition has been regulated in other areas of official export credits recourse to mixed credits has increased. The United States, which traditionally has offered very few mixed credits, has failed to obtain progress in negotiations on mixed credits within the Organization for Economic Cooperation and Development (OECD). France, Italy, and Belgium in particular have opposed efforts to raise the minimum allowable grant element in mixed credits, which would make them truly foreign aid and too expensive to be used as a tool for commercial purposes.

In September President Reagan adopted an approach to this problem that had been proposed in legislation by Members of the Committee as early as the 97th Congress. The President submitted legislation to the Congress that would authorize the creation of a $300 million warchest to allow the United States to combat mixed credit offers by initiating a temporary mixed credit program of our own.

The legislation was introduced on October 10 by Committee Members Heinz, Garn, and Dixon, as well as by Senators Danforth and Chafee. A hearing was held on October 30, in the Subcommittee on International Finance and Monetary Policy. Further action is expected early in the Second Session.

EXPORT-IMPORT BANK PROGRAMS

On February 5, the Subcommittee on International Finance and Monetary Policy held an oversight hearing on the programs of the Export-Import Bank. The President's FY 1986 budget submission had called for the elimination of the Bank's direct loan programs, replacing them with an interest subsidy program. Witnesses in the hearing focused on this proposal in particular. No action was taken on the proposal during the Session, the Congress choosing instead to continue with the Bank's direct loan program, thought at a level less than one-third of the authorization for fiscal year 1985.

EXCHANGE RATE MISALIGNMENT

The Subcommittee on International Finance and Monetary Policy conducted a hearing on October 23 on the exchange value of the dollar, the causes of its high value, the consequences for U.S. trade, and proposals for addressing the identified problems. The United States is experiencing record trade deficits, caused in large part by a high value of the dollar that acts as a tax on U.S. exports and as a subsidy for imports. This erosion in our international competitive position jeopardizes the industries with a major dependency on export sales, among which are industries important to our national security and defense production.

Legislation was introduced (S. 1860, and S. 1866) on November 20, which would support the steps undertaken by the Administration to enhance coordination of macroeconomic policies by the major industrial countries and also encourage coordinated intervention by these countries in the foreign exchange markets. That legislation will be taken up in the Second Session.

JAPANESE TARGETING OF U.S. SEMICONDUCTOR INDUSTRY

The United States semiconductor manufacturing industry is in the midst of a major recession. The Subcommittee on International Finance and Monetary Policy held a hearing to review allegations that this business decline was due in large part to unfair Japanese trade practices, both in terms of closed access to the Japanese domestic market for U.S. producers and in terms of unfair marketing practices by Japanese companies in the U.S. market. Substantial evidence was presented to substantiate these claims, and a strong record was established.

In a related step, the Commerce Department announced on December 6 that it was self-initiating an anti-dumping investigation on 256K Dynamic Random Access Memory Components (DRAMs) from Japan, which situation had been discussed in detail in the Subcommittee hearing.

SUBCOMMITTEE ON SECURITIES

IMPACT OF CORPORATE TAKEOVERS

One of the first items of business before the subcommittee was consideration of legislation to halt corporate raiders resort to coercive and unfair tactics in takeover attempts.

The subcommittee held 4 days of oversight hearings with Chairman D'Amato presiding and with a distinguished group of witnesses that appeared for these hearings, helped to indicate the magnitude of these problems and suggested ways that can better protect hostile takeovers.

REGULATION OF GOVERNMENT SECURITIES

On May 9, 1985 Senator D'Amato called to order a hearing to consider legislation on the recent problems associated with auditing practices and accounting standards of the Government securities market. The current problems include customer education, possible changes in accounting practices, as well as a regulatory scheme to require registration and changes in standards for capital adequacy in dealer practices.

REAUTHORIZATIONS FOR THE SECURITIES AND EXCHANGE COMMISSION, 1986-88

On April 17, 1985, Senator D'Amato chaired a hearing to consider the SEC request for reauthorization for fiscal years 1986-88.

The second purpose of the hearing was to use it as a forum to explore some of the recent problems associated with the Government securities market such as the series of failures in the unregulated Government securities market.

S. 919 was introduced by Senator D'Amato to help prevent bankruptcies and save the depositors' confidence in the securities market. Legislation is still pending.

THE SHAREHOLDER COMMUNICATION ACT OF 1985—S. 918

S. 918 passed the Senate on December 18, 1985, this legislation that invests the Securities and Exchange Commission with the authority to promulgate rules regarding the dissemination of proxy materials to shareholders whose shares are held in certain

trust accounts by bonus and other financial institutions. Prior to the enactment of this legislation, the SEC did not have the authority to promulgate regulations in this area that applied to banks. The House passed identical legislation (H.R. 1603) this

AMENDMENT TO THE PUBLIC UTILITY HOLDING COMPANY ACT—S. 727

S. 727 exempts three natural gas companies from the provisions of PUHCA by allowing them to engage in cogeneration activities. This legislation was needed to realize the legislative intent of the Public Utilities Regulatory Policy Act. The Senate passed S. 727 in November and identical legislation was passed by the House in December.

Bills introduced and referred to the Committee totaled 235 with 12 being reported out of the committee and 7 becoming public law as of December 19, 1985.

PUBLIC LAWS ENACTED IN THE FIRST SESSION OF THE 99TH CONGRESS

Public Law 99-4: H.R. 1251.—Mass Transportation projects for fiscal years 1984 and 1985 enacted March 13, 1985.

Public Law 99-61: H.R. 47.—Coin commemoration of the centennial of the Statue of Liberty enacted July 9, 1985.

Public Law 99-64: S. 883.—To extend the Export Administration Act of 1979 enacted July 12, 1985.

Public Law 99-86: H.J. Res. 251.—Enacted August 9, 1985. Gold medal honoring George Gershwin.

Public Law 99-120: H.J. Res. 393.—Enacted October 8, 1985. To provide for temporary extension of certain programs relating to housing and community development.

Public Law 99-156: H.J. Res. 449.—Enacted November 15, 1985. To provide for the temporary extension of certain programs relating to housing community development.

Public Law 99-185: S. 1639.—To provide for the minting of four gold bullion coins enacted December 17, 1985.

SUMMARY OF THE ACTIVITIES OF THE COMMITTEE ON THE BUDGET

The Budget Committee faced perhaps the most difficult challenges of any committee in the Senate. If we have the will to follow through on our 1985 achievements, 1985 may prove to the year that launched the final assault on our number one domestic problem: the Federal budget deficit.

As early as January, Senator Domenici began working with the leadership in establishing the budget deficit as the top priority for the 99th Congress. We introduced S. 1, which set firm deficit goals for the Congress, getting the budget deficit down to 2% of GNP by 1988. That legislative proposal laid the groundwork for the extended negotiations over the 1986 budget—including the submission of the President's budget, the development of a Senate budget, and very detailed discussions with our committee chairman about how we could achieve our budget targets.

In May of this year, by a one-vote margin the Senate agreed to a very tough—but realistic—budget that would have met our deficit goals with real spending cuts. That budget would have terminated many programs and put real restraint on entitlements, as well as restraining defense and other discretionary spending.

There is no point at this late date in lamenting the Senate budget of last spring. Many members remain disappointed that we could not reach agreement with the House and the White House on the kind of deficit-reduction plan we needed. But the Senate showed courage and determination in tackling the budget issue.

The disappointment of our first try at the budget was not the last word for 1985. In consultation with the leadership, the Senate conferees on the budget decided to go for whatever savings we could get out of the budget process. In so doing, the Senate produced the largest reconciliation bill in history. The savings in that bill were reduced by the conference agreement we passed today, but that does not diminish the magnitude of the Senate's achievement.

FOLLOWING THROUGH

We also followed through on the budget—at times with considerable difficulty, because the role of the Budget Committee necessarily generates friction with other Members—by working to ensure that the appropriations bill came in line with the budget targets we set for ourselves. The large majority of the appropriations measures we have passed have been kept within the budget targets because of the work of the Budget Committee and with the cooperation of our colleagues.

Finally, the Budget Committee played an important role in setting the stage for a major deficit reduction effort over the next 5 years. The Budget Committee gave critical advice and counsel in developing and refining the Gramm-Rudman-Hollings deficit control measure, and in working with the Finance Committee to secure agreement with our House colleagues on this important reform of the way we do our budget business.

Whatever happens from this point, it is gratifying to note that, despite the ups and downs we have seen on the budget this year, we have ended up very close to our original budget goals. The mandatory deficit targets of Gramm-Rudman-Hollings will bring us essentially to the deficit targets we set at the beginning of the year. Following through to meet those targets is the challenge of 1986.

SUMMARY OF THE ACTIVITY OF THE COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION FOR THE 1ST SESSION OF THE 99TH CONGRESS

During the 1st Session of the 99th Congress a total of 139 Senate Bills and Resolutions, 4 amendments and 14 House passed measures were referred to the Committee on Commerce for consideration.

The Committee has reported 34 different measures. Ten have become public law. One bill is in conference. Ten measures have passed the Senate and await House action. Twelve bills reported out of Committee remain on the Senate Calendar awaiting Senate Consideration. Several bills reported or passed will be part of the report on Budget Reconciliation.

The Committee held 26 days of hearings on legislation referred to the Committee and 70 days of hearings were in connection with the Committee's oversight responsibilities and on Presidential nominations before the Committee.

A total of 30 nominations, excluding routine National Oceanic and Atmospheric Administration and Coast Guard nominations, were referred to the Committee in the 1st Session of the 99th Congress. Twenty-seven of these nominations were reported out of the Committee and twenty-six were confirmed by the Senate; one nomination remains pending on the Senate Calendar.

The Committee held 13 days of markup sessions to consider and report out matters within its jurisdiction.

A complete listing of the Commerce Committee's activities follows:

PUBLIC LAWS ENACTED DURING THE 1ST SESSION OF THE 99TH CONGRESS

Public law, bill, date, and title.

99-5, H.R. 1093, March 15, 1985, Pacific Salmon Treaty Act of 1985.

99-36, S. 597, May 15, 1985, Technical and Conforming Changes in the Shipping Laws.

99-45, S. 661, March 24, 1985, George Milligan Control Tower.

99-59, S. 413, July 3, 1985, War Risk Insurance Act.

99-62, H.R. 2800, July 11, 1985, Land Remote-Sensing Commercialization Act Reauthorization.

99-73, H.R. 1617, July 29, 1985, National Bureau of Standards Authorization Act for Fiscal Year 1986.

99-97, S. 818, September 26, 1985, Federal Fire Prevention and Control Act Authorization.

99-105, S. 817, September 30, 1985, National Earthquake Hazards Reduction Act Authorization.

99-159, H.R. 1210, November 22, 1985, National Science Foundation Authorization Act for Fiscal Years 1986 and 1987.

99-170, H.R. 1714, December 10, 1985, National Aeronautics and Space Administration Authorization Act, 1986.

99-171, H.R. 3235, December 10, 1985, Mississippi Technology Transfer Center Act.

BILLS IN CONFERENCE

S. 1078 (Federal Trade Commission Act Amendments of 1985)—A bill to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes.

PASSED SENATE AND AWAITING HOUSE ACTION

The following Commerce Committee bills have passed the Senate and are pending in the House of Representatives:

S. 63 (In-Flight Medical Emergencies Act)—A bill to encourage the rendering of in-flight emergency care aboard aircraft by requiring the placement of emergency first aid medical supplies and equipment aboard aircraft and by relieving appropriate persons of liability for the provision and use of such equipment and supplies.

S. 475 (Motor Vehicle Information and Cost Savings Act Amendments)—A bill to amend the Motor Vehicle Information and Cost Savings Act to require certain information to be filed in registering the title of motor vehicles, and for other purposes.

S. 679 (Maritime Appropriation Authorization Act for FY 1986)—A bill to authorize the appropriation of funds for certain maritime programs for fiscal year 1986.

S. 813 (Pipeline Safety Programs Authorization)—A bill to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1986 and 1987, and for other purposes.

S. 990 (National Oceanic and Atmospheric Administration Program Support Authorization Act)—A bill to consolidate and authorize program support and certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce.

S. 1073 (Japanese Technical Literature Act of 1985)—A bill to amend the Stevenson-Wydler Technology Innovation Act of 1980 for the purpose of improving the avail-

ability of Japanese science and engineering literature in the United States, and for other purposes.

S. 1077 (Consumer product Safety Commission Authorization Act of 1985)—A bill to amend the Consumer Product Safety Act to provide authorization of appropriations for 1985.

S. 1103 (National Oceanic and Atmospheric Administration Atmospheric and Satellite Program Authorization of 1985)—A bill to authorize certain atmospheric and satellite programs and functions of the National Oceanic and Atmospheric Administration, and for other purposes.

S. 1574 (Comprehensive Smokeless Tobacco and Health Education Act of 1985)—A bill to provide for public education concerning the health consequences of using smokeless tobacco products.

H.R. 2796 (Foreign Air Travel Security Act of 1985)—A bill to improve security standards for international air transportation.

PENDING ON SENATE CALENDAR

The following Commerce Committee measures were reported out of Committee and are pending on the Senate Calendar at the end of the 1st Session of the 99th Congress:

S. 259 (Professional Sports Community Protection Act of 1985)—A bill to protect the public interest in stable relationships among communities, professional sports teams and leagues and in the successful operation of such terms in communities throughout the Nation, and for other purposes.

S. 374 (U.S. Travel and Tourism Administration Authorization)—A bill to provide authorization of appropriations for the U.S. Travel and Tourism Administration.

S. 638 (Conrail Sale Amendments Act of 1985)—A bill to amend the Regional Rail Reorganization Act of 1973 to provide for the transfer of ownership of the Consolidated Rail Corporation to the private sector, and other purposes.

S. 863 (National Highway Traffic Safety Administration Authorization Act of 1985)—A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other purposes.

S. 958 (Magnuson Fishery Conservation and Management Act Reauthorization)—A bill to provide authorization of appropriations for activities under the Magnuson Fishery Conservation and Management Act.

S. 959 (Coastal Zone Management Act Reauthorization)—A bill to amend the Coastal Zone Management Act of 1972 to provide authorization of appropriations, and for other purposes.

S. 999 (Federal Communications Commission Authorization Act of 1985)—A bill to amend the Communications Act of 1934 to provide authorization of appropriations for the Federal Communications Commission, and for other purposes.

S. 1017 (Metropolitan Washington Airports Transfer Act of 1985)—A bill to provide for the transfer of the Metropolitan Washington Airports to an independent airport authority.

S. 1079 (National Telecommunications and Information Administration Authorization)—A bill to provide authorization of appropriations for activities of the National Telecommunications and Information Administration.

S. 1084 (Corporation for Public Broadcasting Authorization Act of 1985)—A bill to authorize appropriations of funds for activities of the Corporation for Public Broadcasting, and for other purposes.

S. 1097 (Methanol and Ethanol Vehicle Incentives Act of 1985)—A bill to amend the Motor Vehicle Information and Cost Savings Act to provide for the appropriate treatment of methanol.

S. 1218 (International Air Transportation Protection Act of 1985)—A bill to amend the Federal Aviation Act of 1958 to provide for the revocation of certain certificates for air transportation, and for other purposes.

COMMITTEE HEARINGS

Full committee (also includes National Ocean Policy Study [NOPS])

S. 259, S. 287—Professional Sports Community Protection Act of 1985 (S. Hrg. 99-36).

S. 516—Pacific Salmon Treaty Act of 1985 (S. Hrg. 99-25).

S. 959—Coastal Zone Management Act Reauthorization and S. 990—National Oceanic and Atmospheric Administration Program Support Authorization Act (S. Hrg. 99-173).

S. Res. 178, S. 1097—Auto Fuel Economy and Methanol Fueled Vehicles.

S. 1097, S. Res. 178—Methanol Fueled Vehicles and Automobile Fuel Economy Standards.

S. 1312—Federal Communications Commission Network Acquisition Approval Act of 1985 (S. Hrg. 99-292).

S. 747, S. 1245, Amendment No. 529 to S. 1245, S. 1386—Magnuson Fisheries Conservation and Management Act.

S. 1310—Clean Campaign Act of 1985.

Oversight hearing on the use of pelagic driftnets by Japanese, Korean and Taiwanese fisherman in the North Pacific Ocean and their adverse impacts on fish, seabirds and marine mammals.

Oversight hearings on the problem of escalating costs for insurance for commercial fishing vessels.

Aviation

S. 586—International Air Route Certificates (S. Hrg. 99-200).

S. 1218—International Air Transportation Protection Act of 1985 (S. Hrg. 99-192).

S. 1321, S. 1326, S. 1343, H.R. 2796—Anti-Hijacking and Airport Security.

S. 1017, S. 1110—Transfer of National and Dulles Airports.

Oversight hearing on airline computer reservation systems (CRS).

Oversight hearing on international airport security and terrorism.

Oversight hearing on aviation safety, and the Federal Aviation Administration's (FAA) efforts to improve it.

Oversight hearing on safety issues in the regional airline industry.

Oversight hearing on aviation labor issues.

Business, Trade, and Tourism

S. 193, S. 374—U.S. Travel and Tourism Administration Authorization (S. Hrg. 99-95).

Oversight hearing on the promotion of domestic tourism.

Oversight hearing to examine the availability and affordability of insurance in various property and casualty lines.

Communications

Oversight hearing on the issue of explicit rock music and proposals that sound recordings be rated or labeled to inform consumers of potentially objectionable content.

The Communications and Science Subcommittees held a joint oversight hearing on the results of the first of two World Administrative Radio Conferences on use of the geostationary satellite orbit for radio communications.

Consumer

On March 21, 1985, the Subcommittee on Consumer held a hearing on S. 100, the Product Liability Act. A motion to report this measure was defeated at a Commerce Committee executive session on May 16, 1985, by a vote of 8-8. On June 18 and June 25, 1985, the Subcommittee on Consumer held hearings on amendments to S. 100 that had been introduced by Senator Dodd and Senator Gorton. Subsequently, at the direction of the Chairman of the Commerce Committee, Senator Danforth, the Subcommittee staff prepared a working draft of product liability reform legislation. This staff draft was released for public comment on July 15, 1985. After review of the comments received from the public, a second staff working draft was released for comment on November 27, 1985.

Merchant Marine

S. 679—Maritime Administration Authorization and FMC Authorization and S. 102—Construction of Differential Subsidy Authorization. (S. Hrg. 99-80).

S. 664—Competitiveness of U.S. Agricultural Exports (S. Hrg. 99-269).

S. 1461—Documentation of Certain U.S.-flag Vessels Act.

S. 1832. S. 1833—Establishment of Merchant Ship Revolving Fund Act.

Science, Technology and Space

S. 240. S. 1433. H.R. 2095—Extension of Daylight Saving Time.

The oversight hearings on the effect of new technologies on economic competitiveness.

Oversight hearing on the earthquake in Mexico and its implications for our domestic Earthquake Hazards Reduction Program.

Oversight hearing on the state of the satellite insurance industry.

Oversight hearing on the commercialization of the Landsat earth remote sensing system.

Surface Transportation

Three oversight hearings on trucking deregulation.

Oversight hearing on Motor Carrier Safety Act of 1984.

Two oversight hearings on the Staggers Rail Act.

SUMMARY OF THE ACTIVITIES OF THE COMMITTEE ON ENERGY AND NATURAL RESOURCES DURING THE FIRST SESSION OF THE 99TH CONGRESS

(James A. McClure, Chairman)

During the 1st Session of the 99th Congress a total of 177 bills and resolutions were referred for consideration to the Senate Committee on Energy and Natural Resources (129 Senate bills, 3 Senate Resolutions, 19 Senate Joint Resolutions, 29 House bills, and 6 House Joint Resolutions). Three over bills and resolutions under the Committee's jurisdiction were considered and passed by the Senate without Committee referral. The Committee reported a total of 21 measures to the Senate. An additional measure has been ordered reported by Committee, but no written report has been filed to date.

The Committee held 64 days of public hearings (including 9 field hearings) during the 1st Session of the 99th Congress. These hearings encompassed 33 days of oversight

hearings, 19 days of legislative hearings, and 12 days of hearings on nominations. The Committee also held 24 business meetings and one conference.

Twenty-two measures within the Committee's jurisdiction passed the Senate, and of these, the Congress enacted five public laws. In addition, there are six measures awaiting the President's signature. Some five other measures reported by the Committee were pending on the Senate Calendar.

Measures enacted into law

Public Law 99-24 (S. 781) Amends the Biomass Energy and Alcohol Fuels Act of 1980 to extend through September 30, 1985, all conditional commitments for loan guarantees which were in existence on September 30, 1984

Public law 99-58 (H.R. 1699) Energy Policy and Conservation Amendments Act of 1985

Public Law 99-68 (H.R. 1373) Designates the Wilderness in the Point Reyes National Seashore in California as the Phillip Burton Wilderness

Public Law 99-96 (S. 444) Alaska Native Claims Settlement Act Amendment

Public Law 99-110 (H.J. Res. 299) Recognizing the accomplishments over the past 50 years resulting from the passage of the Historic Sites Act of 1935

Nominations

During the 1st Session of the 99th Congress, 26 nominations were submitted by President Reagan and referred to the Committee. Of these, 21 were reported favorably by the full Committee, and 22 were confirmed by the Senate.

Presidential messages

Fifteen Presidential messages were transmited to the Committee during the 1st Session of the 99th Congress dealing with a variety of subjects within the Committee's jurisdiction.

Executive communications

The Committee received a total of 195 Executive communications transmitting legislative recommendations and relating to the Committee's oversight responsibilities.

Reports and publications

During the 1st Session of the 99th Congress the full Committee filed 21 Senate Reports on measures reported by the Committee.

The Committee also published 23 hearing records. Five of these dealt with Presidential appointees, and the remaining 18 publications provided background material pertinent to the Committee's legislative activities and oversight responsibilities.

In addition, the Committee published one committee print dealing with the Committee's rules, membership and jurisdiction.

OVERSIGHT ACTIVITIES

During the 1st Session of the 99th Congress, the Committee on Energy and Natural Resources conducted 33 days of oversight hearings on a variety of issues pertinent to the jurisdiction of the Committee.

Budget oversight

The full Committee conducted three days of hearings on the President's proposed budgets for the Departments of the Interior and Energy, the Synthetic Fuels Corporation, the U.S. Forest Service, and the Federal Energy Regulatory Commission for fiscal year 1986. In addition, the Subcommittee on Energy Research and Development conducted five days of hearings on the Department of Energy Research and Development Programs. Following this review of the proposed budgets, the Committee filed its report to the Senate Budget Committee. The report set forth the anticipated legislative program of the Committee for the First Session of the 99th Congress and reflected the Committee's concern regarding the Budget Committee's assignment of committee jurisdiction, specifically over activities, including construction, on the national forest system lands created from the public domain.

On September 26, 1985, the Committee, in accordance with S. Con Res. 32, the First Budget Resolution for Fiscal Year 1986, reported the legislative recommendations necessary to comply with its reconciliation instructions. The savings exceeded the Committee's targets in its reconciliation instruction for fiscal year 1986 by $575 million in budget authority and $516 million in outlays. In addition, the savings exceeded the targets for the aggregate 3-year period of fiscal years 1986 to 1989 by $550 million in budget authority and $476 million in outlays.

The recommendations of the Committee were consistent with the assumptions in the Budget Resolution in two areas. First, the Committee suggested achieved savings in DOE's Strategic Petroleum Reserve program by reducing the minimum average annual fill-rate from 159,000 to 35,000 barrels per day. Second, the recommendations of the Committee included legislation to settle the legal dispute between the Federal Government and several States regarding the disposition of escrowed revenues from the 8(g) zone of the Outer Continental Shelf. In the midst of considering this legislative proposal, the Committee scheduled a hearing to receive testimony regarding this 8(g) issue. Secretary of the Interior Donald P. Hodel and Governor Mark White of Texas appeared. As assumed in its reconciliation instruction, the recommendation of the Committee distributed 27 percent of such bonuses and rents to the affected States as well as interest accrued thereon. The Committee recommendation also included the disposition of other OCS revenues in dispute, specifically, royalties, both retrospectively and prospectively.

In addition, the recommendations of the Committee achieved savings in budget authority and outlays in two areas not assumed in its reconciliation instruction. First, the Committee suggested an authorization for the Department of Energy's uranium enrichment program, requiring the program to operate at no addition cost to the Treasury. Second, the Committee achieved savings in the DOE energy conservation programs by authorizing Federal agencies to enter into certain contracts for energy efficiency improvements in Federal buildings. Under such contracts the contractors will be paid from money saved as a result of the energy efficiency improvements installed in Federal buildings. The Committee recommendations also imposed a limitation on certain Energy Regulatory Commission rulemaking; however, the provision was removed by amendment on the Senate floor. A provision tending the loan guarantee authority for Biomass Energy projects set forth in section 221 of the Biomass Energy and Alcohol Fuels Act of 1980 was added as an amendment on the Senate floor.

The Committee did not report a legislative proposal regarding FERC fees and annual charges as assumed in its reconciliation instruction. We were able to achieve the instructed savings without need for such legislation.

In conference on the reconciliation measure, the Senate receded to a House provision terminating the United States Synthetic Fuels Corporation. The conference agreement provides for (1) termination of the authority of the SFC to award financial assistance as of the date of enactment; (2) termination of the Board of Directors of the SFC within 60 days after enactment of this Act; and (3) transfer within 120 days of enactment of this Act, the duties and responsibilities of the SFC to the Secretary of the Treasury in accordance with subtitle J of title I of the Energy Security Act.

Archeological and paleontological sites

The Subcommittee on Public Lands, Reserved Water and Resource Conservation held a field hearing (1 day) in Albuquerque, New Mexico on the Preservation of Archeological and Paleontological Sites and Objects.

Coal imports

The Committee held a hearing on the impact of coal imports on the domestic coal industry. The hearing was precipitated by the signing of contracts with Columbia for 500,000 tons of coal per year for power generation. The threat was perceived to be twofold—displacement of domestic coal production by imports, and the direct loss of employment attributable to imports. The Committee examined the public policy implications of additional coal imports, including trade policy, energy policy, employment policy and transportation policy.

DOE's Nuclear Mission Plan

The Subcommittee on Energy Research and Development held a hearing (1 day) on DOE's Mission Plan for the Civilian Radioactive Waste Management Program. The "Mission Plan" is a comprehensive report which shall provide sufficient information to permit decisions to be made in carrying out the repository program for acceptance of nuclear waste by January 1998. As a result of this hearing, a number of questions garnered from the testimony have been submitted to the DOE. It is expected that the answers will provide the department and Congress with the necessary information to insure that the plan addresses all the concerns of those parties most affected. The GAO has also been requested to identify early on weaknesses in the program and to address communications between the states and the federal government.

IMPACT OF IMPORTED PETROLEUM PRODUCTS ON THE DOMESTIC PETROLEUM INDUSTRY

The Subcommittee addressed concerns by major oil companies and independents alike that imports of petroleum products—gasoline in particular—are adversely affecting the domestic refining industry and U.S. energy security. These concerns are based on the fact that more than 100 U.S. refineries with a capacity of 2.5 million barrels per day have shut down since 1981, and many others are now idle or running at partial capacity.

The hearing addressed (a) trends in U.S. refining capacity; (b) what types of refineries are closing—old and inefficient, or new, efficient refineries; (c) do these closings provide us with any indication as to what we may expect in the future; (d) at what point will a decline of U.S. refinery capacity have material impact on our energy security; (e) trends in foreign refining capacity, and how much of this is for exports; (f) impact of foreign experts capacity on U.S. refiners; (g) are foreign countries subsidizing petroleum product exports; and (h) what, if anything,

should be done to assure the United States an adequate amount of refining capacity, and what would be the costs and benefits of such action.

NATIONAL PARK SERVICE

The Subcommittee on Public Lands, Reserved Water and Resource Conservation held a hearing (1 day) which focused on issues affecting the National Park Service.

First, the Conservation Foundation, a nonprofit environmental research organization, issued a major report on National Parks. Second, a new Director of the National Park Service was appointed in June of 1985 and upon his taking office issued a "12-point plan" for the future of the system. Third, after a legislative impasse with the House over "Park Protection" legislation, the Department of the Interior made a series of recommendations on June 21, 1985, to address the issue of managing lands adjacent to limits of the National Park Service. And fourth, the President's Commission on Outdoor America was expected to be appointed. This commission has the opportunity to use the proceedings of the Subcommittee hearings as a tool in compiling their report where it applies to the National Park Service.

OCS leasing and revenue sharing

The Committee conducted two days of oversight hearings related to Outer Continental Shelf oil and gas leasing. One day was dedicated to leasing moratoria and one to the division of revenues from the Section 8(g) the zone. On leasing, for the past four years, the Department of the Interior has been forbidden from leasing OCS tracts off the California coast by a Congressionally mandated moratoria. The hearing was to discover whether such an agreement was in the national interest. On revenue sharing, under Section 8(g) of the OCSLAA of 1978 states were to receive a "fair and equitable" share of revenues derived from OCS leasing in a zone extending from the boundary of state submerged lands extending three miles into federal submerged lands. The hearing solicited testimony on the Committee-proposed distribution formula.

Office of Surface Mining permit fees

One day of hearings was dedicated to examining the effects of proposed permit fees by the Office of Surface Mining on the domestic coal industry. The Committee reviewed the coal industry's contention that these additional costs would only exacerbate the problems of the already depressed coal market and whether such a charge has public policy implications beyond the collection of fees.

Recreation fees

The Subcommittee on Public Lands, Reserved Water and Resource Conservation held a hearing (1 day) on Recreation fees as authorized in the Land and Water Conservation Fund Act of 1965, as amended. The purpose of the hearing was to provide an opportunity to examine the matter of increasing the money received by the Federal Government and its park, forest, reservoir and public land areas used for recreation purposes. Because budget recommendations submitted to the Congress this year placed heavy reliance upon the increase of existing fees and the imposition of new fees upon recreation users as a means of generating additional income, the hearing would serve to prepare Congress to deal with an Administrative legislative proposal to implement these budget recommendations, should it be forthcoming.

Stockpile "modernization"

The Full Committee held a hearing (1 day) on the President's July 8 National Defense Stockpile "Moderization" Proposal and its Potential Impact on the Domestic Mining Industry. Chairman McClure addressed two concerns regarding the proposal: (1) The stockpile goals in the President's Tier I which purportedly consists of those materials that would be required during a protracted military conflict, and (2) The reationale behind creating a "Supplemental Reserve" on Tier II.

Water supply in mid-Atlantic region

The Committee held three days of hearings on water supply issues in the mid-Atlantic states; one in Washington and two field hearings in New Jersey. The three major foci: were water availability, water quality and institutional and management issues in each of the States. The hearings were precipitated by the serious drought conditions in the Delaware basin and efforts to mitigate its effects.

SUMMARY OF THE ACTIVITIES OF THE COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS DURING THE FIRST SESSION OF THE 99TH CONGRESS

During the first session of the 99th Congress, the Committee on Environment and Public Works reported a total of twenty-four bills to the Senate, including major legislative initiatives in both the areas of environment and public works. The Committee also reported eleven nominations and conducted 20 days of oversight hearings, including four days of budget hearings on those programs which fall within the jurisdiction of the Committee.

The Committee focused particular attention on several environmental programs. On March 18 the Committee reported the "Superfund Improvement Act of 1985," which was passed by the Senate on October 1. Major legislation amending the Clean Water Act (S. 1128) and the Safe Drinking Water Act (S. 1241) were also reported and were passed by the Senate.

Legislation providing authorizations for programs under the Disaster Relief Act, the John F. Kennedy Center Act, and for the Public Buildings Service of the General Services Administration were reported and were passed by the Senate.

In the area of nuclear regulation, the Committee reported, and the Senate passed, authorizations for the Nuclear Regulatory Commission and Legislation for the disposal of low-level nuclear waste.

The Committee also reported an omnibus water resources development bill (S. 1567) and legislation providing funding for the nation's system of interstate highways.

During the year, the Subcommittee on Regional and Community Development held oversight hearings to review the programs and policies of the Tennessee Valley Authority. The Toxic Substances and Environmental Oversight Subcommittee conducted five days of oversight hearings on ground-water problems in the United States. The Committee also conducted field hearings on acid rain, exposure to radon gas, endangered species, and highways.

At the end of the first session the Senate had passed a total of 14 of the bills reported by the Committee. It is expected that in the second session the Committee will continue to direct its attention toward completion of much of the work commenced in the first session.

SUMMARY OF ACTIVITIES OF THE FINANCE COMMITTEE DURING THE FIRST SESSION OF THE 99TH CONGRESS

From January through December, 1985 was, indeed, a year of great activity and landmark legislation for the Senate Committee on Finance.

The Committee on Finance played a major role in House Joint Resolution 372, or the Gramm-Rudman-Hollings amendment, as we have come to describe that truly historic piece of legislation.

Just last year, the Committee was called on four occasions to report out legislation increasing the public debt.

This year, though, when the time came for the lid to be lifted once more, the Committee on Finance found itself squarely in the middle of the Gramm-Rudman-Hollings amendment, or the Balanced Budget and Emergency Deficit Control Act of 1985, as it is more properly called.

And, it ws no small role in the legislative process attendant to that bill that Senator Packwood, the Chairman of the Committee, and Senator Long, the Ranking Minority Member of the Committee, as well as its other Members, played in forging the law of the land signed just last week by the President.

Furthermore, as this final week of the first session of the 99th Congress came and went, it was again the Committee on Finance which was solidly in the midst of the business of this body, laboring long and hard to complete its conference on the Deficit Reduction Amendments of 1985.

In support of efforts to reduce the deficit as required by the reconciliation instructions of the Congressional Budget Resolution, the Committee's contribution included 19 savings and 18 revenue raising provisions. Those actions touched nearly every program under the jurisdiction of the Committee on Finance.

Additionally, the Committee provided for needed program reforms by adopting more than 70 other provisions under the reconciliation act.

Consequently, the Committee was able to meet its deficit reduction target of $37.9 billion over three years, covering Fiscal Years 1986 through 1988.

The Committee's effort provided more than 50 percent of the deficit reductions sought by the reconciliation instructions.

Beyond its work in the deficit reduction and budget areas, the Committee shepherded six significant pieces of legislation through the process into public law.

Those bills included: H.R. 2475, a bill to amend the Internal Revenue Code of 1954 to simplify the imputed interest rules of Section 1274 and 483 of the Internal Revenue Code; Senate Concurrent Resolution 15, relating to United States-Japan trade; Senate Joint Resolution 77, the Compact of Free Association, extending certain benefits to the Marshall Islands and Micronesia; H.R. 1866, a bill to phase out the Federal Supplement Compensation Program; H.R. 1869, a bill to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984; and H.R. 2268, the U.S.-Israel Free Trade Area Implementation Act of 1985.

In this legislative 12-months, the Committee continued its work on health care financing issues which directly affect over 30 million of our fellow Americans.

While the majority of the Committee's time was devoted to budget-related concerns, the Committee also exercised its over-

sight prerogative on programs within its purview.

The Subcommittee on Health conducted eight hearings, addressing a wide range of health policy questions. These included: Medicare payments for Graduate Medical Education, Medicare payments for hospitals serving a disproportionate share of poor and elderly patient, the status of Peer Review Organizations, health promotion and disease prevention, patient abuse and anti-fraud legislation, expansion of Medicare beneficiary appeal rights, capital payment reform, and options for Medicare physician payment reform.

Beyond the activities of the Subcommittee on Health, the full Committee on Finance conducted two hearings to examine health policy concerns. The first of those dealt with third-party liability for Medicaid recipients and the second examined Medicare's skilled nursing facility (SNF) benefit.

One the tax front, the Committee on Finance conducted 33 hearings in preparation for its markup of the long-awaited tax reform bill from the other body. The distinguished Senator from Oregon, Mr. Packwood, personally chaired all of these hearings. Between May 9 and October 10, over 350 witnesses from virtually every state in the Union and every segment of society came to air their views on the proposed changes in our tax code.

In addition to the previously-mentioned tax bills which have become law after clearing the Committee on Finance, the panel also wrote the revenue component of S. 51, a bill to extend the Comprehensive Environmental Response, Compensation and Liability Act of 1980, or Superfund.

While 1985 certainly was not a slow year in the tax area for the Committee on Finance, it is a fair understatement to suggest 1986 will be the year of tax for the 20 Members on that panel.

In the area of income maintenance and Social Security, the Committee on Finance conducted two hearings, one reviewing foster care and adoption assistance, and the other reviewing the disinvestment of securities held by the Social Security Trust Funds.

Confronted with the specter of our runaway trade deficit, the Committee on Finance and its Subcommittee on International Trade conducted several rounds of key hearings and reported out two important trade bills, S. 1404 and S. 942. S. 942 promotes the expansion of international trade in telecommunications equipment and services while S. 1404 requires the President to respond to the unfair trade practices of Japan.

The Committee's trade hearings included those on the report of the President's Commission on Industrial Competitiveness, the role of floating exchange rates in the international trading system and on U.S. trade policy toward fair and unfair trade.

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON FOREIGN RELATIONS DURING THE SESSION OF THE 99TH CONGRESS

The Committee began its first session of the 99th Congress with a series of hearings devoted to "Outlines of American Foreign Policy" which provided a comprehensive review and analysis of foreign policy goals, limitations and opportunities for the United States.

The Committee reported out a comprehensive International Security and Development Cooperation Act in May 1985; this legislation was enacted on August 8, 1985 and is the first such authorization bill for foreign assistance in four years.

On regional issues, the Committee and sub-committees held extensive hearings on Central America, particularly on a supplemental authorization to combat terrorism within the region. It held numerous hearings and received several briefings by the administration on Middle East arms sales and the role of arms transfers in promoting stability in this volatile region. Several hearings were also held on the Philippines on the difficult political, economic and security problems it faces. Several hearings preceded passage of legislation defining U.S. economic relations with South Africa.

In the arms control area, the Committee conducted hearings on U.S. nuclear strategy, the Geneva Summit and on the nuclear agreement with the People's Republic of China.

The Committee and subcommittee also held hearings on a range of subjects pertaining to U.S. trade, regional turmoil, financing of foreign military sales, international narcotics, embassy security, international terrorism, African famine relief and many other international issues.

The following is a summary of the Committee's workload during the last session:

BILLS AND JOINT RESOLUTIONS: REPORTED

S. 457: Sub-Saharan assistance.

S. 684: International Bank for Reconstruction & Development, International Finance Corporation and African Development Fund.

S. 947: Overseas Private Investment Corporation.

S. 960: Amending Foreign Assistance Act.

S. 998: Sanctions against South Africa.

S. 995: Opposition to apartheid in South Africa.

S. 1003: State Department, USIA, BIB, National Endowment for Democracy authorization.

S. 1132: Supplemental appropriations for FY '85 and authorizing appropriations for '86 & '87 for ACDA.

S. 1166: Claims against Iran.

S. 1308: Economic assistance for Jordan.

S. 1831: Congressional vetoes of arms export proposals.

S. 1915: Counterterrorism assistance.

S.J. Res. 98: Condemning U.N. Resolution 3379.

S.J. Res. 161: Release of Soviet Jewery.

S.J. Res. 177: International Space Year in 1992.

S.J. Res. 277: Commending Switzerland.

S.J. Res. 238: Nuclear Cooperation Agreement with China.

S.J. Res. 240: Soviet invasion and occupation of Afghanistan.

CONCURRENT RESOLUTIONS AND SIMPLE RESOLUTIONS: REPORTED

S. Con. Res. 46: Americans missing in Southeast Asia.

S. Con. Res. 76: Rights of Polish People.

S. Con. Res. 82: Support for Chile's National Accord.

S. Con. Res. 87: Restoration of democracy in Philippines.

S. Con. Res. 93: Commending Ireland & U.K. regarding peaceful resolution.

S. Res. 68: Congratulating people of Cyprus.

S. Res. 73: Waiving section 402(a) of Congressional Budget Act.

S. Res. 80: Authorizing expenditures by Committee on Foreign Relations.

S. Res. 158: Authorizing printing.

S. Res. 161: Waiving section of Congressional Budget Act.

S. Res. 185: Emigration from Cuba.

S. Res. 227: Worldwide disease immunization.

S. Res. 237: American concerns with Soviet presence in Afghanistan.

S. Res. 244: Authorizing printing.

S. Res. 268: Waiving section of Congressional Budget Act.

S. Res. 271: Regarding assistance to Liberia.

(As of December 18, 1985)

Treaties: Reported and approved (6):

Protocols for further extension of International Wheat Agreement.

Tax Convention with Italy.

Tax Convention with Cyprus.

Treaty with Canada concerning Pacific salmon.

International Telecommunication Convention and Final Protocol.

Treaties: Reported—not approved (4):

Genocide Convention.

Tax Convention with Denmark.

Protocol to amend 1980 Tax Convention with Denmark.

Tax Agreement with People's Republic of China.

NOMINATIONS

Referred	117
Reported/confirmed	102
Withdrawn by President	1
Representatives to conferences:	
Referred	14
Confirmed	14
Foreign Service promotions:	
Preferred	[1] 1342
Confirmed	[2] 1341

[1] Includes 1 nomination for Career Ambassador.

[2] Foreign Service nomination of Edwin G. Corr, received by the Senate on October 28, 1985 as part of list of Bremer et al, expected when overall list was confirmed on December 18, 1985. Therefore, Corr nomination is still pending before the Senate.

SUMMARY OF ACTIVITIES OF THE GOVERNMENTAL AFFAIRS COMMITTEE DURING THE FIRST SESSION OF THE 99TH CONGRESS

In the first session of the 99th Congress, the Senate Governmental Affairs Committee pursued numerous legislative and oversight activities in a broad range of areas. The Committee focused its attention on new aspects of familiar topics such as government management and defense, and initiated new activities on such subjects as the recommendations of the Grace Commission. The first session of the 99th Congress also saw the Governmental Affairs Committee at the forefront of a successful effort to craft a new supplemental retirement plan for federal workers hired after January 1, 1984.

LEGISLATIVE ACTIVITIES

Federal retirement reform

The "Federal Retirement Reform Act of 1985" began as S. 1527, introduced on July 30 by Chairman Roth and Senator Stevens. The bill establishes a comprehensive retirement plan, in conjunction with social security, to cover all federal workers hired after January 1, 1984. In a strong bipartisan effort, S. 1527 was unanimously reported by the Governmental Affairs Committee on October 2, 1985. Upon consideration by the full Senate, H.R. 2627 was reported in lieu of S. 1527 and subsequently passed by a vote of 96–1 on November 7, 1985. At the close of the first session of the 99th Congress, H.R. 2672 is currently in conference committee awaiting further action.

Benefits to former Presidents

S. 1047 was introduced by Senators Roth and Chiles on May 1, 1985. This legislation,

in three parts, provided for reductions in office and staff allowances and Secret Service protection afforded to former Chief Executives. It also established limits and guidelines pertaining to the size and maintenance of all future Presidential libraries. On October 2, the Presidential libraries section was reported, with H.R. 1349 inserted in lieu of the Senate bill. The remaining two sections of S. 1047 were ordered reported by the Committee on November 19, 1985.

Program fraud civil remedies

S. 1134, the "Program Fraud Civil Remedies Act," is the latest version of legislation which was first initiated by the Governmental Affairs Committee in 1981. The bill provides executive branch agencies with the means to independently pursue settlement in cases of false claims and statements entered against the government. S. 1134 allows agencies to utilize administrative law judges for the purpose of regaining revenues lost through false claims, and provides stiff monetary penalties for those found guilty of perpetrating such claims and statements. S. 1134 was introduced by Senators Roth and Cohen on May 15. The Committee favorably reported the bill on December 10, 1985.

Federal employees health benefits refunds

H.R. 3384, a bill to include federal retirees in the group of individuals eligible for refunds under the Federal Employees Health Benefits Program (FEHBP), was referred to the Governmental Affairs Committee on October 1, 1985. The Committee reported this measure on December 6, and the Senate passed it on December 19.

Federal flexitime schedules

H.R. 1534 was referred to the Governmental Affairs Committee on May 22, 1985. This measure converts the temporary authority to allow federal employees to work on flexible or compressed work schedules to permanent authority. On July 11, the Committee reported H.R. 1534, and the bill passed the Senate on December 11, 1985.

OTHER REFORM MEASURES

Budget reconciliation

In its budget reconciliation activities during the first session of the 99th Congress, the Governmental Affairs Committee was mandated to derive $12.6 billion in savings over the next three fiscal years. When the Committee reported its recommendations on October 2, the total savings in the Committee package totaled $13.2 billion over three years. The major areas from which these savings were achieved included a federal employee pay freeze for fiscal year 1986 and reforms in the postal subsidies program. The Committee also reported recommendations for improvements in civilian contracting practices through multi-year contract agreements. After the conference agreement, the total savings from the Committee's budget reconciliation activities was $12.5 billion over the next three fiscal years.

NOMINATIONS

The Committee received a total of 25 nominations during the first session of the 99th Congress, of which 22 were confirmed by the Senate. They are as follows:

Julius Becton, Director of the Federal Emergency Management Agency.

Jerry Lee Calhoun, member of the Federal Labor Relations Authority.

Terence C. Golden, Administrator of the General Services Administration.

John N. Griesemer, Governor of the U.S. Postal Service.

Constance J. Horner, Director of the Office of Personnel Management.

James P. McNeill, Associate Director of the Federal Emergency Management Agency.

Barbara Jean Mahone, Chairman of the Special Panel on Appeals.

James C. Miller III, Director of the Office of Management and Budget.

John M. Steadman, Associate Judge, District of Columbia Court of Appeals.

Associate Judges of the Superior Court of the District of Columbia; Harold L. Cushenberry, Jr., Herbert B. Dixon, Richard A. Levie, Curtis E. Von Kann, Michael L. Rankin.

Commissioners of the Postal Rate Commission: Henrietta F. Guiton, Patti Birge Tyson.

Inspectors General: Paul A. Adams, Department of Housing and Urban Development; William R. Barton, General Services Administration; Bill D. Colvin, National Aeronautics and Space Administration; James L. Richards, Department of Energy.

Members of the Board of Governors of the U.S. Postal Service: J.H. Tyler McConnell, Robert Setrakian.

OVERSIGHT ACTIVITIES

The Committee undertook a variety of oversight activities during the first session of the 99th Congress. These included hearings on the recommendations of the Grace Commission, federal retirement reform, infant mortality, non-smokers' rights, and continuing investigations into the deglamorization of drugs and the effect on our nation's youth, money laundering, and U.S. involvement in the United Nations.

CONCLUSION

The Governmental Affairs Committee experienced a slight shift in the emphasis of its activities during the first session of the 99th Congress, with the focus on executive branch nominations and more first-time investigations. During the second session of this Congress, the Committee will continue its efforts in these areas, but it also plans to step up its activities in other oversight areas such as defense, waste and fraud, and management improvement.

SUMMARY OF ACTIVITIES OF THE SELECT COMMITTEE ON INDIAN AFFAIRS DURING THE 1ST SESSION OF THE 99TH CONGRESS

In the first session of the 99th Congress 19 bills were referred to the Select Committee on Indian Affairs; 7 Executive Communications were received; and one Presidential nominee was referred. Bills before the Committee included legislation to extend the Indian Health Care Improvement Act of 1976; two bills to amend existing legislation relating to educational programs operated by the Bureau of Indian Affairs; a bill to regulate gaming activities within Indian reservations; a bill to decommercialize and regulate the fishing of steelhead trout; a bill to extablish a program for the detection and prevention of alcohol and drug abuse among Indian youth; a bill to resolve clouds on title to certain lands on the White Earth Indian Reservation in the State of Minnesota; a bill to provide for settlement of water claims of tribes on the Truckee, Carson and Walker Rivers in the State of Nevada; and legislation to provide for the use and distribution of judgment funds awarded various Indian tribes in the States of Minnesota, Wisconsin, and Michigan.

Of the 19 bills referred to the Select Committee on Indian Affairs, 11 were reported out of Committee and 9 favorably acted upon by the Senate. Two bills, one amending the Indian Education Act of 1965 and the other providing for the use and distribution of judgment funds awarded the Mdewakanton and Wahpekute Eastern or Mississippi Sioux, have been signed into law. The nomination of Ross O. Swimmer to be Assistant Secretary of Indian Affairs was reported by the Committee and he was confirmed by the Senate by unanimous consent.

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON THE JUDICIARY DURING THE 1ST SESSION OF THE 99TH CONGRESS

During the 1st Session of the 99th Congress, reflecting the wide variety of subjects within its jurisdiction, the Committee on the Judiciary considered, deliberated, and acted upon an impressive array of matters.

Fifty-seven hearings were conducted by the full Committee and Subcommittees on legislation. In addition, 47 oversight hearings were held. The Committee met in Executive Session on 28 occasions, reporting to the Senate 149 of the Senate and House bills and resolutions which had been referred to it.

Again in the 99th Congress, the Committee reported, and the Senate passed by a vote of 69 to 30, the Immigration Reform and Control Act, S. 1200. Still central to the bill are employer sanctions against those who knowingly hire illegal aliens and a legalization program for certain illegal aliens who can demonstrate they have resided in the United States continuously prior to January 1, 1980. S. 1200 contains no change in the existing legal immigration system, nor does it deal with immigration asylum procedures. In addition, S. 1200 contains a temporary seasonal worker provision based on the compromise reached by the conference committee in the 99th Congress. The Committee also favorably reported S. 1262, the Refugee Assistance Extension Act of 1985.

In recognition of the problems facing the Nation with regard to the budget deficit, as in the last two Congresses, the Committee reported "balanced budget" constitutional amendment legislation. The two measures reported in this Congress are S.J. Res. 13 and S.J. Res. 225, both of which are pending on the Senate calendar.

Another social issue dealt with by the Committee was school prayer. On October 29th, the Committee reported S.J. Res. 2, proposing an amendment to the Constitution of the United States relating to voluntary silent prayer or reflection, to the full Senate. That measure is also pending on the Senate calendar.

Pursuant to the Low-Level Radioactive Waste Policy Act of 1980, seven regional compacts (Southeast, S. 44; Northwest, S. 356; Rocky Mountain, S. 442; Central Interstate, S. 655; Central Midwest, S. 802; Midwest, S. 899; and Northeast, S. 1798) were introduced in the 99th Congress. The full Committee held a hearing on three of these measures in March. All seven were reported to the Senate. Since the cut-off date contained in the 1980 Policy is near, these measures were part of a substitute amendment offered to H.R. 1083 and sent back to the House for approval.

In the area of criminal law, the Committee reported S. 104, to regulate the manufacture and importation of armor-piercing bullets; S. 1437, the "designer drug" bill; S. 850, the "intoxicated common carrier" bill; and H.R. 3511, the Bank Bribery Amendments Act of 1985. Both S. 1437 and S. 850 have passed the Senate by unanimous consent. In addition, the Committee has or-

dered reported S. 1236, which would make technical amendments to provisions of the Comprehensive Crime Control Act of 1984. That measure will be reported to the Senate during the 2nd Session of this Congress.

Due to the increase in the number of hijackings and terrorism conducted against Americans abroad, the Committee participated in three days of hearings held jointly with the Committee on Foreign Relations on international terrorism. In addition to the hearings, the Committee reported S. 274, the Nuclear Power Plant Security and Anti-terrorism Act of 1985, and has ordered reported S. 1429, the Terrorist Prosecution Act of 1985.

In the area of juvenile issues, the Committee reported S. 1174, to amend the Juvenile Justice and Delinquency Prevention Act of 1974 to provide States with assistance to establish or expand clearinghouses to locate missing children, and S. 1818, to prevent sexual molestation of children in Indian country. Both of these measures have passed the Senate.

The patent, copyright, and trademark areas were addressed by the Committee with the reporting of S. 1002, to amend the Lanham Act to improve provisions relating to concurrent registrations, and S. 1230, to amend the patent laws implementing the Patent Cooperation Treaty.

Holding hearings concerning several antitrust issues, including the sale of Conrail, the vertical restraint guidelines of the Justice Department, and treble damage liability, the Committee has approved for reporting S. 412, the Malt Beverage Interbrand Competition Act.

In the area of administrative practice and procedure, the Committee reported H.R. 1890, to provide for an equitable waiver in the compromise and collection of Federal claims, and has approved for reporting S. 1562, the False Claims Reform Act of 1985.

Even though the Committee did not have a sufficient time of referral in which to act, the Committee held two days of hearings on S. 51, the Superfund legislation, and offered a package of amendments on the Senate floor dealing with the right to contribution, pre-enforcement review, and judicial review. These amendments were adopted and became a part of the final measure adopted by the Senate.

In addition to the foregoing, the Committee reported S. 40, the Constitutional Convention Implementation Act of 1985, S. 86, the Sex Discrimination in the United States Code Reform Act, and S. 1916, preserving the authority of the Supreme Court Police. S. 86 has passed the Senate. The text of S. 1916 was inserted in the House companion measure, H.R. 3914, which now has been approved by both Houses of Congress and will soon become public law. The Committee also reported four Federal charter bills, two measures amending interstate compacts and two private relief bills.

During the 1st Session of the 99th Congress, the Committee received, and the Senate confirmed 128 executive nominations for the following positions: 22 for U.S. Circuit Judgeships; 62 for U.S. District Court Judgeships; 1 for U.S. Claims Court Judgeship; 1 for International Trade Court Judgeship; 13 for U.S. Attorney; 7 for U.S. Marshal; 1 for Attorney General; 1 for Deputy Attorney General; 1 for Associate Attorney General; 1 for Solicitor General; 5 for Assistant Attorney General; 1 for Administrator, DEA; 7 for membership on the Sentencing Commission (including Chairman); 1 for membership on the Foreign Claims Settlement Commission; 2 for membership on the Copyright Royalty Tribunal; 1 for Chairman of the Administrative Conference of the United States; and 1 for Commissioner of Patents and Trademarks.

SUMMARY OF ACTIVITIES OF THE LABOR AND HUMAN RESOURCES COMMITTEE DURING THE FIRST SESSION OF THE 99TH CONGRESS

During the first session of the Ninety-Ninth Congress, the Senate Labor and Human Resources Committee has held more than forty hearings on a broad spectrum of issues. The subjects ranged from labor union violence, youth unemployment, barriers to special needs adoptions, the role of the United States as a member of the International Labor Organization, nutrition and fitness and their effects on health promotion and disease prevention, to the impact of space technology on human resources. Fourteen measures referred to the committee for action have subsequently been signed into public law. (see attached list) A total of 133 nominations were referred and of these 105 received Senate confirmation. Thirty-one bills under the committee's jurisdiction were approved by the Senate.

Some of the major pieces of legislation to become public law include the Orphan Drug Act Reauthorization, S. 1174/P.L. 99-91; Nurse Training Reauthorization, S. 1284/P.L. 99-92; Health Professions Education Reauthorization S. 1283/P.L. 99-129; Health Research Extension Act, H.R. 2409/P.L. 99-158; Walsh-Healy amendment to the DoD authorization, P.L. 99-145; Fair Labor Standards Public Employee Overtime Compensation Act, S. 1570/P.L. 99-150; and the National Science Foundation Authorization, S. 801/P.L. 99-159. (see news releases for description of measures)

Significant items reported by the Committee which were approved by the Senate but not yet acted upon by the House (excluding those mentioned above) Primary Care Block Grant/Community Health Centers and Migrant Health Centers, S. 1282; National Health Service Corps Amendments, S. 1285; Adoption Assistance Amendments of 1985, S. 1628 (incorporated in the Deficit Reduction Act) and the Comprehensive Smokeless Tobacco and Health Education Act, S. 1574.

Major nominations to be acted upon by the Committee include: William Brock to be Secretary of Labor; Dr. Everett Koop to be U.S. Surgeon General; William Bennett to be Secretary of Education;

Significant nominations:
Dr. Everett C. Koop, Public Health Service.
John Erthein, National Council on Handicapped.
Francis Hodsoll, National Council for the Arts.
Ford B. Ford, Chairman, Mine Safety and Health Review Administration.
William Brock, Secretary of Labor.

SUMMARY OF ACTIVITIES OF THE COMMITTEE ON RULES AND ADMINISTRATION DURING THE 1ST SESSION OF THE 99TH CONGRESS

During the 1st session of the 99th Congress, the Committee on Rules and Administration, under Chairman Charles McC. Mathias, Jr., considered and sent to the Senate a number of bills and implemented various measures and policies that affected the daily management of the Senatorial, committee, and support offices. The following summaries highlight the Committee's actions during 1985.

FEDERAL ELECTION CAMPAIGN ACT OVERSIGHT

Seven bills proposing changes in the campaign finance provisions of the Federal Election Campaign Act have been introduced and referred to the Senate Committee on Rules and Administration in the first session of this Congress. Three of these bills, S. 59 by Senator Goldwater, S. 1072 by Senator Gorton and S. 1891 by Senator Heinz, are legislative proposals for the most part identical to bills on which the Committee received testimony during hearings in the 98th Congress.

S. 59 proposes to place expenditure limits on all candidates, political parties and PACS and also proposes a repeal of the presidential public funding program. S. 1072 would allow candidates to declare that independent spending had become a part of their campaign and thus bring such spending under the contribution limits. This legislation also would triple the amount of expenditures political party committees could make on behalf of their Senate and House candidates. When Senate and House candidates spend more than certain amounts of personal funds, the contribution limits would be tripled for individuals and PAC'S contributing to their opponents. S. 1891 proposes to strengthen the role of political parties in the financing of campaigns by increasing the contributions and expenditures they may make on behalf of federal candidates. This legislation would also change current audit and enforcement procedures at the Federal Election Commission. Under its provisions, committees receiving and expending funds to draft individuals as candidates would be brought under the limits of the FECA.

S. 297, introduced by Senator Boren in January, is identical to a bill he introduced in the previous Congress.

The other bills are S. 1563, Senator Helms' bill on union dues and a later version of Senator Boren's bill S. 1806.

A hearing was held on S. 1787, Senator Mathias' bill proposing to finance general elections to the Senate, on November 5, 1985.

The Committee reported out an original bill, S. 1117, authorizing appropriations in the amount of $12,605,000 for the Federal Election Commission in FY 1986.

PUBLIC PRINTER NOMINATION

On January 3, 1985, Mr. Ralph E. Kennickell, Jr., of Virginia, was nominated by President Reagan to be Public Printer, and his nomination was received by the Rules Committee.

Following an extensive background check by the Committee staff, on June 12, 1985, a public hearing was held on the nomination. At a June 20, 1985, business meeting to consider the nomination, the Committee determined that further investigation into Mr. Kennickell's background was warranted. Subsequently, the Department of Justice was asked to investigate certain questions regarding the nominee's background. The Justice Department had the FBI conduct the investigation, and on November 14, 1985, the Department of Justice submitted the FBI's findings to the Rules Committee.

At a business meeting of the Rules Committee on December 10, 1985, a rollcall vote was taken on a motion to favorably report the nomination of Mr. Kennickell to be Public Printer. The nomination was ordered reported by a vote of 8 to 4.

As of this writing (December 19, 1985), Mr. Kennickell's nomination is pending on the Executive Calendar.

SMITHSONIAN INSTITUTION OVERSIGHT

In exercising its oversight over the Smithsonian Institution, the Rules Committee considered and favorably reported the following measures: S. 583, a bill to authorize renovations to the Cooper-Hewitt Museum in New York City; S. 582, a bill to reauthorize museum suppport activities under the National Museum Act; H.R. 1483, a bill to authorize construction and repair of facilities for the Smithsonian Tropical Research Institute in Panama and the Whipple Observatory in Arizona.

Hearings were held on S. 1311, a bill to authorize the construction of a museum for very large aircraft and spacecraft at Dulles Airport, but no further action was taken.

The committee held hearings on an original measure to authorize new construction at the Freer Gallery of Art.

The Committee also considered and favorably reported the following joint resolution: S.J. Res. 214, reappointing Carlisle Humelsine to be a member of the Smithsonian Board of Regents, and S.J. Res. 215, reappointing William G. Bowen to be a member of the Smithsonian Board of Regents.

LIBRARY OF CONGRESS OVERSIGHT

The Chairman and other members of the Rules and Administration Committee conducted an oversight meeting (as Senate members of the Joint Committee on the Library) on the Library of Congress—specifically the plans and progress of the Library with the renovation and restoration of the Jefferson and Adams buildings, construction of the book deacidification facility at Fort Detrick, Maryland, and the Library's printed card, microform, and computerized catalogs—the U.S. Botanic Garden Park, renamed the Frederick Auguste Bartholdi Park, in honor of the sculptor of the park's fountain—and the final plans for the dedication of the Dr. Martin Luther King, Jr., memorial sculpture in the United States Capitol.

BROADCAST OF SENATE FLOOR PROCEEDINGS

The Committee on Rules and Administration reported favorably Senate Resolution 28 with amendments and recommended that the resolution as amended be agreed to.

S. Res. 28, as reported by the Committee on Rules and Administration, provides for a test period implementation of live, gavel-to-gavel radio broadcast coverage of all proceedings in the Senate Chamber, and a closed circuit test of television coverage of all proceedings, except, in both cases, when a closed-door session is ordered. The Architect of the Capitol, the Sergeant at Arms and Doorkeeper of the Senate, the Librarian of Congress, the Archivist of the United States, and the Committee on Rules and Administration are given certain specified duties by this resolution. Regulations for this coverage are also provided, and a sum not to exceed $3,500,000 for the Architect of the Capitol to carry out the purposes of this resolution is authorized to be expended from the contingent fund of the Senate.

LINE ITEM VETO

Senate Bill 43, which provides that each item of any general or special appropriation bill and any bill or joint resolution making supplemental deficiency, or continuing appropriations that is agreed to by both Houses of Congress in the same form shall be enrolled as a separate bill or joint resolution for presentation to the President, was referred to the Rules and Administration Committee on January 3, 1985. This measure, which was introduced on January 3, 1985, by Senator Mattingly, was co-sponsored by 46 Senators, six of whom, Senators McClure, Helms, Warner, Dole, Stevens, and Garn, are members of the Rules and Administration Committee.

The Committee held two days of hearings on this measure (May 14 and May 20, 1985) receiving testimony in favor of the measure from Senator Mattingly and Senator Evans and testimony in opposition to the bill from Senator Hatfield and a panel of experts (Dr. Louis Fisher, Specialist in American National Government in the Congressional Research Service; Dr. Allen Schick, Professor of Public Policy at the University of Maryland as a visiting fellow of the American Enterprise Institute; and Dr. Norman Ornstein, AEI Resident Scholar.) Senators Mathias, Ford, and Inouye raised questions, and spoke in opposition to S. 43, when questioning the various witnesses.

Statements in favor of the bill were received from Senator Thurmond, Senator Dole, Howard Jarvis (American Tax Reduction Movement), John C. Datt on behalf of the American Farm Bureau Federation, 13 groups and associations led by the U.S. Chamber of Commerce, and Professor Judith Best of the State University of New York at Cortland. Statements for the Record in opposition to S. 43 were received from Common Cause, the AFL/CIO Executive Council, and the National Council, and the National Council of Conservation Districts. Also received for the record was a statement from Johnny H. Killian, CRS Specialist in American Public Law, who concluded that the courts would decide the contitutionality of S. 43, if enacted and implemented by the Congress, on the basis of

how much power shifted from Congress to the President.

The Rules Committee held a mark-up session on Thursday, June 20, 1985, and voted to report S. 43 unfavorably, without amendments, and with a written report.

The motion to proceed to consideration of S. 43 was debated in the Senate from July 17 to July 24, 1985. After three unsuccessful cloture votes, the motion to proceed was withdrawn on July 24.

SENATE COMMITTEE OVERSIGHT

S. Res. 85 the Omnibus Committee Funding Resolution of 1985

The Rules Committee reported annual authorization for the expenditures of the Standing, Select, and Special Committees of the Senate for the period of March 1, 1985, through February 28, 1985, of $44,878,358.

PRINTING FOR THE SENATE

The Rules Committee reported favorably the following printing resolutions for Senate committees:

S. Res. 30, to authorize the printing of the report entitled "Developments in Aging: 1984" for the Special Committee on Aging; S. Res. 244, authorizing the printing of background information on the Committee on Foreign Relations for that committee; S. Res. 181, authorizing the printing of the report entitled "Highway Bridge Replacement and Rehabilitation Program, Sixth Annual Report to Congress" for the Committee on Environment and Public Works; S. Res. 231, authorizing the printing of a revised edition of the "Standing Rules of the Senate" for the Committee on Rules and Administration; S. Con. Res. 80, to authorize the printing of 2,000 additional copies of the print entitled "Defense Organization: The Need for Change" for the Committee on Armed Services; and S. Con. Res. 85, to authorize the compilation and printing of the Bicentennial Edition of the Biographical Directory of the United States Congress for the Committee on Rules and Administration.

THE CAPITOL

The Ninth Edition of *The Capitol*, a pictorial history of the Capitol and of the Congress, is now in production. Delivery to Members is scheduled for early 1986.

U.S. CAPITOL HISTORICAL SOCIETY CALENDARS

The Rules Committee conducted a survey of all Members of the Senate regarding their preference on the "We The People" Historical Society calendar. With 89 Senators responding to the questionnaire, the results indicated that the overwhelming majority of Senators desired delivery of the 1,000 calendars that have traditionally been provided them. A number of Senators expressed their opinion that the calendars are an excellent constituent relations tool. Committee staff is currently in the process of distributing the calendars to Senator's offices.

ADMINISTRATION OF THE SENATE

Office automation systems for Senators' offices

As of December 19, 1985, office automation equipment has been installed in the Washington offices of 94 Senators. The staff of these offices believes this program has been a great help in providing them with tools for increasing their productivity. There are now requests for an expansion of this program in Washington and for an extension of these services to home state offices.

The committee received and considered office automation plans for twenty committees and offices of the Senate. 15 of these plans have been approved and are installed or in the process of being installed. The remaining five are still being reviewed.

Procurement of new telephone system for the Senate

A Request for Proposals (RFP) for a new telephone service was issued by the Committee on Rules and Administration on October 1, 1984. Responses were received from 6 vendors on January 31, 1985.

The Senate was joined in its investigation of new phone services by the House Administration Committee at the request of Chairman Annunzio. (May, 1985) House and Senate staff and consultants and representatives of the Architect and the Office of Technology Assessment formed a joint evaluation team. The joint team attended all formal contacts with bidders, such as oral presentations, demonstrations and site visits.

Upon completion of site visits both House and Senate reviewed the original RFP. An amended RFP containing revised specifications, reflecting increased capacity to accommodate the House and other purposes was issued on June 4, 1985. Responses to the amended RFP were received on July 24, 1985. Of the 6 original bidders, two declined to submit bids on the amended request and withdrew.

The four remaining bidders were asked to appear before the joint evaluation team to describe their products and installation plans on August 22-26, 1985.

Demonstrations were arranged and conducted in the Washington offices of three customers to permit AAs, office managers, and receptionists to review desk sets in a working environment. (August 28-29) Their comments were considered in the evaluation.

All bidders were asked to review their proposals in the light of discussions and submit best and final cost proposals by September 5, 1985. All complied.

All contracts with bidders were coordinated by the contracting officer and meetings with bidders were held with representatives of both houses in attendance. The two teams performed their evaluations separately, concentrating on aspects of the bids that affected their respective house and items that were related to coordination of services between the two houses.

The Sergeant at Arms presented his recommendation for telephone service for the Senate on Nov. 12, 1985. Additional information meetings were held for the committee members.

The Committee considered the recommendations on Dec. 4 and Dec. 10. After prolonged discussion, the Committee voted to reject all the pending bids, to rebid it within 90 days, and to specify that on evaluations the technical points would receive 80 percent of the weight and the cost 20 percent, as opposed to the 75/25 ratio in the previous bid.

MASS MAIL REGULATIONS

The committee amended the regulations governing mass-mail with the following provisions: (1) increased the minimum paper allotment from 1.2 million to 1.8 million sheets per year per senator, (2) excluded town meeting notices from the paper allotment if the Senator is at the town meeting, (3) excluded "dear friend" letters in response to organized mail campaigns from the paper allotment, (4) provided for the publication on a quarterly basis of Senators' individual mass/mail costs, (5) defined a paper allotment year, and (6) provided for the printing of pictures of missing children on Senate mass-mail and on letters prepared with the Senate Correspondence Management system.

The committee also reported an original measure, Senate Concurrent Resolution 91, to provide for the quarterly reporting of the mass-mail costs of members, committees and offices of the House of Representatives and the Senate.

Contingent fund expenditures

The Rules Committee auditors processed 40,000 vouchers this year for contingent fund expenditures, representing a 5% increase over the previous year.

Administration of Senate Office Buildings

Under the direction of the Rules Committee, with the assistance of the Office of the Architect of the Capitol, the following administrative actions concerning the Senate Office Buildings occurred in 1985:

New modular office furniture was assigned to 10 Senators in the Hart Building;

Plans to locate the Senate Employees' Child Care Center from the Immigration Building to a new location were finalized;

Capitol offices were reassigned to 42 Senators; a total of 78 Senators have now been provided with office space in the Capitol.

New space in the Capitol for the media is presently nearing completion;

Studies associated with acquiring the Old Post Office Building at Massachusetts Avenue and North Capitol have been completed.

SUMMARY OF ACTIVITIES OF THE SENATE SMALL BUSINESS COMMITTEE DURING THE 1ST SESSION OF THE 99TH CONGRESS

I. SBA AUTHORIZATION LEGISLATION

The Committee reported out and the Senate passed, by vote of 94-3, a three-year authorization bill to fund the Small Business Administration's (SBA's) basic core of credit, management assistance and disaster loan programs for fiscal years 1986-1988, while achieving substantial agency savings of $2.5 billion. The bill, S. 408, was then incorporated into the Omnibus Reconciliation Act, which passed the Senate on December 19, 1985.

The final budget plan for the SBA attains significant outlay savings through a budget freeze in fiscal year 1986, termination of SBA's Direct Loan Program (except for economic opportunity loans, loans to MESBICs veterans and, the handicapped), elimination of the Non-physical Disaster Loan Program, and the following policy changes: removing farmers from SBA's Disaster Loan Program and requiring them to obtain assistance from the Farmers Home Administration for disasters declared after September 30, 1985, and permitting the Small Business Investment Company (SBIC) Program to be financed through private capital markets instead of through the Federal Finance Bank.

The following programs were maintained through FY 1988:

Credit programs

The *7(a) Loan Guarantee Program* will continue to allow banks to provide long-term financing, otherwise unavailable, to small firms. These loans can be up to $500,000 with terms usually 7-10 years in length. Two important reforms were made in this program. First, the fee to the borrower was increased from 1% to 2%; and second, SBA's maximum loan guarantee was decreased to 85% for FY 1986 program levels: $2.5 billion.

Small Business Investment Company (SBIC) and Minority Enterprise and Minority Enterprise Small Business Investment Company (MESBIC) Programs will continue to fill the critical void in the availability of small business equity financing by providing small firms with venture capital through SBA-licensed private lending companies. FY 1986 program levels: $20 million for SBICs and $41 million for MESBICs.

The 503 Certified Development Company Loan Program will continue making "bricks and mortar" financing available to healthy small businesses for planned expansion and job creation through a partnership among federal, state and local governments, and the private sector. FY 1986 program level: $400 million.

Through its *Surety Bond Guarantee Program*, SBA will continue to assist qualified small businesses by extending a guarantee to a surety of up to 90% against loss, thereby making bonding more easily obtainable for them. This is important as small business contractors and subcontractors must often furnish surety bonds in order to obtain public and private sector construction contracts. FY 1986 program level: $1 billion.

All the FY 1986 levels for the loan guarantee programs described above will be adjusted for inflation in the outyears.

Disaster assistance

Through its *Physical Disaster Loan Program*, SBA will continue to provide critical and timely assistance to businesses and homeowners who are victims of physical disasters. SBA will continue making loans at favorable terms to property owners to cover uninsured losses resulting from natural disasters. Farmers, however, will be removed from this program as of October 1, 1985.

Management assistance

SBA's management assistance programs, including *Small Business Development Center (SBDC), Small Business Institute (SBI), Service Corps of Retired Executives (SCORE), and Active Corps of Executives (ACE)*, will continue to utilize private sector resources to meet the wide-ranging needs of small businesses. These programs, through a delivery system composed of retired volunteers, universities and the private sector, will continue to provide affordable training and counseling to small business entrepreneurs, which will be funded through the salaries and expenses portion of SBA's budget.

II. TAX HEARINGS

The Committee conducted 13 field hearings in seven states as part of a comprehensive series of forums to examine the impact of tax reform on small business. The hearings focused on the Administration's November, 1984 tax simplification proposal and the most updated version of their package, as well as the Bradley-Gephardt and Kemp-Kasten tax reform proposals. Of particular interest to the Committee and to the witnesses who testified were those provisions which affect small business' ability to attract and retain capital. Examples of such provisions include those dealing with the Investment Tax Credit (ITC), depreciation, and the taxation of capital gains. A Committee report detailing the proceedings will be issued in January.

III. NATIONAL ADVISORY COUNCIL ANNUAL MEETING

The Committee's National Advisory Council, at its annual meeting on October 23, unanimously approved eight resolutions, including measures calling for the President and Congress to take immediate action on the budget crisis, endorsing cuts in all areas, including entitlement programs, social security, defense spending and tax increases, if necessary; to oppose comprehensive tax reform, with the exception of a minimum corporate tax; and to maintain the Small Business Administration as an independent agency. In its fifth annual meeting, the Council, which is composed of 25 small business persons from around the nation, also declared its support for vigorous enforcement of U.S. antitrust laws; stronger implementation of the Prompt Payment Act; called for hearings and a federal standard on the issue of liability insurance, in light of the current crisis in availability and affordability for small firms; and asked the President, the U.S. Trade Representative, the International Trade Commission and the Commerce Department to reduce imports from any country whose unfair trade practices contribute to our trade deficit with that country.

IV. PROMPT PAYMENT ACT OVERSIGHT

The Committee conducted the first of two hearings to oversee the implementaton of the Prompt Payment Act of 1982 to ensure that small contractors doing business with the federal government receive timely payment. The initial hearing took place in Norfolk, Virginia, with the second planned for early next year in Washington, DC. The hearings were called in response to reports from small business contractors that some federal agencies are failing to fully carry out the objectives and Congressional intent of the Prompt Payment Act.

V. OVERSIGHT OF SBA'S VETERANS PROGRAM

The Committee conducted an oversight hearing into the veterans assistance programs and Office of Veterans Affairs at the Small Business Administration on November 13. The hearing was held in order to determine whether SBA has been fulfilling its mandate to give "special consideration" to veterans in all agency programs, as directed by Public Law 93-237. The Committee is formulating recommendations to the agency for improving their veterans outreach efforts based on the hearing record and responses to follow-up questions.

Summary of Activities of the Committee on Veterans' Affairs Activities During the First Session of the 99th Congress

I. INTRODUCTION

During the First Session of the 99th Congress the Senate Committee on Veterans' Affairs was active in addressing many important issues and concerns which face the Nation's veterans. During the past year the Committee has continued its efforts to be responsive to the needs of veterans through improving health-care and benefits programs provided by the Veterans' Administration as well as veterans' programs administered by the Department of Labor.

The Committee held 18 days of hearings on legislative and oversight matters and the legislative recommendations of veterans' service organizations. Among those hearings were 4 days of hearings concerning VA health care and medical facility construction programs and related matters; 1 day of hearings on the VA fiscal year 1986 budget; 2 days of hearings concerning veterans' exposure to ionizing radiation; 3 days of hearings concerning veterans' compensation and employment matters; 2 days of hearings on the VA home loan guaranty program; and 1 day of hearings on the nomination of Donald Shasteen to be the Assistant Secretary of Labor for Veterans' Employment.

The Committee met in open session 5 times and reported 5 bills to the Senate, the provision of one of which, with modifications, was ultimately enacted into 1 public law.

(1) The Veterans' Administration Health-Care Amendments of 1985, Public Law 99-166, December 3, 1985.

Those not yet enacted are:

(1) H.R. 752, the proposed "New GI Bill Amendments of 1985" reported by the Committee on June 27, 1985 (S. Rept. 99-17).

(2) S. 367, the proposed "Veterans' Administration Adjudication Procedure and Judicial Review Act" reported by the Committee on July 8, 1985 (S. Rept. 99-100) and passed by the Senate on July 30, 1985.

(3) S. 1730, the proposed "Consolidated Omnibus Budget Reconciliation Act of 1985" Title XI reported by the Senate Committee on Veterans' Affairs on September 26, 1985 (S. Rept. 99-146).

(4) S. 1887, the proposed "Veterans' Compensation and Benefits Improvement Act of 1985" reported by the Committee on November 26 (S. Rept. 99-200) and passed by the Senate on December 2, 1985.

On March 7, 1985, the Majority of the Committee transmitted to the Budget Committee, pursuant to section 301(c) of Public Law 93-334, its recommendations for the fiscal year 1986 budget for veterans' benefits and services. The Minority of the Committee transmitted, separately, its recommendations on March 6, 1985.

LEGISLATIVE ACTIVITIES

Veterans' health care

During the First Session of the 99th Congress, 4 days of hearings were held and a major legislative initiative was enacted which concerned veterans' health-care programs.

On June 12, 1985, the Committee ordered reported favorably S. 876 which was ultimately enacted on December 3, 1985, as Public Law 99-166, the Veterans' Administration Health-Care Amendments of 1985. Public Law 99-166, an omnibus bill including 27 separate provisions, among other things:

(1) Requires the Administrator to conduct a 3 year pilot program under which the VA would increase the range of services provided to Vietnam-era veterans at 10 existing VA readjustment counseling centers, otherwise known as "Vet Centers".

(2) Extends through Fiscal Year 1989, the period of time which those veterans exposed to ionizing radiation from a nuclear detonation or toxic substances in Vietnam would be eligible to receive priority VA health-care services for disabilities not determined to be unrelated to such exposure.

(3) Requires the Administrator to establish a comprehensive quality-assurance program to monitor the quality of VA health care.

(4) Requires the VA to submit to the Committee on Veterans' Affairs of the Senate and House of Representatives a five-year strategic plan detailing the mission and goals of VA medical facilities and a construction plan based on those goals.

(5) Approves the VA's requested individual medical facility construction projects although not the dollar levels requested by the VA, in the fiscal year 1986 budget submission. For fiscal year 1986 the President requested $417.2 million for major construction projects and $194.4 million for minor construction projects.

In addition to the aforementioned legislative activities, the Committee held hearings to review other important health-care issues including oversight of existing health-care programs including the VA's construction planning programs and the consideration of legislation concerning veterans exposure to Agent Orange and ionizing radiation.

Education and related matters

H.R. 752, as reported by the Senate Veterans' Affairs Committee would accelerate the effective date of the educational assistance programs for active duty and Selected Reserves personnel established by P.L. 98-525. In addition H.R. 752 would:

(1) Extend the deadline for enrollment in the "Veterans' Educational Assistance (VEAP)" by six months from July 1, 1985, until December 30, 1985.

(2) Allow the Secretary of Defense to offer benefits under the "New GI Bill" to individuals who return to active duty after a break in service.

The Senate Armed Services Committee reported unfavorably the aforementioned legislation and no further action has been taken.

Judicial review

On July 8, 1985, the Committee reported S. 367, the proposed "Veterans' Administration Adjudication Procedure and Judicial Review Act" which would provide for judicial review of final agency decisions on veterans' claims for VA benefits and which would modify the $10 statutory limitation on the fee payable to an attorney representing a claimant before the VA. On July 30, 1985, the Senate passed the text of S. 367, as reported. No further action was taken on this legislation during the First Session of the 99th Congress.

Reconciliation

The Committee met on June 20, 1985, to consider Administration's legislative proposals which included a means test, and reimbursement from health insurers for the cost of health care furnished by the VA.

Pursuant to section 2(1) of S. Con. Res. 32, the First Concurrent Resolution on the Budget for Fiscal Year 1986, the Committee, on September 26, 1985, ordered reported favorably legislation and report language recommending certain budget savings. Pursuant to its reconciliation instructions, the Committee recommended changes in the law sufficient to reduce budget authority and outlays for veterans' programs by $1.15 billion during FY 1986-FY 1988.

Among other things, this legislation would:

(1) Clarify eligibility categories and priorities for health care provided for or furnished by the VA, would establish expanded eligibility for such health care for certain service-connected disabilities, and establish an income eligibility criterion for non-service-connected veterans.

(2) Authorize prospectively the United States to recover reasonable costs of care and services furnished through VA or non-VA facilities at VA expense for veterans with no service-connected disability, who are covered under health-plan contracts.

The above mentioned provisions were included in S. 1730, the proposed "Consolidated Omnibus Budget Reconciliation Act of 1985" as passed on November 14, 1985, as an amendment in the nature of a substitute to H.R. 3128. The Conference agreement on H.R. 3128, is expected to be considered by the House and the Senate on December 19, 1985. The statement of managers outlines the Conference agreement.

Compensation and related issues

During the First Session of the 99th Congress, the Senate Veterans' Affairs Committee reported, and the full Senate approved, on December 2, 1985; S. 1887, the proposed "Veterans' Compensation and Benefits Improvement Act of 1985" a bill with 49 sections in 5 titles. It would provide that veterans in receipt of compensation for service-connected disabilities dependents and survivors in receipt of dependency and indemnity compensation would receive an across-the-board cost-of-living increase of 3.1 percent effective December 1, 1985. In addition to increasing the rates of compensation, other important provisions of S. 1887 would:

(1) make improvements in the Home Loan Guaranty Program, including the establishment of stricter credit underwriting standards.

(2) make changes in the various educational assistance programs available to veterans.

(3) extend and expand the Emergency Veterans' Job Training Act and provide an authorization for additional funding for that program.

(4) provide the option of marking gravesites in national cemeteries with upright markers.

The Senate and House were unable to reach a compromise on an omnibus compensation bill prior to the end of the 1st session of the 99th Congress. In order to ensure that a cost-of-living adjustment (COLA) would be provided to veterans in receipt of compensation for service-connected disabilities, dependents, and the survivors of veterans whose deaths were due to service, a 3.1% COLA rate increase was included in both a Senate amendment to H.R. 1538, the Veterans' Compensation Rate Increase and Job Training Improvement Act of 1985, and in the conference report of H.R. 3218, the Omnibus Budget Reconciliation Act of 1985 which was passed by the Senate and House on December 19, 1985. H.R. 1538, as amended, and passed by the Senate on December 19, 1985, also renamed and extended for one year the Emergency Veterans' Job Training Act.

Expected action by the committee during the 2d session of the 99th Congress

During the next session of Congress, the Committee will continue its oversight of the major programs administered by the VA.

Special emphasis is expected to be placed on several program areas including:

(1) alternatives to institutionalization for aging and chronically mentally ill veterans.

(2) a continued review of the VA's loan guaranty program.

(3) a review of the VA's financial management and resource allocation system and the use of, among other things, diagnostic-related-groups (DRG's).

(4) an examination of the VA's automatic data processing (ADP) system.

AMENDMENT TO INCREASE LIMIT ON DISTILLED SPIRIT PLANTS EXEMPT FROM BOND REQUIREMENTS

Mr. DOLE. Mr. President, during a recent town meeting in Garden City, KS, I was approached by two men who own a small alcohol fuel producing plant in Leoti, KS. These men were concerned that as of January 1, 1986, they would be forced to close their plant and lay off approximately 12 employees because of a Federal law requiring them to furnish a $110,000 bond. Officials with the Bureau of Alcohol, Tobacco and Firearms inform me that this bonding requirement is to guarantee that an alcohol fuel producing plant will pay any Federal tax liability accruing on the distilled spirits produced by the plant. It seems rather strange to me, Mr. President, that such a bonding requirement should result in the closing of an alcohol fuel producing facility, as there is no Federal tax liability on alcohol fuel.

According to the two men operating this plant, it has been impossible for them to obtain the federally mandated bond. Their bank is a small agricultural-oriented facility and due to the sad shape of the agricultural economy these bonding companies have no interest in underwriting such a bond.

I do understand, Mr. President, that at one stage in the alcohol distillation process there is some concern that the alcohol produced by an alcohol fuel plant could be diverted and used for beverage purposes. Should this happen there would be Federal excise taxes due on the product. However, Mr. President, I have been assured by officials with the Bureau of Alcohol, Tobacco and Firearms, that Public Law 96-223 sets out specific criminal penalties for any such illegal activities—thereby providing the Government with a form of recourse against those diverting the product illegally.

Today, I would have offered an amendment to increase the limit on distilled spirit plants exempt from bonding requirements when producing alcohol fuels if there had been a realistic chance for enactment. This amendment would have raised the bonding threshold for those plants in operation for at least 2 years, from the 10,000-proof gallon level to a 2,500,000-proof gallon level, for 1 year. It will allow those small alcohol fuel production plants experiencing bonding problems to remain open next year, and would have given Congress enough time to fully discuss the merits of the bonding requirement.

Unfortunately, it was not possible to get the House to consider this measure today. I hope to be able to move this legislation very quickly in the next session.

I ask unanimous consent that the text of the amendment I intended to offer be printed immediately following my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . In the case of any distilled spirits plant which, for each calendar quarter during 1984 and 1985, was required to obtain, and obtained, a bond under section 5181 of the Internal Revenue Code of 1954, section 5181(c) of such Code shall, for each

calendar quarter during 1986, be applied by substituting "2,500,000 proof gallons" for "10,000 proof gallons".

APPOINTMENTS BY THE CHAIR

The PRESIDING OFFICER (Mr. WALLOP). The Chair, on behalf of the President pro tempore, pursuant to Public Law 94-118, appoints the Senator from Hawaii [Mr. INOUYE] to the Japan-United States Friendship Commission.

The Chair, on behalf of the President pro tempore, pursuant to Public Law 99-83, appoints Rabbi Chaskel Besser to the Commission for the Preservation of America's Heritage Abroad.

The Chair, on behalf of the President pro tempore, pursuant to Public Law 99-93, as amended by Public Law 99-151, appoints the following Senators to the United States Senate Caucus on International Narcotics Control: the Senator from Delaware (Mr. BIDEN), Co-Chairman; the Senator from Arizona [Mr. DECONCINI]; and the Senator from Illinois [Mr. DIXON].

The Chair, on behalf of the Vice President, pursuant to Executive Order 12131, signed by the President on May 4, 1979, as extended, appoints the Senator from Texas [Mr. BENTSEN] to the President's Export Council.

APPLAUDING ADOPTION FACTBOOK DEVELOPED BY UTAH CITIZEN

Mr. HATCH. Mr. President, I am pleased to bring to the attention of my colleagues an important resource related to the adoption of children. Recently, the national news media have been talking about adoption statistics—data that has not been collected by the Federal Government since 1975. As it turned out, it took the efforts of a national voluntary organization, the National Committee for Adoption, to gather this important data and make it available to policymakers, to those who offer services to women with crisis pregnancies, and to the tens of thousands of families who would like to adopt but can't. This data was published as part of the "Adoption Factbook."

The person who is primarily responsible for the data gathering is Ione J. Simpson. She found the right resources and worked with States to obtain this information without a costly and cumbersome Federal program. Ione is a career social worker and long-time employee of the LDS Social Service system who did the data-gathering design, while on sabbatical, as a staff member of the National Committee for Adoption. Ione is a resident of Salt Lake City, and my staff and I had the opportunity to meet and work with her while she was in Washington for a year's work as Director of Public Policy and Professional Practice for the National Committee.

Those of us in Utah take pride in our willingness to look at all the facts and make decisions based on those facts. In the case of adoption, thanks to Utah resident Ione Simpson, we now have the facts we need to make better decisions affecting all children who need homes—healthy infants, special needs children, and children from other lands who look to America as their only chance for permanence.

IN SUPPORT OF THE INCREASE IN BENEFITS OF SERVICEMEN'S GROUP LIFE INSURANCE

Mr. COCHRAN. Mr. President, I support enthusiastically the proposal to increase the servicemen's group life insurance benefits from $35,000 to $50,000. I think this increase should be retroactive to include those brave Americans who were killed in the Beirut bombing in 1983.

The recent tragedy in Gander, Newfoundland, which took the lives of 250 members of the 101st Airborne Division, including 2 young soldiers from my State of Mississippi, is being felt by families throughout the Nation. This increase in insurance benefits would not replace the departed loved ones, but could help provide for those families now facing an uncertain future.

Each and every day, American soldiers, sailors, airmen, and marines risk their lives for their country. Major tragedies such as the Gander crash and the Beirut bombing focus our attention, but there are lives lost by service men and women almost daily which do not receive the Nation's attention. The loss of the surviving families, however, is just as real.

On August 19, 1981, two Navy F-14's from the U.S.S. *Nimitz* were attacked and subsequently shot down two Libyan fighters. The F-14 squadron commander and lead pilot was Comdr. Hank Kleeman. A 1965 Naval Academy graduate, he had served his country wherever he was needed, and when called upon this August night, he did not hesitate. His actions made all Americans, including his wife and four children, proud. He was subsequently promoted to captain and assigned as commanding officer of Air Test and Evaluation Squadron Four in California. On the morning of December 3, 15 days ago, Capt. Hank Kleeman was killed in an aircraft accident.

The increased insurance will not provide financial security for the survivors of Hank Kleeman, but it will help to provide a promise of education for his four children. It will do the same for the families of those who were killed at Gander, at Beirut, and throughout the world. This legislation would have a major positive impact on the families who deserve our support the most.

THE OIL BUST

Mr. BOREN. Mr. President, as I have previously mentioned on the floor, I have written Finance Committee Chairman Senator ROBERT PACKWOOD requesting hearings early next year on my proposal to put in place an oil import fee.

Mr. President, as I said then, we should be prudent and put in place a safety net for the goals we have achieved in energy conservation, for America's domestic energy, and the country's financial system which funds that industry.

We should act now to prevent the disastrous effect sudden sharp drops in the price of oil would have on our economy. Prices may not fall dramatically, and the tiers of an oil import fee may not ever be necessary. But we should protect against the possibility of that happening, and not wait until a potential problem becomes a full-blown crisis.

Mr. President, I urge my colleagues to read the column written by Charles Krauthammer and printed today in the Washington Post, and I ask that the column be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

THE OIL BUST

If the strain of all the good will, cheer and generosity of the season has left you thoroughly exhausted, I offer relief: a few minutes of sweet, unmitigated vindictiveness. OPEC is dead. Time for rejoicing.

Astute observers detected the first sign of the end of the oil era not in the financial pages, but in the sudden disappearance from TV screens of the Santa Gertrudis cattle. You remember: the Exxon ads that, years ago, showed the happy herd milling about in peaceful coexistence with a Texas refinery, living proof of Big Oil's neighborliness.

When oil was king, ads could disdain anything so crude as product promotion. No more tigers in the tank. Ads were for image. Seen the ads lately? The Santa Gertrudis are gone. And the tiger, promising better performance and symbolizing good old grasping competition, is back. So is the oil market.

For almost 10 years OPEC *was* the market. No longer. Earlier this month OPEC collapsed as a cartel. The beauty is that OPEC destroyed itself. The massive oil shocks of 1973 and 1979-80 stimulated so much energy conservation and non-OPEC production that OPEC now sells only a third of the free world's oil, down from almost two-thirds in its heyday. Thanks to its greedy formula of curtailing production to raise prices, OPEC gratuitously forfeited much of its market share—*the* measure of economic power—to others, such as Mexico, Britain and Norway.

Ah, greed. A recent analysis by the London-based Economist shows that had

OPEC raised prices merely non-extortionately, say, in accord with GNP increases in the West, it would over the past six years have accumulated exactly the same total income ($1.3 trillion). But it would now have (1) a steadier and higher price, (2) a one-third greater, and probably controlling, share of the world market and (3) reason to smile. Instead of being at the edge of a rising income curve, it is now at the edge of a cliff. Who says there is no justice in the world?

OPEC, of course, has another word for greed. At the December OPEC meeting, Tamunoeni David-West, Nigeria's oil minister, said, "Nigeria has made enough sacrifices to promote the ideals of OPEC." The beneficiaries of past OPEC idealism—the battered economies of the West and the ruined economies of the oil-poor Third World—welcome OPEC's retreat from highmindedness.

The news, however, is not unequivocally good. Oil prices, now at $28 per barrel, are perched for a free fall. Since Persian Gulf crude costs about $2 per barrel to produce, there is no telling how great the fall could be.

That is very good news for the world's economies, but it carries a threat.

Chevron Chairman, George Keller, once called it the Velvet Trap scenario: a sharp drop in oil prices leads to an increase in consumption, a slowdown in energy substitution out of oil, and a decrease in marginal production from expensive non-OPEC, wells, such as those in the Arctic and the North Sea. Gas is guzzled, wells shut down, the market tightens, and, in the 1990s, the trap closes: a crisis, a panic, another oil shock.

What to do? The solution is an oil import fee. Let it go into effect only if the price falls below the current $28. If the world price is $18, the tax is $10. If it is $23, the tax is $5. If it is $28, the tax is zero. That way no one pays a penny more for gas or heating oil than he does today. Adjusted, say, every three months to reflect the average world price, such a tax would soak up windfall only.

The effects are clear. It would keep consumption from rising. (In 1984, with prices falling, U.S. oil consumption rose 3.2 percent.) And, by maintaining at $28 the price offered domestic producers, it would keep a lot of marginal wells from shutting down. (Already the expectation of lower oil and gas prices has caused the number of U.S. rotary drill rigs in operation to fall to the lowest level since 1976.)

Why would anyone oppose such a boon? The president because he has a tax allergy and supply-siders because they don't want to take away the stimulative effect of an oil price drop.

Tax allergies are incurable, but perhaps one can reason with supply-siders. An oil import fee does not abolish the stimulate effect of an oil price drop. It merely reallocates it. The money—at $10 per barrel, $15 billion per year—is not lost. It simply gets collected by government instead of being passed on directly to oil users as a reward for energy waste.

The point of an oil import fee is to raise the (relative price of oil. The windfall does not disappear, nor the stimulative effect. In theory, the oil tax money could be refunded in the form of lower income tax rates. The Gramm-Rudman era, even the most starry-eyed supply-sider will concede, is not a very good time for that. Well, then, an oil fee could narrow the deficit and obviate the need for corresponding—anti-stimulative—spending cuts.

If there ever was a best-of-both-worlds idea, this is it. The last time it was broached in Congress was by Senate Budget conferees in July. One colleague put it to Sen. David Boren: "The oil import fee makes so much sense that Congress probably won't pass it." It didn't. It should.

MYTH OF THE DAY: TERRORISM, IT CAN HAPPEN HERE

Mr. PROXMIRE. Mr. President, the myth of the day is something very basic to all of us. To you, to me, to all Americans, namely the threat of international terrorism and the feeling that it can't happen here.

Terrorism, I'm sorry to say, is going to be a fact of life for us and will loom like a dark, deadly shadow over the international political landscape for the rest of the century. And that is not a happy thought.

Am I being some sort of Cassandra, bringing warnings that no one heeds? I sincerely hope not. Let's take a look at the facts.

From 1975 to early 1985, terrorists struck more than 5,000 times worldwide. And the tragic legacy: 4,000 dead and 8,000 wounded. Last year alone, the U.S. Government counted nearly 600 international terrorist acts.

Now, if those numbers are not grim enough consider this: a recent study by the Rand Corp. says terrorist acts are rising at an annual rate of 12 to 15 percent. And in that same report there is something that could be even more ominous: that terrorism is becoming commonplace, even routine or ordinary. What an outrageous thought that something as heinous as the hijacking of the cruise ship *Achille Lauro* and killing of an elderly, paralyzed American could become routine. No decent person, anywhere on this planet, can accept such acts as routine.

And we have other things to worry about: state sponsored terrorism. I guess it is not enough that individual madmen murder the innocent, now we have the specter of outlaw states aiding and abetting these blood-thirsty killers.

Share another nightmare with me: nuclear terrorism. Preposterous, you say? I think not. Nuclear proliferation has brought atomic materials and the knowledge of how to build a bomb to more countries. Now imagine for a moment an outlaw nation giving a terrorist band an atomic bomb. That would be a catastrophe! If you added all the world's terrorist acts from Munich 1972, to the *Achille Lauro*, it could never equal the horror of a city-destroying atom bomb in the hands of terrorists.

The fact is we have grown complacent about terrorism. That could be tragic.

We see the pictures from Lebanon and assume what happens there can't happen here. I wish that were true. Alas, it is not.

How many remember last year's terrorist bombing right here in the U.S. Capitol? We have been very fortunate so far. The U.S. Capitol bombing killed no one. But what about next time? There is absolutely no indication that terrorism will vanish overnight.

So, what is to be done? Do we cower in fear, ignoring the problem, hoping it will go away? Hardly! There are several concrete, relatively simple steps we can take.

We should continue to beef up physical security. That means checking more bags, inspecting more briefcases. Inconvenient? Sure it is. But it is far simpler and far cheaper to make these checks rather than wishing we had after some strategy.

We need better security for our Americans abroad. The United States is always going to be a prime target with our extensive official and commercial ties overseas. We don't need another Lebanon with an Embassy destroyed or Marines blown up.

Better intelligence efforts to root out these enemies of decent people is another step. And based on that close cooperation with other countries to identify terrorists before they strike. We must label those rogue nations who help terrorists.

Most of all we must realize it can happen to us. Terrorism can strike here. That doesn't mean living in fear. Absolutely not! It does mean being aware that we could have serious problems if we don't work vigorously to stamp out this scourge of international terror.

"STAR WARS" WILL INCREASE THE LIKELIHOOD OF NUCLEAR WAR

Mr. PROXMIRE. Mr. President, there are a series of reasons why the SDI or "star wars" program can develop into one of the most tragic mistakes in this country's history. First, it now seems clear that there is an overwhelming consensus on the part of the most knowledgeable supporters of this program that it can never protect American cities. The President has said that SDI can eventually do this. He apparently believes it. But the President is virtually alone in this conviction. In December in a series of three lengthy reports Charles Mohr wrote a detailed analysis of the SDI or star wars in the New York Times. Mohr talked with virtually all the top experts on star wars both in the administration and outside of the administration. He concluded that whereas 18 months ago some star wars supporters still thought that a "near perfect" defense was possible, this is no longer the case. Mohr reports:

Instead of stressing the goal of a defense that is nearly perfect by the standard of how many Soviet nuclear warheads it could shoot down, Administration figures now

stress that if "Star Wars" could only deny the Russians the ability to destroy the key military targets, which the Administration perceives to be the Russians' only goal, it would be good enough.

The study by the Office of Technology Assessment found a series of reasons why the SDI would be more likely, not less likely, I repeat more likely to bring on a superpower nuclear war. First, if both superpowers had similar but limited defenses, whichever superpower struck first would have a major advantage because it could knock out much—though not all of its opponent's nuclear arsenal.

Why is this? Consider: What does the SDI need to succeed? Any chance of a successful star wars defense depends on a sharp reduction of the adversary's nuclear arsenal. How can this be achieved most surely? Answer: A preemptive attack could provide precisely that. This is why the Office of Technology Assessment has concluded that if both sides deploy and SDI system, as the President has proposed, the prospect of a preemptive Soviet strike would sharply increase. As OTA observes:

Even a limited Soviet defense would have to deal only with a "ragged response" from a diluted United States retaliatory arsenal.

Of course a dangerous possibility is a situation in which the defenses of each nation are vulnerable to a preemptive strike by the other side. What happens under those circumstances? What happens is that whichever adversary strikes first has a huge advantage. Result: mutual deployment of SDI will make a super power nuclear war far, far more likely.

Mr. President, one of the most revealing disclosures in the OTA report as described by Charles Mohr in the New York Times is the result of a war games scenario that simulates star wars defenses. One Soviet affairs specialist described it this way:

We found we were playing against defense contractor personnel and others who know nothing about Soviet doctrine. It took our whole team, the Red team, less than 20 minutes to agree that our first counter to "Star Wars" would be to increase offensive missile numbers. Their team, the Blue team, said, "No, that is not how the Soviets think." Every step we took surprised them.

In a later speech I intend to discuss the cost of "star wars" as it will affect not only the research, the production and the deployment of immensely expensive hardware, but the additional cost of supplementing an SDI system with a new immensely costly air defense and a vast new, hugely expensive civil defense system. What a tragedy! We may be on the verge of pouring the economic, scientific, and manpower resources of this great Nation into far-and-away the most costly system the world has ever seen. What happens when we have it? We will find it will not work except on one terrible condition. It will work only if we initiate the first strike. We will know that our adversary, the Soviet Union, will face the same dilemma. They too will have some kind of an SDI which they also know means their best chance of survival will be to strike before the United States does. What does that kind of situation do to the prospect of nuclear war? Will we be better off? Consider what the President's preeminent spokesman on foreign policy, our Secretary of State George Shultz, said just last December 10. He said:

In the 1980's and beyond, most likely we will never see a world in a total state of peace or a state of total war. The west is relatively very well prepared to deter an all-out war, or a Soviet attack on western Europe or Japan; that's why these are the least likely contingencies.

The Secretary of State was telling us that the prospect of super power nuclear war right now is remote, and it will remain remote for years to come. But all that changes with Star Wars. The real tragedy is that our multitrillion-dollar folly will sharply increase the likelihood of nuclear war. What a way to throw away a few trillion dollars.

GENOCIDE CONVENTION: ANOTHER MISSED OPPORTUNITY

Mr. PROXMIRE. Mr President, as the gates of 1985 begin to close, we see once again that Congress has failed to act upon the Genocide Convention. This should have been the year for passage. The administration had given its full support. Ominous developments abroad in the form of brutal human rights abuses indicated that ratification was vital and absolutely necessary. The year 1985 even marked the 40th anniversary of the end of the Second World War and the Holocaust. If ever there seemed an opportune time, it was this year.

The legislative agenda for next year appears busier than ever. Looking ahead, we can expect to face such heavyweight issues as Conrail, tax reform, campaign reform spending, and provisions implementing Gramm-Rudman.

Is there any room for the Genocide Convention, which has been sidestepped and brushed aside for more than three decades?

We must make room for this treaty. We must demand a firmer commitment for ratification of the Genocide Convention. For what we need now more than at any time before is stronger leadership in the cause of human rights and against genocide around the world.

Mr. President, it is essential that we move ahead early next year if the Genocide Convention is to have a realistic chance for consideration next year. We need a commitment here and now from the leadership of the Senate to set a date certain for consideration of the treaty. We need a commitment now from the White House to put the full weight of the President's authority behind this effort.

We have waited an entire generation for the Senate to act on this treaty. We must not wait any longer.

DEATH OF FRANK ARTHUR CAMPBELL

Mr. FORD. Mr. President, it is with great sadness that I relay to the Senate news of the untimely death of Mr. Frank Arthur Campbell. Since 1978, Frank served within the Educational Services and Support Division of the Senate Computer Center. As an instructor and consultant for the Senate's legislative computer applications, Frank was well known and highly esteemed by staff members from many corners of Capitol Hill.

Frank distinguished himself as an honors graduate of Paul Quinn College in his native Waco, TX. He later became an elementary school teacher, first in Waco and later within the Waterloo, IA, school system. His teaching expertise and personable manner were well applied in his years at the Senate; many a staff member learned how to use the Senate's LEGIS system under Frank's careful and caring guidance.

Painful as they were, Frank's last days were considerably brightened by the closeness of the many family members and friends who traveled to be with him in illness. On behalf of the Senate, I wish to extend special condolences to Frank's mother, Mrs. Dora L. Campbell, and to his sister Alma Faye and brother Larry who traveled from Waco to comfort Frank.

I am sure I speak for the entire Senate in saying that Frank's warmth and compassion will be sorely missed.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 2 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, an-

nounced that the Speaker pro tempore [Mr. WRIGHT] has signed the following enrolled bill:

S. 1706. An Act to authorize the Architect of the Capitol and Secretary of Transportation, in consultation with the Chief Justice of the United States, to study alternatives for construction of a building adjacent to Union Station in the District of Columbia, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

At 2:40 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the text of the bill (H.R. 4006) to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985, with an amendment, in which it requests the concurrence of the Senate, and that the House agrees to the amendment of the Senate to the title of the bill, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 255. Joint resolution relating to the convening of the second session of the Ninety-ninth Congress.

ENROLLED BILL SIGNED

The Vice President announced that on today, December 20, 1985, he signed the following enrolled bill, which had previously been signed by the Speaker of the House of Representatives:

S. 1884. An act to amend the Farm Credit Act of 1971, to restructure and reform the Farm Credit System, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, December 20, 1985, she had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 1706. An act to authorize the Architect of the Capitol and Secretary of Transportation, in consultation with the Chief Justice of the United States, to study alternatives for construction of a building adjacent to Union Station in the District of Columbia, and for other purposes.

S. 1884. An act to amend the Farm Credit Act of 1971, to restructure and reform the Farm Credit System, and for other purposes;

S. 1918. An act to change the date for transmittal of a report;

S.J. Res. 189. Joint resolution designating the week beginning January 12, 1986, as "National Fetal Alcohol Syndrome Awareness Week";

S.J. Res. 198. Joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine"; and

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week".

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services:

The following named officers for posthumous promotion to the grade indicated under the provisions of article II, section 2, clause 2 of the Constitution of the United States of America:

ARMY

To be captain

Lt. John K. Kosh, [redacted].
Lt. Paul D. Long, [redacted].
Lt. Joey McCarty, [redacted].
Lt. Barry C. Powell, [redacted].

To be chief warrant officer W-4

CWO3 Robert A. Bowen, [redacted]

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. ABDNOR:

S. 1998. A bill to amend the Internal Revenue Code of 1954 to provide for the repayment of the tax imposed on fuel in diesel-powered automobiles or light trucks; to the Committee on Finance.

By Mr. DANFORTH:

S. 1999. A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BYRD (for Mr. ROCKEFELLER (for himself and Mr. BYRD)):

S. 2000. A bill to clarify the exemptive authority of the Securities and Exchange Commission; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ABDNOR

S. 1998. A bill to amend the Internal Revenue Code of 1954 to provide for the repayment of the increased tax imposed on fuel used in diesel-powered automobiles or light trucks; to the Committee on Finance.

REPAYMENT OF INCREASED TAX ON DIESEL FUEL

● Mr. ABDNOR. Mr. President, when the 1984 Deficit Reduction Act was passed, the diesel fuel tax was raised 6 cents per gallon to repair the damage created by large trucks on our highways. Unfortunately, this tax was also levied against owners of automobiles and small trucks. This places an unneeded financial burden on these owners.

My legislation would correct this injustice by providing a rebate to consumers who own diesel-powered autos and light trucks of the tax they pay. Damage to our highways cannot be attributed to these people at all, and corrective action must be taken.

These people bought these diesel-powered vehicles when the energy crunch was real. They now wind up paying for their innocent attempt to conserve fuel. I urge my colleagues to support this measure, so the injustice can be corrected. My colleague on the House side, Mr. SCHULZE already has legislation introduced. If we want fairness in our legislation, then this bill will receive the due consideration it deserves.●

By Mr. DANFORTH:

S. 1999. A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes; to the Committee on Commerce, Science, and Transportation.

PRODUCT LIABILITY VOLUNTARY CLAIMS AND UNIFORM STANDARDS ACT

● Mr. DANFORTH. Mr. President, I rise today to discuss the issue of product liability reform. As chairman of the Senate Committee on Commerce, Science, and Transportation, I believe that there is no more important subject before the committee than the cost and scarcity of liability insurance, and the underlying need for product liability reform.

Traditionally, product liability has been a matter left to State law, but today the morass of product liability law is a problem of national concern that requires congressional action. The product liability system is costly, slow, inefficient, confusing, and unpredictable. It hurts business, consumers, and our competitive position in world markets.

The present patchwork of inconsistent, often contradictory State laws makes it difficult for manufacturers to know what standards they will be held to in manufacturing a product. It delays justice to those victims truly deserving compensation, and it encourages lawyers to solicit half-hearted plaintiffs in the hope of recovering windfall contingent fees.

The confusion in product liability laws leads not only to excessive litigation but to unpredictable insurance costs. The result is that an increasing number of American firms cannot purchase insurance coverage that is adequate to protect against potential liability. At the same time, many consumers who are injured by defective products and deserve compensation are unable to recover damages or must wait years for recovery. They find themselves caught in a legal lottery in which identical cases can produce dif-

ferent results in different jurisdictions. When they recover, they sometimes find that they receive less in damages than the total legal costs and expenses involved in the case.

Manufacturers seek certainty about the scope and extent of their liability. Consumers seek swifter, more certain recovery, and both groups seek to avoid the high transaction costs of litigation. It is time for a new approach to the problems of our product liability system that unites manufacturers and consumers, in recognition of the fact that their interests, while different, are not necessarily conflicting.

After Senator KASTEN's product liability reform bill, S. 100, became deadlocked in the Commerce Committee, the Committee held hearings on alternatives to S. 100 proposed by Senator DODD and Senator GORTON. I then directed the Commerce Committee staff to begin the formulation of such a new approach to product liability reform that combines uniform product liability standards, along the lines of the KASTEN bill, with an alternative claim or compensation system, similar to those proposed by Senator DODD and Senator GORTON.

I did so, because I believe that such an approach is essential to product liability reform and the only way to develop viable legislation that would have a broad base of support from manufacturers, consumers, and labor. The basic idea is to establish uniform Federal standards for product liability litigation and, at the same time, to get as many people as possible out of the courts and into a simple, expedited claim system that provides swift and more certain recovery without the costs of protracted litigation.

Mr. President, this approach now is embodied in a staff working draft of product liability legislation that originally was released for public comment last July. This draft, which since has been revised, gives a person injured by a defective product a choice between a new, expedited claim system and traditional litigation. If the injured person chose to litigate, he could seek recovery for damages, including pain and suffering and punitive damages, in a traditional lawsuit that would be governed by uniform Federal standards that preempt State law and that would be based primarily on negligence or fault—not strictly liability. As an alternative, without going to court, a person seeking recovery for harm caused by a product could file a claim directly with the manufacturer to recover only net economic loss—actual out-of-pocket expenses incurred as a result of the harm, which are not reimbursed by other sources.

No recovery would be permitted within the claim system for pain and suffering or punitive damages, but the burden of proof for recovery would be much lower than that of the traditional litigation system. This would not be an absolute "no-fault" claim system, but the standard for recovery would be much easier to meet and there would be greater certainty of recovery.

Under this proposal, once a claim is submitted, a manufacturer must respond within 90 days. If the manufacturer only disputes the amount to be paid for net economic loss, this issue goes to binding arbitration. If the manufacturer denies liability or fails to respond to the claim, the claimant has a choice. The claimant may initiate a traditional lawsuit under new uniform Federal standards. As an alternative, the claimant may seek expedited limited judicial review within the claim system. Such review would be under the claim system liability standard without a jury and with recovery limited to net economic loss. Once judicial review has been sought within the claim system, it cannot be pursued in traditional litigation for the same harm. Likewise, once traditional litigation has been initiated, a person cannot use the claim system to seek recovery for the same harm.

Mr. President, this staff working draft also gives special treatment to toxic harm caused by long-term exposure to products. The particular concern here is to address the problems many individuals have with respect to identification of the manufacturer and with respect to proof of causation in long-term latency disease cases, particularly those involving occupational diseases. We are seeking a simplified mechanism to resolve the disputes as to causation that now make it very difficult and costly to assess liability in such cases.

The response to this proposal has been encouraging. A very constructive approach was taken by all those who commented on the first draft, and after these comments were reviewed, a second staff working draft was released on November 27. This draft clarifies the provisions of the original and addresses concerns raised in many of the comments on the first draft submitted to the committee by manufacturing, labor, and consumer groups, as well as by others.

Of course, it is important to remember that this is only a staff working draft and it still would be premature to endorse specific provisions of the draft, but I think that we are making real progress in addressing the problems of product liability in a fair and comprehensive manner, and I ask unanimous consent that the second staff working draft be printed in the RECORD for review by my colleagues and all those interested in product liability reform.

The current crisis with respect to the availability of liability insurance only underscores the urgent need for product liability reform. It is my hope that the Commerce Committee can begin hearings on this new draft early in the next session and that we can move ahead as expeditiously as possible to fashion product liability reform legislation that efffectively and fairly addresses the problems of manufacturers, product sellers, workers, and consumers. It is my hope, as well, that those who study this draft proposal will share their views and concerns with the committee as soon as possible.●

ADDITIONAL COSPONSORS

S. 837

At the request of Mr. HEINZ, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 837, a bill to amend the Social Security Act to protect beneficiaries under the health care programs of that act from unfit health care practitioners, and otherwise to improve the antifraud provisions of that act.

S. 1378

At the request of Mr. DURENBERGER, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1378, a bill entitled the "Long Term Care Insurance Promotion and Protection Act of 1985."

S. 1710

At the request of Mr. BYRD, his name was added as a cosponsor of S. 1710, a bill to establish a motor carrier administration in the Department of Transportation, and for other purposes.

S. 1721

At the request of Mr. RIEGLE, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1721, a bill to amend the Social Security Act to provide for improved procedures with respect to disability determinations and continuing disability reviews and to modify the program for providing rehabilitation services to individuals determined under such act to be under a disability, and for other purposes.

S. 1855

At the request of Mr. QUAYLE, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 1855, a bill to revise the provisions of the Public Health Service Act relating to health planning.

S. 1860

At the request of Mr. MOYNIHAN, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1860, a bill to amend the Trade Act of 1974 to eliminate barriers and distortions to trade, to provide authority for a new round of trade negotiations, to promote U.S. and for other purposes.

S. 1880

At the request of Mr. GORTON, the name of the Senator from Indiana [Mr. QUAYLE] was added as a cospon-

sor of S. 1880, a bill to amend the Internal Revenue Code of 1954 to clarify the treatment of travel expenses in the case of construction workers.

S. 1889

At the request of Mr. DENTON, the names of the Senator from Nevada [Mr. LAXALT], the Senator from North Carolina [Mr. EAST], the Senator from North Carolina [Mr. HELMS], and the Senator from Idaho [Mr. SYMMS] were added as cosponsors of S. 1889, a bill to amend title 11 of the United States Code, relating to bankruptcy, to prevent discharge of administratively ordered support obligations.

S. 1912

At the request of Mr. DANFORTH, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 1912, a bill to provide for a 6-month extension of certain temporary provisions relating to the Internal Revenue Code of 1954.

S. 1940

At the request of Mr. DENTON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 1940, a bill to protect the security of the United States by creating the offense of international terrorism, and for other purposes.

S. 1941

At the request of Mr. DENTON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 1941, a bill to protect the security of the United States by providing for sanctions against any country that provides support for perpetrators of acts of international terrorism.

S. 1942

At the request of Mr. DENTON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 1942, a bill to amend title 10, United States Code, to improve the security of U.S. military installations.

S. 1966

At the request of Mrs. KASSEBAUM, the names of the Senator from South Dakota [Mr. PRESSLER], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 1966, a bill to provide for efficient and equitable use of operating rights at congested airports, and for other purposes.

SENATE JOINT RESOLUTION 237

At the request of Mr. GRAMM, the names of the Senator from Illinois [Mr. DIXON], and the Senator from North Carolina [Mr. HELMS] and the Senator from South Carolina [Mr. HOLLINGS] were added as a cosponsors of Senate Joint Resolution 237, a joint resolution to designate the month of January 1986 as "United States Savings Bonds Month."

SENATE JOINT RESOLUTION 249

At the request of Mr. DENTON, the name of the Senator from Idaho [Mr. SYMMS], was added as a cosponsor of Senate Joint Resolution 249, a joint resolution to proclaim October 23, 1986, as "A Time of Remembrance" for all victims of terrorism throughout the world.

SENATE CONCURRENT RESOLUTION 94

At the request of Mr. DENTON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of Senate Concurrent Resolution 94, a concurrent resolution expressing the sense of the Congress that the President should declare a State of national emergency with respect to terrorist acts committed against nationals of the United States.

AMENDMENT NO. 1423

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 1423, intended to be proposed to S. 1404, an original bill to require the President to respond to unfair trade practices of Japan.

AMENDMENT NO. 1424

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 1424 intended to be proposed to S. 1860, a bill to amend the Trade Act of 1974 to elimate barriers and distortions to trade, to provide authority for a new round of trade negotiations, to promote U.S. exports, and for other purposes.

AMENDMENT NO. 1425

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 1425 intended to be proposed to S. 1837, a bill to establish a National Trade Data Bank, to provide authority to revise certain trade and financial agreements, and for other purposes.

AMENDMENT NO. 1426

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 1426 intended to be proposed to H.R. 3722, a bill to extend until December 14, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program.

AMENDMENT NO. 1427

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 1427 intended to be proposed to S. 942, a bill to promote expansion of international trade in telecommunications equipment and services, and for other purposes.

ADDITIONAL STATEMENTS

CARGO PREFERENCE

● Mr. BOSCHWITZ. Mr. President, I want to take this opportunity to clarify one point concerning the cargo preference provisions in the farm bill. As one who was quite involved in the last minute negotiations with the House Members, I feel it is important to share my understanding of the intent of the final legislation.

The one issue I wish to specifically address is that of the definition of availability. The initial Senate amendment stated that the Secretary of Transportation shall "give due consideration to the availability of U.S.-flag vessels to transport the commodities."

The House amendment that was then adopted eliminated this language as a technical amendment because it was not necessary to redefine availability—as it is already defined in the Merchant Marine Act, and we are amending that act with the compromise.

In fact Mr. President, the description of the amendment circulated by the Merchant Marine Committee's Chairman WALTER JONES, stated both the purpose and the reason for the change, and I quote from his text: "Strike redundant paragraph; covered in Merchant Marine Act."

Given this, I want to make the point clear that nothing in this bill should be construed as changing the definition of availability, and further, this legislation is not intended to interfere with any pending litigation dealing with the legal issues surrounding the availability exception of the act.●

THE CONGRESS-BUNDESTAG YOUTH EXCHANGE PROGRAM

● Mr. LUGAR. Mr. President, I would like to share with you several letters which were received from high school students from Germany who spent a year in the United States as participants in the Congress-Bundestag Youth Exchange Program. Each student lived with a host family and attended an American high school. These letters are evidence that youth exchange programs such as the Congress-Bundestag Youth Exchange Program encourage a better understanding between young people throughout the world.

First of all I want to express again my thanks for making my stay here in the United States possible. It has been a fantastic experience and I'm especially grateful because I would not have been able to come as an exchange student if it wouldn't have been with the Congress-Bundestag Youth Exchange Program.

Since I'm very interested in politics, this year has been a fortunate one with the election last fall, the arms talks, discussions about Central America, the 40th anniversa-

ry of WW11 or President Reagan's visit to the cemetery in Bitburg. It was great to get to know so many vital political issues of the American point of view (that is often similar as it was regarding farm problems for example) because I got to see a whole new span of aspects in most of them (American involvement in Central America). This is so extraordinarily great because U.S. politics are so world-important! If I came to America with a neutral position towards this country I go back as Pro-American, in most respects anyway, and say that our relation in the Western Alliance is an enormous valuable one!

But I did not only get to love America, I got to love my own country also. After the first few weeks I saw my own background so clearly, I got to understand my own culture and it became so obvious how I became what I am. It became evident how much each country's culture develops and how each country is the immediate product of its history.

During this period of understanding I started for the first time in my life to be proud to be German—because we are in a way unique and special . . . At the same time I accepted the American way for here but still felt more comfortable with our way and was glad Germany is the way it is . . .

Pretty soon my attitude changed into loving this country, its uniqueness, its originality. I love it because it is so young and consists of so many different peoples-which are all Americans. You could not judge or determine somebody's nationality by race or skin color . . . there's such a variety of Americans. (Unfortunately I understand that there's a lot of racism especially in the South though . . . I myself did not meet many black people in the Midwest.)

There's so much space around here-you go miles and miles without seeing anybody else . . . (In Nebraska anyway . . .) And I was so much "into America" that I forgot my own language to a large degree . . . By now this extreme mood has gone over into loving both countries, this and mine. There are negative things here and there and I feel "in place" in both nations.

I don't think my personality has changed very much during my stay, but this is difficult to judge for myself! If it has, it will show as soon as I am home . . . I am more self-aware though and know more about myself as where or what I want to be and I'm more comfortable in asking favors of other people. Going back I'll leave a home and many friends and since I'm pretty attached to everything I'm going to miss it a lot. But I'm looking forward to going home, too.

I feel like I served my country in a unique way mainly through sharing attitudes, experiences, etc. And I feel that every exchange student does. But I believe that I also added a lot to the knowledge of American people. Exchange programs like this are certainly very special and an excellent way for Americans to get acquainted with other cultures and countries. I'm happy to be part of its cause. There's a time when the world must come together as one!

Sincerely,

MELANIE GRIMM.

Melanie Grimm from Worth, West Germany, 17 years old, hosted by Mr. and Mrs. Tim Mattson, Holdridge, Nebraska.

There were times in this year when I couldn't understand why the people acted different than I expected them to act. But this was because the difference in culture is not only "Levi's", "Coke, and McDonald's", culture is also the way people live together. I made the experience that the people here are very friendly and I think that friendliness is the highest culture any country can have. I am of the opinion that you can't judge a country because of the things you have heard or seen of it. To study a country, you have to live there for a while. Only if you live there for a while can you understand the people living there, because you are a part of them.

Norbet Czech from Regensburg, West Germany, hosted by Mr. and Mrs. John Kohout, Bellevue, Nebraska.

My being an exchange student will have a great impact on my further life. I am now decided that my future work will have to do with foreign countries. I want to work as much as possible for the understanding of the world. Even though this might not have great effect directly, but I believe if everybody tries this both countries can associate closer and understand each other better.

Frederic Pflanz from Ludwigshafen, West Germany, 17 years old, hosted by Mr. and Mrs. David Dyer, Kankakee, Illinois.

First of all, this year will be unforgettable for me. This year was a full success. I experienced a new way of life, very different from the way at home. I have made new friends. I have a second family which loves me as much as my family at home in Germany. . . .

It is very good that the Congress of the United States and the German Bundestag support such student exchange. I like to thank YFU and the Congress-Bundestag Program for a wonderful, filled with experiences year.

Cordula Buengener from Stukenbrock, West Germany, 17 years old, Richard and Kathy Fitzgerald, Wyoming, MI.●

THE CHANGING VIEWS ABOUT FOREIGN RELATIONS IN KANSAS CITY

● Mr. SIMON. Mr. President, whether we want to acknowledge it or not, people in our country are gradually acquiring more and more of an international sensitivity just as people in other countries are.

I visited recently with Eugene Trani, vice chancellor for academic affairs at the University of Missouri-Kansas City, and he handed me a document about Kansas City and foreign relations.

While Kansas City is some distance from my State of Illinois, my guess is that what he has written about Kansas City could be written about cities in every State in the Nation.

The more open our citizens are to this type of international development, the more likely they are to advance economically.

I believe my colleagues will be interested in Dr. Trani's comments. I ask that they be printed in the RECORD.

The comments follows:

THE CHANGING VIEWS ABOUT FOREIGN RELATIONS IN KANSAS CITY

(By Eugene P. Trani)

Because the Royals won the World Series, the American people have just discovered Kansas City. But in this discovery the Americans have finished behind the Russians and the Chinese. The Soviet people learned about Kansas City in an hour-long documentary, "In the Middle of America," shown on Soviet television in 1983, and the Chinese from a documentary, "Edgar Snow's Hometown," shown earlier this year on Chinese T.V. Therein lies a tale worth analyzing. Kansas City is in some ways better known outside the United States than in New York City, San Francisco, or Los Angeles. And certainly Kansas City is more heavily involved in foreign relations and demanding a greater voice in the making of the foreign policy than ever before.

Years ago this section of the country prided itself on its isolationist tendencies. It was the center of the isolationism that was so influential in the 1920s and 1930s. Active opposition to the spread of Communism was generally supported in Kansas City and surrounding communities, as were the activities of Senator Joseph McCarthy and his colleagues. Even though President Harry Truman, a major architect of modern American foreign policy, came from the Kansas City surburb of Independence, people here in 1940s, 1950s, and 1960s had little interest in foreign policy and little involvement in foreign relations themselves. What involvement they had was based primarily on moral, idelogical, cultural, or ethnic considerations.

All that has changed in the 1970s and 1980s. Today, Kansas City and the two states—Missouri and Kansas—which make up the metropolitan area now have multiple foreign interests and a great stake in foreign policy.

Much of today's interest and involvement is, of course, economic. Kansas City is the home of the Board of Trade, the world's leading hard red winter wheat trading center. At least 50 percent of U.S. wheat exports are in hard red winter wheat, and the U.S. accounts for 30 percent of the world wheat export trade. The Board of Trade has attracted a complex of agricultural enterprises to Kansas City; all multinational grain companies have offices here. In addition, Kansas City is the home of the Milling and Banking News, the weekly "bible" of the grain industry, which in 1972, first reported the large grain purchases of the Soviet Union. American grain sales—or embargoes—to the Soviet Union or The People's Republic of China are thus a major concern in Kansas City. Agricultural exports from this section of the country have in fact increased dramatically. According to the latest available State Export Reports of the International Trade Administration of the U.S. Department of Commerce, Missouri's agricultural exports grew from $174,000,000 in FY 1968 to $1,404,000,000 in FY 1982, while Kansas' agricultural exports rose from $296,000,000 in FY 1968 to $1,628,000,000 in FY 1982. In both states, $1 out of every $3 in agriculture came from farm exports. There also has been signifcant growth of exports of manufactured goods for both Missouri and Kansas ($634,000,000 in 1969 to $3,013,000,000 in 1981 for Missouri and $241,000,000 in 1969 to $1,517,000,000 in 1981 for Kansas, according to the same source).

This economic interest in exports has led to the creation of a Foreign Trade Zone in Kansas City, and international division of the Kansas City Chamber of Commerce, and the establishment of a number of diplomatic consuls in Kansas City. Kansas City's

Foreign Trade Zone, one of the ten largest and the first inland Foreign Trade Zone in the United States, now totals more than three million square feet and is operated totally by private enterprise, with no government funding. The increased importance of exports has also led to annual trade missions by the Governors of Kansas and Missouri, with Kansas's John Carlin just returning from Europe and Missouri's John Ashcroft just coming back from the Orient. It also has led to much greater interest in foreign policy on the part of Senators Thomas Eagleton, John Danforth, Robert Dole and Nancy Kassebaum and Missouri's and Kansas's members in the House of Representatives. Senator Dole, for example, was a major force in the decision of the United States to drop its grain embargo against the Soviet Union, instituted by President Carter because of Afghanistan and strongly objected to in Kansas City because of damage to Midwestern agriculture. Senator Danforth has become a leading spokesman on the issue of domestic protection. Finally there has been a significant increase in direct foreign investment in both Kansas and Missouri.

But it is not just in the economic area that this increased involvement in foreign affairs is obvious. Kansas City has a very active International Relations Council, with more than 1,000 members, Sister City relationships with a number of cities around the world, including Seville in Spain, Kurashiki in Japan, Tainan City in Taiwan, Freetown in Sierra Leone, and Morelia in Mexico, and a number of cultural and educational relationships. Kansas City's Missouri Repertory Theatre has recently presented the English-language premiers of major Soviet and Chinese plays. And Kansas City, like the states of Missouri and Kansas more generally, has a significant number of foreign scholars studying at its institutions of higher education.

Nowhere is the changing attitude towards foreign relations more obvious than in Kansas City's attitude toward The People's Republic of China. In 1949, Kansas City was a hotbed of criticism for "America's loss of China to the Communists," criticism that extended to favorite son Harry Truman. But Kansas City was also the hometown of the journalist Edgar Snow, author of "Red Star Over China" and a revered figure in modern China. Snow's origin, as well as the activities of some significant Kansas Citians, has led to a special relationship with The People's Republic of China. Thousands of Kansas Citians have visited China and Kansas City is a pilgrimage for many Chinese visiting the United States, leading to close personal relationships.

Kansas City and Xian are in the final stages of formalizing a sister city relationship, and grammer schools, high schools, the University of Missouri-Kansas City (UMKC), hospitals, art galleries, theatres, and many other Kansas City institutions have formal relationships with similar institutions in China. UMKC has formal exchange relationships with such leading Chinese Universities as Peking University, Wuhan University, the Beijing Foreign Studies University, the Central Conservatory of Music, and the University of Science and Technology of China. UMKC has a significant number of Chinese students and professors studying and doing research in Kansas City, including the son of a former foreign minister, the daughter of Deng Xiaoping's personal physician, and the son of China's leading actor. Even Kansas City's Chinese community, which has strong ties to Taiwan, supports Kansas City's relationship with "Communist China."

What do all these Kansas City-based contacts with China and other sections of the world mean? To be sure, they are not unique. All across America, individuals, companies, marketing associations, colleges and universities, cities, and states are involved in similar activities. These involvements have certainly lessened the "control" of the State Department over American foreign policy. Collectively, all these non-Washington relationships are beginning to affect the formulation and implementation of American foreign policy. As economic considerations become an even more critical factor in foreign relations, the private, institutional, and corporate involvements with the world can only grow in significance. The old Logan Act, which prohibits private individuals from negotiating with foreign governments, needs to be updated. Kansas City, and many cities in this section of the country, are beginning to develop foreign policies. Watch out Foggy Bottom!●

INTERNATIONAL EDUCATION EXCHANGES

● Mr. SIMON. Mr. President, my predecessor, Charles Percy, had an article in a special international education supplement to the Christian Science Monitor.

It is an excellent commentary pointing out the importance of international education exchanges.

I urge my colleagues, and the former colleagues of Charles Percy, to read it.

I ask that the article be inserted in full in the RECORD.

The article follows:

STUDY ABROAD: WE STILL HAVE A LOT TO LEARN

(By Charles H. Percy)

As a student at the University of Chicago in the 1940s, I experienced first-hand the excitement that the university's International House and its foreign residents brought to our campus and community.

From heading the early international efforts of Bell & Howell Co. to heading the US Senate Foreign Relations Committee, my interest and commitment to the value of international cultural and education exchange has remained steadfast.

There is no question of the tremendous impact international educational exchange can have in the field of foreign policy. I have seen time and again how a positive study-abroad experience, no matter how brief or modest, can have a life-long impact on an individual's attitudes toward the host country. If those individuals one day become world leaders, the impact is even more striking. In Japan, for example, more than 30 of the 100 current Japanese ambassadors around the world are graduates of programs sponsored by the Institute of International Education (IIE). Japanese Prime Minister Yasuhiro Nakasone knows personally the value of exchange programs through his daughter Meika's experience as an exchange student at Elston High School in Indiana some 20 years ago.

These private- and public-sector experiences have afforded me the opportunity to devote a great deal of time to two international educational organizations—IIE, which through its 14 offices worldwide offers services to foreign students studying in the United States and to US students abroad, and the Hariri Foundation, which sponsors thousands of undergraduate, graduate, and postgraduate Lebanese students in the United States, Canada, and Europe who need financial assistance and who will contribute a whole new generation of leadership to rebuild Lebanon.

Through my association with these two groups, I have seen international students achieve greater awareness of our culture and their own. I have seen students reach for a better understanding of societies in the world, and I have seen students gain a new perspective on their own personal values.

Yet, while more than 340,000 international students are taking advantage of educational programs in the United States, fewer than 1 percent of American students are advancing their own international awareness through study-abroad programs or cross-cultural education.

This apparent lack of interest and awareness is manifest throughout American society:

The United Nations surveyed 30,000, 10- and 14-year-olds in nine different countries, and the results placed the Americans next to last in their comprehension of foreign cultures.

A recent poll also found that 49 percent of Americans apparently believe that foreign trade is either irrelevant or harmful to the United States.

A California professor of world geography was shocked to find the results of a map quiz given to freshman students. One-third of the class did not know where France is, 74 percent could not find El Salvador, 47 percent could not find Japan (many students confused it with New Zealand), 45 percent could not find Iran, and 54 percent could not find Atlanta.

This lack of cross-cultural awareness, however, comes at a time when our social, cultural, and economic environment is becoming increasingly international and interdependent.

Four out of five new jobs in the United States are generated as a direct result of foreign trade. In agriculture, one out of three acres of US farmland is cultivated for export, and approximately one-third of all US corporate profits come from international activities.

Government officials and academics warn that US security and international standing are increasingly threatened by our own inability to train individuals in diplomacy, area studies, and languages.

Clearly, all levels of American education, business, and government need individuals who can successfully function in an international setting.

New and creative ways of raising the American public awareness of the goals and benefits of foreign-exchange programs must be found.

In the field of education, American youth must be exposed to international education and language at an earlier age. New York City has launched a pilot project to teach French, Spanish, and Italian to kindergarten, first-, and second-grade students.

Many major US cities now require all high-school graduates to complete at least one year of foreign-language study. The New York State Board of Regents recently passed a proposal that is aimed at making 50 percent of all high-school students in the state proficient in a foreign language.

In higher education, many colleges and universities are reinstituting language requirements for graduation.

Across the US, educators are trying to broaden the base of cultures and areas students choose for study abroad. Traditionally, international education has been oriented toward Europe. Emphasis now is also being directed to study-abroad programs in third-world countries.

Private organizations like the IIE can help to increase community participation in international educational exchange and provide information and funding for public understanding of the rewards.

Organizations that have country-specific goals, such as the Hariri Foundation, can help bear the responsibility for financing and directing the career development of their own students.

US multinational companies can increase their contribution by developing scholarship programs for students in countries in which they are doing business.

All of us can help create a resurgence of volunteer efforts, including international student houses and home-stay programs.

Advanced technology is also working to improve the environment of international education. Groups such as the National Committee for International Education through Satellites (NCIES) are helping to internationalize education by using live, interactive satellite broadcasts to teach applied skills and theoretical knowledge across national and cultural boundaries.

The NCIES learning system provides for live interaction by placing students in contact with other cultures via two-way television. Native speakers are shown in an overseas marketplace, school, farm, factory, religious celebration, or home. In language education, for example, Spanish classes in Maryland can be linked with Spanish-speaking communities in Miami, or German classes in Pennsylvania can be linked with Bremen, West Germany. The NCIES system can work both ways—by teaching American English to foreign students or by teaching foreign languages to American students.

This innovative technology may prove as valuable to international education as computer technology has been for American industry.

Through efforts like these and other initiatives, we can significantly increase public awareness and understanding of the importance of cross-cultural training. We can also more fully appreciate our own place in a global society.

In recent years our nation's defense budget has increased faster than any other area. But what better "defense" can this nation, or any other, build than through investment in future good will and understanding between our people and future generations of other nations?●

INNA MEIMAN

● Mr. SIMON. Mr. President, I call attention to the case of Inna Meiman, a personal friend of mine in the Soviet Union. Inna's health is poor and deteriorating quickly. She needs medical attention that only the West can provide.

To increase public awareness of Inna's plight, a young Minnesota woman is conducting a hunger strike. Lisa Paul spent 2 years in Moscow and struck up a friendship with Inna. Lisa has been so preoccupied by Inna's situation that she decided to make a public protest.

I commend Lisa for this courageous act of friendship and wish her well.

I ask to print the following article from the Minneapolis Star and Tribune in the RECORD.

The article follows:

[From the Minneapolis Star and Tribune, Dec. 14, 1985]

"U" STUDENT STARTS HUNGER STRIKE FOR A SICK SOVIET FRIEND

(By Neal Gendler)

Inna Meiman of Moscow is dying of cancer, unable to get treatment in the West, and Lisa Paul of Minneapolis is starting a hunger strike today in protest.

Paul, 23, is a University of Minnesota senior from Appleton, Wis., majoring in Russian-area studies. She met Meiman, who is about 55, while in Moscow for two years working as a nanny for an American business executive. Meiman was Paul's Russian-language tutor and, soon, her friend and entree into the world of "refusniks," people who have been refused visas to emigrate.

Paul said that Meiman became ill in 1983. She has had four operations on a growth on the back of her neck, but the tumor continues to grow.

"She has been invited by several hospitals in the West," Paul said this week. "Sweden, Israel, France and the U.S. all have offered her treatment, so the action I'm taking is to protest this refusal. It's not to starve myself until they let her go." Paul will take fruit juice and vitamins, and she plans to end her fast Jan. 4, in time for winter quarter; by then, she hopes that Americans will be more aware of Meiman's situation.

Meiman already is known to Soviet authorities. Paul said that in 1979, when more Jews were being allowed to leave, Meiman and her son applied. They were refused. In 1981, Paul said, her friend married Naum Meiman, a mathematician who belonged to the persecuted and disbanded Helsinki Watch Committee that monitored Soviet compliance with the Helsinki accords.

He, too, had applied to leave and been refused. The Meiman's own problems might be characterized in their remarks in the Dec. 16 Newsweek about Yelena Bonner, also a member of the watch committee and wife of exiled physician Andrei Sakharov.

"The very fact that a big man like Sakharov had to starve himself to get his wife treatment is indicative of how things are in the Soviet Union," Naum Meiman is quoted as saying.

"Her release is not a concession," Inna Meiman is quoted as saying. "We have not seen a single concession yet."

Inna Meiman needs a concession.

"What this is really all about is about Inna, all labels aside," Paul said. "It's about this woman who is very involved in the society, and not come across these people.

"I don't think you should live there and not meet these people because then you can't come back and talk about Moscow and all its people." One of the people she met was a woman who'd spent years in prison and exile for protesting the 1968 Soviet invasion of Czechoslovakia.

"She stood up, with everything to lose—and she did lose it all," Paul said. "That's what those refusniks are about. Inna said that in some respects those people are the bravest people in the world. You're standing up because you're totally committed to something but you know you'll lose everything . . . it makes what I'm doing relatively easy in comparison.

"People here have told me they admire me, and that's nice to hear, but having those people as a comparison, it's not that hard to make a commitment."

Paul has been training for about three weeks, reducing intake of certain foods. She's also talked with a physician who once fasted for 40 days. Paul said that her family supports her plans.

"My mother met Inna when she visited me in Moscow, so she really understands," Paul said. Paul plans to go home for Christmas and hopes to get into the news there, too.

"I encourage other people getting sick. . . . Inna has thanked the Soviet doctors and said they've done all they can, but medical technology in the West offers advanced treatment and hope that this can be cured. Now, the woman has hardly any neck muscles left.

"She has applied to leave for treatment." Paul said. "They said you can't do that unless you have a note from the Ministry of Health. The Ministry of Health said they don't give out such notes."

Paul said that the Soviet authorities "probably consider her to be so sick that they think she'll die, hopefully sooner rather than later, so they won'd have to deal with this . . . also, like Yelena Bonner coming to the United States, it might say that the Soviet medical system is inadequate, so why embarrass yourself when you can just let someone go without?"

Paul has been preoccupied with Meiman's plight since leaving Moscow six months ago. She has written to U.S. politicians, but "I felt I needed to do something on this level" both for Meiman and "to draw attention to me so I can talk about the injustice that's going on."

Paul said that her protest "is centered on Inna—my cause—but it's also the whole issue behind this." That issue wasn't something with which Paul grew up as a Catholic in Appleton.

Paul said the issue became hers because she lived in Moscow. She didn't seek "refuseniks," she said, but "I don't think you can live in the Soviet Union two years, trying to get involved by writing Inna directly—a letter of support, encouragement and/or New Year's greetings," Paul said. "How great it would be for Inna to know the concern others feel for her." Whether Meiman receives all the letters, they would make Soviet authorities learn of the interest in her in the West.

"That's where the potential is in this hunger strike," Paul said. "If public interest picks up, more people write, potentially something could happen." She encouraged people to write, using the Russian address style that puts the country on the top line and the name on the bottom: USSR; RSFSR; Moscow, 113127; Naberezhnaya Gorkogo, 4/22, Apt. 57; Inna Meiman. Postage is 44 cents.

Concerned that Meiman might not have received her letter about the hunger strike and that she understand and respect what she is doing. Paul telephoned Meiman last week.

"My concern was that she might be really concerned about this burden she's placed on my life. But she said that she understands why I'm doing it and that she's very touched by my thoughts and what I'm doing.

"She was very quick to tell me to be careful, don't endanger my health. I really feel

good about that because from me to her it's a gift of love."●

THE SOCIAL SECURITY SYSTEM

● Mr. SIMON. Mr. President, our Social Security system has received a great deal of attention recently. While the 1983 amendments assured the viability of the system, there are those who would dismantle this crucial program. One of their often-used reasons is that the young and the employed are saddled with the burden of supporting those who do not work. This argument smacks of both greed and ignorance.

A long-time authority, Elizabeth Wickenden, of the study group on Social Security has recently published an excellent overview of the Social Security system.

I ask that the following factsheet be published in the RECORD.

IS IT TRUE WHAT THEY SAY ABOUT SOCIAL SECURITY? OPEN LETTER TO YOUNG WORKERS

INTRODUCTION

The passage of the Social Security Act in 1935 not only established a landmark institution but also launched a national debate about its financial soundness that continues to this day. Particularly at this time, where concern about the growing national deficit is high, social security becomes a favorite—however irrelevant—target. It is natural for young people, whose future seems to stretch indefinitely before them in a fog of uncertainty, to be among the first to raise these questions and sound these alarms. This paper is, therefore addressed primarily to young workers though it concerns everyone who receives or hopes to receive social security when the family income from wages or other work stops.

Part of this alarm seems to spring from the very success of the program which has undergone successive changes since 1935 through amendments that undertook to broaden protection against economic insecurity. Today, fifty years later, it is hard to remember or imagine the time when impoverished old people had only the poor house or the reluctant generosity of their children to carry them through hard times. Widows, orphans and the disabled were also reduced to the humiliation of charity, begging, or the poor house for their survival. Today nearly 37 million individuals receive monthly checks from the federal Old Age, Survivors and Disability program while over 30 million older and disabled persons have part of their medical and hospital bills paid through the federal program, Medicare.

Entitlement to all of these benefits derives from special trust funds financed by contributions from workers and/or their employers. 122 million workers today contribute to the OASI, Disability and Medicare trust funds. All of these millions of persons are bound together by a compact of mutual confidence that rests on statutory provisions governing payments by those now working and benefits to those now retired. This represents an unprecedented social partnership. Still there are questions, especially from younger workers.

WHY THIS PAPER?

Like others concerned with social security I am sometimes confronted by angry young friends. They say something like this: "Why do I have to pay these high social security taxes when everyone knows the system is going bankrupt and won't be there when I get old?" or "Young people like me are being ripped off to pay for benefits to old people who don't need them." or "Why can't I provide for my old age with IRAs or other investments? I can get a better return on my money than they can." or "Why should I be forced to worry about my old age when I need the money now that I'm young?"

The point of view reflected in these questions (even though that of a vocal minority) [1] seriously challenges a system which depends for its vitality and survival on intergenerational continuity, financing and confidence. No one takes it lightly. This "Open Letter" seeks to reply to this challenge.

WHAT IS THE SOCIAL SECURITY SYSTEM?

The social security system is a lifetime social insurance program that protects virtually all working people and their families against loss of earnings due to death of a family breadwinner (life insurance), long-term disability, old age retirement or widowhood.[2] It also pays for part of the health costs for the elderly and long-term disabled.[3] These programs are financed by a charge against earnings (payroll tax), half paid by the employee and half by the employer (except for the self-employed who pay a comparable amount in their own behalf.) Unemployment insurance protecting against loss of earnings due to involuntary unemployment is also a form of compulsory social insurance but since it does not involve an employee's contribution it does not raise the same kind of questions. In all cases the worker receives part of his compensation in cash and part in entitlement to future benefits.

Taxes

Unless they have the misfortune to lose a parent in childhood most people initially encounter the social security system with their first job. For many it is a shock, for which they were little prepared, to find that their first paycheck has been reduced by a somewhat mysterious tax called FICA [4]—for social security. At the present time this amounts to 7.05% for the employed on earnings up to a present maximum of $39,600. 5.7% of this goes into trust funds for Old Age, Survivors and Disability Benefits and 1.35% for hospital insurance for people over sixty-five and the long-term totally disabled. This is matched by an equal amount from employers. The self-employed must pay a total of 9.9%—8.55% for cash benefits and 1.35% for Medicare.

The money in these trust funds may only be used for paying social security benefits as specified in the Act and the administrative costs of the program. Any surplus must be invested in obligations of the Federal government. Recent rates on special social security issues have paid between 11 and 13.75% interest. At the present time the Social Security system is showing an excess of income over outgo and this trend is expected to continue. Some people predict the accumulative effect of this difference may reach as high as 12 trillion dollars before it begins to decline owing to an increase in beneficiaries as a result of the baby boom generation. Even by January 1, 1985 this reserve fund had reached 47 billion dollars.

Benefits

Most workers and their dependents are entitled to benefits based on their average earnings—after they have worked a minimum of 10 years or 40 quarters—when these earnings are interrupted by death, long-term disability or old age retirement. Full benefits are first payable at 65 but people may choose or be forced to retire at 62 with an actuarially reduced benefit. Persons who choose to retire later than 65 receive a somewhat higher benefit. For retirement up to age 70 benefits are payable only to those with limited earnings. This requirement is known as the "retirement test", the limit on what may be earned without reduction of benefit. Above these exempt amounts benefits are reduced one dollar for each dollar of earnings. Dependent spouses who have not earned higher benefit entitlements by their own work, receive 50% of primary benefit and widows over 65 receive 100%.

Women's benefits

A very considerable debate goes on surrounding women's benefits. Owing to the treatment of women both as dependents and earners they may be entitled to benefits on both fronts but receive only the higher of the two. Many favor some modified plan of "earning sharing', combining the earnings of husbands and wives, dividing them equally for purposes of social security credit. This may benefit the two-earner family but reduce benefits for the non-working wife and some couples. To make such a plan fair to present contributors would require complicated modifications and long transitional requirements which would considerably increase its cost to the program. It should also be noted that women benefit under the social security system by their greater longevity.

Benefit formula

The workers' (primary) monthly benefit is figured in terms of his average indexed monthly earnings (AIME) on the following basis: 90% of the first $280 of earnings, 32% of the next $1,411 and 15% of any remainder. In addition it is important to note that an individual's average earnings are adjusted to reflect an increase in over-all national earnings (and thus productivity). This is achieved through an automatic upward adjustment in these components (also known as "bend points") of the benefit formula and—for higher earners—an automatic upward adjustment in the wage base. This benefit level, once established, is adjusted to reflect cost-of-living increases (popularly known as the COLA).

IS SOCIAL SECURITY INSURANCE?

A favorite charge of those opposed to social security is that it is not "insurance" at all but really a "welfare" program. Since these are both rather elastic terms it is necessary to break them down into specific components.

Pooled risk

Social security is insurance in the sense that it pools funds in order to provide protection against shared risks. Some of these risks involve situations one hopes will never occur: i.e. early death, long-term disability

---

[1] A recent survey, conducted by Yankelovich, Skelly and White showed a majority approval rate by young persons under 34 years of age but some doubts about the future of the program. A substantial majority said they would remain in the system even with an option to get out.

[2] Social security has been made increasingly gender-free so whenever a sex-related term is used it should be interpreted as applying to both sexes.

[3] For definitional purposes Medicare has been included here even though it is not discussed in the paper since its problems are different from those of cash benefits.

[4] Federal Insurance Contributions Act.

and hospitalization. The contributors who never get their money back from these funds are the lucky ones just as never recovering money invested in fire insurance is considered highly desirable.

Old age retirement

Old age is different since it is generally regarded as a goal to be desired. People want to live beyond sixty-two and most look forward to retirement. They are willing to pay the price for a reasonable level of wage replacement. In this sense it is like an annuity, also a form of insurance. The risk here lies in the question of longevity: Those who die early pay the prices for those who live longer.

Entitlement

It is also typically insurance in that only those who have made payments into the joint fund or are dependent on someone who has done so are entitled to draw benefits from it. The "entitlement" is based on prior contributions which are in turn tied to work. The beneficiary is drawing down on the "protection" he earned while he was working. This is one of the primary differences from "welfare" as we commonly use the term, where "entitlement" is based on current "need", a much less easily defined concept. Entitlement to welfare payments is qualified by how the public is willing to define "need" which in turn depends on how much it is willing to pay. Hardly an "entitlement" at all one might say.[5] Social security benefits, on the other hand, are based on and related to loss of earnings, a far more acceptable basis for higher payments.

Full funding

Opponents say that it is not true insurance because the rights of neither the individual nor the collective of individuals are fully "funded". In private insurance the insuring company must have enough money laid by to be able to pay off all the benefit rights of all insured individuals at any one time. As an independent voluntary entity its continuity, and hence its continuing income from new policies, cannot be assured in any other way. Government, on the other hand, is assumed to be continuous. Thus, in social security, current contributions from those currently working pay the current beneficiaries, while it is assumed that they, in their turn, will be sustained by future working generations.

Until about 2030 these current contributions will be enough to cover current costs; after that time the accumulated surplus and interest will supplement. It is the good faith of the government, plus the continuing calculations of future obligations and income by qualified actuaries, that sustains the system. A program as huge as social security would require much more than the present trust fund to be "fully funded" and could totally disrupt the capital market. Wall Street would be the first to complain while contributions would have to be substantially raised to sustain such a large capital fund.

A conservative system

Actually, compared to other systems, the American social security system is extremely conservative. It is a self-contained system and virtually no general revenue funds have been used to pay benefits. In many other systems the financing of social security is shared on a three-way basis: worker, employer and government funds from other sources. We also base our financing on seventy-five year actuarial predictions of future needs and income, longer than any other country except Canada. These are subject to constant review by the Board of Trustees, regular advisory councils mandated by statute, special commissions (as in 1983) and the Congress.[6] At the present time the system is running a surplus, as planned in anticipation of a growing aged population.

Social Security and the deficit

To anyone who knows the care and caution with which social security financing is monitored and fine-tuned (as evidenced in the adjustments made by Congress in 1983 to meet a temporary financing problem) the widespread fear that "social security is going bankrupt" seems totally unreasonable. It seems rather to reflect carefully nurtured propaganda by those who don't like the idea of government-sponsored support for those outside the labor force, however financed.

This is also true of the present effort to make social security the scapegoat for a budget deficit largely caused by skyrocketing defense-related expenditures and ill-advised tax cuts. Social security, as a self-financed and actuarially determined program cannot, under present provisions of law, contribute to the real deficit. Present law requires that all social security taxes be deposited in the trust funds and all social security payments be made from the trust funds. Only the unrealistic inclusion of the funds in the Federal Unified Budget makes it appear otherwise and even President Reagan has recommended that they be removed. Should funds ever run short, despite all the care taken to assure their solvency, it is unthinkable that Congress would permit a program on which so many people depend for present or future benefits to go bankrupt. To raid its trust funds for purposes unrelated to social security needs (including those deemed necessary to its own future solvency) betrays the basic provisions of the Social Security Act.

BUT WILL I GET MY MONEY BACK? [7]

Social Security as protection

In part this question reflects a lack of understanding that insurance involves protection against risks that, though universal, are not equally incurred. Obviously the man with a dependent wife and four children who dies at thirty-five will get more in benefits than the single man who dies, without prior interruption of his working career, at sixty-seven. Protection as a positive good is not always well understood in a social security context even by those who pay high premiums for private life insurance and other forms of insurance on which they hope never to realize. Moreover, younger workers bear a greater risk of leaving young children in case of premature death or disability and hence have a special stake in these aspects of the program.

Social aspect

But probably more important is the fact that social security as social insurance includes a social component that weights the benefit formula in favor of low earners, those with dependents and early entrants into the system.

Of special interest to young earners are its life insurance and disability provisions which offer them immediate protection. Even more important to most is the assurance that their parents are adequately provided for rather than, as was so common in earlier days, having to turn to their children for help. I am not one who thinks the present generation of young workers is more materialistic, self-centered and selfish than its predecessors but I do think it is confronted by a barrage of propaganda that makes no distinction between earned benefits based on an objective statutory formula and welfare assistance based on an individual determination of need.

It is also important to bear in mind the significant role of the employers' contributions to the financing of the system. Some difference of opinion exists about the nature of this contribution. Economists tend to see it as an aspect of the labor cost of the system but workers tend to think only of the amount deducted from their own paychecks. In the aggregate this makes little difference in the financing of the system but it does make for a difference of perception to the worker. While it is natural for young people to be carefree about the future, the society in which they live is not risk-free. Along with the rewards of entering the work force, they need to share its responsibilities or, as Justice Holmes wrote, "Taxes are what we pay for a civilized society."

WHY CAN'T I OPT OUT?

The Heritage Foundation, the CATO Institute and other sources of conservative thinking, including even Ronald Reagan himself before his presidential aspirations changed his utterances if not his mind, have advocated that individuals be permitted to withdraw from the system. Sometimes this is accompanied by a requirement that they purchase equivalent protection through IRAs (Individual Retirement Accounts) or other private means.

A multigenerational system

This may sound like a reasonable idea to some innocents but for those who know the dynamics of the American system it is a clear death sentence. It would be more straightforward and honest simply to recommend repeal of the program. For it is the contributions of those who are working that simultaneously build their own entitlements and provide the funds for current benefits. For the individual it is a transfer from his working years to his non-working years. Collectively it is a transfer from production to those no longer producing. To the extent that the majority of these latter are retirees or their widow it is an intergenerational transfer. It assumes continuity, reciprocity and a sense of responsibility for the common weal.

Without the contributions of younger workers there would not be enough money to pay benefits to those whose contributions had "earned" them and the self-financing character of the system would be destroyed. Since it is hard to believe that this vast number of people would be totally abandoned by society, general revenue funds would have to be provided in this case. At this point a true intergenerational conflict would ensue and a means test to winnow out all but the most needy would become almost inevitable.

[5] See fact sheet No. 13, Social Security: Why Not a Means Test?

[6] See also: *Social Security: A Declaration of Confidence and Support by Private Pension Professionals* (enclosed).

[7] Attached herewith is a paper "Do Young People Get Their Money's Worth From Social Security?" by Robert J. Meyers, former chief actuary for the Social Security Administration and a highly respected expert in this field.

Potential loss to young workers

The young worker would have purchased his freedom from FICA taxes at a heavy price, including the many protections afforded by the social security system. IRAs, for the most part, involve a substantial risk and are not available—as is social security—for loss of income prior to old age. They involve no dependents' benefits, no productivity adjustment and no COLA. Many young workers would not be able to make such purchases voluntarily and would of course lose the employers' contribution.

The public interest

From the point of view of the public interest there are two perspectives. On the one hand foregoing social security taxes on a substantial share of earned income as the source of support for the system is a luxury we can ill afford, especially in this deficit period. IRA income is taxable only after retirement and the interim loss is a heavy sacrifice of badly needed revenue. If IRSs were treated as the primary provision for retirement their level and extent (and hence the revenue loss) would necessarily be greatly expanded. This can be described either as a tax shelter or a tax expenditure (social benefit tied to the tax system) or both but in any case the public is the loser. Given any option on their use, the middle or upper income group would be the gainer; lower income workers would not be able to afford this luxury.

WHAT KIND OF SOCIETY DO WE WANT?

This brings us to the second point of interest, i.e. What kind of society do we want anyway? We are not, as we often boast, the most generous country in the world. Twelve other industrial countries [8] spend more on public social programs in terms of percentages of their gross national product than we do. The self-contained nature of social security financing has served all generations well in protecting benefit levels. Young people do not have the advantage of their elders like me in remembering what life was like before the Social Security Act was passed fifty years ago and subsequently extended in coverage and protections. The passing of a predominantly agricultural society deprived older family members of the protections farm ownership provided. Increasingly the widowed, disabled, and elderly were forced into choosing between the ignominy of poor house or poor law relief and putting on their children a burden they could usually ill afford, often depriving grandchildren of educational opportunity.

Our social security system, starting from small beginnings in 1935, has followed the intentions of its original designers [9] by developing into a program that protects most workers against the major reasons for loss of earnings at a level which—while far from lavish—is increasingly adequate. It is a brilliantly integrated system, balancing income with outgo over the years, equity with social purpose, and preserving the dignity of objective entitlement based on earned rights. It seems inconceivable that it should be destroyed either directly or by equally damaging amendment. It seems equally inconceivable that it should not continue to develop as needs and resources make that possible.●

[8] These are figures from the Organization for Economic Cooperation and Development which includes nineteen of the most industrialized countries outside the Soviet bloc.

[9] See Factsheet No. 11 Original Intentions, by Dr. Eveline Burns. See also the 50th Anniversary Edition of the Report of the Committee on Economic Security published by the National Council on Social Welfare.

TRIBUTE TO DR. FRANCES KEPPEL

● Mr. SIMON. Mr. President, I rise today to pay tribute to Dr. Francis Keppel, distinguished professor of education at Harvard University, former commissioner of education and chairman of the National Student Aid Coalition. Most of my friends and colleagues are unaware of the important role played by Frank Keppel and the National Student Aid Coalition in formulating student aid policies over the last 5 years. On December 12, the coalition held its final meeting and Frank Keppel provided a report to the coalition on its activities from 1981–85.

It seems appropriate that the coalition would conclude its formal activities on the same day that the Senate Subcommittee on Education, Arts and Humanities took the first step—by marking up—toward reauthorizing the Higher Education Act in the 99th Congress. Much of what we have done is attributal to the fine work undertaken by the coalition. As the former chairman of the House Subcommittee on Postsecondary Education and a member of the Senate subcommittee, I have seen first hand the work of the coalition, the contribution of its executive director Linda Berkshire, and the outstanding leadership of Frank Keppel.

The report to the coalition follows:

REPORT OF THE CHAIRMAN OF THE NATIONAL STUDENT AID COALITION, 1981–85

It is salutary, if often embarrassing, to go back to first purposes in presenting a final report on a project. The story of the National Student Aid Coalition is no exception. So let us start by quoting from the 1980 request to the Carnegie Corporation and Ford Foundation for financial support—documents which are not likely to understate the hopes of those seeking the funds.

". . . The provision and delivery of financial assistance to students seeking education after high school in the United States traditionally has been a "joint venture" involving the federal and state governments, secondary and postsecondary institutions, private organizations, and students and their families. That fact is recognized in the multiple sources from which student aid funding comes and in the multiple agencies involved in moving the aid through the system to the students. In the areas of policy determination and procedural implementation, however, there has not been a consistently effective reflection of the roles and concerns of all of the parties to the process . . ."

". . . it is intended to provide a mechanism for coordinating the efforts of thirty-one organizations with an interest in student aid. It is not intended to preempt the activities or voice of those organizations but rather to provide them with a place to debate issues, reach consensus, and pursue that consensus with the appropriate policy-making bodies . . ."

". . . One of the important outcomes that can be expected from the support requested of private foundations by this proposal is the development of mechanisms by which that support can be obtained for subsequent years from sources other than foundations . . ."

Put in less elegant language, this means that the Coalition, made up of a cluster of educational organizations, was to watch over the "mechanism" of delivering student aid, to try to maintain a partnership in doing so, and stay out of "policy" matters more suited to those with greater competence and authority. Ironically, however, the Coalition project was started at a time of the changing of the tide, and it became almost impossible to separate mechanism from policy. The Coalition had to wrestle with the following paradoxes:

Established to monitor the system of delivering student financial aid for the poor, the Coalition found itself entangled in the effects of the 1978 federal loan program to help the middle class meet rising college costs—a program which absorbed federal appropriations like a sponge. The Coalition, therefore, had to give major attention to adjust measures of parental financial responsibility to the demands of political winds and a changing economy, a duty perhaps more suited to the political sector.

Established to help maintain a partnership between federal, state, institutional, and private sources of student aid, the Coalition had to spend time trying to remind the Washington establishments that there was life beyond the Potomac. Even though the Administration's policy apparently was to transfer many federal decisions to the states and the private sector, the Administration's actions seemed insensitive to the reasoning of the Federalist Papers.

Established at least in part from a concern that the poor must find access to higher education, the Coalition soon discovered that many institutions were becoming more concerned with maintaining enrollments by attracting as many students as they could, young or old, poor or well to do. Student financial aid became interpreted by some as aid to institutions of higher education.

Established at a time that inflation had outrun college charges, increases in college charges soon outran inflation, thereby raising doubts about the wisdom of a federal policy that tied appropriations to prices set by the colleges themselves. In New England, for example, between 1978 and 1985, inflation was reported to rise 69 percent while costs at public institutions rose 113 percent and private, 120 percent.

Established in the context of an Act of 1965 designed to provide equality in access to higher education to the poor and minorities, the Coalition found that progress toward that goal had either levelled or even begun to reverse. This development did not seem to be of the comparable concern in 1985 that it was in 1965.

Established to advise both the Executive and the Legislative branches, the Coalition soon discovered that the massive distrust that developed between them on student financial aid resulted in delayed decisions and inefficient delivery systems to students and institutions. Since it was scarcely the Coalition's position to deal with the root problem, it found itself having to treat the symptoms.

Established to consider student financial aid at both the undergraduate and the graduate and professional levels, the Coalition found that it was not properly constituted for dealing with post-baccalaureate issues,

and had to try to persuade others to take on the task.

Established as a forum which included associations representing different types of institutions of postsecondary education, the Coalition found it easy to reach consensus in recommending ways to improve the service if the pie was made larger. However, it found that its membership preferred to separate into competing groups when there was less pie. And when it came to calculating the size of the pieces of the pie and the quality of service, the Coalition, which was not established to deal with such issues, became, on occasion, immobile and downcast.

Despite the original intent in establishing the Coalition, which planned for participation by leaders of organizations from outside Washington, in practice, those attending the meetings as representatives of the membership organizations turned out to be Washington staff members.

In an effort to carry out its task under these circumstances, the Coalition reorganized the Committee on Need Assessment and Delivery which annually proposed changes in the (euphemistically titled) Uniform Methodology and saw those proposals accepted by appropriate authorities. It sought to strengthen understanding of the complex partnership of federal, state, private, and institutional sources that provide student financial aid by putting them on a chart. The result described a period of 18 months, printed in four colors, with three kinds of boxes as symbols of points of decisions, and in its original form, required a chart of almost 18 feed in width. It had its desired effect—to show that delay in decisions anywhere along the line results in some students somewhere being unable to get to college. The Coalition also was able to document the case that those in greatest need of information about student aid received the least and at the least appropriate time.

However, efforts to obtain financial support for the Coalitions's continuation from its membership failed.

The Coalition's competent, energetic and well-informed staff did yeoman work in finding out what was going on, telling about it to those who needed to know, and pulling together data from a myriad of sources. The result was that the Coalition became a trusted source of information that was used by both the Legislative and Executive branches, both political sides of the aisle, and even by competing educational interests. The Chairman came to feel that the work of the staff alone justified the generous grants of Carnegie and Ford, even though it might be tactless to document the numberless instances in which they helped to accomplish the sensible or stop the foolish.

The hearings of the Congress in 1984 and 1985 on reauthorization of the Higher Education Act of 1965, however, provided the Coalition an opportunity to pull its effort together to seek ways to carry on some of its functions and make some suggestions that could improve the delivery system of student financial aid. At the time of writing, the following seem to have some chance of emerging in the legislation now making its way in Congress:

1. Congressionally appointed and funded Advisory Committees to review methods of establishing student and parental responsibility and ability to pay the costs of undergraduate and graduate education; to comment on regulations designed to carry out programs; and to undertake other studies and analyses on the instruction of Congress. If established, these Committees could carry on part of the Coalition's work.

2. A new need analysis system for federal Title IV programs.

3. A program designed to provide information and advice to students in high school, particularly in the early years, about available student aid and how to benefit from it—a program aimed primarily at the poor, minorities and what has come to be called non-traditional students. Evidence obtained by the Coalition suggested strongly that lack of such programs was a serious block to achieving equality of access to higher education for those groups.

4. A Master Calendar mandated by Congress governing decisions on issues related to the delivery of student aid. The Calendar is designed to avoid delays in providing information and in developing and distributing student aid forms needed by students, parents, and institutions.

5. A considerable number of technical amendments to Title IV intended to provide oil or grease to the machinery of delivering student aid where experience had shown the need of reducing friction.

This final report must therefore include a mix of some tasks accomplished, some untouched, some failed, some barely started (such as improving the access of poor and minorities in the last four years), and some still in the stage of hope.

But on one topic there can be no doubt—the loyal and intelligent work of thousands of financial aid administrators has been a major factor in delivering assistance to millions of young men and women, and for this, the Nation should be grateful. It should be even more grateful for the continued willingness of parents and students of all economic classes to provide funds from their own resources to finance postsecondary education—a willingness that is not matched anywhere overseas. The Coalition may not have played much of a part in maintaining this magnificent tradition, but it can at least report that it tried.●

SENATOR ROCKEFELLER'S QUIET DILIGENCE

● Mr. LEVIN. Mr. President, on November 19, Senator JAY ROCKEFELLER spoke to the Senate about lessons that could be learned from the settlement of the Wheeling-Pittsburgh steel strike. Senator ROCKEFELLER's speech was a reasoned and eloquent call for labor-management cooperation as the indispensable cornerstone for revitalizing steel and other critical industries to meet the challenges of international competition.

Those of us who heard the speech valued it because we knew that it grew out of JAY ROCKEFELLER's personal experience in West Virginia as Governor and Senator and his familiarity with the Wheeling-Pittsburgh situation. What too few of us knew, however, was how deeply and consistently involved Senator ROCKEFELLER has been in the effort to save Wheeling-Pittsburgh Steel.

An editorial in the Charleston Gazette, dated November 27, entitled "Quiet Diligence," provides a detailed picture of Senator ROCKEFELLER's extraordinary mediating efforts. The editorial observes that he "labored behind the scenes for 9 months, sweating out compromises, coping with problems, rarely grabbing the news spotlight in the manner of most politicians."

I commend my colleague for his unique role in the Wheeling-Pittsburgh situation, and I ask that the editorial from the Charleston Gazette entitled "Quiet Diligence" be printed in the RECORD.

The editorial follows:

QUIET DILIGENCE

Most of West Virginia's economic news lately has been bad. Volkswagen will phase out 871 workers in South Charleston. FMC closed a 400-worker unit in the same city. Union Carbide is offering psychological help to hundreds of laid-off employees. Mason Glass at Jane Lew closed when its 60 workers wouldn't surrender half their pay.

But there's an encouraging note: Wheeling-Pittsburgh Steel has been pulled back from the brink of doom and 8,200 employees—751 of them West Virginians—are at work under a cooperative contract that gives them a voice in management.

The Wheeling-Pitt reprieve happened partly because Sen. J.D. Rockefeller IV, D-WV, labored behind the scenes for nine months, sweating out compromises, coping with problems, rarely grabbing the news spotlight in the manner of most politicians.

Last February, communication had ceased between former Wheeling-Pitt chief Dennis Carney—a brilliant but difficult executive—and United Steel Workers leader Paul Rusen. Teamwork between union and management was needed to induce banks to refinance the desperate firm. Rockefeller called both men to his office and they resumed talks.

Later, when the truce faltered, Rockefeller flew to Pittsburgh, brought the antagonists together, and brokered a wage package and debt restructuring plan. He accompanied Wheeling-Pitt leaders to New York banks. He urged General Motors chiefs to renew steel orders from Wheeling-Pitt.

When the suffering firm went to bankruptcy court and workers struck, Rockefeller's staff logged thousands of hours in the salvage effort. Aide Phil McGance manned what became known as Rockefeller's "full-time Wheeling-Pitt desk." A key concern during the dark days of the strike was to prevent cancellation of the Follansbee mill being created jointly with Nisshin Steel and to avoid loss of its $8.7 million federal grant.

A turnaround came after major stockholder Allen Paulson deposed Carney and brought in a new chief executive gifted at wringing compromise from chaos. The contract that evolved was based on partnership, with workers accepting a pay cut in return for decisionmaking power. A Rockefeller proposal—an escalator to increase wages if the company prospers—was incorporated in the contract.

In a Senate speech last week, Rockefeller didn't tout his own role but lauded the "visionary" contract for its "virtually unprecedented commitment to partnership between workers and management in sharing the future of this company."

A multimillion-dollar payroll has resumed pumping life into West Virginia's Northern Panhandle. It didn't happen through boosterish Commerce Departments or dramatic news announcements. (Gov. Arch Moore

reaped more publicity in one day of flying to Follansbee to hand out unemployment checks than Rockefeller did in nine months of quiet effort.)

Wheeling-Pitt isn't out of the woods. The corporation is $500 million in debt and its pension plan must be bailed out by federal insurance. But the cooperative labor contract signed Friday is a hopeful step—one reflecting plenty of backstage work by Sen. Rockefeller.●

BEYOND ECONOMICS

● Mr. MOYNIHAN. Mr. President, I rise today to bring to my colleagues' attention an article written by the distinguished senior Senator from Colorado, my friend Mr. HART. The essay, entitled "Beyond Economics," appeared in the autumn issue of the Journal of Family and Culture.

The Senator has distinguished himself once again by looking beyond the limits of conventional wisdom for insights into the social forces we in Government are charged to deal with. He refuses to limit his thinking to that acceptable to any rigid doctrine, left or right. A small testament to such can perhaps be inferred from the fact that the Journal of Family and Culture has seen fit to publish Mr. HART's views.

As for his observations, let me say simply that Mr. HART has once again lucidly delineated a reasoned response to a matter troubling to all of us: The shortcomings of economics. His is a prescription for a "new, broader, more fundamental framework that includes economics, but that places it in a larger context built of our values, our culture, and our nonmaterial needs."

I encourage my colleagues to spend a few minutes considering Mr. HART's views. It is, most assuredly, important reading.

Mr. President, I ask that a copy of Mr. HART's article be included in the RECORD.

The article follows:

BEYOND ECONOMICS

(By Gary Hart)

Among the things prudent politicians usually avoid is putting forth ideas that are tentative, perhaps incomplete, and almost certainly controversial. But the times we are living in demand new thinking. We cannot develop the national policies we need for the remainder of this century and the beginning of the next by endlessly debating the respective merits of Herbert Hoover and F.D.R. We need new approaches, and these seldom spring full-grown from the head of Jupiter. They require politicians, among others, to put forward some hypotheses, some tentative conclusions, some ideas that may or may not ultimately be right but that move us along the road toward some new perspectives on our world and where it is going.

This article attempts to do that in reference to a subject that concerns every citizen: economics. The ideas offered here are in a formative stage, and they are tentative. Some may be obscure, and there may be some false leads among them. But they constitute an attempt to move beyond the usual economic debate over tax structures, interest rates, the money supply, and the deficit. These are all important subjects. But taken alone or together, they seem in many ways to miss the core economic issue: the quality of our lives.

How can we see more deeply into the "dismal science" of economics? A good starting point might be the realization that in a larger cultural and social sense, all economic policies have been failing for at least a century and possibly longer. Time and time again, nations have succeeded economically—both in terms of growth and distribution of wealth—only to find social dissatisfaction growing, not diminishing. The economic success of the Victorian period in Europe bred enormous dissatisfaction in virtually every social class, leading to serious internal instability. In America, the economic success of the 1950's was followed by the widespread social turmoil of the 1960's. And the dissatisfaction was led by many of those who had benefited most from the economic gains.

Something fundamental has gone wrong; success does not succeed. "More" is not enough. The science of producing and getting more is not sufficient as a guiding principle. Economic growth is important, but it is important because it provides the means with which to do things. It is not a sufficient goal in itself.

We need an economic reform movement—a movement with the goal of going to the heart of the nature of society and of human behavior. How do we go about defining the new questions we need to ask—questions which may lead to reform in the way of economics is used in governing? History remains the only real "data base" of human behavior, and economic reform must begin with history.

Prior to the industrial revolution, western societies were characterized by a high degree of stability over time. People were born, lived, and died in the same village or town, among the same neighbors, often following a family craft or profession. This stability, a stability over generations, created many dependable, general relationships. For one's entire life, the same people were friends, co-workers, co-religionists, and so on. Traditional society was well described by Edmund Burke's analogy to a great, old tree. The relations among people were as mutually supporting as those among the many roots of that tree.

But industrialism shattered traditional society. With its demand for physical and social mobility, its disruption of agrarian societies, its segregation of home life from life at work, its mixing of people from different origins, and its lack of concern for anything other than quantitative output, it substituted *functional* relationships for general relationships. We now see some people at home, others at work; we move frequently; the extended family becomes obsolete; children live in a different world from that of their parents. Many of us live in several different worlds through the course of our lives. While industrialism brought wealth, it also brought an impoverishment of the individual and collective spirit.

But industrialism did create a new discipline: economics. Consideration of production, consumption, and distribution of goods and services as matters of state policy did not begin with the Industrial Revolution, of course. But economics in its modern sense was born along with industrialism in the 18th century. It defined man as an economic creature—a creature driven almost exclusively by material wants, who makes rational decisions, in the words of the 19th century economist Stanley Jevons "to satisfy (his) wants to the utmost with the least effort."

Unfortunately for economics, this "economic man" does not exist. We are not defined by our possessions. Our vision reaches beyond the material plane. The quantitative instruments of economics cannot circumscribe the human spirit. The desire for goodness, the search for truth, and the love of beauty all soar above the narrow bounds of materialism.

Without economic prosperity, of course, we cannot meet the needs of our own people and others throughout the world. But material prosperity does not provide purpose. It is not, of itself, a worthwhile vision. Tennyson wrote: "Thou hast made us, we know not why. We think we were not made to die." And he might have added, in this industrial age: "We think we were not made merely to possess, or to be governed only by the static measure of a discipline confined to the principles of production and consumption."

As the industrial age evolves, the discipline it produced, economics, is increasingly looked to for new theories to keep the giant engine running. But at the same time, we sense economics to be deficient as the foundation of government. To use to the language of economists, traditional economics is necessary but not sufficient.

What would be sufficient? Perhaps we need, in the words of Theodore Roszak, "a nobler economics that is not afraid to discuss spirit and conscience, moral purpose and the meaning of life, an economics that aims to educate and elevate people, not merely to measure their low-grade behavior."

In a sense, an economics of such richness and depth would be so different from economics as we know it today that perhaps a new term is needed. Certainly, we need a broader term than economics to describe the overall foundation for government and public policy. A good term might be "statecraft." Such statecraft should attempt to make national policies sensitive to deeper motivations than the desire for a paycheck. It should be an attempt to confront the question, what does it profit a society to conquer inflation, reduce interest rates and create new jobs, if we don't enjoy what we have or what we are doing or sense some greater national or cultural purpose?

A definition of statecraft should start by identifying human aspirations that go beyond material needs. Four such aspirations might provide a starting point:

A sense of purpose and vision. We all need a perspective on our existence in time and place, and a sense of direction as individuals and as a nation;

Opportunity for creativity. There is a growing demand throughout society for participation in the workplace and redefinition of our jobs to include shaping and guiding our institutions;

Opportunity for individual growth, for continuing and recurring education and exposure to new information and new experiences;

Autonomy or individuality—the need to be able to shape our own lives, as individuals and as communities, within the context of our constitutional liberities.

To give us a chance to achieve these aspirations—and to give some content to the notion of statecraft—we must take a number of other themes into consideration:

First, decentralization. Room for human growth can be provided best within small

units. As one sociologist, wiser than most, said, "You cannot study men; you can only get to know them." Local control in politics, in social and cultural issues, and in the business world must be a central theme.

Second, community. To have richness instead of isolation in our personal lives, we must allow communities to grow. Economic policies—public or private—which shatter community are destructive to the human spirit, however "efficient" they may be.

Third, a manageable pace of change. Change is unavoidable. But future historians may wonder if the 20th century drove itself to collective madness with its desperate velocity of change. We must control the pace of change, rather than letting it control us. Continuity must be given a chance to grow between generations. Technology must adapt to human realities, not vice versa.

Fourth, we must question modernity's most sacred cow: the notion that "you can't turn back the clock." Of course, in many areas we would not want to return to past practices. We have made genuine progress in everything from civil rights to sanitation. But in some areas, including such divergent fields as public transportation and the arts, a reasonable argument can be made that what we had once was better than what we have now. Even in these areas, attempts to turn back the clock will not precisely reproduce the past. But a look backward can give us a reference point. Historically, many great movements forward have been attempts to return to the past. The Renaissance is a good example.

Fifth, we must give more thought to aesthetics. Anyone who lives with the architectural monstrosities in our cities or the "Vegas Strips" that foul our towns and suburbs knows aesthetics is important. John Ruskin's attempt to blend economics and aesthetics may not have been the blind alley most classical economists think it to be.

Sixth, we must give greater consideration to the human side of the industrial process. We cannot expect our society to be successful if most people's jobs reward them only with a paycheck. The medieval guilds may have known something we have forgotten: the reward of a job well done, a job that gives reign to creativity, that requires and shows forth real skill, may be as important as the company's bottom line. In fact, it may even increase the bottom line. Giving workers a greater voice in their workplace may yield more gains in productivity than replacing them with robots.

Finally, we must think differently about education. This is perhaps the most important consideration of all. Ortega y Gasset, in his classic The Revolt of the Masses, warned that 20th century man was becoming a technologically competent barbarian. We can punch the buttons on our machines, but we cannot see ourselves or our world in any context, because we have not been educated. Education is not training, though training is also valuable. Education is essentially the classical education, intended to give us understanding of our culture and our values, of why our values are valuable, of the edifice our ancestors have built upon which we stand. It is rooted primarily in the study of history and literature. It teaches us mathematics and science, not to make us technicians, but to teach us to think logically. It must be revived—first, among our educators. Without it, we cannot hope for a society that does more than lurch blindly from crisis to crisis, unable to see where it has been, and thus know where it can go.

As we evolve the qualities that constitute statecraft, what should we seek to do with them? Our principal task is to relate them to the technology, wealth and growth that must remain important parts of our social order. The task is not to overthrow technology or growth, but to use them within the framework of statecraft—to drive them and control them, rather than being driven and controlled by them. One might say, our task is to civilize them.

Can we really use these seven themes in devising policy in the real world? Why shouldn't we? Would it not make more sense to design an urban transportation system that took into account our needs for community and aesthetics rather than just what works technically? Would not our job training programs work better if they were based on a broader view of what people want from their jobs? We have already seen, in numerous cases, that decentralized decisionmaking, both in government and business, leads to greater satisfaction and better results.

A great nation must have a great framework by which it is to govern itself. Traditional economics, with its one dimensional "economic man", is simply insufficient. We must think through a new, broader, more fundamental framework that includes economics, but that places it in a larger context built of our values, our culture, and our non-material needs. That is much more than this brief article can possible do. But it is, perhaps, a beginning, and a call to face the task.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room SD-423.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 18, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-21 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter(s) of Offer to Turkey for defense articles and services estimated to cost $206 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

PHILIP C. GAST,
Lieutenant General, USAF, Director.

Attachments: Separate Cover: Classified Annex.

TRANSMITTAL NO. 86-21

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(B)(1) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Turkey.

(ii) Total estimated value: Major defense equipment as defined in Section 47(6) of the Arms Export Control Act: $0 million; other: $206 million; total: $206 million.

(iii) Description of articles or services offered: Seven hundred sixty conversion kits each consisting of tank thermal sights, add on stabilization, solid state ballistic computers necessary to convert M48A5 tanks, and associated defense services.

(iv) Military Department: Army (USV and USX).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: case not included in Section 28 report.

(viii) Date report delivered to Congress: December 18, 1985.

POLICY JUSTIFICATION

TURKEY—TANK CONVERSION KITS

The Government of Turkey has requested the purchase of 760 conversion kits each consisting of tank thermal sights, add on stabilization, solid state ballistic computers necessary to convert M48A5 tanks, and associated defense services. The estimated cost is $206 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey in fulfillment of its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

These conversion kits will be used by the Government of Turkey in their Tank Modernization Program. These components, when installed on the M48A5 tanks, will greatly increase the fire power capabilities of the Turkish Land Forces Command. The tank thermal sight provides enhanced night fighting capability by using Long Range Infra/Red detectors that enable the tank gunner to detect enemy tanks through darkness, fog or battlefield smoke. The add-on stabilization system allows the tank to fire its main armament while on the move. The procurement of 760 conversion kits would upgrade approximately one-third of the Turkish M48 tank inventory. These kits will be provided in accordance with, and subject to the limitations on use and transfer provided for under the Arms Export Contrl Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question. Turkey will have no diffi-

culty absorbing these tank conversion kits into its armed forces.

There are three prime contractors: Texas Instruments, Dallas, Texas; Control Data Corporation, Alexandria, Virginia; and Cadillac Gage, Warren, Michigan.

Implementation of this sale will require the assignment of two additional U.S. Government personnel for one month and two contractor representatives for one year to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

OMB'S PROPOSAL TO CUT OFF METRO

● Mr. MATHIAS. Mr. President. The Office of Management and Budget has made a preliminary recommendation to eliminate funding in the 1987 budget for the Washington area rapid rail system. The consequences of such an action for one of the Nation's most exemplary and efficient transit systems would be disastrous.

The three jurisdictions that compromise the Washington metropolitan area—Maryland, Virginia, and the District of Columbia—have worked tirelessly over the years with the Federal Government to develop a construction schedule to complete the Metro system in a rational, well-planned way, with the strictest funding requirements. Now, one of the parties to the agreement—the Office of Management and Budget—wants to pull the rug out from under them, by halting all Federal funding and thereby throwing the entire construction schedule out of kilter. It is particularly unfortunate that one of the lines placed in jeopardy is a key element in serving low income residents who rely heavily on public transportation. Such last minute changes in construction schedules and contract negotiations inevitably increase costs.

Our standing in the world and our position as a great power are measured in many ways that go beyond the stocks of arms in our arsenals or the volume of transactions in our economy. The quality of life that we provide for our people is also a measure of our maturity as a nation. Every great power in the world today provides a modern system of public transportation for its capital. The subways in Moscow, London, and Paris serve to illustrate this point. The possibility that the United States should shirk this responsibility is not to be considered seriously by thoughtful people. As highways become more congested it will not be considered seriously by practical people.

I agree that we have to look for new ways to reduce the deficit, but we should not single out programs such as the Washington rapid rail system to shoulder an unfair share of the burden. It is an ideal model for other transit systems around the country. Its ridership is high and increasing, its operating costs are being held in check and its service reliability is among the best in the Nation. No one expects Metro to escape the budget scalpel when the transportation programs are put on the chopping block, but a guillotine is far too drastic a tool.

The Washington Post, in an editorial of December 13, set forth some cogent, well reasoned arguments in favor of providing a more rational adjustment. I commend it to my colleagues and ask that it be printed in the RECORD.

The editorial follows:

OMB'S PROPOSAL TO CUT OFF METRO

Greater Washington's subway system—the grand and often imperiled mass transportation project for the capital that has enjoyed the support of every president since Dwight Eisenhower—is now in its deepest trouble ever. The Reagan Administration's Office of Management and Budget has recommended cutting out all federal spending for completion of the system as envisioned, negotiated and brought along through years of cooperative efforts by federal, state and local governments. It's called "zeroing out" and would take effect in the next fiscal year. The result: routes patiently awaited might never be built. The biggest losers would be the residents of low-income neighborhoods who depend most on mass transit—and who have had to wait the longest.

There's no question that under Gramm-Rudman-Hollings plenty of harsh adjustments are in the offing and that Metro faces its share. But OMB's proposal would undercut delicately negotiated agreements reached by this very administration and all the other participating governments. They already had worked out schedules for keeping subway construction as orderly and economical as possible, within strict financial limitations. That is the only fair way to treat those parts of the region that over the years have committed and pooled their state and local money for other routes while theirs had to wait.

It isn't as if this administration had been mindlessly tossing dollars at some high-speed plaything for the locals. Secretary of Transportation Elizabeth Dole and Ralph L. Stanley, the administration's mass transit chief, have won agreements with metro that are considered models of sensible austerity. And if they believe in what they have accomplished so effectively for a balanced mass transportation system in the capital, they should appeal in the strongest terms for a more rational adjustment. It would be a recognition within the administration of what they have achieved on its behalf already.●

ECONOMIC BENEFITS OF THE STRATEGIC DEFENSE INITIATIVE: SPEECH BY GIANNI AGNELLI, CHAIRMAN OF FIAT

● Mr. WALLOP. Mr. President, I offer for my colleagues' review and study a speech delivered by Gianni Agnelli. Delivered on November 21, 1985, in Brussels, it reviews the potential economic benefits to Europe of participation in the strategic defense initiative. I, myself, as most of us in this body, have concentrated primarily on strategic military and political reasons for SDI. This address adds an important new dimension to discussions of the benefits of research into strategic defense technologies. While his arguments are meant to apply to Europe, they are very relevant to the U.S. economy.

A Chase Econometrics study in 1976 made the following estimates on the economic impact of the U.S. space programs: For every billion dollars invested in space research and exploration, the American gross national product increased by $23 billion; more than 800,000 new jobs were created; and the money multiplier effect was between three and eight. Extrapolating on the technology development resulting from NASA space programs, Mr. Agnelli forecasts major technological benefits to the economy from SDI.

Primary economic benefits derive directly from the transfer of SDI technology into the industrial base. Mr. Agnelli gives likely examples from across the spectrum of the SDI research program. One from the directed energy area is adaptive optics in the mirror systems used to focus lasers and compensate for atmospheric distortion. This technology can be used in industry to control lasers as cutting tools, to permit the use of lasers for long-distance communications, and to develop microscopic imaging systems for the design and inspection of microelectronic circuitry and other miniaturized components. Secondary benefits result from activities needed to implement the results of basic SDI research and could be even greater than the primary ones. They derive from the necessary space infrastructure which would support large-scale industrial development in space. Finally the tertiary benefits accrue. There are alloys, composites, and crystals which can only be manufactured in microgravity. There are pharmaceuticals which can be produced in purities and quantities required only in space. As an indicator of the magnitude of potential benefits, Mr. Agnelli refers to studies estimating revenues for satellite communications alone in the range of $50 to $100 billion annually, with growth rates of 20 to 40 percent.

I hope my colleagues will look carefully at the reasoning and examples that Mr. Agnelli uses. They will be

very relevant during the review of the 1987 SDI funding requests.

The material follows:

Ladies and Gentlemen, etc.: Thank you for the honor of addressing this distinguished gathering on the topic of the American Strategic Defense Initiative. As an Italian and a European, I am deeply concerned about the effect of the Strategic Defense Initiative on the security of my country, and the entire Western European Community. However, there are others here, better suited by training and inclinations to penetrate the byzantine intricacies of global strategy.

Therefore, I would like to address you as an industrialist, a European industrialist, on what I perceive as the opportunities the Strategic Defense Initiative offers for European Economic development.

As you are undoubtedly aware, European industry is suffering from the phenomenon of "high technology lag". Although we excel in the design and manufacture of products based in traditional industrial techniques and mature technologies, we have not kept abreast of the cutting edge technologies. Neither have we been as adept as we might be in exploiting advanced technology developed outside of Europe. In a global market which demands goods of increasingly advanced technology, we run the risk of stagnation and the loss of sizable portion of international trade to those nations which offer state-of-the-art products.

Although beset by structural dislocations inherent in the transition from a traditional, industrial economy to a modern, post-industrial economy, the United States has, in the last five years, created more than eight million new jobs, while Europe has lost several million. The United States has demonstrated its superiority over Europe in the development and application of high technology; it is high technology which is responsible for the majority of the new employment in America. Why should this be the case, when our universities and technical institutions are capable of producing scientists and engineers equal to any in America?

There are two basic causes. First, the American economy remains remarkably unstructured when compared to those of Europe, leading to the establishment of thousands of entrepreneurial companies in what has been termed the "high innovation sector". These small-to-medium sized companies seek out new markets and create their own demand by applying new ideas and advanced technology to the solution of old and emerging problems. The high innovation economy is characterized by rapidly shifting trends; to survive, these companies place a premium on flexibility and creativity. The lack of a large entrepreneurial class in Europe mitigates against the rapid development and exploitation of new ideas. Our whole business, labor and governmental structure is too conservative, too obsessed with security, to compete effectively against companies willing to take major risks on unproven concepts (which, if they succeed, often have spectacular payoffs).

The second major contributor to American success in high technology is the use of major government-sponsored applied research and development programs which act as focusing agents for the creative energies of high technology firms. Daily business activity is sufficient to provide incremental improvements in technology, or new discoveries in narrowly specialized fields. However, a quantum breakthrough to a new level of technology requires a broader, more coherent, effort. Just as ordinary light can be made coherent and focused as a laser to cut through steel, so too can technological development be made coherent and focused to cut through technological barriers which might otherwise seem insurmountable.

In our century, war has often been this kind of focusing agent. The quest for new, efficient instruments of destruction, the threat to individual and national survival, provide the impetus for technological research which, paradoxically, provides the wherewithal for better living peace.

I believe the United States has found a peaceful substitute for warfare as a focus for technological development. Such a program must present broad and challenging technical goals, requiring solutions to new and unforeseen problems in diverse, but related, areas. The program must have goals cast in a Promethean mold, to capture the imagination of scientists and laymen alike, and thereby mobilize the physical and moral resources of the nation in the same manner that the threat to survival mobilizes the nation in war.

I believe that space exploration has provided this role for America. The space program has been the lasting medium for the engineering and entrepreneurial inclinations of the American people, resulting in achievement of extraordinary scope and importance. Consider: in 1958 the United States managed, with great difficulty, to place a two kilogram satellite in low earth orbit; a decade later, men are walking on the moon and returning safely to Earth. Today they are demonstrating the ability of man to live and work in space, and sending unmanned probes to the most remote corners of the solar system.

However, if the only results of the space program were solutions to the immediate technical problems of space flight and the expansion of our abstract knowledge of the cosmos, there would be little economic benefit beyond the aerospace firms involved. But within the solutions to the major problems reside countless minor problems, the solutions to which may have much broader applications than anticipated. These tangential applications, or "spinoffs", have been unanticipated economic windfall, and fully justify the expenses of programs like Apollo or the Space Shuttle by virtue of the new industries and employment they have created.

The full range of technological spinoffs from the space program is too vast to recount here. Those who are interested should investigate the "Spinoff Reports", published by NASA annually. It is sufficient, though, to say that few, if any basic areas of advanced technology which do not owe some or all of their development to the demands of the Space Program.

A few specific examples should prove this point, beginning with fields of microelectronics and computers. If we live in the age of the computer revolution, we may thank the space program. The demands for highly reliable electronic components packaged in the minimum mass and volume were essential for both manned and unmanned space probes, leading directly to the integrated circuit. Missile guidance control, the development of complex navigational algorithms and ballistic computations requiring the execution of many thousands of mathematical operations per second, led to the development of powerful, high speed digital computers. To place these computers aboard weight and volume constrained spacecraft, the computers were made smaller which in turn demanded integrated circuits of much greater density and speed. Today computers found in households and offices are far more capable than any which were available even to military organizations in the early 1960s. The cost of computers has decreased, even as capabilities have increased several orders of magnitude, thanks to improved manufacturing techniques developed out of the American space program.

As secondary spinoff of computers and the space program: computer assisted design and computer assisted manufacturing. Aerospace and automotive manufacturers have eliminated thousands of manhours of precision model making, wind tunnel and prototype testing by using complex computer simulations in the design process. Design changes which previously took months to implement are today tested and verified in hours by feeding the desired parameters into a computer. This technique was first developed in the space program to validate design concepts without the expense of building hundreds of test vehicles.

We also use computers on the assembly line for hundreds of repetitious precision tasks previously done by hand. We at Fiat use many robots in the manufacture and assembly of our automotive products. The technology for these machines was spun off of the remote planetary probe and image processing programs of the space program. Highly realistic cockpit simulators are being used to train and refresh aircrew, and develop responses to inflight emergencies. These simulators, first developed to train astronauts, save the airlines millions of dollars in fuel and maintenance each year, while improving pilot proficiency and safety. Computers and other technologies developed from the space program have revolutionized biomedical science. CAT and ultrasound scans used image processing techniques from space probes. Advanced biomedical sensors were developed out of the space program's need for remote physiological monitoring of astronauts from space.

The need to minimize structural weight and maximize spacecraft payloads led to the invention of a wide range of composite materials with many times the strength of steel at a fraction of the weight. These composites are now being used in aerospace and automotive manufacturing to reduce structural weight and improve the efficiency of aircraft and vehicles. These composites demonstrate many new and existing characteristcs which permit the exploitation of theoretical designs previously deemed impractical due to the lack of available materials. The forwardswept wing now in testing on the X-29 was first conceived in Europe in 1945; but until stiff, high strength carbon-boron epoxy was available, this revolutionary aircraft technology could not be developed. The X-29, along with many of the latest military and commercial aircraft, employ digital fly-by-wire flight control systems first used on manned spacecraft, which reduce pilot workloads, and permits highly efficient flight for reduced cost, and difficult maneuvers throughout the flight regime.

Indeed, space technology has entered our mundane lives so pervasively that it is impossible to pass a single day without encountering some article developed out of the space program.

The effect all this has had on industrial economies is enormous. The entire Apollo program cost the American taxpayer some twenty-three billion dollars over twelve

years. The return on that investment has been staggering. NASA conservatively estimated that the direct return on every dollar invested in the space program is on the order of eight-to-one. On top of this, one must consider secondary and tertiary applications. Example: earth observation satellites. Billions of dollars are saved annually by the advance warning given when hurricanes, blizzards or floods threaten, thanks to weather satellites. Earth resource satellites enable us to spot oil, water and valuabel minerals in remote locations without the time and expense of sending survey teams to the area. The same satellites help locate and combat agricultural diseases by infrared analysis of foliage. The source and effects of pollution can be mapped in the same manner.

In fact, it would not be far from wrong to state that the impact of the space program has been practically incalculable in monetary terms. However, a Chase Econometrics study of 1976 made the following estimates: For every one billion dollars invested in space research and exploration, the American gross national product increased by twenty-three billion dollars; more than eight hundred thousand new jobs were created; the money multiplier effect was between three and eight. It is probably no coincidence that the period of 1972 to 1980, during which America had no ongoing large-scale space program, was a period of economic malaise for the United States. Nor is it entirely coincidence that the American economy has revived in conjunction with a revitalized space program.

What has this to do with the Strategic Defense Initiative? I believe that SDI is potentially the same sort of focusing program as Apollo or the Space Shuttle. Although it has a military purpose, this purpose is purely defensive; indeed, its ostensible goal is the prevention of mass destruction. The technical problems in developing a ballistic missile defense are vast, and push the limits of our present capabilities. The concept is broad and daring enough to capture the imagination and mobilized the kind of support needed to propel a technological breakthrough. Most important, for the first time, the United States is actively seeking multinational European support and participation in this effort.

Whether one supports the strategic goals of SDI is immaterial to the fact that the program presents European industry with the opportunity to participate in what could become the greatest research and development program of the decade. Through exposure to the technology, attitudes and environment of the program, we may be able to translate the experience into the revitalized high technology economy which we desparately need. As presently structured, it is intended only to investigate the technological possibilities of strategic defense. The question of implementation cannot be answered reasonably until such a technical investigation is completed. In any event, implementation is a military-political question outside the realm of industrial policy.

The nature of economic benefits to be derived from SDI research can be characterized as primary, secondary, and teriary.

Primary economic benefits are those derived directly by the transfer of SDI technology into our industrial base; spinoffs of this nature will show the greatest return on investment in the near term. The Strategic Defense Initiative is organized to investigate three major areas of technology: kill mechanisms, such as lasers, kinetic energy weapons, etc.; SATKA, or the Surveillance, Acquisition, Tracking and Kill Assessment sensors and Battle Management, the data processing and communications system required for coordination, fire control and resource management. The technical challenges in each of these research areas are formidable; it may turn out that some are insurmountable in foreseeable future. Nonetheless, coordinated, coherent research will advance the state of technology in all fields involved in the research effort, even if a strategic defensive system is never deployed. The Strategic Defense Initiative Organization recently recognized the economic importance of technological spinoffs by opening an office to identify civilian applications of SDI research and disseminate them to the public. Let me identify just a few of the industrial applications of primary SDI research.

In the field of lasers and directed energy weapons, SDI has already succeeded in improving the efficiency of high energy beam generation. This making the industrial use of lasers as cutting and welding tools more economical. The free electron laser under development for SDI has numerous potential applications in industrial and medical processes because of its capability to alter the frequency of the beam it emits. Lasers are under consideration for tracking and targeting sensors. Laser radar, due to its very short wavelength, has much higher resolution than radio frequency radars to transmit data along lines of sight at much greater densities than are possible with microwave systems. Adaptive optics used to control beam focus and compensate for atmospheric distortion, can be used in industry to control lasers as cutting tools, to permit the use of lasers for long distance communications, and to develop microscopic imaging systems for the design and inspection of microelectronic circuitry and other miniaturized components.

Particle beam technology, especially the neutral particle beam, is exploring areas of particle acceleration and beam control essential to the development of controlled fusion technology, and the technology of ion propulsion.

In kinetic energy weapons, the electromagnetic "rail gun" is considered one of the most promising areas of investigation, capable of accelerating small to moderate sized masses to velocities of over three thousand meters per second in the space of dozen meters, using controlled magnetic pulses. This technology can be used to improve the capabilities of magnetic levitation mass transit systems now under development in Germany and Japan.

The entire realm of SATKA is replete with technological spinoffs. The basic problem of SATKA is developing sensors capable of detecting small objects, of being able to discriminate between legitimate targets and decoys designed to dilute the effectiveness of the defenses. The sensors must also be able to detect minute changes in the state of the target to determine if the defenses have neutralized it. Accomplishing these objectives will require sensors many times more sensitive than those presently in use. New infrared and optical sensors will be used in earth observation satellites to survey and locate resources more effectively even than those in use today. It may be possible, through improved image processing technology, to identify marine resources, such as fish, or plankton, or even submerged mineral resources on the continental shelves. These same image processing techniques will also be used in industrial processes, for monitoring and quality assurance. It has been suggested that particle beams of relatively low power can be used as mass detectors, to determine the density of objects.

Battle Management, however, may be the area in which we see the most important and immediate spinoffs of SDI. Integration of the thousands of separate elements in a ballistic missile defense requires extraordinary data processing rates. For a boost phase intercept, potentially the most cost effective form of defense, processing rates on the order of one hundred million bits per second are needed, several orders of magnitude beyond the capability of all but the most powerful computers available today. Computers for battle management, however, must be cheaper and more compact than the present generation of supercomputers. The requirement for ultra-high speed date processing will give birth to a new generation of computers which will make today's models obsolete. These new computers will probably use parallel, rather than sequential processing, which will require entirely new methods of programming. These computers will be able to process much larger volumes of data and run increasingly complex simulations, which will reduce design and manufacturing costs for industry.

The immense amount of data being processed, and the very short times available for decision making, requires the battle management system to be much more automated than any previous military system. Man is a monitor, an override, a fail-safe component. The dynamic interplay of offense and defense during an engagement implies that the two-dimensional stochastic models used in earlier automated systems will be wholly inadequate. Instead, artificial intelligence and expert systems will be improved greatly to permit rapid, correct responses to unique and rapidly evolving tactical situations. The civilian applications for artificial intelligence of this calibre are awesome. To give but a few examples:

Assembly lines can be more fully automated, and much more flexible. Industry would then be able to shift from the production of a few models with limited variations, to smaller runs of a more diverse product line specifically tailored to consumer needs, without incurring prohibitive expense, by using artificial intelligence to coordinate the subcomponents and processes required for each item in response to programmed inputs.

In aviation, artificial intelligence and expert systems can function as "pilot's associates", monitoring system performance and reducing pilot workloads. In resource exploration or hazardous material processing, remote land rover vehicles or unmanned submersibles will be able to go places too dangerous for humans, without relying on remote control inputs. Such vehicles will be able to maneuver in their environment, equipped with manipulator devices enabling them to carry out their programmed tasks the face of unexpected conditions.

Consider the effect which the computer has had in industry to date, and then imagine the impact of a tenfold or hundredfold improvement in computer performance. Think of the power of a Cray-II packaged to fit atop a desk, and the concomitment reduction of data processing costs when such capability becomes widespread.

Battle management also requires secure, high-speed telecommunications capability, to pass targeting and tracking data, system status, and command signals across global distances. This will require a new generation

of communications satellite of much greater power than now exist. Not only will individual satellites be able to carry a greater number of signals, but, as power increases, the complexity of ground receiver stations will decrease. Within a decade, it may be possible to transceive signals via satellite using ground stations of only a few watts power and dishes less than a meter in diameter.

Electronic, cybernetics, signal and data processing, optical sensors, laser and particle beam technology, telecommunications and material processing, are but a few of the areas which will be advanced by the inherent requirements of a ballistic missile defense system. Even if such a system is never deployed, the benefits of coordinated, coherent research in these areas will spin off into numerous civilian applications.

But from these primary benefits we can also discern a wide range of secondary benefits, resulting from activities needed to implement the results of basic SDI research, may have even greater impact, over the long term, than the primary spinoffs. For example, almost every system architecture described to date requires a large, space-based segment. To emplace this segment will require an integrated space logistics system, including efficient, low cost, space transportation; orbital transfer vehicles; heavy lift vehicles; permanently manned construction and repair stations; and the ground facilities to control them. In addition, space-based weapons will require high density power sources several orders of magnitude beyond any yet deployed. Implementation of space-based defense, therefore, requires the development of a space infrastructure, which is also essential for the large scale industrial development of space. While it is possible that this infrastructure will be developed independent of SDI, there can be little doubt that the connection to strategic defense will accelerate and ensure its development by providing a national (or international) security rationale. With a space infrastructure in place, we will begin to reap the teriary benefits of SDI through the industrialization of space. The markets for space are huge, untapped treasures waiting to be mined. There are alloys, composites and crystals which can only be manufactured in microgravity. There are pharmaceuticals which can be produced in purities and quantities required only in space. There is free and abundant energy for industrial processes, free and available vacuum and radiation. There are literally thousands of applications which we have not even imagined. The economic potential of this market is practically unlimited. Studies have shown that revenues for satellite communications alone will be in the range of fifty to one hundred billion anually, with growth rates of twenty to forty percent. It is estimated that by the year 2000, space industrialization will create between two and three billion new jobs in the United States alone, even at the unambitious pace now being pursued. The Aerospace Industries Association estimates that every million dollars spent on space activities creates one hundred direct new jobs, which does not include the service industries which will evolve to support rapidly expanding space industries.

In the short term, however, I believe that the primary benefits of SDI basic research justify European participation in the program. Failure to participate will concede a monopoly to American firms on any technologies emerging from SDI, which can only harm our competitive position. Fortunately, the United States is actively soliciting our participation in the venture, obviously for political reasons. But their motivation should not deter us from taking advantage of a situation which will benefit the economics of all who participate.

Unfortunately, there are several impediments to successful European participations, some of which are the fault of the Americans, but others which can be laid at our own door.

European industry has been sceptical of the Strategic Defense Initiative as a means of acquiring new technology. Some do not see the benefits as being as important and far-reaching as I have described. All that can be said is that every day brings forth evidence that, if anything, the description I have given you is not visionary enough.

More European industrialists are sceptical of the willingness or ability of America to have a meaningful European segment to SDI. I believe this is due in part to a misappreciation of the size and nature of the present program. Numbers are being tossed about, such as twenty, fifty, or one hundred billion dollars, as the ultimate budget of SDI. In fact, at this point, the SDI is working on a very slender budget. General Abrahamson's request this year was for 3.7 billion dollars; he received 2.9. Budgets for the next few years will run between six and ten billion dollars. If the contracts being offered are not for very large amounts, blame the total program budget, not American unwillingness to offer money to Europeans.

You will also note that of the money authorized for the program, the majority of the funding has gone to a relative handful of large American firms. A European might well ask what is left for him? How can he compete against a large, incumbent contractor? This is again a misperception of the program. The large contractors awarded to date have gone to companies involved in the development of large-scale demonstration hardware, the laser test beds, particle beams, or interceptors. These programs predate SDI by as much as a decade, having originated with the individual American services, and were brought under the SDI umbrella in 1983. As the programs nearest to fruition, it is natural that funding be allocated to them as a top priority. But as the overall funding level of the program expands, and new areas of investigation begin to mature, there will be many opportunities for European involvement. There will be areas in support and ancillary functions which do not receive the attention of major American companies, which provide us with opportunities to acquire new technology without direct competition with America's aerospace giants. As SDI matures, additional problems, not previously forseen, will require solutions. In that arena we will start on the same footing as the Americans; if we have competitive ideas, we will win a share of the budget.

But in this regard, I will remind you that the direct funding we receive from SDI will never be a large enough amount (barring actual deployment of a ballistic missile defense) to justify a major commitment of resources on our part. It is the acquisition of the technology and our ability to spin off marketable applications that is our major benefit.

Aside from the level of scepticism in European business, there are several other significant impediments to overcome. At the highest level, there is the irreducible fact that SDI is a military program with a political and strategic dimension. The factor of national interest makes the normal customer-contractor relationship inadequate for this program. Since each nation in the Alliance has a different perception of its security needs and the effects of SDI upon them, there will be widely divergent positions on the issue; a consistent policy is unlikely.

The strategic dimension also introduces the problems of security and technology transfer. We are all aware of the efforts of the Soviet Union in the realm of technical and scientific espionage, and of the efforts of the United States to halt what it perceives as a hemorrage of technological secrets to the Eastern Bloc. We are also aware that American actions in this direction have in the past caused friction within the Alliance. Since the areas investigated by SDI will have critical military applications, it is obvious that the United States will attempt to control their dissemination. However, if technology transfer controls are too strict, the effect may be discouragement of the European participation the United States ostensibly wishes to foster. Many European firms probably will defer any decision on participation until definitive technology transfer guidelines have been negotiated between the respective governments.

At a lower level of policy-making, Europeans face a number of bureaucratic hurdles to meaningful participation. At the root of our problems is our lack of experience in programs of this nature. We do not know the ground rules, nor do we have the personal contacts of American high technology firms. Therefore, we are disadvantaged simply trying to get in the door. Compounding our difficulties is the well known predilictions of the U.S. Department of Defense against the procurement of non-American material. There is a two way street, but the traffic is much heavier from west to east than vice versa. The American Congress must share the blame for this, through the enactment of "Buy American" legislation, which effectively bars our participation in research and development programs. Significant European participation in SDI may also have an adverse effect on American public opinion, if it is perceived as depriving American companies of work.

In addition, European industry will be entering the SDI market several years behind American companies. We will need special assistance to assimilate the progress which has been made to date, and to identify market areas in which we can make significant contributions. How, then, can European participation in SDI be implemented successfully? There are four basic approaches which may be taken.

First, efforts may be made in a decentralized manner through the private sector. Individual firms may bid on SDI research projects without any coordination with other companies or their own governments. Companies would enter the program with small contracts and grow from within. This approach offers speed and flexibility, but an individual firm lacks major bargaining leverage when facing opposition from American companies and the previously noted bureaucratic impediments. In addition, companies may be reluctant to commit their resources in the absence of a public commitment to SDI, especially when one considers the skepticism with which the entire program is viewed.

A second approach would involve coordinated action by several firms, without any formal governmental backing. A consortium would bid competitively for contracts, using their combined resources to gain bargaining

power. However, coordination within a consortium is relatively poor, leading to longer response times and higher costs. The track record of large corsortium programs is not good—witness the Concorde, Jaguar, Alpha Jet and other aerospace programs. In addition, as a purely private venture, the consortium would still lack the governmental support needed to coordinate between national authorities and to mitigate some of the risks involved.

The third approach involves formal bilateral agreements between the United States and individual European governments. Under the terms of such an agreement, areas of cooperation would be established, and the European government involved would distribute contracts among its industrial firms. An arrangement of this nature is not practical at this moment due to the limitations of the American procurement system. The American system is based on competition for all but a few categories of procurement, and it is not at all clear if existing laws and regulations would permit relegation of a sizeable portion of the SDI budget to European governments for distribution to their industries. In addition, there is need for close, direct contact between the contractor and the sponsoring agency, which will inevitably lead to the creation of a dual level bureaucracy, with intergovernmental coordination layered above the technical interface, causing unnecessary duplication of administration, delays, and increased costs.

The fourth option is a multilateral intergovernmental arrangement based either within the NATO Alliance or the EEC. The agreement would apportion the work to be done by each nation; the national governments would then distribute contracts to individual firms. This is the least plausible alternative. Aside from its unnecessary complexity, it is probably impossible to arrive at such an agreement due to the differing political and strategic positions among the allies.

Each of the four options individually has some major disadvantage. It appears, though, that a combination of the first and third options offers the best available compromise. Initially, European companies should attempt to penetrate the SDI market on their own, using relatively small projects to build confidence and a base of experience. At some later point, direct bilateral agreements must be worked out by the respective governments to coordinate higher policy issues and provide bargaining leverage for industry. This approach offers flexibility to take advantage of the fluid state of SDI research, and would, at a later stage, provide some of the bargaining leverage and security which a European firm would need prior to committing major resource to SDI.

It will be difficult to implement such an arrangement. The problems are twofold, involving both European and American governments. From the perspective of a European government, the initial contract amounts are very small, rarely more than a few million dollars. It will be difficult to convince a government to commit its political capital for what appears to be a program of minor economic consequence. In response, it must be noted again that the dollar amounts awarded for SDI contracts will increase over time, but more importantly, that the direct cash outlays for SDI are not the major rationale or benefit of European participation. Rather, by exposure to new technologies and directed research, European industry will be able to spin off applications which will be many times greater than the profit from direct SDI payments.

There are several problems from the American side, related to the unique manner in which the United States manages military procurement. If we are going to commit ourselves to SDI, we must have assurance that contracts will actually be awarded for the projects on which we bid. Unlike agreements between European governments, cooperative agreements with the United States carry no guarantees, no multiyear or fixed dollar procurements. In addition, American procurement regulations requiring competitive bidding on all but a few contracts places us at a disadvantage. The divided responsibility for foreign policy in the American system also hinders our cooperation. We have no assurance that agreements negotiated with the Executive branch will be ratified by the Legislature, or that Congress will not abrogate or repeal an existing agreement. We have participated in many programs in which the contractual rug have been pulled out from under us.

If the United States truly wishes our participation in SDI, then direct diplomatic negotiations are required to map our new procedures for administering international programs. This is an unprecedented undertaking, and existing laws and regulations do not meet their unique conditions. We need guarantees that we will be able to penetrate the SDI market on a large scale, either by blocking out funds reserved for European ventures, or by delegating particular areas of investigation to European firms. We require guarantees that contract awards will actually be made, and that the United States has a long-term commitment to SDI which justifies a major investment of resources on our part. American procurement laws must be amended for greater flexibility, or some form of waiver used to exempt European participants from elements of a system to which they are not adapted.

In return, we Europeans must become more entrepreneurial. We must have the vision, creativity and flexibility to exploit the new areas of technology which will be opened, if we are to reap real benefits from our participation. The space research and development activities being initiated in the United States today will revolutionize the technology products of the near future. It is vital that European industry not be left behind as the rest of the world moves into a new industrial revolution.

Europeans in government and industry must be less sceptical of American motivations and capabilities. For more than forty years the United States has been a steadfast ally and firm friend to Europe. During that same period we have seen American genius bring about industrial and technological changes which a half century ago seemed mere fantasy. The United States has once more set forth on a major technological undertaking. They ask for our cooperation and participation. I believe it is in our best interest to accept this truly generous offer. It is in our best interest to see that any cooperative program succeeds. It is the responsibility of all parties, European and American, to work in good faith to remove the roadblocks preventing quick and meaningful participation in the Strategic Defense Initiative.●

PRODUCT LIABILITY REFORM

● Mr. DANFORTH. Mr. President, on December 20, I made a statement for the record concerning a new staff working draft of product liability reform legislation. Unfortunately, this draft was mistakenly printed as a new bill, S. 1999.

I want to take this opportunity to emphasize that this text is still in the drafting stages and will be subject to further changes and much discussion among members of the Commerce Committee. While it is premature to endorse specific provisions of this draft, I am confident that hearings early in 1986 will lead to prompt committee consideration of legislation to address the serious need for product liability reform.

Also, on December 20, I asked that this staff working draft be printed in the RECORD to facilitate discussion of these latest proposals. Since this was not done, I renew my request that the new staff working draft of product liability reform legislation be printed in the RECORD immediately following these remarks.

The material follows:

[Staff Working Draft—No. 2]

S. —

A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

SHORT TITLE

SEC. 101. This Act may be cited as the "Product Liability Voluntary Claims and Uniform Standards Act".

DEFINITIONS

SEC. 102. As used in this Act, the term—

(1) "capital good" means any product, other than a motor vehicle, or a vessel, aircraft, or railroad used primarily to transport passengers for hire, or any component of any such product, if it is also of a character subject to allowance for depreciation under the Internal Revenue Code of 1954 and was—

(A) used in a trade or business;

(B) held for the production of income; or

(C) sold, leased, or donated to a governmental or private entity for the production of goods, for training, for demonstration, or other similar purposes;

(2) "claimant" means any person who submits an expedited product liability claim or brings a civil action subject to title II or III of this Act, and any person on whose behalf such a claim is submitted or such an action is brought; if such a claim is submitted or such an action is brought through or on behalf of an estate, the term includes the claimant's decedent, or if it is brought through or on behalf of a minor or incompetent, the term includes the claimant's parent or guardian;

(3) "clear and convincing evidence" is that measure or degree of proof that will produce in the mind of the trier of fact belief or conviction as to the truth of the allegations sought to be established; the level of proof required to satisfy such standard is more than that required under preponderance of the evidence, but less than that required for proof beyond a reasonable doubt;

(4) "commerce" means trade, traffic, commerce, or transportation (A) between a

place in a State and any place outside of that State; or (B) which affects trade, traffic, commerce, or transportation described in clause (A);

(5) "commercial loss" means economic injury, whether direct, incidental, or consequential, including property damage and damage to the product itself, incurred by persons regularly engaged in business activities consisting of providing goods or services for compensation;

(6) "exercise of reasonable care" means conduct of a person of ordinary prudence and intelligence using the attention, precaution and judgment that society expects of its members for the protection of their own interests and the interests of others;

(7) "exposure" means proximity permitting absorption, ingestion or inhalation of a substance through any body surface;

(8) "harm" means (A) personal physical illness, injury, or death of the claimant; (B) mental anguish or emotional harm of the claimant caused by or causing the claimant's personal physical illness or injury; and (C), for purposes only of title III of this Act, physical damage to property other than the product itself; the term does not include commercial loss;

(9) "manufacturer" means (A) any person who is engaged in a business to produce, create, make, or construct any product (or component part of a product) and who designs or formulates the product (or component part of the product) or has engaged another person to design or formulate the product (or component part of the product); (B) a product seller with respect to all aspects of a product (or component part of a product) which are created or affected when, before placing the product in the stream of commerce, the product seller produces, creates, makes, or constructs and designs or formulates, or has engaged another person to design or formulate, an aspect of a product (or component part of a product) made by another; or (C) any product seller not described in clause (B) which holds itself out as a manufacturer to the user of a product;

(10) "person" means any individual, corporation, company, association, firm, partnership, society, joint stock company, or any other entity (including any governmental entity);

(11) "preponderance of the evidence" is that measure or degree of proof which, by the weight, credit, and value of the aggregate evidence on either side, establishes that it is more probable than not that a fact occurred or did not occur;

(12) "product" means any object, substance, mixture, or raw material in a gaseous, liquid or solid state (A) which is capable of delivery itself or as an assembled whole, in a mixed or combined state or as a component part or ingredient, (B) which is produced for introduction into trade or commerce, (C) which has intrinsic economic value, and (D) which is intended for sale or lease to persons for commercial or personal use; for the purposes of this Act, the term does not include (i) industrial waste, atmospheric pollutants, and water contaminants, (ii) human tissue, blood and blood products, or organs, or (iii) tobacco or alcoholic beverages sold for human consumption; and for the purposes of title II of this Act, any product purchased by the United States Government which is manufactured to United States Government design specifications for use in an aerospace or defense application.

(13) "product seller" means a person who, in the course of a business conducted for that purpose, sells, distributes, leases, prepares, blends, packages, labels, or otherwise is involved in placing a product in the stream of commerce, or who installs, repairs or maintains the harm-causing aspect of a product; the term does not include—

(A) a seller or lessor of real property;

(B) a provider of professional services in any case in which the sale or use of a product is incidental to the transaction and the essence of the transaction is the furnishing of judgment, skill, or services; or

(C) any person who—

(i) acts in only a financial capacity with respect to the sale of a product; and

(ii) leases a product under a lease arrangement in which the selection, possession, maintenance, and operation of the product are controlled by a person other than the lessor;

(14) "relevant point in time" means, for the purposes of title III of this Act, the earlier of the time of manufacture of a product or certification of an aircraft or its parts or accessories by the Federal Aviation Administration;

(15) "Secretary" means the Secretary of Commerce;

(16) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States, or any political subdivision thereof;

(17) "toxic agent" means an object, substance, mixture, raw material, or physical agent producing or capable of producing toxic harm in humans; the term does not include genetic or other physiological predisposition to toxic harm or environmental background factors to which general population is exposed;

(18) "toxic harm" means harm which is functional impairment, illness, or death of a human being resulting from exposure to an object, substance, mixture, raw material or physical agent of particular chemical composition.

PREEMPTION

SEC. 103. (a) This Act governs any civil action brought against a manufacturer or product seller, or any theory, for personal injury or property damage caused by a product. A civil action brought against a manufacturer or product seller for loss or damage to a product itself or for commercial loss is not subject to this Act and shall be governed by applicable commercial or contract law.

(b) No civil action may be brought in any Federal or State court against a manufacturer or product seller for personal injury or property damage caused by a product other then an action for recovery for harm brought pursuant to this Act.

(c) This Act supersedes any State law regarding recovery for any injury or damage caused by a product only to the extent that this Act establishes a rule of law applicable to any such recovery. Any issue arising under this Act that is not governed by any such rule of law shall be governed by applicable State or Federal law.

(d) Nothing in this act shall be construed to—

(1) waive or affect any defense of sovereign immunity asserted by any State under any provision of law;

(2) supersede any Federal law, except the federal Employees Compensation Act;

(3) waive or affect any defense of sovereign immunity asserted by the United States;

(4) affect the applicability of any provision of the foreign Sovereign Immunities Act of 1976 (28 U.S.C. 1602 et seq.);

(5) preempt State choice-of-law rules with respect to claims brought by a foreign nation or a citizen of a foreign nation;

(6) affect the right of any court to transfer venue or to apply the law of a foreign nation or to dismiss a claim of a foreign nation or of a citizen of a foreign nation on the ground of inconvenient forum; or

(7) supersede any statutory or common law, including an action to abate a nuisance, that authorizes a State or person to institute an acton for civil damages or civil penalties, clean up costs, injunctions, restitution, cost recovery, punitive damages, or any other form of relief resulting from contamination or pollution of the environment, or the threat of such contamination or pollution.

(e) As used in this section, "environment" has the meaning given to such term in section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601(14)).

(f) This Act shall be construed and applied after consideration of its legislative history to promote uniformity of law in the various jurisdictions.

RECORD RETENTION

SEC. 104. (a) A manufacturer of a product for which recovery may be sought under title II or subject to title III of this Act shall retain for a period of twenty-five years one copy of all studies or reports within the manufacturer's possession, custody, or control, which assess the risks or hazards posed by the design or formulation of the product. A manufacturer of such a product also shall retain for a period of twenty-five years a record of each reported incident of death, injury, or illness resulting or alleged to have resulted from the use of the product.

(b) Any claimant and any person who is a party to a civil action governed by this Act or who has notice that he or she may be made a party to such an action shall retain all material, documents and other data (including, in the case of the claimant, the product alleged to have caused the claimant's harm) within that person's possession, custody or control that are relevant or may lead to the discovery of evidence relevant to the claim or action.

(c) In any action governed by this Act, if the court determines that a party has willfully disposed of, destroyed, concealed, altered or removed any material, document or data in violation of subsection (a) or (b) of this section, there shall be a rebuttable presumption that the facts to which the material, document or data relate are established in a manner adverse to the position of the party who has committed the violation. The court shall assess a civil penalty against such party in an appropriate amount not less than $1,000 and order such party to pay the other party's costs, including reasonable attorney's fees, incurred in proving the violation.

(d) In any action governed by this Act, if the court determines that a party has nonwillfully violated subsection (a) or (b) of this section, and that no other means are available to establish the facts to which the unavailable material, document or data relate, the court may, in the interest of justice, establish a rebuttable presumption that the facts to which the material, docu-

ment or data relate are, for the purposes of such action, established in a manner adverse to the party who has committed the violation.

ATTORNEY DISCLOSURE

SEC. 105. (a) As used in this section, the term—

(1) "attorney" means any natural person, professional law association, corporation, or partnership authorized under applicable State law to practice law; and

(2) "client" means any person who consults or seeks to retain an attorney in connection with a claim or civil action brought under or subject to this Act.

(b) An attorney who is contacted by a client inquiring about rights of recovery for harm caused by a product or seeking to engage the attorney's services in connection with a claim or civil action brought under or subject to this Act shall provide the client with—

(1) an explanation of the options specified in titles II and III of this Act for recovery for harm caused by a product, including—

(A) the elements of proof and potential recovery under such options;

(B) the time periods specified in this Act for payment if the client submits an expedited claim under title II of this Act;

(C) the length of time that is likely to be required for the client's recovery in a civil action under title II or title III of this Act; and

(D) an estimate of the likelihood of the client's recovery pursuant to such options; and

(2) an estimate of the attorney's time, fees, and expenses, and all other potential costs, expenses, and penalties payable or to be paid by the client seeking recovery under title II or pursuant to title III of this Act.

(c) If an attorney fails to disclose to a client the information required by this section, the client may bring a civil action for damages in the court in which an action under title III of this Act was or could have been brought. An attorney who fails to make the disclosure required by this section shall be liable for any loss caused the client by such failure and for exemplary damages in the amount of the client's net economic loss, as defined in section 202 of this Act. The provisions of this section shall be in addition to and not in lieu of any other available remedies or penalties.

SERVICE OF PROCESS

SEC. 106. The summons and complaint in any action brought under or subject to this Act shall be served as provided by the applicable law or rules of the court where such action is brought, except that the delivery of the summons and complaint upon the defendant or the defendant's agent as required by applicable State or Federal rules may be made by certified mail, return receipt requested, whether within or beyond the territorial limits of the State in which the action is brought.

ADMISSIBILITY OF CERTAIN EVIDENCE

SEC. 107. Evidence that a manufacturer or product seller has admitted liability, expressly or impliedly, or has made payment to a claimant for harm caused by a product under title II of this Act shall not be admissible in any other action brought under or subject to this Act or otherwise by another claimant.

EXPERT OPINION

SEC. 108. For the purposes of this Act, expert scientific or medical opinion is not sufficient evidence to establish any fact unless such opinion has support in peer-reviewed scientific or medical studies.

SUBSEQUENT REMEDIAL MEASURES

SEC. 109. In an action governed by this Act, evidence of any measure taken by a manufacturer or product seller after the occurrence of a claimant's harm which, if taken previously, would have made the harm less likely to occur is not admissible to prove liability. Such evidence may be admitted when offered for another purpose, such as proving ownership, control, or feasibility of precautionary measures, if controverted, or impeachment.

PRODUCT LIABILITY REGISTRY

SEC. 110. (a) Any manufacturer who is not incorporated or registered to do business under the law of a State shall appoint an agent for service of process in the United States upon whom service of process may be made pursuant to section 106 of this title and claims presented pursuant to section 201 of title II of this Act. Any such manufacturer shall transmit notice of the appointment of such an agent and of the agent's address to the Secretary, in accordance with regulations promulgated by the Secretary.

(b) The Secretary shall maintain a registry of agents appointed pursuant to subsection (a) of this section, and shall furnish the name and address of any agent to any person requesting such name and address for the purpose of making service of process or submitting a claim under this Act.

(c) Not later than twelve months after date of enactment of this Act, the Secretary shall promulgate regulations establishing financial-responsibility requirements for manufacturers who are required by subsection (a) of this section to appoint an agent for service of process. Financial responsibility may be established in accordance with such regulations by insurance, guaranty, surety bond, or letter of credit, or any combination thereof.

(d) Any manufacturer who fails to comply with a provision of this section or a regulation issued under this section shall be liable to the United States for a civil penalty in an amount not to exceed $5,000 for each day of such non-compliance. Such civil penalty shall be assessed by the Secretary by the issuance of an order made on the record after opportunity for a hearing in accordance with section 554 of title 5, United States Code. The amount of such penalty when finally determined may be deducted from any sums owed by the United States to the person charged. Any person who requested a hearing respecting the assessment of a civil penalty and who is aggrieved by an order assessing a civil penalty may file a petition for judicial review of such order with the United States Court of Appeals for the District of Columbia Circuit within the 30-day period beginning on the date the order making such assessment was issued. If any person fails to pay such an assessment the order to pay such penalty becomes a final order or, where a petition for judicial review has been filed, after the court has entered final judgment in favor of the Secretary, the Attorney General shall recover the amount assessed, plus interest at currently prevailing rates, in an action brought in an appropriate district court of the Unites States. In such an action, the validity, amount and appropriateness of the penalty shall not be subject to review.

PRODUCT LIABILITY REVIEW PANEL

SEC. 111. (a) In order to carry out the purposes of this section, there shall be established a Product Liability Review Panel (hereinafter referred to as the "Review Panel"). The Review Panel shall be composed of three members selected by the Judicial Conference of the United States on the basis of their expertise regarding civil actions and recovery for personal injury or property damage caused by products, and four members selected by the National Academy of Sciences on the basis of their expertise regarding economic, medical, and scientific aspects of the subject matter of the study. A chairman and a reporter shall be elected from among the seven members of the Review Panel.

(b) The Review Panel shall conduct a study to assess the expedited procedures and remedies provided by title II of this Act. As part of such study, the Review Panel shall evaluate—

(1) the adequacy of such procedures and remedies in providing fair compensation in a prompt and cost-effective manner for harm caused by products, including toxic harm caused by exposure to products, and harm, whether toxic or non-toxic, caused by drugs and medical devices used in human health care, as well as by other products;

(2) the scope of the evidentiary burdens placed on claimants under title II of this Act in proving the causes of harm, including toxic harm, particularly in light of scientific uncertainty regarding causation of certain human health effects;

(3) the availability and cost of product liability insurance for claims under title II of this Act;

(4) the costs imposed on claimants, manufacturers, and the judicial system by the procedures and remedies provided by title II of this Act; and

(5) the success of the procedures and remedies set forth in titles II and III of this Act in providing both incentives for product safety and adequate compensation for persons harmed by defective products.

(c) The Review Panel shall conduct such hearings, conferences or public forums as are necessary to assure adequate public participation in its proceedings.

(d) Within thirty-six months after the date of enactment of this Act, the Review Panel shall submit to the Congress a report containing the results of the study required by this section, with appropriate recommendations. Such recommendations shall address specifically the need to amend or supplement the provisions of this Act.

(e) A member of the Review Panel who is not an officer or employee of the Federal Government shall be entitled to receive compensation at a rate not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule pursuant to section 5332 of title 5, United States Code, for each day (including traveltime) during which the member is engaged in the actual performance of the duties of the Review Panel.

(f) There are authorized to be appropriated for the purpose of this section such sums as may be necessary. Such sums shall remain available until expended.

EFFECTIVE DATE

SEC. 112. (a) This Act shall be effective on the date of its enactment and shall apply to all expedited claims submitted pursuant to title II of this Act on or after that date and all civil actions subject to title III of this Act commenced on or after that date, including any claim or action in which the harm or the conduct which caused the harm occurred before the effective date.

(b) If any provision of this Act would shorten the period during which a manufacturer or product seller would otherwise be exposed to liability, the claimant may, notwithstanding the otherwise applicable time period, submit an expedited claim to such a manufacturer or bring any civil action governed by this Act within one year after the effective date of this Act.

TITLE II

EXPEDITED PRODUCT LIABILITY CLAIMS PROCEDURE

SEC. 201. (a) A person who has suffered harm caused by a product, other than an employee of the product's manufacturer who suffers such harm in the course of his employment, may submit an expedited claim under this title to the nanufacturer, except that no claim for harm occurring outside of the United States may be brought under this title by a person who is not a citizen of the United States.

(b) A person who submits such a claim under this title for harm caused by a product may not seek recovery for damages arising from the same harm in a civil action governed by title III of this Act, if the manufacturer—

(1) makes payment of net economic loss to the claimant, pursuant to section 206(b) or 209(a) of this title;

(2) declines to make full payment solely because of a dispute over the amount of net economic loss, pursuant to section 206(d) or 209(b) of this title; or

(3) declines liability for the claimant's harm or fails to respond as required by section 206(a) of this title, and the claimant seeks recovery for the harm pursuant to section 208 of this title.

(c) No person may submit an expedited claim to a manufacturer under this title if there is pending against the manufacturer a civil action brought by such person under any theory, under any law, to recover damages for the same harm.

(d) In the absence of a prior written agreement to the contrary, a manufacturer who makes payment under this title for damages caused by a product or who is found not liable for such harm under section 208 of this title may not be made a defendant in any action brought by any other party for contribution, reimbursement, or indemnity for damages arising from the same harm.

(e) Payment of an expedited claim for harm under this title or a finding of nonliability under this title shall not bar an action governed by title III of this Act for associated harm which is physical damage to property other than the product itself.

MANUFACTURER'S LIABILITY FOR NET ECONOMIC LOSS

SEC. 202. (a)(1) As used in this title, the term "net economic loss" means—

(A) reasonable expenses incurred for reasonably needed and used medical and rehabilitation care and services;

(B) lost income from work which the claimant would have performed if the claimant had not suffered harm, reduced by any income earned from substitute work actually performed by the claimant or by income the claimant would have earned in available appropriate work which the claimant was capable of performing but unreasonably failed to undertake;

(C) reasonable expenses incurred in obtaining ordinary and necessary services in lieu of those the claimant would have performed, not for income, but for the benefit of the claimant or the claimant's immediate family, if the claimant had not suffered the harm;

(D) lost earnings of a deceased person who suffered fatal harm caused by a product which, if the person had not died, would have been contributed to claimants who are entitled to received benefits by reason of such person's death under the law of the place where the deceased person was domiciled; and

(E) reasonable expenses incurred by the claimant in preparation and submission of a voluntary expedited claim prior to the date on which notice is given by the manufacturer pursuant to section 206(b), 206(d), or 209 of this title, including a reasonable attorney's fee,

less the total amount of compensation for economic loss paid or payable to the claimant by reason of the same harm from any other source, including any such compensation paid or payable under any government program (including workers' compensation) or employee benefit plan, or pursuant to any private insurance policy or program or any prepaid medical benefit plan.

(2) The lost income taken into account under paragraph (1)(B) of this subsection shall be reduced by the amount of all Federal, State, and local income taxes and any Social Security or other payroll taxes which would be applicable to such income, but which would not be applicable to compensation paid under this title.

(b) A manufacturer's liability under this title for harm caused by a product is limited to the claimant's net economic loss resulting from such harm.

(c) Where harm occurs in circumstances that might entitle a claimant to benefits (including workers' compensation benefits) which would reduce the amount of the claimant's net economic loss in accordance with subsection (a)(1) of this section and it cannot reasonably, within the time provided for payment of net economic loss under section 206(a) of this title or any reasonable extension of such time, be determined whether or in what amount such benefits will be payable, the manufacturer shall place in an interest-bearing escrow account that portion of the economic loss which the manufacturer reasonably anticipates the claimant will receive from such other sources, until the claimant's right to such benefits and the amount of such benefits finally has been determined under applicable law.

(d) The total amount of compensation for economic loss paid or payable to a claimant from any other source shall, for purposes of subsection (a) of this section, be reduced by the amount of legal fees and other costs incurred by the claimant in collecting such compensation.

(e) Attorney's fees may be on a contingent basis but, for the purposes of subsection (a) of this section, shall be calculated on the basis of an hourly rate which should not exceed that which is considered acceptable in the community in which the attorney practices, considering the attorney's qualifications and experience and the complexity of the case.

(f) Except as otherwise provided by any provision of Federal law, no program of compensation, whether public or private, the benefits of which would be deducted from claimant's economic loss in order to calculate net economic loss under this section, may make payment of benefits secondary to payment of net economic loss by a manufacturer under this title.

SUBMISSION OF AN EXPEDITED CLAIM

SEC. 203. (a) Within ten days of receipt of notice of injury alleged to have been caused by a product, a manufacturer shall provide persons seeking to recover for harm caused by a product with a clear and comprehensive written explanation of their rights under this Act, including their right or representation by counsel, and with any forms required for filing an expedited claim. Within one hundred twenty days of the effective date of this Act, the Secretary shall make available a model explanation of such rights and model forms. A manufacturer who provides a claimant with copies of such explanation and forms shall be deemed to have satisfied the requirements of this subsection.

(b) A person seeking to recover under this title from a manufacturer for harm caused by a product shall submit an expedited claim by certified mail, return receipt requested, to the manufacturer.

(c) In order to be deemed a complete claim for purposes of section 206 of this title, a claim submitted to the manufacturer pursuant to subsection (b) of this section must be accompanied by—

(1) except as provided in subsection (d) of this section, reasonable proof that the manufacturer made the individual product unit that caused the harm;

(2) full information regarding the date, place, and time of the harm's occurrence, the cause, nature and extent of the harm, and the nature and the amount of economic loss caused by the harm;

(3) copies of all bills for which payment is sought, including medical bills;

(4) copies of all medical reports or records within the possession of the claimant relating to the harm for which recovery is sought;

(5) a statement of lost income for which recovery is sought;

(6) the name and address of any other source of compensation paid or payable to the claimant for such economic loss, and the amount of any such compensation; and

(7) an affirmation or declaration, under penalties of perjury, that, to the best of the claimant's knowledge, the information provided with the claim is accurate.

(d) Any person seeking to recover under this title for toxic harm of a kind which manifests itself only many years after exposure may, where it is not possible for such person, despite every reasonable effort, to identify the manufacturer of the individual product unit that caused the harm, submit a product liability claim in accordance with the provisions of this section to any manufacturer of a product that is identical and chemically indistinguishable from the product which caused the harm if that manufacturer's product was available at the time when, and in the market in which, the product that caused the harm was purchased. In addition to the information required by subsection (c) of this section, the claimant shall provide the manufacturer with an adequate explanation of its inability to identify the manufacturer of the individual product unit which caused the toxic harm.

(e) An expedited claim under this section must be submitted within two years of the time the claimant discovered or in the exercise of reasonable care should have discovered the harm and its cause, except that a claim of a person under legal disability may be submitted within two years after the disability ceases.

DUTY TO DISCLOSE INFORMATION

SEC. 204. (a) A claimant shall, as a condition to recovery under this title—

(1) cooperate fully and expeditiously with the manufacturer in its reasonable investigation of the circumstances of the harm and of the net economic loss claimed as a result of such harm; and

(2) promptly update during the course of the manufacturer's investigation all medical information and information relevant to the calculation of net economic loss previously furnished pursuant to section 203(c) of this title.

(b) In addition to the information to be furnished pursuant to section 203(c) of this title, the claimant shall, upon request, deliver to the manufacturer a copy of every written report made before or after the date of request, which is available to the claimant and is not otherwise available to the person making the request, concerning any relevant medical treatment or examination of the claimant. In addition, the claimant shall, upon request, deliver to the manufacturer the names and addresses of all physicians, hospitals and other persons examining, diagnosing, treating, or providing services to the claimant in connection with the harm or any other relevant past injury. The claimant shall authorize the person making such request to inspect all relevant records made by such persons.

(c) Any person (other than the claimant) providing information pursuant to this section shall be entitled to reimbursement from the requesting party for costs reasonably incurred in providing such information.

LIABILITY FOR HARM

SEC. 205. (a) Where an expedited claim has been submitted to a manufacturer in accordance with section 203 of this title, the manufacturer is liable to the claimant, to the extent provided in section 202 of this title, if—

(1) the product, when it left the control of the manufacturer, was unreasonably dangerous; and

(2) the unreasonably dangerous aspect of the product was a proximate cause of the claimant's harm while the product was being used in a manner and for a purpose intended by the manufacturer or which could be reasonably anticipated by the manufacturer,

unless the claimant acted in some material respect in a manner which was a gross failure to exercise reasonable care.

(b) A product is unreasonably dangerous for purposes of this section unless the manufacturer of the product establishes by a preponderance of the evidence that—

(1) the product's utility so outweighs the risk of the harm caused the claimant that a person knowing of such risk would, nonetheless, in the exercise of reasonable care, be justified in placing a product so constructed, designed, or formulated in the stream of commerce; and

(2)(A) the risk of the harm caused the claimant would either have been apparent to a reasonably observant person or would have been a matter of common knowledge to persons in the claimant's situation; or

(B) if the risk of the harm caused the claimant would not have been apparent to a resonably observant person or would not have been a matter of common knowledge to persons in the claimant's situation, that (i) if the risk in question was avoidable, the manufacturer provided a warning or instruction adequate to enable a person exercising reasonable care to avoid the risk, or (ii) if the risk in question was unavoidable, the manufacturer provided information adequate to permit a person exercising reasonable care to make an informed decision whether to assume the risk.

(c)(1) A product which is a drug or a device which may only be or is, in fact, only administered, applied, used or dispensed by a practitioner licensed by law to administrates, apply, use or dispense such drugs or devices is not unreasonably dangerous for purposes of this section, if the manufacturer has taken reasonable steps to provide such practitioner with warnings and instructions with respect to the harm in question which are in compliance with the requirements of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.)

(2) For the purposes of this subsection, the term—

(A) "device" has the meaning given to such term in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)); and

(B) "drug" has the meaning given to such term in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1)).

(3) A determination by the Food and Drug Administration that a warning or instruction complies with the requirements of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) is conclusive evidence of such compliance.

(d)(1) If a claimant has suffered toxic harm of a kind which manifests itself only many years after exposure, a product shall be presumed conclusively for purposes of subsection (a) of this section to have been a proximate cause of the claimant's toxic harm, if—

(A) the claimant was exposed to the product at a relevant time; and

(B) in the best available scientific opinion, the claimant's exposure to a product of such chemical composition, in the circumstances, would significantly increase the risk of incurring the toxic harm suffered by the claimant, unless another toxic agent is more likely than the product at issue to have independently produced claimant's toxic harm.

(2) An increase in the risk of incurring a particular toxic harm as a result of a particular exposure would be significant for the purposes of this subsection if the incidence of such harm in an exposed population were to exceed the incidence in nonexposed populations by 30 percent or more.

(e) A determination of the National Toxic Health Effects Panel established by section 213 of this title that, in the best available scientific opinion, exposure to a product of a certain chemical composition would or would not in particular circumstances significantly increase the risk of incurring a particular toxic harm shall be conclusive evidence of that fact for purposes of subsection (d) of this section, in the absence of fraud or similar misconduct on the part of such Panel or one or more of its members. In the absence of such a relevant determination of such Panel, the claimant must establish by a preponderance of the evidence that, in the best available scientific opinion, exposure to a product of a certain chemical composition, in the circumstances of the claimant's case, significantly increased the claimant's risk of incurring the toxic harm suffered by the claimant.

PAYMENT OR REJECTION OF AN EXPEDITED CLAIM

SEC. 206. (a) Within ninety days of receipt of a complete expedited claim submitted under section 203 of this title (unless a longer period is agreed to by the claimant), a manufacturer shall determine whether it is liable for the harm complained of by the claimant and give notice to the claimant as provided in this section.

(b) If a manufacturer decides not to contest liability for such harm, it shall so notify the claimant and either (1) make payment to the claimant for such net economic loss payable pursuant to section 202 of this title as has arisen to date from that harm, or (2) enter into an agreement with the claimant for other mutually acceptable disposition of the claim and any supplemental claims that might be filed under section 209 of this title.

(c) If the manufacturer determines that it is not liable for such harm, it shall give the claimant written notice of rejection of the claim and the reasons for such rejection, together with a written explanation of the claimant's rights under section 208 of this title. Within one hundred twenty days of the effective date of this Act, the Secretary shall make available a model explanation of such rights. A manufacturer who provides a claimant with copies of such explanation shall be deemed to have satisfied the requirements of this subsection.

(d) If a manufacturer decides not to contest liability for such harm but declines to make full payment of the claim because of a dispute over the amount of net economic loss, the manufacturer shall notify the claimant of such determination. The manufacturer shall pay the undisputed portion of the claim, if any, and provide the claimant with a written explanation of the claimant's rights under section 207 of this title. Within one hundred twenty days of the effective date of this Act, the Secretary shall make available a model explanation of such rights. A manufacturer who provides a claimant with copies of such explanation shall be deemed to have satisfied the requirements of this subsection.

RIGHTS UPON DENIAL OF FULL PAYMENT

SEC. 207. (a) If a manufacturer has advised a claimant that it declines to make full payment of an expedited claim submitted under this title solely because of a dispute over the amount of net economic loss, the claimant may, within ninety days of such notice, initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from a roster of arbitrators maintained by the Services for such purpose. The manufacturer shall submit to such arbitration and shall be bound by any final determination of such proceedings.

(b)(1) The Service shall adopt procedures and rules applicable to the selection of arbitrators and to the conduct of arbitration proceedings under this section. In order that such proceedings may be expeditious, informal, and reasonably inexpensive in cost, the Service's rules shall provide, among other provisions, that unless agreed otherwise by the parties—

(A) no prehearing discovery shall be permitted;

(B) any hearing shall be held in the community in which the claimant resides;

(C) the matter may, upon the request of the claimant, be submitted to the arbitrator for decision without written posthearing briefs;

(D) the arbitrator shall hear the case within 60 days after the date of the arbitrator's appointment and render a decision within 30 days after submission of the case for decision; and

(E) in a case in which a claimant is represented by counsel, the arbitrator may award the claimant only either the amount sought by the claimant at the start of the hearing or the amount last offered by the manufacturer at the start of the hearing.

(2) The findings and determinations of the arbitrator shall be in writing and shall be final and conclusive. Such findings and determinations shall be enforceable in any court of competent jurisdiction. No official or court of the United States shall have power or jurisdiction to review any such findings and determinations except where there is alleged fraud, misrepresentation, or similar misconduct by one of the parties to the arbitration or the arbitrator and where there is a verified complaint with supporting affidavits attesting to specific instances of fraud, misrepresentation, or other misconduct.

(c) If the arbitrator finds that the claimant was the substantially prevailing party, the arbitrator shall increase the amount of net economic loss payable to the claimant by reasonable attorney's fees and expenses incurred in connection with the arbitration proceeding.

(d) The manufacturer shall pay the fee and expenses of the arbitrator, except that if the arbitrator finds that the manufacturer was the substantially prevailing party, the manufacturer shall be entitled to recover from the claimant all such sums paid to the arbitrator.

(e) Arbitration under this section shall be a claimant's exclusive remedy where the manufacturer declines to make full payment of an expedited product liability claim because of a dispute over the amount of claimant's net economic loss.

RIGHTS UPON DENIAL OF LIABILITY

SEC. 208. (a) If a manufacturer gives notice to a claimant pursuant to section 206(c) of this title that it is not liable for the claimant's harm, or if a manufacturer fails to respond to a claim as required by section 206(a) of this title, the claimant may bring a civil action for an order enforcing the claimant's rights under this title. If notice of rejection has been provided to a claimant in accordance with section 206(c) of this title, the issues at trial shall be limited to those issues raised by the claimant and set forth in such notice. All issues shall be tried by the court without jury. Such an action must be brought within one year of the date of submission of the claim under section 203 of this title or within ninety days of the manufacturer's rejection of the claim, whichever is later.

(b) A claimant may bring an action under subsection (a) of this section—

(1) in an appropriate court of the State in which the harm occurred or in which the claimant resides, and such action shall be governed by the provisions of this Act; or

(2) in accordance with section 1332 of title 28, United States Code, in the district court of the United States for the district in which the claimant resides or in which the harm occurred, but the district courts of the United States shall not, by virtue of section 1331 or 1337 of title 28, United States Code, have jurisdiction over any civil action brought under this title.

(c) An action brought under subsection (a) of this section shall be expedited in every way and, if brought in a State court, may be removed by the plaintiff to the district court of the United States for the district and division embracing the place where such action is pending if such action is not called for trial within 180 days after the date of commencement of such action. Upon such removal, the parties shall be limited to 30 days for discovery, unless the parties agree otherwise.

(d) If, in an action brought under subsection (a) of this section, the claimant establishes by a preponderance of the evidence either that the manufacturer failed to respond to the claim in the manner and within the time required by section 206 of this title, or that the manufacturer is liable to the claimant under section 205 of this title, the court shall—

(1) enter an order enforcing the claimant's rights under this Act and directing arbitration pursuant to section 207 of this title of any dispute over the amount of net economic loss payable to the claimant; and

(2) award reasonable attorney's fees and expenses incurred in connection with the action and interest on the amount of the claimant's net economic loss (subject to the arbitrator's determination) equal to two percent per month for each month after the notice period specified in section 206(a) of this title that net economic loss remains unpaid.

(e)(1) If, in action brought under subsection (a) of this section, the court finds that there was not good cause for the manufacturer's—

(A) denial of liability to a claimant pursuant to section 206(c) of this title; or

(B) failure to respond to the claim in the manner and within the time required by section 206 of this title,

the court shall, without regard to whether it enters an enforcement order, award exemplary damages in an amount not to exceed twice the amount of the net economic loss sought by the claimant or $10,000, whichever is greater.

(2) If, in an action brought under subsection (a) of this section, the court finds that there was not good cause for the claimant to file such action, the court shall require the claimant to file such action, the court shall require the claimant or claimant's attorney to pay all of the manufacturer's costs of investigating and defending the claim.

(3) For the purposes of this subsection, the term "good cause" means that cause which, to a person of ordinary intelligence and care, and irrespective of any ordinary intelligence and care, and irrespective of any subsequent judicial determination with respect to the manufacturer's liability to a claimant, would be a reason sufficient to justify the manufacturer's denial of liability to a claimant or failure to respond to a claim, or the claimant's filing of a claim under this title.

(f) A person who willfully violates an enforcement order entered under this section or an order of an arbitrator entered under section 207 of this title shall upon conviction be subject to a fine of not more than $2000 for each day of such violation, or imprisonment not to exceed two years, or both.

(g) Any settlement of a claim to which the parties agree after an action has been brought under this section must be approved by the court, which may adjust the amount of settlement by the amount of any penalties which the court finds appropriate in accordance with subsections (d)(2), (e) and (f) of this section.

SUPPLEMENTAL EXPEDITED CLAIMS

SEC. 209. (a) If, after a manufacturer has acknowledged liability or has been determined to be liable on an expedited claim submitted under section 203 of this title, the claimant incurs additional net economic loss arising from the same harm, the claimant may, unless barred by the terms of a settlement agreement entered into pursuant to section 206(b) of this title, submit to that manufacturer supplemental expedited claims for net economic loss. Within seventy-five days after receipt of a supplemental expedited claim, the manufacturer shall determine whether, under the applicable standards of this title, it is obliged to make payment of the additional net economic loss described in the claim. If the manufacturer decides not to contest liability for such payment, it shall proceed in accordance with the provisions of section 206(b) of this title. If the manufacturer determines that it is not liable for such payment, it shall proceed in accordance with the provisions of section 206(c) of this title, and the claimant shall have such rights and remedies as are provided by section 208 of this title.

(b) If a manufacturer does not contest liability but declines to make full payment of a supplemental expedited claim submitted under this section, the manufacturer shall advise the claimant of the fact in writing. The claimant may, within ninety days of such notice, initiate arbitration under the procedures specified in section 207 of this title.

TIME LIMITATION ON LIABILITY

SEC. 210. Any civil action under section 208 of this title shall be barred, if a product which is a capital good is alleged to have caused harm which is not toxic harm, unless the expedited claim was submitted within twenty-five years of the date of delivery of the product to its first purchaser or lessee who was not engaged in the business of selling or leasing the product or using the product as a component in the manufacture of another product.

REIMBURSEMENT OF MANUFACTURER

SEC. 211. (a)(1) Subject to the provisions of this subsection, any manufacturer who has paid an expedited claim or supplemental claim for harm caused by a product under this title may, within two years of such payment, seek and obtain contribution, reimbursement, or indemnity on the basis of comparative responsibility from any other person (other than the claimant's employer or fellow employees) from whom the claimant might have had recovery for the harm, whether under this Act or otherwise. Recovery of damages under this section shall be in proportion to the percentage of such person's responsibility for the harm.

(2) If an action is brought under this section against another manufacturer (other than the claimant's employer) who would have been liable to the claimant under section 205 of this title, such action shall be governed by the standards of liability set forth in section 205 of this title.

(3) If an action is brought under this section against any other person (other than the claimant's employer or fellow employee) and such action is a product liability action, as defined in section 301 of this Act, such action shall be governed by the standards of liability set forth in sections 302 and 303 of this Act; however, in order to prevail against a product seller who is not a manufacturer, the manufacturer must establish by a preponderance of the evidence that the failure of such product seller to exercise reasonable care was a proximate cause of the harm complained of by the claimant and that such product seller's percentage of responsibility for the harm was greater than the manufacturer's percentage of responsibility for the harm.

(4) If an action is brought under this section against another person (other than the claimant's employer or fellow employee) whose failure to exercise reasonable care was a proximate cause of the harm complained of by the claimant and the action is not a product liability action, as defined in section 301 of this Act, such action shall be governed by applicable standards of liability under State or Federal law.

(b) With respect to an expedited claim for toxic harm paid pursuant to section 203(d) of this title, a manufacturer may recover on an equitable basis from any other manufacturer of a product that is identical to and indistinguishable in chemical composition from the product of the manufacturer who paid such claim, if the product of such other manufacturer was available at the time when, and in the market in which, the product that caused the claimant's toxic harm was purchased.

(c) A manufacturer may seek such contribution, reimbursement, or indemnity—

(1) where a claim was paid pursuant to section 203 of this title, either in the appropriate court of a State in which jurisdiction over the parties may be had or, if the requirements of section 1332 of title 28, United States Code, are satisfied, in an appropriate district court of the United States; or

(2) where payment was made as a result of a final judgment in a civil action under this title, in the court which had jurisdiction over such civil action.

(d) Neither the claimant's employer nor any insurer shall have any right of subrogation, contribution, or indemnity against the manufacturer or product seller or any lien on the claimant's recovery from the manufacturer or product seller, nor shall the manufacturer or product seller have any right of contribution or indemnity against the claimant's employer or fellow employee, except as provided in section 202 of this title.

COLLECTIVE PROCESSING OF CLAIMS

SEC. 212. Nothing in this title or in the antitrust laws of the United States or of any State shall preclude manufacturers or product sellers from establishing and maintaining collective means of and facilities for processing claims which are submitted under this title.

NATIONAL TOXIC HEALTH EFFECTS PANEL

SEC. 213. (a) The National Toxic Health Effects Panel (hereinafter referred to as the "Health Effects Panel") shall be composed of nine members who shall be career employees of the Public Health Service within the Department of Health and Human Services. Such members shall be appointed by the Secretary of Health and Human Services. The Secretary shall designate one of the members of the Panel to serve as Chairman. Each member shall be a person who, as a result of medical or other scientific training and experience, is exceptionally well qualified to analyze and assess the risks to human health associated with exposure to toxic substances. The members of the Health Effects Panel shall include at least one epidemiologist, one toxicologist, one industrial hygienist, and one physician.

(b)(1) Except as provided in paragraph (2) of this subsection, three of the members first appointed under this section shall be appointed for a term of two years, three for a term of four years and three for a term of six years, the term of each to be designated by the Secretary. Each of their successors shall be appointed for a term of six years from the date of expiration of the term for which his predecessor was appointed.

(2) Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall serve only for the remainder of such term. A member may continue to serve after the expiration of this term until his successor has taken office. A vacancy on the Health Effects Panel shall not impair the right of the remaining members to discharge their responsibilities under this section.

(c)(1) The Health Effects Panel shall—

(A) compile and evaluate relevant information and issue guidance, after opportunity for public comment, for use by claimants, manufacturers and the courts in processing claims for toxic harms under this title; and

(B) determine generically, on its motion or in response to a petition submitted to it under subsection (d) of this section, whether in the best available scientific opinion, taking into account epidemiological studies, histological data, experimental evidence, and other relevant scientific data, exposure to a product of particular chemical composition, in particular circumstances, would or would not significantly increase the risk of incurring a toxic harm.

Such determination shall be made by a division of three members of the Health Effects Panel, except that the Health Effects Panel may, by a vote of four of its members, order reconsideration of any determination by the entire Health Effects Panel.

(2) An increase in the risk of incurring a particular toxic harm as a result of a particular exposure would be significant for the purposes of this subsection if the incidence of such harm in an exposed population were to exceed the incidence in nonexposed populations by 30 percent or more.

(d)(1) Any claimant, prior to making a claim under this title, and any manufacturer, immediately upon the filing of a claim under this title, may petition the Health Effects Panel for a determination or for reconsideration of a previous determination. When a petition has been submitted by a potential claimant within two years of the time the claimant discovered or, in the exercise of reasonable care, should have discovered the harm and its cause, the period for filing a claim under section 203 of this title shall be extended by the period of the Health Effects Panel's proceeding. When a petition has been submitted by a manufacturer, the ninety-day period for payment or rejection of the claim specified in section 206(a) of this title shall commence with completion of the Health Effects Panel's proceeding, but not later than six months from the date of submission of a claimant's claim under section 203 of this title, unless otherwise agreed by the claimant.

(2) Any petition shall be accompanied by a disclosure, in such form as the Health Effects Panel specifies, of all relevant information known to the petitioner concerning the toxicity of the product in question.

(3) In any judicial proceeding or arbitration under this title, findings of the Health Effects Panel shall be conclusive and shall not be subject to collateral challenge, except for fraud or similar misconduct on the part of the Health Effects Panel or one or more of its members.

(e) The Secretary shall provide the Health Effects Panel with such administrative support services as may be necessary for carrying out its functions under this Act.

(f) Notwithstanding any other provision of law, agencies and departments of the Federal Government shall provide the Health Effects Panel with such information and data as the Health Effects Panel, through the Secretary, may request. The Health Effects Panel may also, through the Secretary, require the production by States, industry and other private sources of such information as it may require to carry out its responsibilities. In the case of contumacy, or failure or refusal of any person to obey such an order, any district court of the United States or the United States Court of any territory or possession within the jurisdiction of which such person is found, resides or does business, shall, upon application of the Secretary, have jurisdiction to issue to such person an order to produce such information. Any failure to obey such order of the court shall be punishable by such court as contempt thereof.

(g) There are authorized to be appropriated for the purposes of this section such sums as may be necessary. Such sums shall remain available until expended.

TITLE III

CIVIL ACTIONS

SEC. 301. A person seeking to recover for harm caused by a product may bring a civil action against the product's manufacturer or product seller pursuant to applicable State or Federal law, except to the extent such law is superseded by this title. By bringing such a civil action, a person waives all rights to recovery for the same harm under the expedited claim procedure of title II of this Act.

UNIFORM STANDARDS OF MANUFACTURER LIABILITY

SEC. 302. (a) In a civil action subject to the provisions of this title, a manufacturer is liable to a claimant only if the claimant establishes by a preponderance of the evidence that—

(1) an individual product unit manufactured by the manufacturer was a proximate cause of the harm complained of by the claimant; and

(2)(A) the manufacturer was negligent in constructing the product (as provided in subsection (b) of this section), in designing or formulating the product (as provided in subsection (c) of this section), or in providing warnings or instructions about a danger connected with the product or about the proper use of the product (as provided in subsections (d) and (e) of this section), or

(B) that the product did not conform to an express warranty made by the manufacturer with respect to the product (as provided in subsection (g) of this section).

(b) A manufacturer has been negligent in constructing a product if, when the product left the control of the manufacturer—

(1) it deviated in a material way from the design specifications or formula of the manufacturer or from otherwise identical units manufactured to the same specifications or formula; and

(2) the manufacturer does not establish by clear and convincing evidence that it exercised reasonable care in the product's construction.

(c) A manufacturer has been negligent in designing or formulating a product if, at the relevant point in time—

(1) the manufacturer knew or, in the exercise of reasonable care, should have known about the danger which caused the claimant's harm; and

(2) a manufacturer exercising reasonable care would not have used the design or formulation that the manufacturer used.

(d) A manufacturer has been negligent in providing warnings or instructions, if, at the time the product left the control of the manufacturer, the manufacturer—

(1) knew or, in the exercise of reasonable care, should have known about a danger connected with the product that caused the claimant's harm; and

(2) failed to provide the warnings or instructions that a person exercising reasonable care would have provided with respect to the danger which caused the harm alleged by the claimant, given the likelihood that the product would cause harm of the type alleged by the claimant and given the seriousness of the harm, unless those warnings or instructions, if provided, would not have materially affected the conduct of the product user.

(e) A manufacturer has been negligent in providing post-manufacture warnings or instruction if, after the product left the control of the manufacturer, the manufacturer—

(1) knew or, in the exercise of reasonable care, should have known about the danger which caused the claimant's harm; and

(2) failed to take reasonable steps to provide post-manufacture warnings or instructions which would have been provided by a person exercising reasonable care, given the likelihood that the product would cause harm of the type alleged by the claimant and given the seriousness of the harm.

(f) Where warnings or instructions are required under subsection (d) or (e) of this section, such warnings and instructions shall be given to the product user, unless—

(1) a person exercising reasonable care would have given such warnings or instructions to a third person, including an employer, who could be expected to take action to avoid the product user's harm or to assure that the risk of harm is explained to the product user; or

(2) the product is one which may be legally used only by or under the supervision of a using or supervising expert, in which case the manufacturer has exercised reasonable care if warnings or instructions are provided to such expert.

(g) A manufacturer is liable under this title because a product does not conform to an express warranty made by the manufacturer if—

(1) the warranty relates to the harm-causing aspect of the product;

(2) the product failed to conform to such warranty; and

(3) the failure of the product to conform to such warranty caused the claimant's harm.

(h) When the injury-causing aspect of the product was, at the time of the manufacture of the product, in compliance in all material respects with standards, conditions, or specifications established, adopted, or approved by the Congress or by an agency of the Federal Government responsible for the design, formulation, labeling or performance of the product, its manufacturer shall not be considered to have been negligent for purposes of this section unless the claimant establishes by a preponderance of the evidence that a person exercising reasonable care could and would have taken additional precautions. A determination by an agency of the Federal Government that a product is in compliance with its standards, conditions, or specifications is conclusive evidence of such compliance.

(i) It shall be a complete defense to any civil action subject to the provisions of this title that—

(1) the product at issue was acquired from the manufacturer or product seller by an agency of the Federal Government for an aerospace or defense application;

(2) the Federal Government established or approved reasonably precise contract specifications material to the claim; and

(3) the product conformed to such specifications in all respects material to the claim,

unless the claimant proves by a preponderence of the evidence that the Federal Government was not informed by the manufacturer or product seller of dangers material to the claim which were known to the manufacturer or product seller but not to the Federal Government. A determination by an agency of the Federal Government that a product conforms to its contract specifications is conclusive evidence of such conformance.

UNIFORM STANDARDS OF PRODUCT SELLER LIABILITY

SEC. 303. (a) Notwithstanding the provisions of section 301 of this title, in any civil action for injury or damage caused by a product, a product seller other than a manufacturer is liable to a claimant, only if the claimant establishes by a preponderance of the evidence that—

(1)(A) the individual product unit which allegedly caused the harm complained of was sold by the defendant, (B) the product seller failed to exercise reasonable care with respect to the product, and (C) such failure to exercise reasonable care was a proximate cause of the claimant's harm; or

(2)(A) the product seller made an express warranty, independent of any express warranty made by a manufacturer as to the same product, (B) the product failed to conform to the warranty, and (C) the failure of the product to conform to the warranty caused the claimant's harm.

(b)(1) In determining whether a product seller is subject to liability under subsection (a)(1) of this section, the trier of fact may consider the effect of the conduct of the seller with respect to the construction, inspection, or condition of the product, and any failure of the seller to pass on adequate warnings or instructions from the product's manufacturer about the dangers and proper use of the product.

(2) A product seller shall not be liable in a civil action subject to the provisions of this title based upon an alleged failure to provide warnings or instructions unless the claimant establishes that, when the product left the possession and control of the product seller, the product seller failed—

(A) to provide to the person to whom the product seller relinquished possession and control of the product any pamphlets, booklets, labels, inserts, or other written warnings or instructions received while the product was in the product seller's possession and control; or

(B) to make reasonable efforts to provide users with those warnings and instructions which it received after the product left its possession and control.

(3) A product seller shall not be liable in a civil action subject to the provisions of this title except for breach of express warranty where there was no reasonable opportunity to inspect the product in a manner which would or should, in the excerise of reasonable care, have revealed the aspect of the product which allegedly caused the claimant's harm.

(c) A product seller shall be treated as the manufacturer or a product and shall be liable for harm to the claimant caused by a product as if it were the manufacturer of the product if—

(1) the manufacturer is not subject to service of process under the laws of any State in which the action might have been brought; or

(2) the court determines that the claimant would be unable to enforce a judgment against the manufacturer.

UNIFORM STANDARDS FOR OFFSET OF WORKERS' COMPENSATION BENEFITS

SEC. 304. (a) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is or would have been entitled to receive compensation under any State or Federal workers's compensation law, the judgment entered against each defendant and third-party defendant found liable shall be reduced by the sum of the amount paid as workers' compensation benefits for that harm and the present value of all workers' compensation benefits to which the employee is or would be entitled for the harm. The determination of workers' compensation benefits by the trier of fact in a product liability action shall have no binding effect on and shall not be used as evidence in any other proceeding.

(b) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is entitled to receive compensation under any State or Federal workers' compensation law, the action shall, on application of the claimant made at claimant's sole discretion, be stayed until such time as the full amount payable as workers' compensation benefits has been finally determined under such workers' compensation law.

(c) Unless the manufacturer or product seller has expressly agreed to indemnify or hold an employer harmless for harm to an employee caused by a product, neither the employer nor the workers' compensation insurance carrier of the employer shall have a right of subrogation, contribution, or implied indemnity against the manufacturer or product seller or a lien against the claimant's recovery from the manufacturer or product seller if the harm is one for which a product liability action may be brought under this Act.

(d) In any civil action subject to the provisions of this title in which damages are sought for harm for which the person injured is or would have been entitled to receive compensation under any State or Federal workers' compensation law, no third-party tortfeasor may maintain any action for implied indemnity or contribution against the employer, any co-employee or the exclusive representative of the person who was injured.

(e) Nothing in this Act shall be construed to affect any provision of a State or Federal workers' compensation law which prohibits a person who is or would have been entitled to receive compensation under any such law, or any other person whose claim is or would have been derivative from such a claim, from recovering for harm caused by a product in any action other than a workers' compensation claim against a present or former employer or workers' compensation insurer of the employer, any co-employee or the exclusive representative of the person who was injured. Any action other than such a workers' compensation claim shall be prohibited, except that nothing in this Act shall be construed to affect any State or Federal workers' compensation law which permits recovery based on a claim of an in-

tentional tort by the employer or co-employee, where the claimant's harm was caused by such an intentional tort.

(f) Without regard to when the harm giving rise to the claim occurred, the provisions of this section shall not apply to any person subject to or covered by the Longshore and Harbor Worker's Compensation Act (33 U.S.C. 901 et seq.).

UNIFORM STANDARDS FOR AWARD OF PUNITIVE DAMAGES

SEC. 305. (a) Punitive damages may, if otherwise permitted by applicable law, be awarded to any claimant who establishes by clear and convicing evidence that the harm suffered was the result of conduct manifesting a manufacturer's or product seller's conscious, flagrant indifference to the safety of those persons who might be harmed by a product. A failure to exercise reasonable care in choosing among alternative product designs, formulations, instructions or warnings is not of itself such conduct. Except as provided in subsection (e) of this section, punitive damages may not be awarded in the absence of a compensatory award.

(b) The trier of fact shall first determine whether compensatory damages are to be awarded. After such determination has been made, the trier of fact shall, in a separate proceeding, determine whether punitive damages are to be awarded. In determining whether punitive damages are to be awarded, the trier of fact shall consider—

(1) the manufacturer's or product seller's awareness of the likelihood that the serious harm at issue would arise from manufacture or sale of the product;

(2) notwithstanding the provisions of section 302(b)(2) of this title, the conduct of the manufacturer or product seller upon learning that the product caused harm; and

(3) the duration of the conduct and any concealment of it by the manufacturer or product seller.

(c) Punitive damages may not be awarded where the unsafe aspect of the product which caused the claimant's harm complies in material respects with standards, conditions, or specifications established, adopted, or approved by the Congress or by an agency of the Federal Government responsible for the safety of the design, formulation, labeling or performance of a product.

(d) If the trier of fact determines under subsection (a) of this section that punitive damages should be awarded to a claimant, the court shall determine the amount of those damages. In making that determination, the court shall consider—

(1) all relevant evidence relating to the factors set forth in subsection (b) of this section;

(2) the profitability of the conduct to the manufacturer or product seller; and

(3) the total effect of other punishment imposed upon the manufacturer or product seller as a result of the misconduct, including punitive damage award to persons similarly situated to the claimant and the severity of other penalties to which the manufacturer or product seller has been or may be subjected.

(e) In any civil action in which the alleged harm to the claimant is death and the applicable State law provides, or has been construed to provide, for damages only punitive in nature, a defendant may be liable for any such damages pursuant to the provisions of this title regardless of whether a claim is asserted under this section. The recovery of any such damages shall not bar a claim under this section.

UNIFORM STANDARDS OF LIMITATION AND REPOSE

SEC. 306. (a) Any civil action subject to the provisions of this title shall be barred unless the complaint is filed within two years of the time the claimant discovered or, in the exercise of reasonable care, should have discovered the harm and its cause, except that any such action of a person under legal disability may be commenced within two years after the disability ceases. If the commencement of such an action is stayed or enjoined, the running of the statute of limitations under this section shall be suspended for the period of the stay or injunction.

(b) Any civil action subject to the provisions of this title shall be barred if a product which is a capital good is alleged to have caused harm which is not a toxic harm unless the complaint is served and filed within twenty-five years of the date of delivery of the product to its first purchaser or lessee who was not engaged in the business of selling or leasing the product or using the product as a component in the manufacture of another product.

(c) Nothing in this section shall affect the right of any person who is subject to liability for harm under this Act to seek and obtain contribution or indemnity from any other person who is responsible for that harm.

APPLICATION OF OTHER LAW

SEC. 307. Except as otherwise provided in this Act, nothing in this title shall be construed to affect any statutory or common law rule governing recovery by a claimant, or any statutory or common law rule governing the effect of the comparative responsibility of the claimant upon the recovery.

TITLE IV

RISK RETENTION

SEC. 401. Section 2(a)(3) of the Product Liability Risk Retention Act of 1981 (15 U.S.C. 3901(a)(3)) is amended by inserting "including liability for payments under title II of the Product Liability Voluntary Claims and Uniform Standards Act," immediately after "a product,".●

REPORT OF COMMITTEE TO NOTIFY THE PRESIDENT

Mr. DOLE. Mr. President, I wanted to report that we have made contact with the President. He has indicated he has no further work for us this year. He said he was looking forward to a very productive session next year. He did mention tax reform specifically. We were both silent—not that we indicated disapproval but to indicate that we were sort of happy this year was over. He was very pleasant. He wished us a happy holiday season, as we did him, and we are now prepared to wrap it up for this year.

EXPRESSIONS OF THANKS

Mr. DOLE. Mr. President, as I leave, I certainly want to thank many people, as I did in my statement, but particularly the distinguished minority leader for his friendship and his many, many courtesies and for his tolerance at times while I catch on to some of the things he has known for years. I appreciate the staff, all the senatorial staff, those who watch us, watch over us. We appreciate the Chaplain's daily scolding and look forward to a good year next year.

Mr. BYRD. Mr. President, as the 1st session of the 99th Congress enters its final moments, I would be remiss if I did not acknowledge that the distinguished senior Senator from Kansas now has served a full year—his first year—as majority leader of the Senate.

Mr. President, I know something about the problems that face the majority leader of this body. I know about the long hours that he must put in. I know first hand the difficulties of contending first with differences of perspective and opinion on one's own side of the aisle before one can then contend with the differences of perspective and opinion between the two parties. I know the distinguished majority leader will know what I mean when I say that the job, while it surely has its rewarding moments, is not all sweetness and light.

After having observed the very capable Senator in action in his new assignment since the beginning of the year, however, I can say that he has worked very hard at his responsibilities; he has applied himself and his considerable skills with diligence in an effort to assure that the Senate satisfactorily discharges its responsibilities.

After what has been at times an arduous session—and, in fact, after what has been a tedious period during the recent days as we tried to complete the work of this first session in order to depart for the holidays. I am confident that the majority leader is ready as I am ready to be with his family and loved ones. I hope his holidays will be restful and reinvigorating—pleasant in every way—and that they will equip him for the challenges that await all of us who serve in this body when we return in January for the second session.

I hope the majority leader and his esteemed wife will accept the personal best wishes that Erma and I offer to them for this holiday season and for a very happy New Year.

Mr. President, I have nothing to add to what the distinguished majority leader has said with respect to our calling upon the President in compliance with the resolution that has been passed by the Senate. I do want to take this opportunity to thank the distinguished majority leader for his kind comments and to say that he has worked hard. It has been a pleasure working with him.

I look forward to being back in January to be with him again as we do our work in the Senate.

I want to say the same thing about the distinguished Senator from Wyoming, who is the assistant Republican leader. Our relationship has been ex-

cellent. It has been a pleasure to work with him. He is always very courteous and understanding. Nothing better can be said of anyone, may I say in the first person, if I can violate the rules of the Senate for a moment, than thank you, ALAN. It has been good to work with you. I have enjoyed it, and I look forward to working with you in 1986.

Mr. SIMPSON. Mr. President, I do indeed appreciate those remarks of the Democratic leader. It has been a very interesting relationship with this gentleman since I met him in 1963 when my father was in the U.S. Senate.

He has been especially patient with me, especially this year as I assumed my new tasks. It is a great honor, and a great privilege, indeed, that my colleagues would elect me to do this. And from the early beginning of January and February when I was somewhat defensive and short in my tasks—and I remember that distinctly—you were most extraordinary patient in that situation and I appreciate it very much. I think they refer to all of this type of thing as a "growth experience." I believe that is the phrase. Indeed, it is, and you have made it a pleasant one and I appreciate it. I have sought your counsel and you have given it without question, and I deeply appreciate that. In every situation, you have never misled me or mistrusted me, and that makes for a very much nicer job situation for me. I also appreciate that.

Mr. BYRD. Mr. President, I thank the very able and cordial and dedicated assistant Republican leader.

Mr. SIMPSON. Mr. President, just quickly, let me say that working with Senator DOLE has been a very special privilege. He is a man who gets things done. It is a pleasure to watch him. He is not easily intimidated, nor cowed by the task he has. He handles his job with precision and great wit and skill. You cannot "spook him up." I believe that is a trait that is much needed in this place as we conduct our business.

PROGRAM FOR JANUARY 21, 1986

Mr. SIMPSON. Mr. President, the Second Session of the 99th Congress will convene at 12 noon on January 21, 1986.

Under the standing order, the two leaders will have 10 minutes each.

There will be a special order in favor of Senator PROXMIRE for not to exceed 15 minutes. That will start the new year properly. It is a ritual that is as appropriate as the opening and closing sine die, with Senator PROXMIRE, who pays attention to his duties.

There will be routine morning business not to extend beyond 1 p.m., with Senators permitted to speak therein for not more than 5 minutes each.

Following morning business, it is the intention of the majority leader to proceed to the consideration of S. 638, the Conrail bill.

I say to the occupant of the Chair [Mr. WALLOP] that I shall see him in our native State of Wyoming in a few short days.

Mr. BYRD. Mr. President, I expressed my appreciation and gratitude to all on yesterday.

I have no further action to recommend. I thank the Senator.

Mr. SIMPSON. I thank the Senator from West Virginia.

I thank the remarkable staff of the Senate. I appreciate their patience in a rather tiring situation, and I appreciate their work.

ADJOURNMENT SINE DIE

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I move, in accordance with the provisions of House Concurrent Resolution 267, that the Senate stand in adjournment sine die for the 99th Congress, 1st session.

The motion was agreed to, and at 6:28 p.m., the Senate adjourned sine die.

NOMINATIONS

Executive nominations received by the Senate December 20, 1985:

IN THE ARMY

The following-named officers for posthumous promotion to the grade indicated under the provisions of article II, section 2, clause 2 of the Constitution of the United States of America:

To be captain

Lt. John K. Kosh, [redacted]
Lt. Paul D. Long, [redacted]
Lt. Joey McCarty, [redacted]
Lt. Barry C. Powell, [redacted]

To be chief warrant officer 4

CWO3 Robert A. Bowen, [redacted]

DEPARTMENT OF EDUCATION

Frances M. Norris, of Virginia, to be Assistant Secretary for Legislation and Public Affairs, Department of Education, vice Anne Graham.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 20, 1985:

IN THE ARMY

The following-named officers for posthumous promotion to the grade indicated under the provisions of article II, section 2, clause 2 of the Constitution of the United States of America:

To be captain

Lt. John K. Kosh, [redacted]
Lt. Paul D. Long, [redacted]
Lt. Joey McCarty, [redacted]
Lt. Barry C. Powell, [redacted]

To be chief warrant officer 4

CWO3 Robert A. Bowen, [redacted]

MESSAGES FROM THE HOUSE RECEIVED DURING ADJOURNMENT

ENROLLED BILLS SIGNED

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 20, 1985, subsequent to the sine die adjournment of the Congress, received a message from the House of Representatives announcing that the Speaker pro tempore [Mr. WRIGHT] had signed the following enrolled bills:

H.R. 1890. An act to provide for an equitable waiver in the compromise and collection of Federal claims;

H.R. 3974. An act to provide for temporary family housing or temporary housing allowances for dependents of members of the Armed Forces who die on or after December 12, 1985, and for other purposes; and

H.R. 4006. An act to extend until March 15, 1986, the application of certain tobacco excise taxes and certain medicare reimbursement provisions.

Under the authority of the order of the Senate of January 3, 1985, the enrolled bills were signed on December 20, 1985, during the sine die adjournment of the Congress by the President pro tempore [Mr. THURMOND].

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 24, 1985, during the sine die adjournment of the Congress, received a message from the House of Representatives, announcing that the Speaker pro tempore [Mr. WRIGHT] had signed the following enrolled bills and joint resolutions:

S. 1840. An act to amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes;

H.R. 1404. An act to establish the Eastern Shore of Virginia National Wildlife Refuge and the National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, Virginia;

H.R. 1538. An act to amend title 38, United States Code, to provide a 3.1-percent increase in the rates of disability compensation and of dependency and indemnity compensation paid by the Veterans Administration; to make improvements in veterans' job training programs; and for other purposes;

H.R. 2651. An act to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska;

H.R. 3718. An act to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds;

H.R. 3931. An act to designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, Massachusetts as the

"Captain John Foster Williams Coast Guard Building";

S.J. Res. 255. Joint resolution relating to the convening of the second session of the Ninety-ninth Congress; and

H.J. Res. 495. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

Under the authority of the order of the Senate of January 3, 1985, the enrolled bills and joint resolutions were signed on December 24, 1985, during the sine die adjournment of the Congress by the President pro tempore [Mr. THURMOND].

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on December 24, 1985, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1840. An act to amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts, and for other purposes; and

S.J. Res. 255. Joint resolution relative to the convening of the second session of the Ninety-ninth Congress.

NEW PUBLIC LAWS

(For last listing of Public Laws, see Daily Digest, p. D1559)

H.J. Res. 485, waiving the printing on parchment of enrolled bills and joint resolutions during the remainder of the First Session of the 99th Congress. Signed December 18, 1985. (P.L. 99-188)

H.R. 3981, to extend until December 19, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program. Signed December 18, 1985. (P.L. 99-189)

H.J. Res. 465, making further continuing appropriations for fiscal year 1986. Signed December 19, 1985. (P.L. 99-190)

H.R. 1789, relating to the authorization of funds for certain components of the National Wildlife Refuge System. Signed December 19, 1985. (P.L. 99-191)

H.R. 3735, to designate the pedestrian walkway crossing the Potomac River at Harpers Ferry National Historical Park as the "Goodloe E. Byron Memorial Pedestrian Walkway". Signed December 19, 1985. (P.L. 99-192)

H.J. Res. 424, to designate the year of 1986 as the "Year of the Flag". Signed December 19, 1985. (P.L. 99-193)

S. 1264, National Foundation on the Arts and the Humanities Amendments of 1985. Signed December 20, 1985. (P.L. 99-194)

H.R. 664, to amend the Panama Canal Act of 1979 with respect to payment of interest on the investment of the United States. Signed December 23, 1985. (P.L. 99-195)

H.R. 1534, to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority. Signed December 23, 1985. (P.L. 99-196)

H.R. 1627, to designate certain national forest system lands in the State of Kentucky for inclusion in the National Wilderness Preservation System, and to release other forest lands for multiple use management. Signed December 23, 1985. (P.L. 99-197)

H.R. 2100, Agriculture, Food, Trade, and Conservation Act of 1985. Signed December 23, 1985. (P.L. 99-198)

H.R. 2976, to direct the Secretary of Agriculture to release the condition requiring that a parcel of land conveyed to New York State be used for public purposes and to convey United States mineral interests in the parcel to New York State. Signed December 23, 1985. (P.L. 99-199)

H.R. 3085, clearing title to certain lands along the California-Nevada boundary. Signed December 23, 1985. (P.L. 99-200)

H.R. 4006, to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the railroad retirement insurance program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985. Signed December 23, 1985. (P.L. 99-201)

H.J. Res. 436, to designate 1986 as "Save for the U.S.A. Year". Signed December 23, 1985. (P.L. 99-202)

H.J. Res. 450, authorizing and requesting the President to issue a proclamation designating April 20-26, 1986, as "National Organ and Tissue Donor Awareness Week". Signed December 23, 1985. (P.L. 99-203)

S. 947, Overseas Private Investment Corporation Amendments Act of 1985. Signed December 23, 1985. (P.L. 99-204)

S. 1884, Farm Credit Restructuring and Regulatory Reform Act of 1985. Signed December 23, 1985. (P.L. 99-205)

S.J. Res. 32, authorizing and requesting the President to designate September 21, 1986, as "Ethnic American Day". Signed December 23, 1985. (P.L. 99-206)

S.J. Res. 70, to proclaim March 20, 1986, as "National Agriculture Day". Signed December 23, 1985. (P.L. 99-207)

S.J. Res. 213, to designate January 19-25, 1986, as "National Jaycee Week". Signed December 23, 1985. (P.L. 99-208)

H.R. 729, to amend the Panama Canal Act of 1979, in order that claims for vessels damaged outside the locks may be resolved in the same manner as those vessels damaged inside the locks. Signed December 23, 1985. (P.L. 99-209)

H.R. 2694, designating the United States Post Office Building located at 300 Packerland Drive, Green Bay, Wisconsin, as the "John W. Byrnes Post Office and Federal Building". Signed December 23, 1985. (P.L. 99-210)

EXTENSIONS OF REMARKS

TRIBUTE TO DR. O. URCILLE IFILL, SR.

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GRAY of Pennsylvania. Mr. Speaker, I should like today to bring the attention of my colleagues in the House of Representatives to a most distinguished Philadelphian, Dr. O. Urcille Ifill, Sr. Dr. Ifill has been the pastor of the African Methodist Episcopal Union Church for the past 7 years. He will be honored by his congregation at a testimonial appreciation banquet on January 3.

Dr. Ifill's commitment, not only to his church, but to the Philadelphia community, has been totally untiring and unselfish. While sitting on numerous boards and committees of the African Methodist Episcopal Church, Dr. Ifill served as president of the Black Clergy of Philadelphia and Vicinity, a position he filled with inspiration and unswerving dedication. Despite the considerable demands of this crucial leadership position, he has also served as a member of the Funding Policy Committee of United Way, a member of the National Council of Christians and Jews, a member of the Pennsylvania Public Interest Coalition, a member of the Metropolitan Council of Christian Churches of Philadelphia, co-chairman of the Ecumenical Council of Philadelphia Tribune Charities, Inc., and a member of the Pan Methodist Fellowship.

Mr. Speaker, I have known Dr. Ifill for many years. His ministry and community activities have served as a model for my own calling. Since coming to the African Methodist Episcopal Church in 1978, Dr. Ifill never has been too busy to halt his hectic schedule and help the individuals and groups who look to him for guidance. I, as well as every Philadelphian, am indebted to Dr. Ifill for his contribution to the improvement of not only our spiritual lives but also to the betterment of our neighborhoods and our city.

A TRIBUTE TO MR. JOSEPH HOFHEIMER

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DioGUARDI. Mr. Speaker, it is my privilege to rise today to pay tribute to Mr. Joseph Hofheimer, a great humanitarian and civic leader. On January 15, 1986, an event will be held at the White Plains Hotel to honor Mr. Hofheimer for the volunteer services that he has provided to the residents and State of New York.

Mr. Hofheimer is currently president of the Richard Bower Co., headquartered in New York City. Despite the demands of this job, he makes time to participate in a variety of community activities. His participation touches all bases of voluntarism: he actively and unselfishly dedicates his time to the Jewish community, while promoting better education and health care for his neighbors.

As a life trustee of various Jewish philanthropies and a past president of the Jewish Community Center in White Plains, Mr. Hofheimer has proven to be an influential and effective leader in the Jewish community.

Mr. Hofheimer has gone to great lengths to enhance our education system. Presently, he sits on the board of directors at Barnard College. Prior to his involvement with this respected college, he served on the Scarsdale Board of Education, which included 1 year as president of the board.

Currently, Mr. Hofheimer is a member of the board of directors of the Blythedale Children's Hospital and chairman of the board of the White Plains Hospital. I commend Mr. Hofheimer for his desire to provide quality health care for all Westchester residents.

It is not surprising that Mr. Hofheimer's dedication to public good carries over to his private life, where he and his devoted wife Natalie have raised four lovely children.

I applaud Mr. Hofheimer's dedication to bettering the lives of all of us. His efforts are the embodiment of the American spirit of voluntarism that has made our Nation what it is today. New York is very fortunate to claim Mr. Hofheimer as a resident. I wish him the best of luck in all of his endeavors. Mr. Speaker, I ask that you and my colleagues join me in saluting Mr. Hofheimer, a concerned humanitarian and great American.

Thank you Mr. Speaker.

FRANK FEDERAL CAUSE OF ACTION

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KINDNESS. Mr. Speaker, I realize that I have already made some brief remarks to the House regarding my concerns with the Federal cause of action for personal injury and property damage recently put forth by our colleague from Massachusetts, Mr. FRANK. In those remarks, I tried to highlight my concerns in the interest of time. I would now, however, like to revisit the issue for the benefit of the Members and make a more extensive comment on this ill-conceived amendment and on the general problems of putting Federal causes of action in all our Nation's laws.

To begin with, I must say that my most serious general objection to the Frank proposal was the lack of evidence of its necessity. Indeed, the Superfund 301(e) Study Group, the recent Keystone Conference and other groups have consistently acknowledged the fact that there is little evidence to prove that injured parties are frustrated in recovering for their losses under the existing tort law regime.

SECTION 501 DEFINITIONS

First. Release—the term would not have excluded federally permitted releases of exposure due to use of pesticides—a major issue for farm States. Additionally, claims by those who allegedly lost profits or diminution in the value of property from such things as acid rain might have been available under this language. Since States apparently would have been able to sue to recover for such losses, the provision might have been argued to vastly expand natural resource damage claims under Superfund and consequently triggered a wave of litigation between heavy industry and certain States, despite the limitation of liability contained in existing section 107(f).

SECTION 502 LIABILITY

(A) LIABILITY

This provision had several onerous aspects, perhaps the worse of which was the exclusivity of the defenses set forth in subsection (d). The provision probably would have precluded such obviously appropriate defenses as contributory or comparative negligence by the plaintiff and voluntary contributing activities of the plaintiff, such as smoking, drinking, or exposure during unrelated nonworkplace activities. Although some "apportionment" among defendants was provided, no equitable reduction in damages was contemplated. Thus, a jury called upon to determine whether the plaintiff had met the burden of proving that the release "caused" damage may have been compelled to grant a favorable verdict, or none at all. This runs in contrast to the tort law of some States which recognizes the availability of a comparative negligence—of the plaintiff—defense in tort actions involving strict liability.

A second problem was the ambiguity of the word "causes." By using the present tense rather than the more logical and customary past tense, the author arguably meant to allow recovery upon a showing of damages—an injury or disease—of a type which are caused by exposure to the substance or substances to which the plaintiff has been exposed—thus relieving the plaintiff of the traditional burden of proving that his or her damages actually were

caused by the release. Such a standard would have constituted a drastic departure from traditional tort norms and might have prevented the defendant from introducing highly relevant information regarding other potential causes—except to the extent that they "solely" caused the harm and the defendant was prepared to prove his due care "in light of all relevant facts and circumstances."

(B) PERSONS LIABLE

Subsections (b)(1) and (b)(2) would have created liability for persons who had no connection with the release which caused injury, other than mere inclusion in the chain of title to the facility. For example, one who would have brought a facility which had been the source of a past release but which has not been the source of a release during his ownership nonetheless would have been liable, by operation of law, for a vast range of injuries arising out of prior events. The third-party defense apparently would have been unavailable, since a direct or indirect contractual relationship would have existed. This is a major departure from current personal injury law. Thus, property from which a known release has occurred probably would have been rendered unmarketable for a very long time—encouraging abandonment to governmental entities of otherwise marketable property which had been retroactively rendered unmarketable. A similar result would have been obtained under (b)(2) for a subsequent, responsible site owner or operator—even one who took appropriate remedial measures and indeed had removed all hazardous substances during his stewardship. Thus, no previously used facility would have been an attractive investment to a responsible, reputable hazardous waste disposal site operator. In a similar vein, subsections (b)(3) and (b)(4) may have created liability for those who could conclusively prove that the substances with which they were connected, though of "a type" which "causes the type of damages incurred," could not have been released from the facility and, thus, could not have cause the plaintiff's damages. For example, assume industrial solvents have been buried in four large disposal areas at a facility to which the defendant sent wastes. If data and records proved conclusively that the damaging release was from a disposal area which was closed prior to the defendant's transportation or generation of wastes or that the release took place entirely before transport, the defendant would nonetheless be without any apparent defense to strict, joint, and several liability. Finally, the last sentence of subsection (b) appeared ambiguous and potentially unfair. This is because the phrases "type of hazardous substance" and "type of damages incurred" are subjects of obvious, sometimes contentions scientific uncertainty. Plaintiffs simply should not recover unless "the hazardous substance" released caused "the damages incurred"—especially if toxicological profiles on specific substances will be generated under new CERCLA provisions.

(C) STRICT; JOINT AND SEVERAL

The express strict, joint, and several liability provisions presented go beyond the provisions of sections 107 and 101(32) of CERCLA, which have not been rigidly construed to always require such liability. (See, e.g., *U.S.* v. *A&F Materials Co.*, 578 F. Supp. 1249 (S.D. Ill. 1984) (apportionment criteria should be applied); *Bulk Distribution Centers, Inc.* v. *Monsanto Co.*, 589 F. Supp. 1437, n. 15 (S.D. Fla. 1984) (strict liability may apply); and *United States* v. *Stringfellow*, 20 ERC 1912 (C.D. Cal. 1984) apportionment criteria should be applied under section 107, and joint and several liability is inappropriate under section 106). Overt codification of this now discretionary policy would have greatly hamstrung the ability of small business to insure against such liabilities and would have created strong incentives for improper disposal.

(D) DEFENSES

All of the defenses except subsections (3) and (4) are identical to the defenses set forth in comparable language under section 107(b) of CERCLA, which have been very narrowly construed. The new defense for de minimis PRP's, set forth in subsection (d)(3) is an interesting and novel addition to Federal cause of action proposals, but adds nothing to the traditional common law defense already available under State law. Furthermore, it was not made applicable to persons liable under subsection (b)(2), despite the obvious fairness of such an application. For example, if a person were to buy a facility from which a release has already occurred, disposes of a de minimis volume of waste of the same "type" as that which "causes" the damages and then sells the facility, he would still be jointly and severally liable under the proposed language. This result is certainly a drastic departure from present law and is arguably a denial of due process. Finally, there was no obvious reason to require that a defendant prove that both the volume of his waste was de minimis and that the toxicity of his waste was de minimis. It is difficult to see how a waste of de minimis toxicity would be of a "type" which "causes" injuries sufficient to give rise to a cause of action. Conversely, if the volume of his waste was de minimis "in comparison to other hazardous substances involved," why should the defendant remain a party to the litigation and be subject to joint and several liability? This aspect of the defense of de minimis contribution to injury was also a substantial departure from existing law. Furthermore, defendants might have been required to address the measure of toxicity of substances of the type involved, rather than that actually involved.

The "new" defense for unknowing, diligent subsequent purchasers of facilities at which wastes have been disposed—section 502(d)(4)—is better than no defense at all, but is, in many, perhaps most, jurisdiction, more limited than its common law counterpart. Some jurisdictions do not recognize the liability of a subsequent purchaser of land for injuries arising out of nuisances created by his predecessor, unless the subsequent purchaser takes action to abate the nuisance or clearly commits himself to abatement. Mere "omission" of abatement does not always give rise to liability. The proposed defense would seem to have cleared the way for such liability.

(E) CONTRIBUTION

Although an express right of contribution is a fair concommitant to Federal legislation creating joint and several liability, the proposed provision would have required that contribution claims be raised in a "separate action"—thus stripping Federal courts of the authority to hear directly related claims against third parties in the same action. This is a power now clearly enjoyed under the Federal Rules of Civil Procedure and Exercised in existing CERCLA suits and by most State jurisdictions having modern rules of procedure. Through it, courts prevent wasted judicial resources and the filing of sequential actions and actions only against "deep pockets," whether or not equitable. Furthermore, it is difficult to understand how the court would have been able to implement fairly and meaningfully the "apportionment among parties held jointly and severally liable" called for in subsection (f), if named defendants were forbidden from joining other potentially responsible parties in the case in chief through contribution claims. The general language of subsection (g) probably was not sufficient to assure that timely joinder of other responsible parties by existing defendants occurred. Further, it is inconceivable, in any event, that a court should hear evidence relating to all of the apportionment factors listed in subsection (f), but be barred from simultaneously adjudicating contribution claims among the same parties.

Oddly, the provision apparently would not have prohibited claims against third parties for indemnity, restitution, or declaratory relief. Thus, only contribution claims would have been handicapped.

(F) APPORTIONMENT

The apportionment proposal had some attractive features, but several substantial deficiencies.

The apportionment called for was entirely discretionary. Furthermore, consideration of the factors provided was entirely discretionary. Although most courts might be expected to use these factors, they could have declined to do so.

Regarding the factors themselves, conspicuously absent was "the care exercised by the parties"—a factor mentioned by courts and others as an appropriate criterion in Superfund suits.

Subsection (f)(5) allowed consideration of the damages "which should justly be attributed" to those "who are not, and could not be, brought before the court"—an illogical clause, since those who could not be brought before the court will never be before the court. Certainly, the United States and the State and local governments would have been included, since section 514 seemed to give them a blanket exemption from liability. In addition, defendants who could not be reached under the long-arm

statute of the State in which the action was brought would also be included, since there was no nationwide service of process granted for the new Federal cause of action. Of course, those who enjoyed the protection of a stay under the Bankruptcy Act would have also been included. All of this having been said, why is the allocation of responsibility to parties who "could not be brought before the court" a relevant factor, when the court's discretion apparently is limited to apportioning "damages among parties held jointly and severally liable" in the action in chief; and why would the Congress wish to take special, arguable unnecessary pains to note, in proposed subparagraph (g) that:

Joinder of claims and persons in actions under this section shall be in accordance with the Federal Rules of Civil Procedure?

No apparent claim for apportionment has been created, and contribution claims apparently must be filed as separate actions. The intentions of the author with regard to contribution, apportionment and joinder were a hopeless muddle—one which was not likely to be unraveled in last minute activity on the floor. Such things deserve and demand the proper scrutiny of the Judicary Committee.

SECTION 503. REALLOCATION OF UNCOLLECTED APPORTIONED SHARES

The most serious problem with the provision was that it was unclear what effort must be made or circumstances must exist for a judgment to be "uncollectible." A "good faith" or "diligent" effort should be made to execute on the judgment as a prerequisite to the motion. What if the defendant were in bankruptcy? Would the plaintiff be required to bring an action against an insolvent party's insurance carrier? Would some effort be required to locate a party who has relocated? Because the interests of solvent defendants will be dependent on the plaintiff's effort, some standard of conduct should have been imposed on the moving party, supported by thoughtful legislative history as to the type of effort which might be sufficient to justify reallocation.

SECTION 504. EVIDENCE

Substantial uncertainly and dispute prevails in the scientific community concerning the actual relevance of many of the categories of studies which would have been declared relevant by the proposed amendment to many types of illness or injury which might have been the subject of litigation. It is bad law and bad science to unequivocally declare their admissibility if they merely "tend to establish" causation or contribution to "damages compensable * * * of the type or class allegedly suffered by an individual." Such evidence may be of no probative value to the specific injury involved. Some forms of cancer may be linked to or suspected to be associated with exposure to a specific substance. This does not mean that a court should be compelled to admit broad categories of studies involving that substance in a case alleging a form of cancer which has never been associated with the substance, just because the court may feel constrained to view cancer as a "class" of damages. Even more questionable would have been the admissibility of every study showing any form of damage to "micro-organisms" or abnormal "tissue cultures" in support of a plaintiff's claim that his "fear of injury, illness, or death" to himself, his spouse, child, or friend, was not "unreasonable."

SECTION 505. COMPENSABLE DAMAGES

Unlike some previous proposals for a Federal cause of action, this proposal contained no limitations on categorical or aggregate liability. The most dangerous provisions were those dealing with pain and suffering awards, which could have been made not only for actual injuries, but also for "fear of injury, illness or death" to one's self or to another—no matter how attenuated the relationship. This claim could have been sustained so long as the fear was not "unreasonable." Arguably, the defendant would have been required to assert the "unreasonableness" of the fear as an affirmative defense, which would have had to have been sustained by a preponderance of the evidence. Fear of injury claims are highly novel and generally not recognized as valid—for obvious reasons. Given this provision, it can be almost certain that this new cause of action would have probably given rise to numerous claims. At a minimum, it would have provided ready access to Federal courts to anyone who had been exposed to a hazardous substance, regardless of actual injury. To their "Federal fear claim," they might have easily added pendent State claims for injunctive or other relief. The defendant would not have only had to fear fear itself, but also costs of litigation.

Finally, compensable damages described in section 505(1) appeared as though they were intended to be "medical costs" as defined in section 501(1). This use of different descriptive terms was bound to create ambiguity.

SECTION 508. LIMITATIONS

The formulation chosen was one of the most favorable to potential plaintiffs. Probably the most onerous aspect of the proposal was that it created new rights of recovery for "damages * * * incurred" up to 10 years prior to the enactment of the amendment. Presumably, parties who had litigated or even settled claims for other damages during the period in question could have relitigated their claim under the proposed language—recovering damages not previously compensable under State law, or sustaining liability having failed in the past to show any failure to exercise due care. The creation of such retroactive civil liability is highly disfavored—especially where it is not remedial in purpose.

Curiously, the word "expense" was used in subparagraph (a)(1). Apparently, the word "damages" was intended. Otherwise, the statute would not apply to damages other than those for injury, illness, or death.

Subparagraph (d) would have had virtually no practical effect, since to bar an action, the previous State law claim would have had to have been essentially identical to the unprecedented proposed claim.

SECTION 511. ADDITIONAL RECOVERY

Subparagraph (a) appeared to prevent settlements reached in any litigation under this title from including a release as to any future health damages not foreseen at the time of settlement. Thus, this provision might have greatly discouraged settlement in any cases other than those involving death.

Subsection (b) would have honored the finality of judgments reached in prior litigation only as to the specific damages which were the subject of that litigation. Additional damages allowed under the proposal, no matter what their amount or novelty, could have been sought despite prior litigation.

SECTION 512. CLASS ACTIONS

There is no apparent need for superseding application of rule 23 with a provision which apparently prevented consideration of numerosity, the representative nature of the named plaintiff or his ability to represent the class.

SECTION 513. PUNITIVE DAMAGES

The retroactive imposition of liability of punitive damages was extraordinary and arguably unconstitutional. Deterrence could have been served entirely by prospective imposition of such liability. Since its purpose was entirely punitive, and since individuals who may have been subject to its imposition could not change the conditions giving rise to their liability, it arguably constituted a bill of attainder, an ex post facto law, and may have constituted a prima facie violation of due process as well.

Curiously, the provision would have allowed awards in cases involving "pollutant(s)"—which were not the subject of other provisions of the proposed title and, depending on other provisions of the bill, may not have been defined for purposes of this title.

SECTION 514. LIABILITY OF THE UNITED STATES

Of all the provisions of the proposal, this was probably the most extraordinary and unfair. Since the title would have established strict, joint and several liability, private citizens would have been made to compensate individuals for damages to which a governmental entity or entities clearly and obviously contributed. Furthermore, the proposal apparently would have precluded subsequent actions by liable parties to obtain contribution from such entities for their part in the matter. Since a substantial percentage of all sites which have received hazardous wastes were owned and/or operated by local governments, and since the United States—often the EPA itself—has sent hazardous wastes to sites and has leased land to corporations which, with the knowledge of the United States, disposed of hazardous wastes on the property, the liabilities which private citizens would have been made to bear under this proposal would have been very great indeed. This approach is fundamentally inconsistent with every other liability created under CERCLA with regard to the United States and some State liabilities as well. Thus, ironically, at many sites, the United States

might have been compelled to shoulder a significant share of any response costs which might have been ordered, but would have passed on to other generators all personal injury obligations created under this new title. In addition, liability for toxic waste exposure which the United States might have had under the Federal Tort Claims Act—not predicated on strict liability—probably would have been ignored by plaintiffs whenever a "deep pocket" might have been sued for a full recovery under the proposed strict liability claim. The passage of such fundamentally self-serving and unfair legislation by the United States is not only patently unfair, but arguably unconstitutional.

Finally, the provision purported to bar any recovery against the United States and State and local governmental entities "through indemnification." This language may have been intended to prevent recovery in situations in which a governmental entity has expressly or, under State law, impliedly subjected itself to rightful claims for indemnification arising out of contractual relationships with private citizens. Unsettling such well-settled, and even vested, contractual rights of private parties might have been unconstitutional or constituted a taking for which just compensation might have been due. Furthermore, the provision would have tended to chill entry into any contract with a governmental entity in which the generation, transportation, or disposal of hazardous substances was involved, and may have completely prevented such entities from selling real property which had been the site of hazardous waste disposal, regardless of promises to assume liability for injuries or to indemnify the buyer from any claims which might have arisen.

Finally, some proposals now pending would have authorized the Administrator of the EPA to indemnify waste cleanup contractors for any claims which arise out of their strict liability, or even their negligence. The proposed section apparently would have barred such agreements from having any effect with respect to damages compensable under the proposed title. Furthermore, local and State governments have been precluded from offering any indemnity to contractors which would have protected them from the full force of new claims created under the proposal.

In conclusion, the proposal contained sufficient serious technical defects and questionable substantive ramifications which more than justified its overwhelming defeat.

ANNE FRANK DAY

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. LEHMAN of Florida. Mr. Speaker, on December 15, 1985, the international exhibition, "Anne Frank in the World: 1929–1945," officially opened at the main branch of the Dade County Public Library.

On this occasion, Metropolitan Dade County Mayor Stephen P. Clark and the board of county commissioners officially declared this day "Anne Frank Day" in honor of this event.

Under the able leadership of the Miami Anne Frank Exhibition Committee coordinator Merle Saferstein and committee member Adele Sandberg, this event brought together a diverse representation of people throughout the Dade County community to share in understanding an important series of events in world history and to learn of the impact and legacy of Anne Frank.

I offer my congratulations to all that were involved in this significant and demanding undertaking that benefited our entire south Florida community.

DEAN OF PRESS CORPS RETIRES

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FRANK. Mr. Speaker, I take this opportunity to pay tribute to Edward Justin Sullivan, the retiring dean of the Fall River, Massachusetts press corps. "Jud" Sullivan was honored at a recent party held at the Venus de Milo in Swansea, MA. In the 3 years I have represented the greater Fall River area, I have developed a great deal of respect for the newspapers which serve this part of the State. Edward Sullivan joined the Providence Journal, one of the area's leading organs, in 1951 when he was named manager of the Fall River Bureau. Over the next 35 years he upheld the highest standards for responsible journalism and consistently produced well-written, informative news and feature articles about a wide variety of subjects of interest to the Journal's readers. His only break during in service there occurred in the late 1960's when he was appointed the first executive director of Citizens for Citizens, a local community action organization which continues to provide important human services to the people of Fall River. "Jud" Sullivan's unique blend of journalistic integrity and community service will certainly be missed by everyone who lives in Fall River or who reads the Providence Journal.

Another excellent newspaper in the area, the Fall River Herald News printed an article discussing the important contribution that "Jud" Sullivan has made and also that of Lester Boyd—an excellent Journal writer in their Attleboro office who was also honored at the retirement party. The Fall River Herald is to be commended for recording the contribution of another newspaper's reporters. I ask that the Fall River Herald article be reprinted in the RECORD.

DEAN OF PRESS CORPS RETIRES

(By James N. Dunbar)

Journalist Edward J. "Jud" Sullivan was honored by some 200 persons Saturday at a retirement party held at the Venus de Milo, Swansea.

Sullivan had a long and distinguished career with the Providence Journal-Bulletin and has been a mainstay of the fall River office for many years.

Also honored at the retirement party was veteran Journal writer Lester Boyd of the Attleboro office.

Edward Justin Sullivan was the dean of the local press corps. He would gladly share his expertise when asked. He did it with accuracy, clarity and kindness.

His deftness in phrasing questions gave clear notice to political candidates that he was politically astute. If pertinent answers didn't come, he dug in skillfully until he was satisfied with the response.

While always a competitor, he would share his notes if another reporter arrived late for a meeting.

After he and Boyd were given tributes and gifts by their colleagues and public officials, Sullivan remarked that he knew he hadn't adjusted to retirement yet because his first thought when he looked around and saw all the "newsmakers" present was, "And here I am without my pad."

Sullivan extended "a very sincere thank you" to all those who came to honor him, as well as to his "very loving and tolerant wife." Observing that "in Fall River we have had great relationships," Sullivan said what he treasures most about his career is the mutual respect between himself and the public.

Mayor Carlton M. Viveiros, terming Sullivan and Boyd "two fine gentlemen who are well respected and trusted," said he treasures his relationship with "Jud" Sullivan because Sullivan's agenda was always to get the story and to give the public the facts, honestly and without malice.

"I don't know where this community would be without guys like you making sure we stay on our toes." said Viveiros.

James V. Wyman, the Journal's deputy executive editor, told the gathering that both Sullivan and Boyd established strong personal profiles and lived up to principles that caused people to trust them.

He added that both Sullivan and Boyd have set standards that will be followed for years to come.

Also paying tribute to the retiring journalists were Bernie Sullivan, Massachusetts news editor for the Journal, and Dave Crombie, a reporter for the newspaper. Bernie Sullivan thanked "Jud" Sullivan and Boyd "for the honor of learning from them and working with them."

The master of ceremonies, reporter and columnist Bob Kerr, said he expects that there will be many occasions when he and his colleagues in the Fall River office will say, "If only 'Jud' were here." He praised Sullivan and Boyd as the kind of professionals who were generous in teaching young reporters and in letting them develop and find themselves.

Both retirees were given citations and proclamations from their respective cities and the state Legislature and portraits of themselves by Frank Lanning, retired Journal artist.

Jud Sullivan could bang out an interesting story from the most meager information. In a 32-year career with the Journal he covered events of every kind in a crisp, clear style, writing stories ranging from fast-breaking news to such "brights" as how many Sullivans or Medeiroses were in the phone book.

His career spanned the old school of typewriters, glue pots and pasted copy marked "30," to the era of video display terminals. He always maintained a fresh approach and continued tracking stories.

He wrote honestly and in good taste about people and a city he knows well. As a kid he lived on Forest Street, and he graduated from B.M.C. Durfee High School in 1939. Jud Sullivan pitched for St. Mary's in the CYO League. He graduated from the Boston University School of Journalism in 1943. That June he was inducted into the Marine Corps.

The service gave the young Marine a good chance to hone his skills. Sullivan served as a combat photographer for the 2nd Marine Division in the South Pacific for most of World War II while attached to public relations and division intelligence.

Returning from the military in 1946, Sullivan was news director at WALE until joining the Journal in 1948. In 1951 he was named manager of the Fall River bureau.

In 1965, then Mayor Roland Desmarais named Sullivan to lead the new Community Action Program. A year later it became Citizens for Citizens. He organized it and served as its first executive director until 1970, when he returned to the Journal and became local bureau manager.

Married to the former Mary Lou Maurer, he is the father of eight children.

He wrote his last story at the bureau newsroom on Nov. 30.

About retirement? "I'll just sit around and relax for a month or so, enjoy getting away from having to meet deadlines and then decide what I'll do after that," Sullivan commented.

DOUBLE LOSS—DOUBLE GAIN

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SCHUETTE. Mr. Speaker, like her husband, Mrs. Nancy Addleman has served the people of her community well, and I commend her for her active involvement.

Nancy Addleman's activity in the General Federation of Women's Clubs of Michigan culminated with her election as president of the Big Rapids Intermediate Women's Club. During her presidency, the club was elected club-of-the-year in the State of Michigan. Her activity in this organization also gave her the opportunity to become the assistant director of the Hugh O'Brian Leadership Seminar held at Central Michigan University in 1985.

Nancy Addleman was also active in the Girl Scouts of America. She and her family were long, active members of the United Church in Big Rapids, MI.

In addition to holding her elected position in the GFWC, Nancy Addleman's leadership capabilities were also recognized by the people of Mecosta County, for she was elected to the Big Rapids School Board and rose to the presidency of that board.

Although the people of her community will miss her, it is with great pleasure that I recommend Mrs. Nancy Addleman to the people of Missouri.

CONGRESSMAN GEORGE MILLER LAUDS FOOTBALL CHAMPIONS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MILLER of California. Mr. Speaker, I am very proud of two outstanding high school football teams from my district in Contra Costa County, CA, which this year won their respective championships in the north coast section. I know that all Members of the House of Representatives will want to join me in saluting the achievements of these young athletes and their coaches.

De La Salle High School ended a perfect 10–0 season with a victory in the North Coast Section 2A Championship, and even the opposing coach from Marin Catholic admitted that the Spartans were "the best team" he'd ever seen. That same sentiment was shared by De La Salle's own head coach, Bob Ladouceur.

Pittsburg High capped a year of impressive victories and a 10–3 record in winning the North Coast Section 3A Championship. I also want to call attention to the accomplishments of this very fine team, and their coach, Larry Rodriguez.

It is a great honor for me to have two championship football teams within my own congressional district, and I am delighted to take this opportunity to congratulate the members of those teams, and their coaching staffs, on their outstanding seasons.

ARCHBISHOP MOELLER HIGH SCHOOL CHAMPIONS

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. McEWEN. Mr. Speaker, it is with great pride that I take this opportunity to express my congratulations to Archbishop Moeller High School regarding their seventh Division One State Football Championship.

Their recent 35-to-11 victory over Canton-McKinley High School was impressive to say the least. This win illustrates the hard work and perseverance of these players to be the best football team in Ohio.

During the football season this championship team had the strong support of their fellow students, parents and friends to achieve this coveted state crown. In my view, this kind of dedication is the hallmark of school spirit.

Mr. Speaker, the Moeller High School football team has players from four different congressional districts. We all share their joy in this noteworthy accomplishment and wish them future successes. I have provided the names of this formidable organization for the consideration of my colleagues:

MOELLER HIGH SCHOOL STATE CHAMPIONSHIP FOOTBALL TEAM 1985 VARSITY PLAYERS

Ashbrock, Frank, Jr, LB. Back, Don, Sr, LB. Baele, John, Jr, LB. Bates, Doug, Sr, LB Bauman, Eric, Sr, G. Bayer, Tony, Jr, LB. Braig, Kevin, Sr, DB. Bratten, Tom, Sr, TE. Brisben, Brent, Sr, WB. Carney, Chip, Sr, LB. Clark, Brian, Jr, LB. Cline, Hal, Jr, DT. Codner, Drew, Jr, TE.

Dawson, Tony, Sr, DT. Dunn, Don, Jr, T. Eckert, Charlie, Sr, G. Ennis, Ed, Sr, T. Fisher, Rob, So, DT. Francisco, Shawn, Sr, FB. Friends, Nathan, Jr, DT. Fulmer, Kyle, Sr, DT. Gallagher, John, Jr, DT. Gahr, Steve, Jr, FB. Gillen, Vince, Jr, SE. Griffey, Ken, Jr, SE. Grossheim, Rob, Sr, T.

Henry, Greg, Sr, DB. Henson, Dan, Jr, T. Hilvert, Ray, Sr, WB. Hounchell, Eric, Jr, DB. Hunter, Mike, Sr, DB. Jackson, Tony, Sr, TB. Jacobs, Brad, Sr, G. Jennings, Tim, Jr, DB. Kadnar, Matt, Jr, LB. King, Terry, Jr, DB. Knecht, Jim, Jr, LB. Knepler, Carl, Jr, WB. Konard, Ken, Sr, SE. Kovalik, Dan, Sr, LB. Krimmer, Jeff, Jr, LB.

Latzy, Matt, Jr, DT. Lemmel, Mark, Jr, G. Lewis, Chris, Jr, T. Lewis, Ken, Jr, TB. Logan, Jim, Jr, DT. Lohr, Chris, Jr, T. Lyon, Todd, Sr, DB. Madden, Jeff, Jr, WB. Marklay, Tim, Sr, LB. Marshall, Scott, Sr, FB. McKenna, Mike, Sr, TE. Murphy, Bryan, Sr, TB. Murray, Vada, Sr, DB.

Neierrt, Todd, Sr, DT. Nicholson, Tom, Sr, QB. Papes, Jason, Sr, SE. Parchman, Chris, Jr, DT. Pisciotta, Hal, Sr, K. Powell, Bob, Jr, DT. Powell, Mike, Jr, LB. Purvis, Tim, Jr, T. Rawls, Chris, Jr, DB. Ringle, Tom, Sr, TE. Russell, Jim, Sr, LB. Ryals, Trevor, Sr, C. Rytel, Larry, Sr, LB.

Sagrati, Joe, Jr, DB. Schaffner, Scott, Jr, QB. Schaffner, Todd, Jr, C. Shaw, Alan, Sr, T. Stephens, Matt, Sr, C. Stricker, Eric, Jr, LB. Sturgis, Mike, Sr, DT. Teuschl, Tom, Jr, K. Weible, Eric, Sr, LB. Weis, Steve, Sr, DT. Whigham, Cliff, Jr, TB. Willging, Dave, Jr, LB. Williams, Brian, Sr, DB. Williams, Darrell, Sr, LB. Williams, Keno, Jr, FB.

Captains: Chip Carney, Roy Hilvert, Vada Murray, Trevor Ryals.

Coaches: Steve Klonne, Head Coach.

Jeff Liebert, Athletic Director and Offensive Backfield Coach.

Pat Orloff, Offensive Line Coach.

Marc Bjelac, Defensive Backfield Coach.

Bob Tull, Offensive Line Coach.

Jim Lippincott, Defensive Coordinator, Assistant Athletic Director.

Gary Leibold, Defensive Line Coach.

Jim Nienaber, Head Reserve Coach.

Tom Stellman, Reserve Offensive Line Coach.

Tim Schira, Reserve Linebacker Coach.

Mike Shibinski, Reserve Defensive Back Coach.

Dan Bjelac, Head Freshman Coach.

Bob Kolkmeyer, Freshman Linebackers Coach.

Carl Kremer, Freshman Offensive Back Coach.

Team physicians: Dr. Frank Cianciolo, Dr. John Gillen, Dr. Paul Kollman, Dr. Edward Kremcheck, Dr. David Schlueter.

Team chaplains: Rev. John Putka, S.M., Rev. Joseph Tedesco, S.M., Bro. Robert Flaherty, S.M.

Managers: John Belle, Mike Bramble, Dave Beutel, Joe Beyer, Mark Dornoff, Mick Eck, Mike Habegger, Mike Rauckhorst.

Trainers: Steve Damico, Mike Frank.

Statisticians: John Dombacher, Rory Ingram.

Equipment managers: Joe Asbrock, Harry Becker, Cliff Kemp.

Administrative assistants: Don Goff, Bill Straub.

Special projects coordinators: Zip Montag, Ralph Petering.

Athletic secretaries: Carol Campbell, Mary Rice.

Rally coordinator: Bob Hotze.

Cheerleaders: Jody Liebert.

Band director: Rick Hagee.

TAX REFORM

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Ms. MIKULSKI. Mr. Speaker, on Tuesday night, by voice vote, the House passed the 1985 tax-reform bill. I have always believed voters have the right to know where their Members stand on issues. I don't think Members of Congress should ever hide behind a voice vote.

I supported the bipartisan majority to keep the tax-reform steam engine on track and allow it to pick up more passengers. I believe the principle of tax reform is important. I believe that tax fairness is essential. And I believe our efforts to achieve these goals must continue.

The tax bill passed by the House has good news and bad news in it. The good news is that it compresses the number of tax brackets, increases personal exemptions, keeps deductions for State and local taxes, does not tax fringe benefits, closes loopholes, and has a minimum corporate tax to ensure that corporations that profit off democracy help pay the cost of democracy.

But there is bad news in the tax bill, too. In fact, there are several parts of the bill that cause me great alarm, and which I tried during the last few days to correct through parliamentary initiatives. I hope these concerns will be corrected in the Senate.

Chief among my concerns is the fact that I do not like the new way in which municipal, State, and Federal employee pensions are taxed. I don't think it's fair to penalize police officers, teachers, FBI agents, Social Security workers, and others who already make major contributions to our society through the work they do.

That's why I voted with the entire Maryland delegation for the parliamentary opportunity to remove this provision. We lost that vote, but I will continue to do whatever I can to ensure that when the final bill reaches the House again that this provision will not be included in it.

Another concern deals with economic growth. I think Congress should do everything it can to encourage businesses to invest in America. Research and development stimulates American ideas for American jobs, and we need investment tax credits to encourage businesses to buy American equipment and machinery.

Finally, I believe it's absolutely essential for us to reduce the Federal deficit. I want to see revenues from the new minimum corporate tax specifically targeted for deficit reduction. These new revenues should not just be put back into the Federal checkbook.

In the coming months, the U.S. Senate will be taking a look at this tax-reform bill. I will be watching very closely to see what changes they make. I will be doing everything I can to see this bill is improved by correcting the concerns I have just outlined.

Mr. Speaker, on Tuesday night the House voted to keep the issue of tax reform on track. The steam engine has left the station but there is a long way to go before the train reaches its final destination at the President's desk.

I am one Member of Congress who wants to make sure there are changes in the route so that more passengers can climb aboard as this train moves toward economic growth and prosperity.

MICHIGAN'S LOSS, MISSOURI'S GAIN

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SCHUETTE. Mr. Speaker, I rise today to commend the character and dedication of Dr. Duane Addleman. Over the years, Dr. Addleman has served the students and staff of Ferris State College, Big Rapids, MI, in various capacities. His most recent position was acting dean of the school of allied health, a position he has held since 1982.

Upon leaving Ferris State College to accept a position at Southwest Missouri State University, Dr. Addleman's many friends honored him by acknowledging his career accomplishments and community service. Prior to becoming acting dean of the school of allied health, Dr. Addleman served as associate dean, assistant dean for administration, and assistant to the dean. He also served as the acting head of the department of dental health, and administrative intern for Allied Health Education.

Not only was Dr. Addleman chosen for advancement at Ferris, he was also elected by his peers to be president of the American Society of Allied Health Professions. He held many positions in this important organization. Serving as chairman of the Council of Educational Institutions, as a member of the National Accrediting Agency for the Clinical Laboratory Association, and chairing several other committees, Dr. Addleman was chosen to be a Fellow of this prestigious society.

As Dr. Addleman's career is highly impressive, his community involvement is equally so. Dr. Addleman served as president of the Mecosta County Area United Way; was a member of the Mecosta-Osceola Youth Attention Board; served on the board of directors of the Retired Senior Volunteer Program; was a member of the 99th District Club; taught Sunday school at the United Church in Big Rapids, MI; and was extremely active in the Boy Scouts of America.

It is for these reasons, and because I know the character of Duane Addleman, that I wold like to recommend Dr. Duane Addleman to the citizens of Missouri. The loss of the people of Ferris State and the surrounding communities is the gain of the people of Missouri.

BILL NELSON'S IMPENDING RIDE ON THE SPACE SHUTTLE

SPEECH OF

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 16, 1985

Mr. BENNETT. Mr. Speaker, it seems that it was just a few years ago that man first set foot on the Moon. Since then, our exploits in space have grown.

Expanding our horizons—exploring the final frontier—is still very much ingrained in America's fabric. To explore is in our blood—to reach out to the unknown is what this country is about. Inquisitiveness dwells in our hearts.

Now a friend of mine—a colleague has a chance to be a part of this exploration. Congressman BILL NELSON is set for a journey that will surely be with him for as long as he lives. I congratulate Mr. NELSON for his opportunity—an opportunity that comes to very few. To be part of the action, the action of space exploration.

Sally Ride, the first woman in space—Senator GARN, the first politician in space—now BILL NELSON. Who wouldn't want the chance to travel in space? BILL NELSON, a truly fine person, deserves this honor.

I'll conclude by saying that my best wishes are with Congressman NELSON as he partakes in this marvelous moment. The State of Florida and Congress should be proud for this moment, as we were proud when Senator GARN took his place on the shuttle. Perhaps the day will come when everyone will have the chance to go into outer space. Until that time, those of us left behind can only congratulate those chosen, knowing full and well our hearts and our best wishes will be aboard, if not our bodies. In the case of BILL NELSON, he is a man of great spiritual strength and natural leadership. He is the kind of person who deserves this opportunity.

CONGRATULATIONS TO LAFAYETTE HIGH SCHOOL

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HOPKINS. Mr. Speaker, I would like to take this opportunity to congratulate Lafayette High School from Lexington, KY, for its recent tie for first-place in the Knowledge Master Open, a national academic competition covering a variety of subjects from science to music. In addition,

Tates Creek High School and Henry Clay High School, also of Lexington, were 58th and 60th, respectively, in the 600 school nationwide competition.

This accomplishment by Lafayette students Chris Mullins, Neil Scheurich, Alex Reese, Pukar Patel, Brian Reed, Greg Peterson, Larry Taylor, and Eric Brooks signifies the discipline and sacrifice that has been the hallmark of our Nation since its inception. Their dedication to their studies is similar to our forefathers' desire to obtain an education.

One of the most important investments we continue to make for our national security, our economic stability, and our continued strength as a world leader is in education. When young people make an effort at excelling in academics, we cannot help but be optimistic about the foundation we are laying for America's future by this investment.

I salute these students and their teachers, and feel proud that they are in my district. And, I commend to my colleagues our continued support for excellence in education and in our Nation's future.

FREEZING FUNDS OF JUVENILE PROGRAMS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. LEVINE of California. Mr. Speaker, I am outraged by the action of the OMB in freezing funding for juvenile justice programs. This is technically an impoundment of funds; it defunds vital programs which reduce juvenile crime, and it is an alarming precedent for future possible funding freezes. Further, the timing of this action, coming as Congress is preparing to recess, clearly indicates the intention of the OMB to foil the budget process.

I am alarmed because this action is an impoundment of funds under the Budget and Impoundment Control Act, which states that Congress must be notified of any proposed rescission or delay of funding. In the absence of such notification, the appropriated funds must be spent. Congress has appropriated funds for the Office of Juvenile Justice and Delinquency Prevention, and has received no notification of rescission or delay. Consequently, this funding freeze constitutes impoundment of funds, and a violation of Congress' prerogative in the appropriation of funds.

Additionally, I am outraged because this action de-funds programs which work to divert the troubled and high-risk youth who often become career criminals. The South Bay Juvenile Diversion project, in my district, works with approximately 500 first-time youth offenders a year. Eighty percent of the youth who work with this project have no further trouble with the legal system. The funds we spend on juvenile justice programs we receive back again as these youth become productive adult citizens. The funds we cut from juvenile justice programs, we lose in future spending on police, courts, and jails. Mr. Speaker, this spending cut is no savings.

Finally, I am alarmed by the ramifications of this action. Does the OMB plan to de-fund other programs in this way? If this action goes unchecked I am concerned that the funds for other vital programs will be impounded equally capriciously. The Nation's elected Representatives have the responsibility for appropriating funds in the best manner to serve the needs of the country and its citizens. This responsibility cannot be adequately exercised when Congress' decisions can be so easily circumvented.

I strenuously object to this action, and I call for the immediate release of these funds.

TRAGEDY OVER TETERBORO

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HUGHES. Mr. Speaker, as many will recall, the illegal strike by the Professional Air Traffic Controllers Organization [PATCO] in 1981, drew a tough response from the Reagan administration, which fired some 11,500 striking employees.

At that time, I did not criticize the administration's firm stance because I felt that, as a nation, we should not condone illegal strikes by public employees whose service is vital to protecting the public safety.

The functions for the fired PATCO members were taken over by supervisory personnel as new controllers were recruited and trained. Unfortunately, despite the effort to fill the void left by the fired controllers, it is apparent that the air traffic control system has simply not kept up, even after the passage of 4 years. By and large, today's air traffic controllers are overworked and in many instances underexperienced, as the volume of air traffic continues to grow and grow.

Although the Department of Transportation has recently decided to hire 1,000 new controllers in 1986 and 1987, this action, by itself, will not be enough.

For every 100 new controllers hired, experience has shown that less than half will reach full performance level status. Even in the best of cases, it will take years for a new controller to reach the desired level of proficiency.

On the other hand, it would take only months to retrain selected controllers who were released in 1981—controllers who have proven records and many years of experience.

The administration has made its point that illegal strikes will not be tolerated. I don't think that there's anyone in the world who doubts that at this point.

I feel it would be appropriate, at this time, for the administration to review on a case-by-case basis the status of former air traffic controllers to determine whether they have the qualifications to be rehired and are truly willing to abide by the rules and obey the law.

Having been denied their careers for a full 4 years is punishment enough. There are persons convicted of serious crimes who have been placed on probation for a shorter period of time than that.

I don't think it would be possible to make the fired controllers suffer any more than they have already, but it is clear that the quality of our air traffic control system continues to suffer from not having enough seasoned controllers.

I was recently contacted by a constituent, Mrs. Marie Miller of Brigantine, NJ, whose son was killed in a tragic mid-air collision over the Teterboro, NJ, airport. He was a pilot of a Nabisco corporate jet at the time.

Certainly, it is impossible to say whether this tragedy could have been avoided if there were more highly experienced air traffic controllers on the job today—the indications are that it would have made no difference in this case.

I have discussed this incident personally with Federal Aviation Administrator Donald Engen, who is firmly committed to maintaining the highest standards of air safety. Administrator Engen strongly believes that the system is adequate and that in any event, this unfortunate accident resulted from other causes.

Nevertheless, Mrs. Miller's points are well taken concerning the increased congestion and flights by inexperienced pilots, combined with greater overall air traffic and substantially fewer controllers. I want to share Mrs. Miller's letter with my colleagues at this time:

BRIGANTINE, NJ,
December 5, 1985.

Hon. WILLIAM HUGHES,
Northfield, NJ.

DEAR CONGRESSMAN HUGHES: In 1980, you made us very happy by offering an appointment to our son, Douglas, to the U.S. Naval Academy. He was also offered an R.O.T.C. scholarship from Harvard at the same time. As it happened, he chose the Harvard scholarship and has been happy with his decision. However, we will always be grateful to you for seeing his potential and for making us such proud parents.

I am writing to you, not about Douglas, but about our other son, Greg, who was just as capable and had accomplished so much in his short life span of 36 years. He was killed in a fiery collision of a corporate (Nabisco) jet and a small Piper Cherokee on Nov. 10, at the Teterboro, NJ, airport. We buried him on Dec. 3, after the investigators had released his remains.

It is a terrible thing to lose a loved one, and even more terrible to lose one's child, but to lose a wonderful, talented, bright son with so much to offer, and in the prime of his life, through a needless accident makes the sorrow so much more difficult to bear.

We have learned, since Nov. 10 that the place where he was killed is an unsafe place. Many people in high places apparently are aware of the dangers, but so far, nothing is being done. We are appalled to find out that:

1. Air travel grows more dangerous daily.
2. There were 50 percent more misses in 1984 than in 1981.

3. The system has 5,147 fewer air traffic controllers than it had at the time of the strike.

4. Controllers are overworked and inexperienced.

5. In 1984, 1,897 operational errors were made, in which aircraft were permitted to come closer than safety rules allow.

6. Air traffic has increased 8 percent since 1981.

7. It now takes only 2 years for a controller to become fully qualified, instead of 5 years.

8. The union, which was responsible for the strike no longer exists and there is no reason not to rehire the experienced controllers.

9. At Teterboro Airport, on week-ends, it is a "zoo", with many pilots with few hours and little experience, taking off and landing in the same areas with the large planes.

Greg was the Chief Pilot for Nabisco Brands and one of their best. When the Chairman of the Board flew, it was our son whom he wanted in the Captain's seat. Greg had flown 9,000 hours and had a perfect safety record. He was always aware, cautious, and determined to keep his passengers, his co-pilot, the plane and himself safe. We know in our hearts that he died because of someone's mistake, but not his.

Senator Paul Simon, on the "Today" show spoke of this accident in North Jersey and said that if measures are not taken to right the wrongs that now exist, we can expect to see more air disasters than ever before.

I urge you to use your influence in the Congress to see that changes are brought about so that more lives are not needlessly wasted.

Respectfully yours,

(Mrs.) MARIE MILLER.

LEGISLATION TO BAN THE SALE OF COOK INLET OIL

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MANTON. Mr. Speaker, I recently introduced legislation, H.R. 3817, along with my colleague from Maryland, Mrs. BENTLEY, to place the export of crude oil from Alaska's Cook Inlet on the same terms and conditions as Alaskan North Slope oil.

Earlier this year, Congress reauthorized the Export Administration Act. That measure, which was approved by an overwhelming margin, reaffirms a 10-year congressional commitment that oil produced from the Alaskan North Slope must be devoted to domestic use. The ban on the export of Alaskan crude oil benefits American consumers, provides much-needed maritime jobs, strengthens our national security and promotes energy independence.

Despite this strong statement against the export of Alaskan crude oil, this administration apparently intends to ignore the wishes of Congress. On October 28, the White House announced that in the coming months the President plans to authorize the export of Cook Inlet oil to Japan.

This administrative action is possible because technically the Export Administration Act only prohibits the export of Alaskan oil that is produced at Prudhoe Bay along the Alaskan North Slope and flows through the Trans-Alaskan Pipeline (TAPS). Cook Inlet oil is not transported through TAPS, but rather is carried from the production field Cook Inlet by U.S. tankers to refineries in California and along the Gulf Coast.

Although the 6,000 barrels per day of oil produced at Cook Inlet is a small amount when compared to the amount being extracted from the North Slope, the administration's decision is nonetheless a bad one for the following reasons.

First, proponents of the sale of Cook Inlet oil contend it will help to reduce our trade deficit. Nothing could be further from the truth. In order to replace the special quality of crude oil produced from Cook Inlet, United States refineries would have to buy more expensive crude oil from Indonesia, Norway, or other less stable foreign sources. The United States imports too much oil as it is. Given our serious trade deficit, it makes absolutely no sense to export this precious natural resource which would have to be replaced by more expensive imports.

Second, the export of Cook Inlet oil to Japan sends the wrong message at the wrong time. It's time to get tough on our trading partners that refuse to play by the rules and continue to deny U.S. exporters equal access to their markets. Last year, the United States trade deficit was a record $123 billion costing more than a million American's their jobs. This year the trade deficit is expected to exceed $150 billion. We must work toward a level playing field in international trade. Japan continues to flood our market with cheap imports while denying access to an array of United States products. We should not reward Japan's closed market policies by selling them our national resources which they refuse to carry on United States-flag ships. We must make it clear to Japan and to our other trading partners that we are dead serious about putting an end to unfair trade practices.

Third, the transport of Alaskan oil is the life blood of the American merchant marine industry. The administration's actions show that the planned export of Cook Inlet oil is merely the first step in an effort to totally eliminate the current restrictions on the export of all Alaskan oil. Our maritime industry, already struggling to survive against unfair foreign competition cannot afford to have the door opened for the export of Alaskan oil. Nor can the U.S. afford to be without a strong merchant marine industry to provide for our shipping needs in time of peace and our defense needs in the event of a national emergency.

Any movement toward the export of Alaskan oil will lead us back into a dependence on far less stable foreign energy sources. During the past decade, we have seen our Nation's economy wrecked by Middle East oil embargoes. This was one of the main reasons why the Congress voted to ban the export of Alaskan oil. We should be no less committed to promoting energy independence today.

Mr. Speaker, the legislation I have introduced would simply extend the ban on the export of Alaskan North Slope oil to also cover oil produced from Cook Inlet. We must close the door on the export of any Alaskan oil before it has a change to open any further. I urge my colleagues to cosponsor this important legislation.

CLARIFICATION OF A PROVISION OF THE BEEF PROMOTION AND RESEARCH ACT

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COELHO. Mr. Speaker, I wish to clarify a statement regarding the Beef Promotion and Research Act of 1985. This is a provision within the 1985 farm bill which will establish an orderly procedure for financing and carrying out a coordinated program of promotion and research designed to strengthen the beef industry's position in the marketplace. This promotion and research order is strongly supported by the National Cattlemen's Association.

I strongly support the establishment of this program; however, recently, my colleague from Iowa, the Honorable BERKLEY BEDELL, brought to my attention his concerns regarding the rate of assessment on imported beef and beef products. As chairman of the House Agriculture Subcommittee on Livestock, Dairy, and Poultry, I would like to clarify the intent of this program in regard to this particular provision. When this particular provision was brought to the subcommittee's attention, it was the intent that domestically produced cattle would be assessed a rate of $1.00 per head of cattle each time the animal was marketed. In the case of imported beef and edible beef products, the rate of assessment is to be the equivalent of $1.00 per head, as determined by the Secretary. This assessment on imported beef and edible beef products is to be made only on the single transaction that occurs when the imported beef enters into the commerce of the United States. In making this determination, the Secretary of Agriculture is expected to establish fair and equitable rates that do not discriminate against foreign producers or violate international trade agreements.

AUTO EXPORT QUOTAS

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TRAFFICANT. Mr. Speaker, March 31, 1986, is rapidly approaching. In a little over 3 months the Japanese Government must once again make a decision on whether to limit the export of Japanese automobilies to the United States. Currently, mixed signals are being received from the Japanese Government.

Shortly, Japanese manufactures and the Government are expected to begin closed-door discussions on this very important issue. Many believe the Japanese are likely to either partly or completely remove the quota limitation of 2.3 million cars as established in 1985.

The Japanese claim that the quotas have served their purpose and should be removed. They believe the U.S. Automobile industry has recovered completely and is now able to complete effectively against all international exports. I believe that is simply not true. Many of my colleagues in both the House and Senate share this opinion and believe the United States must take appropriate action to stimulate fair and free trade in the international market.

I believe the topic of fair trade policy should be given primary consideration during the second session of the 99th Congress. The Japanese and other foreign traders must be informed that the United States will no longer tolerate any type of restrictive trade policy.

In my view the Japanese have several alternatives. One would be to retain the quotas at the present level as a positive signal to the Congress and the American people. Secondly, the Japanses could allow the quotas to expire and instead seek some other kind of trade remedy. I believe this proposal is highly unlikely. Finally, the Japanese could not only maintain the current quotas, but further reduce the present car levels.

Though a finial decision on this issue is unlikely for sometime, I can only hope that the Japanese Government will realize the true economic shape of our U.S. automobile industry and maintain the current import quota limitations.

[From the Washington Post]

JAPAN GRAPPLES AGAIN WITH ISSUE OF AUTO EXPORT QUOTAS

(By John Burgess)

TOKYO. December 18.—Japan has reluctantly begun to grapple again with an issue that has few rivals in terms of its potential to poison trade relations with the United States: whether to extend quotas on exports of automobiles.

The current program, which holds sales to the United States to 2.3 million cars a year, expires March 31. But manufacturers and the government are preparing for closed-door consultations that could continue until then.

They hope to avoid a replay of last spring, when Japan's announcement that it would raise the quota by 24 percent provoked angry cries from Congress and helped push trade relations to their lowest point in years.

Many officials here concede that the timing and tone of that announcement was a public relations fiasco. But they insist that the decision was fundamentally just a step toward free trade.

"We should learn from history and experience," said Makoto Kuroda, head of trade policy at the Ministry of International Trade and Industry. He said no consultations were under way yet and refused to comment further, noting the sensitivity of the issue. "Better to keep quiet," he said.

To date, however, events are unfolding much like they did a year ago. The Japanese appear to be underestimating the emotional wallop the issue carries in Congress, and critics in the United States seem to be assuming that a double-cross is being prepared.

Last week, Japanese newspapers carried brief articles on inside pages quoting an unnamed senior official at the trade ministry as saying that quotas would not be extended, although he said Japan would reconsider in the event of unspecified "big changes" in the general situation.

The story attracted only minor attention in Tokyo. In many ways it simply reiterated Japan's official position that the quotas are an aberration and must end as soon as possible. The reported reference to "big changes" left adequate leeway for continuing the restraints.

In Congress, however, it drew strong condemnation and seems to have been read as a formal decision for a new "export wave" across the Pacific that would worsen a trade deficit that this year is expected to reach a record $50 billion.

A ministry spokesman denied that any decision had been made. Spokesmen pleaded ignorance about who made the statement. But industry and government sources said privately it was the top man, International Trade Minister Keijiro Murata, talking on background with the reporters who regularly cover him.

Some foreign analysts here called it a trial balloon. But one Japanese official, saying Murata's statement was in response to a reporter's question, called it a case of politician firing off emotional words without thinking them through.

The quotas began five years ago to give the U.S. automobile industry time to recover from the dark years of the 1970s. Originally a three-year program, the quotas were extended twice for a year each.

The Japanese contend that the quotas' purpose is now accomplished. "The U.S. automobile manufacturers have completely regained their strength, and the unemployed rate is going down," Soichiro Toyoda, president of the Toyota Motor Corp., said at a press conference yesterday.

Toyoda and others complain that the restraints are in force at a time when the United States is strong-arming Japan to dismantle barriers to imports in its own market. Quotas are a fundamental blemish on the principle of free trade, they say.

Last year, Japanese officials depicted it as a concession when they raised the quota from 1.85 million units to 2.3 million. They could have eliminated it altogether, they said.

As of Oct. 31, seven months into the current program, Japanese companies had shipped 1,471,000 cars to the United States and are expected to reach the full 2.3 million. The United States remains their most profitable market, helping them weather intense competition at home that has wiped out most earnings there.

Japanese companies already have opened a campaign for more access. Following the trade ministry official's words last week, many issued calls for an end to quotas. "Trade imbalance should be solved by looking forward, by stimulating domestic demand in Japan and opening its market," said a spokesman for the Nissan Motor Co., the country's second-largest producer.

At the same time, however, auto executives continue to talk of a need for "orderly marketing," a catch-all phrase meaning the avoidance of torrential exports by less formal means, perhaps self-restraint by individual companies.

Japan has several choices. One would be to retain a quota, as a gesture to Congress, but to raise the numbers again. Or, the quota might be allowed to expire, with Japan switching to behind-the-scenes "administrative guidance." Totally free trade in autos is not commonly considered possible.

At least one analyst, however, predicts that Japan will not only keep the quotas but cut the numbers somewhat. Toshio Obi, an economist who is Japan's representative of Columbia University's East Asia Institute, says Prime Minister Yasuhiro Nakasone cannot risk a blowup two months before he hosts President Reagan and other leaders of the industrialized West at an economic summit meeting here in May.

A TRIBUTE TO THE NATIONAL COUNCIL OF JEWISH WOMEN, PRESIDENT BARBARA MANDEL

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FEIGHAN. Mr. Speaker, nothing captures the spirit of this time of year—a time of hope and celebration, of family and goodwill—as the work of people who have committed themselves year round to the goals of fairness, compassion, and peace. Such is the purpose of the National Council of Jewish Women, which recently celebrated its 93d year with a conference in Washington. I would like to take this opportunity to give well-deserved recognition to the NCJW, which has been headed for the past 2 years by a friend and fellow Clevelander, Barbara Mandel.

The NCJW, now 100,000 members strong, has for almost a century promoted a multifaceted program of education, advocacy, and community service. Focusing on the rights of women and children, the NCJW has fought on behalf of abused and neglected children, the elderly, and the disadvantaged. The group has also maintained a reasoned and compassionate voice for the future of Israel, the United States-Israel relationship, and the plight of Jews in the Soviet Union.

Embodying the best of the National Council of Jewish Women, Barbara Mandel's contribution began over 30 years ago when she joined as a member of the Cleveland chapter. In 1971, Barbara was elected as president in Cleveland, later moving on to be national recording secretary and national vice president.

She now volunteers her time on the board of the American Joint Distribution Committee, chairs the National Women's Division of the United Jewish Appeal, and sits on the board for the Council of Jewish Federations. Her voluntary efforts have earned her the Mayor's Citation for Exemplary Community Leadership, and seen her inducted into the 1985 Ohio Women's Hall of Fame. The hall, established in 1978 by the Women's Division of the Ohio Bureau of Employment Services, honors women who have excelled in their efforts to improve the status of women.

As president of the NCJW, Barbara's efforts turned to an effort to further promote the rights of children. Under her guidance, the council established their center for the child which now conducts research on social programs and provides needed information on policies affecting children in our country.

For this, and for all the tireless efforts of the NCJW's corps of volunteers, I hope all my colleagues will join me in commending the National Council of Jewish Women and wishing Barbara the best of luck in her second term as national president.

COURTHOUSE BECAME THE WHITE HOUSE

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1985

Mr. DUNCAN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

COURTHOUSE BECAME THE WHITE HOUSE

(By Chuck Redfern)

For about one hour and fifteen minutes, on Tuesday, September 24, 1985, the McMinn County Courthouse, in Athens, Tennessee, became the White House, of the United States of America. Believe it or not.

You can tell your grandchildren that there was a special day that occurred in Athens when the President of our Land came to town and they moved the Whitehouse to the Courthouse. This is a fact, as the communications systems were in place and if the President needed to make a decision of international magnitude, he would have done it in Athens. If the "hot line" had sounded, it would have sounded in the Courthouse in Athens. If those Russians had decided to "wipe us from the face of the Earth" he would have had to do some fast thinking and talking from the Courthouse. Every office in the Courthouse had about three extra phones for the Secret Service with special numbers and special significance.

This exciting event occurred because Congressman John Duncan convinced President Reagan that if he wanted to visit the rural areas of the United States and see the down-to-earth folks who make up much of our country, then he should come to Athens, Tennessee. There is little doubt that the President was pleased with what he saw and what he heard. By the same token, if there is one McMinn Countian who isn't proud that their county and the Friendly City of Athens was selected as the small community to visit in the State of Tennessee, then I'm sorry for them as it was indeed a momentous occasion for our community.

It was obvious that all citizens, of all political parties, Republican, Democrat, Independent or Mugwhamps joined together to proudly welcome the President and show the United States that we are one of the finest small communities in the country. The publicity and exposure we obtained is beyond the financial capabilities we could muster to buy in the news media. Pictures of our lovely Courthouse, decorated by Jerry Harrill and his crew, to the President holding the Ralide saddle from Plastic Industries, made the pages of newspapers throughout the country, including USA TODAY (a nationally distributed paper). Even the television newtworks showed the same scenes.

The handling of the trip of our President was so well coordinated that it answered the question from some envious cities in our state who asked, "Why Athens?", to which Representative Clyde Webb answered, "Why not Athens?" In one week's time, citizens joined together to put on a showplace for our President that according to Whitehouse and Secret Service personnel was one of the smoothest and most efficiently run visits the President has ever made. Every battle of event needs a General and the unsung hero of this show must go to City Manager Marvin Bolinger, whom the Whitehouse staff labeled as the "Benevolent despot general," meaning he handled the show in a kindly, absolute ruler, commanding manner. He had been elected as event chairman and he accepted the responsibility with dedication.

As Marvin Bolinger asked, "It would take a book to list all the real unsung heroes of this special day as there are hundreds of unpublicized volunteers who contributed of their time and talents to provide the President with an impressive trip to our fair City." From the Rescue Squads, the local and neighboring law officials, the firemen, the Boy Scouts, the Utility Board workers, the City and County employees, the merchants, industrial concerns, Tennessee Wesleyan, the vocational students, the bands and chorus groups, the man on the street (and ladies) plus goodness knows who else, all jumped in and worked night and day to present a great image of rural America and especially Athens, TN. of McMinn County. There were hundreds more who would and could have helped, and wanted to help, but time did not permit to contact everyone. Many were asked to help while standing as onlookers of the work. We appreciate them all.

The fact that some twenty-two to thirty thousand folks were in our City and millions more saw it on television and through the newspapers, makes it the most spectacular event that has ever occurred here. No one can say we didn't do ourselves proud on this day. There may never be another day to match this as far as most of us will see. The crowd was orderly, the program went smoothly, the sun came out at the right time. The President was impressed, the media was impressed and if your "kin" folks and friends living around the country weren't impressed, I'll be surprised.

There are numerous stories to tell that occurred during the hectic days of preparation. It was not until eight a.m. Tuesday morning that the decision was made whether to have it at the Courthouse or the McMinn High gym. Crews had been up all Monday night to decorate the gym in case the rains persisted in falling on Tuesday: Apparently the Reagan charm worked as the weatherman said it was O.K. to keep on "GO" with the courthouse, Tuesday morning at 8 a.m.

No event turns out to be perfect and there will be someone's nose out of joint, but doggone it, you just have to admit there was a special day in Athens, when the Courthouse became the Whitehouse and a President of the United States came here to speak to us. Proud? Yessir, everyone is!

U.S. COMPANIES DESERVE TO COMPETE IN THE INTERNATIONAL PHARMACEUTICAL MARKET

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MADIGAN. Mr. Speaker, I am very pleased today to introduce the Pharmaceutical Export Amendments of 1986. I am joined in introducing this bill by several of my colleagues from the Committee on Energy and Commerce, including Congressmen SCHEUER, BROYHILL, SHARP, and LENT. I am hopeful that the strong, bipartisan support for this legislation will assure its quick passage by the House.

Mr. Speaker, it is currently illegal for American firms to export pharmaceutical products which have not been approved by the Food and Drug Administration [FDA]. This is true, despite the fact that the FDA often moves at a snail's pace, and it can take several years for a drug to be approved. Furthermore, oftentimes a drug has been approved by another country and is desperately needed there, but still cannot be supplied because of this senseless restriction.

This restrictive policy has clearly had an adverse impact on the U.S. economy and more specifically, on the competitive position of American firms in the international market. It has cost us jobs and capital investment by forcing American pharmaceutical companies to conduct important research and to develop and manufacture new drugs outside of the United States.

Ours is the only country that is prohibited from exporting drugs that are lawfully marketed in the importing country but which are not yet approved in the exporting country. This policy makes little sense when the drugs in question may well be available to the importing country from other foreign manufacturers. Our current policy does not prohibit foreign consumers from gaining access to these drugs, it simply locks the United States out of the competition for jobs and revenues.

The bill I have introduced today is very narrow, and contains numerous safeguards to guarantee that the health of citizens in foreign countries is not jeopardized by the lifting of the export ban. The Senate Committee on Labor and Human Resources has already overwhelmingly approved a bill, which was introduced by Senators HATCH and KENNEDY, that is almost identical to this legislation.

I urge my colleagues to look closely at this bill and to give it their full support. A summary of the Pharmaceutical Export Amendments of 1986 follows:

SUMMARY OF THE PHARMACEUTICAL EXPORT AMENDMENTS OF 1986

The legislation permits the export from the United States of drugs which are made in this country but not yet approved by the Food and Drug Administration (FDA) to developed nations which have approved the drugs. Under very limited circumstances,

such drugs which are intended for the treatment of tropical diseases and similar conditions may be shipped to developing nations.

COUNTRIES TO WHICH DRUGS APPROVED ABROAD MAY BE EXPORTED

(1) Developed countries with sophisticated drug approval systems comparable to that of the FDA.

(2) Other developed countries with authority: (i) to assure that information provided to physicians, pharmacists, and patients is consistent with the drug's labeling; (ii) to detect safety problems with a drug; and (iii) to remove unsafe drugs from the market.

(3) Countries not listed in #1 or #2 if the Secretary determines on the basis of human testing and other scientific evidence that shipment of the drug is justified to treat a disease or condition in the importing country which does not exist to a significant extent in the United States.

The Secretary is required to establish two lists of the countries described in #1 and #2 above. The legislation suggests the following countries for inclusion on list #1: Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Japan, Netherlands, New Zealand, Norway, Sweden, Switzerland, and the United Kingdom.

CONDITIONS FOR EXPORT

Such a drug may be shipped if:

(1) The drug accords to the specifications of the foreign purchaser;

(2) Sale of the drug is not in conflict with the laws of the importing country;

(3) The drug contains a label on the outside of the shipping package indicating that it is intended for export;

(4) The outside of the shipping package is labeled: "This drug may be sold or offered for sale only in the following countries:" and lists the countries in which sale is authorized;

(5) The drug has not been sold or offered for sale in the U.S.;

(6) Approval of the drug has not been denied, suspended or withdrawn in the U.S. for reasons of safety and effectiveness;

(7) In the case of a drug to be shipped to a country on list#2, the drug has been approved by a country on list #1; the labeling of the drug is consistent with the labeling approved by a country on list #1; the lable has been translated into the language of the importing country; and approval of the drug has not been denied or withdrawn for reasons of safety by any country on list #1;

(8) In the case of a drug to be shipped to a country described in #2 or #3, the drug is the subject of an NDA, IND, or a master file containing the safety information required for an IND;

(9) The notification of first shipment of the drug is given to the Secretary.

NOTIFICATION OF INTENT TO EXPORT

Prior to the first shipment of an unapproved drug, the shipper must give to the Secretary a notice which:

(1) Identifies the drug to be shipped;

(2) Identifies the establishment in which the drug has been or will be made;

(3) Identifies the country or countries to which the drug will be shipped;

(4) In the case of a drug to be shipped to a country on list No. 2, includes a copy of the drug's labeling; and

(5) Includes assurances that the shipper will report to the FDA any serious adverse drug reactions.

ADDITIONAL SAFEGUARDS

(1) The U.S. shipper must obtain from each of its importers an agreement not to ship the drug into countries other than those authorized under this law. This agreement must be renewed annually.

(2) If a U.S. shipper or its subsidiary ships a drug to a country in violation of any provision of this Act, then the Secretary may prohibit the shipping of the drug and the Secretary has authority to seize the drug, to seek an injunction to halt any proscribed activity, and to impose criminal penalties.

(3) If an importer ships to a drug a country in violation of any provision of this Act, then the Secretary may prohibit the shipping of the drug to such importer.

(4) If the drug poses an imminent hazard in any country authorized to receive it under this Act, the Secretary may immediately prohibit the shipping of a drug to such country.

(5) If an importer ships a drug to an unauthorized country and the drug poses an imminent hazard in the unauthorized country, the Secretary may immediately prohibit the shipping of a drug to such importer.

(6) If a U.S. shipper ships in violation of an imminent hazard order or continues shipping to an importer knowing that the importer is reshipping to an unauthorized country, then the Secretary may prohibit the shipping of the drug and the Secretary has authority to seize the drug, to seek an injunction to halt any proscribed activity, and to impose criminal penalties.

(7) The GAO is required to monitor compliance with the Act and to report to Congress within 2 years of enactment and every 2 years thereafter.

TRIBUTE TO TWO MEMBERS OF THE 101ST AIRBORNE DIVISION

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. CRAIG. Mr. Speaker, it is with profound sadness that I rise to honor the memory of two members of the 101st Airborne Division who lost their lives in the tragic crash at Gander, Newfoundland, on December 12, 1985. I would like to express my deep gratitude for the service these fine young men gave to our country as part of the multinational forces in Egypt—a difficult and important mission in the cause of world peace.

Sp4c. Steven J. Bradshaw of Boise graduated from Boise High School in 1983, where he was a member of the ROTC praised by his commanders. He was headed for his reassignment to Fort Leonard Wood in Missouri, the training base for the Army Corps of Engineers.

Pvt1c. Paul M. Crawford graduated from Nampa High School in 1984. He had recently been married, intended to make his career in the military, and hoped to go to Germany in his next tour of duty.

Although it does little to lessen the sorrow at this loss, I want their families to know that the First District of Idaho, and all Americans, will remember with pride the sacrifice these two young men made in the service of our country.

FALLEN SOLDIERS WHO MIGHT NOT HAVE DIED

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. RANGEL. Mr. Speaker, it is sad when a solider dies. It is sad when he has represented his country well, defended our Nation, kept the peace. It is especially sad when he might not have died.

These soliders did what soliders do best: They kept the peace. The Army's 101st Airborne Division, one of the elite units of our Armed Forces, served ably in the Middle East, as they have many times before, and in many places.

While we honor all the soldiers who died, I would like to make particular mention of those soliders from New York State: Pvt. Paul J. Bostwick, Pvt. William Brilya, Pvt. Trevor Campbell, Pfc. Bobby Coleman, Sgt. Paul Hemmingway, Pvt. Kenneth Nelson, S. Sgt. Ronald Sears, and Sgt. Theodore Travis. I would also like to express my sorrow to the family of Sgt. Francisco Ocasio, of Juana Diaz, Puerto Rico.

While we do not yet know the cause of the crash in Gander, Newfoundland, our sense of loss leads to many questions. It highlights for me the need to intensify our efforts in improving airline safety, both for soldiers and civilians traveling on commercial airliners. We know that deaths in aircraft accidents are at an all-time high in the last several years. Perhaps this is due to chance, but perhaps not. Many aircraft accidents are not due to wind shear or other currently unforeseeable weather abnormalities. Many are due to mechanical or human error. Both can be improved through maintenance, inspection, and training.

I was pleased that the Federal Administration is now ordering a broad inspection of jet engine repair facilities. I commend that action, which was planned before the Gander crash, and I would urge an even more aggressive approach to aircraft maintenance and personnel training, both in the air and on the ground.

Again, I would like to express my sorrow at this terrible tragedy, and I would like to extend my sympathy to all of those families who lost a loved one in the service of the United States.

CONFERENCE REPORT HAS WIPED OUT MOST MILITARY PROCUREMENT REFORMS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SCHEUER. Mr. Speaker, today I voted against the conference report on the fiscal year 1986 continuing appropriations bill.

It would wipe out nearly all of the military procurement reforms in our original version of the legislation the House passed in June of this year, including: The revolving door employment reform; the application of competition and multiple cost sourcing for major weapons systems; and the use of the should cost estimating system.

The only procurement reform left in the bill is the so-called allowable cost amendment.

A combination of these four reforms would have put the Government in a far stronger, more effective position in business negotiations with defense contractors.

Assistant Air Force Secretary A. Ernest Fitzgerald has stated in testimony before the Joint Economic Committee, on which I serve, that we could cut our $100 billion procurement budget by $25 to $50 billion annually if we got our procurement process under discipline and control. We've blown it for this year.

This conference report also represents an increase of $4.8 to $11.1 billion, depending on whose figures you use, over the original House-approved level of fiscal year 1986 defense spending. This dramatic increase in defense spending comes at the expense of what is left of our frayed and tattered social services safety net.

While we cut the minimal funds still available to help the elderly, the poor, and the infirm, we continue to cater to the whims of the defense industry and those in the Pentagon who continue to insist upon gold-plated Cadillac-type weapons when simple Chevys would do.

By passing this bill while operating under the specter of Gramm-Rudman, Congress has chosen voluntarily to fall on its own sword.

Mr. Speaker, I am not denigrating my colleagues who served as conferees on this bill because I know how hard they fought to hold the line on defense spending. They did the best they could faced with tight deadlines and an unyielding Senate.

TENTH ANNIVERSARY OF THE ITALIAN-AMERICAN FOUNDATION DECEMBER 18, 1985

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. OBERSTAR. Mr. Speaker, the 10th anniversary of the Italian-American Foundation offered a unique opportunity to review the contributions Americans of Italian descent made to our great Nation and to give special recognition to some of our colleagues of Italian descent whose roles have been particularly significant. It was my great privilege to attend the October 19, 1985, foundation gala, during which I was deeply moved by the thoughtful comments offered by Congressman FRANK ANNUNZIO, founding father of the foundation, and Senator PETE DOMENICI, who served as master of ceremonies for the gala.

Congressman ANNUNZIO spoke from the heart and with only a sketchy, written outline about the contributions Americans of Italian descent have made to our country througout its history. It is virtually impossible to reconstruct the tenor of Representative ANNUNZIO'S comments because they were delivered with such warmth and depth of feeling, but at my request he has recreated that speech in condensed form and I include the remarks at this point in the RECORD:

ITALIAN-AMERICAN FOUNDATION 10TH ANNIVERSARY, REMARKS OF HON. FRANK ANNUNZIO.

The Italian story is literally the story of America, for from the very beginning of this Nation, Italian Americans have made monumental contributions to the greatness of America. Yes, the story of Italian immigrants is the story of America—and of their courage, enterprise, and loyalty, all given freely in the building of America's life and freedom, from the discovery of this continent in 1492 by Christopher Columbus, as well as from 1776 to the present time. The vast contributions made by Italians and those of Italian descent to the physical, intellectual, cultural, and spiritual development of this Nation are legendary.

Christopher Columbus discovered America. John Cabot explored the mainland. Giovanni D'Verrazzano discovered New York Bay. Filippo Mazzei, a close friend of Thomas Jefferson, inspired many of the ideas expressed in our Declaration of Independence. William Paca, the delegate from Maryland, signed the Declaration of Independence, and served as governor of Maryland.

Italians fought in the Continental Army during the Revolutionary War. They served with honor in the Civil War and again in the U.S. Armed Forces during each of the World Wars as well as in the Korean and Vietnam conflicts.

Charles J. Bonaparte was Secretary of the Navy and Attorney General of the United States. He created by executive order in 1909 the Federal Bureau of Investigation. Fiorello LaGuardia was elected Mayor of New York in 1933 after having served as a Congressman for 14 years. Enrico Caruso and Arturo Toscanini were legends in their own time.

Lee Iacocca, Chairman of the Chrysler Corporation, and Edward J. DeBartolo, Sr., Youngstown, Ohio businessman and sports magnate, Joseph Cardinal Bernardin, Archbishop of Chicago, A. Bartlett Giamatti of Yale University, Frank Sinatra, Joe DiMaggio, Rocky Marciano, whose heavyweight unbeaten record remains intact, Enrico Fermi, Benjamin Civiletti, former U.S. Attorney General in the Carter Administration, and the list of luminaries goes on and on.

One thing is certain—Italian Americans who now comprise 10% of the American population, have attained affluence, education, aspiration, and acceptance. They have contributed so much, but the challenge is still there for us today—as Italian Americans—to apply to our own America—with the same vigor and unity of purpose—those energies and that inspiration which have so often and for so long made Italy a center of civilization. By so doing, we will help to guarantee a new Renaissance of freedom and dignity that will continue to fulfill the American promise of hope to men of every nation throughout the world.

Let us now go forward with renewed vigor and enthusiasm to build on the firm foundation of a solid decade of accomplishment by the National Italian American Foundation. Let us pledge to each other tonight that we shall support the Foundation in its goal to create an endownment fund that will ensure that this organization shall continue in perpetuity.

We want to insure that this organization shall remain the watchdog over those who try to defame us, to cripple us and our children through guilt by association, innuendoes, and smear tactics. We have no room in America for these peddlars of lies and defamation. We are proud as human beings to enunciate the great heritage of America so that our children and grandchildren who follow us can be equally proud of a country that will ensure peace and tranquility for all eternity.

This is our goal—this is your goal—and together we shall accomplish this goal, not only for Italo-Americans but for all Americans, for we must continue to live in a society that will respect the dignity of all men.

The name PETER RODINO transcends ethnic lines because he represents the ideal of the immigration experience of America and because he represents integrity personified, integrity that reminded America throughout the Watergate era that the Constitution of this country stands above man, even when that person is the highest elected official in the land. The Italian-American Foundation has honored Chairman RODINO by establishing a legislative internship in his name, a program which will be administered by the Marianna Stango Rodino Foundation. Recipients will be awarded a 3-month internship of a congressional committee; eligible applicants will be Italian-American students from the State of New Jersey.

Senator DOMENICI perhaps best summed up Chairman RODINO's contribution to our constitutional system with these introductory remarks, which I ask unanimous consent to include at this point in the RECORD:

Peter Rodino is the only major figure in the Watergate hearings who didn't make a fortune writing a book. Congressman Peter Rodino was one of the founders of the National Italian American Foundation. And just today, he received the first of our association's public service awards which carries with it the first of our foundation internships which will be known in his name. It will be known as the Fiorello LaGuardia Internship and there will be many to follow but we are very proud that he is the first.

Because, indeed, in terms of our organization—what we stand for in our pride and our tremendous commitment to our country and our heritage—he is unequaled. One of the strengths of this great American system which somehow seems almost to be on the one hand accidential, on the other may be providential is that this political system has produced people of extraordinary talent who have happened to find their way to be at the right place at critical times. Such leaders have come from the most diverse of places and diverse of backgrounds such as Abraham Lincoln from a little town of Springfield, Illinois and Franklin Roosevelt from the aristocratic Protrun family of the Hudson Valley. In that tradition is Peter Rodino from Newark, New Jersey * * *.

Mr. Speaker, I consider it a great privilege to serve in the Congress with Chairman RODINO, Congressman ANNUNZIO, Senator DOMENICI, and 30 Members of Congress of Italian descent with whom I share the Italian heritage. I am also particularly pleased that the chairman and cofounder of the Italian-American Foundation, industrialist Jeno F. Paulucci, is a native of my northeastern Minnesota Congressional District. Jeno Paulucci has risen from the humblest of economic beginnings to make an enormous contribution to the economy of our northeastern Minnesota region and to the Nation as a whole. Still, he makes time to contribute his energies and creativity to the interests of the Italian-American Foundation and is one of the most persuasive and effective spokesmen for our ethnic heritage in this country.

I offer my congratulations to Jeno Paulucci, Congressman ANNUNZIO, and all the dedicated staff of the Italian-American Foundation in making this 10 anniversary celebration such a memorable event.

HOUSE FOREIGN AFFAIRS COMMITTEE—1985 A RECORD OF ACCOMPLISHMENT

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FASCELL. Mr. Speaker, as the first session of the 99th Congress draws to a close, I would like to take this opportunity to inform the Members of the House of the activities during 1985 of the Committee on Foreign Affairs and its subcommittees.

Thanks to the hard work and bipartisan cooperation of the committee members we have compiled an outstanding record of accomplishment. We have met the goals we set for ourselves at the start of this Congress. Moreover, we responsibly dealt with the many unexpected and unpredictable events that developed during the year involving our nation's foreign affairs.

I am particularly proud of the fact that we enacted into law the first regular foreign aid authorization bill since 1981, including House passage of the conference report by a margin of more than 100 votes. This 2-year bipartisan measure authorized international development and security assistance programs necessary for American interests abroad. Other important initiatives in the bill included provisions for stronger antiterrorism assistance and airport security, strengthening of the international narcotics control effort, increased aid to anti-Communist freedom fighters' efforts, and enhancement of the Peace Corps.

Another major accomplishment was passage of the measure authorizing funds for the Department of State and U.S. Embassies abroad, U.S. Information Agency, and the Board for International Broadcasting. Other provisions in this bill included a U.S. scholarship program for undergraduate students from developing countries; authorizations for the Arms Control and Disarmament Agency; further strengthening of efforts to combat illicit drugs; strengthening of counterespionage efforts; measures to increase protection for foreign missions; and new arms control initiatives.

Early in the year we took the lead on emergency relief legislation for Africa famine victims which resulted in the saving of countless lives. We won House passage of an anti-apartheid bill which prompted Presidential restrictions on South Africa. We strengthened U.S. security through enactment of an improved Export Administration Act bill, and we helped promote U.S. international economic interests through the reauthorization of the Overseas Private Investment Corporation [OPIC]. We aided U.S. agriculture in our participation in the export and foreign affairs provisions of the farm bill, including extension of the Public Law 480 Food for Peace Program. We have passed resolutions extending the offer of assistance to Mexico and Colombia following the natural disasters in those countries.

Particularly significant and productive in 1985 was the committee's extensive activities in three key areas: arms control, antiterrorism, and antinarcotics. By way of sharing with my colleagues the wide range of accomplishments on those three subjects, I elaborate below the details of the committee's work.

ARMS CONTROL ACTIVITIES

Among the issues dealt with by the committee on the question of arms control were: The President's Strategic Defense Initiative [SDI] and antisatellite [ASAT] weapons policy; the United States-Soviet arms control negotiations, a committee-sponsored CRS study on nuclear arms control and seminars on the fundamentals of nuclear arms control; proposals to ban nuclear testing; preservation of SALT II and the ABM Treaty; and binary chemical nerve gas weapons. Much of the detailed work and initial effort in these areas was undertaken by the Arms Control Subcommittee.

ARMS CONTROL IN SPACE

As part of its series of hearings on arms control in space beginning in the 98th Congress and continuing into the 99th Congress, the committee examined the arms control, technical feasibility, and budgetary implications of the President's SDI and ASAT policy. Testimony was heard from former Secretaries of Defense Robert McNamara and Clark Clifford as well as the authors of a report describing the adverse arms control implications of United States and Soviet space defense efforts. From these hearings emerged the view that the ABM Treaty is fundamental to preventing an arms race in defensive systems and to averting the acceleration of the arms race in offensive systems. Moreover, the likely Soviet response to the SDI, as cited in a Pentagon SDI Report to Congress last spring, will be to build up their offensive forces to penetrate and overwhelm our upgraded defenses. These hearings have been published under the title "Implications of the President's Strategic Defense Initiative and Antisatellite Weapons Policy."

In October, the committee examined the administration's new interpretation of the ABM Treaty which would permit the development and testing of air-based, sea-based, space-based, and mobile land-based ABM systems and components based on new physical principles. Testimony was received from Gerard Smith, the negotiator of the ABM Treaty, and John Rhinelander, the legal counsel to the ABM Treaty negotiations. Both maintain that the 13-year longstanding interpretation of the ABM Treaty is the accurate interpretation of the Treaty and that from the negotiating record it is clear that the ABM Treaty prohibits the development and testing of space-based, etc. ABM systems and components based on new physical principles. At this same hearing, Ambassador Paul Nitze, Special Advisor to the President and the Secretary of State for Arms Control Matters, assured the committee that the policy of the President and the administration was to continue to adhere to the longstanding interpretation of the ABM Treaty.

In December, the Subcommittee on Arms Control, International Security, and Science, along with the Subcommittee on Europe and the Middle East and on International Economic Policy and Trade, explored in greater detail the influence of the SDI on our allies, in particular, the issue of technology transfer between the United States, our NATO allies, and Japan, as it relates to SDI.

Within the last few days, I have been particularly gratified by an action of the conference committee on the continuing resolution regarding ASAT. The decision to suspend United States-ASAT testing provided the Soviets do not resume their ASAT testing is a wise one. This is a practical arms control achievement that complements the Foreign Affairs Committee's efforts to avert an arms race in space.

Relatedly, I was also encouraged by the conference committee's decision to preclude funding for binary nerve gas weapons during fiscal year 1986. In this connection, I would emphasize that binary production after fiscal year 1986 will not be automatic, especially in the sense that going forward would be conditioned upon NATO approval and further review by Congress. My own views regarding the binary are unchanged: We should not fund a system that does not work, is not proven safe for our troops, which needlessly adds billions of dollars to the deficit, harms the NATO alliance, and undermines joint pledges at the summit to eliminate chemical weapons.

COMPREHENSIVE UNITED STATES-SOVIET ARMS CONTROL NEGOTIATIONS

As part of its effort to keep Members apprised and up to date on the status of the Geneva arms control negotiations, the committee received regular briefings by Ambassador Kampelman, the chief U.S. arms control negotiator, as well as the other negotiators, and from Ambassador Nitze, the President's arms control adviser.

In preparation for the November 19–20 summit between President Reagan and

Soviet General Secretary Gorbachev, I prepared a statement analyzing United States and Soviet arms control proposals tabled in Geneva with a chart comparing those proposals, and a summary of regional, human rights, and bilateral issues. The analysis and chart appeared in the November 13, 1985, CONGRESSIONAL RECORD on pages E5142–44.

After the summit, the committee was briefed by Secretary of State Shultz on what transpired at the summit.

NUCLEAR TEST BAN PROPOSALS

The committee conducted several hearings on proposals to bring an end to nuclear testing. After extensive discussion, the committee in May marked up and approved for floor action House Joint Resolution 3, legislation to prevent nuclear explosive testing. House Joint Resolution 3 urges the President to seek Senate ratification of two treaties that limit nuclear testing, and to bring negotiations on a comprehensive test ban treaty. With over 200 cosponsors, this resolution has widespread support in the Congress. These hearings are published under the title "Proposals To Ban Nuclear Testing."

NUCLEAR ARMS CONTROL WORKSHOPS

In 1985, the subcommittee sponsored a series of nine workshops on a wide variety of arms control topics. The workshops were held in conjunction with a year-long study by the Congressional Research Service on the fundamentals of arms control. The workshops were open to all Members of Congress. Some of the most notable personalities in the arms control field were invited to be guest experts and give presentations at the workshops. The workshops were organized to encourage more Members of Congress to become more actively involved in arms control matters.

1986 ARMS CONTROL AGENDA

In the second session of the 99th Congress, the Foreign Affairs Committee and the Subcommittee on Arms Control, International Security and Science will continue to examine this wide range of arms control and foreign policy issues. In the area of space arms control, we will further monitor and evaluate the arms control implications of the administration's SDI and ASAT policy. In particular, we will continue to urge the President to proceed with the SDI Program in full compliance with the ABM Treaty. The committee will also seek continued United States-Soviet compliance with SALT II.

In the area of United States-Soviet arms control negotiations the committee will continue to keep Members fully informed on the status of the Geneva arms control negotiations which are scheduled to resume on January 16. We will also keep Members informed of matters regarding the upcoming June summit between President Reagan and Soviet General Secretary Gorbachev. In this area, the committee will also assess legislation calling for tradeoffs between offensive reductions and defensive controls.

Concerning nuclear test ban proposals, the committee is prepared to take House Joint Resolution 3 to the floor of the House.

The committee plans to continue the arms control workshops in 1986 with the same informal, relaxed, and informative format followed in 1985. The workshops will focus on key problems in arms control with the general objective of improving the congressional role in the arms control policymaking process.

FOREIGN ASSISTANCE LEGISLATION ON ANTITERRORISM

The tragic events of the past year have reinforced the need to take effective action against the threat of international terrorism. The committee has responded by strengthening U.S. policy in a number of ways. As a result of our efforts, the foreign assistance legislation authorized an antiterrorism assistance program and prohibited assistance to countries supporting terrorism.

In the area of airport security, the bill provided for the suspension of air service to and from countries with inadequate airport security standards and puts in place a trigger mechanism which would result in mandatory suspension of foreign aid to countries with high terrorist threat airport facilities.

The legislation also urged the President to establish an International Antiterrorism Committee with a mandate to enhance international cooperation on terrorism and to serve as a crisis management mechanism during terrorist incidents.

MARITIME SECURITY

In addition, we are in the process of examining the status of international maritime security. The committee intends to see that the executive branch has the statutory authority to enforce adequate security standards and to ensure prosecution of those who commit acts of terrorism at ports and on the seas. We have also called attention to the need to review and revise extradition treaties and other bilateral and multilateral agreements so that prosecution of terrorists can go forward with due process.

DIPLOMATIC SECURITY

I would also bring to my colleagues' attention the committee's efforts to protect our diplomatic posts abroad from the threat of terrorism. The committee has carefully reviewed the recommendations of the Advisory Panel on Overseas Security, chaired by Adm. Bobby Inman. As appropriate, we expect to consider legislation necessary to implement these recommendations and intend to carry out thorough oversight of the administration's progress in this regard.

U.N. ACTION ON TERRORISM

On the multilateral front, I am pleased to report that on December 9 the United Nations adopted a landmark resolution which condemns all acts of terrorism as criminal. The Congress has been urging the United Nations to adopt such a resolution. The passage of this measure, which unequivocally condemns all acts of terrorism, is a first for the United Nations.

The resolution also provides for improving international aviation and maritime prosecution of terrorists an bringing domestic laws in conformance with existing international conventions.

ANTITERRORISM AGENDA FOR 1986

The frightening prospect of nuclear terrorism requires our immediate attention. We intend to conduct extensive hearings on the threat of nuclear terrorism and call on the International Atomic Energy Agency (IAEA) to pursue the improvement of safeguards of nuclear material and facilities in order to prevent terrorism against such facilities and to avoid the theft of nuclear materials by terrorists.

As mentioned above, we plan to work for full implementation of the Inman Panel recommendation in order to secure our diplomatic facilities to the maximum extent possible.

We intend to enact legislation establishing minimum international maritime security standards. As I have already stated, we are also looking at a tightening of extradition treaties and other measures involving international cooperation in the apprehension and prosecution of terrorists.

We will continue to press in every forum for the establishment of an International Coordinating Committee on Terrorism.

I will also continue to urge that the topic of international terrorism be included on the agenda of the upcoming June summit meeting.

In conclusion, the committee will continue to give high priority to the safety of our citizens from terrorist threats, as well as those Americans in the Foreign Service and the military who are serving our country's interests in high-threat areas. They surely deserve all the protection we are able to provide.

LEGISLATION ON INTERNATIONAL NACROTICS CONTROL ACTIVITIES

During 1985 the committee initiated major new legislation aimed at steming the production of illicit drugs overseas, and improving the management of U.S.-funded narcotics control programs. The foreign assistance legislation included the International Narcotics Control Act of 1985, which increased funding for overseas narcotics control, strengthened the requirement on suspending assistance to countries which have not taken adequate steps to control drug production and trafficking, and conditioned aid to certain countries on a demonstration of improved efforts in the anti-narcotics area.

The State Department authorization legislation also included provisions to improve the narcotics personnel system in the Department of State, directed appropriate Federal agencies to increase their cooperation and information-sharing on narcotics traffickers, and required the Secretary of State to increase his efforts to negotiate updated extradition treaties with major narcotics-producing countries.

In addition, the committee's Task Force on International Narcotics Control held exhaustive hearings and briefings on a wide range of drug-related issues, and met with

numerous leaders from drug-producing and drug transhipment countries.

U.N. ACTION ON NARCOTICS

The committee sponsored a meeting at the United Nations to meet with major drug-producing and drug transshipment countries to discuss ways in which multilateral efforts could contribute to more effective actions against illicit narcotics. The U.N. General Assembly subsequently approved the Secretary-General's call for a U.N. sponsored conference on international narcotics issues, as well as a proposal for a new international treaty on illicit narcotics.

INTERNATIONAL NARCOTICS CONTROL AGENDA FOR 1986

The committee will continue its oversight activities in 1986 on U.S.-funded narcotics control programs overseas in order to ensure that they are as effective as possible. We also intend to explore the increasing connections between narcotics trafficking and terrorism, and to continue our review of foreign government involvement in drug trafficking. And in an effort to ensure that all U.S. Government agencies are involved in the antinarcotics fight overseas, we will explore ways in which the U.S. Armed Forces can contribute to these activities through interdiction and intelligence-gathering.

We are also preparing a comprehensive handbook of narcotics-related legislation for the use of Members during the next session. I believe this is the first time that an effort has been made to gather in one place the major laws and international treaties governing illicit narcotics. I am sure that it will be useful not only to Members, but to U.S. Government agencies and law enforcement personnel as well.

In short, we will continue to search for ways in which we can fight the influx of illicit drugs from overseas, and to improve the coordination and cooperation of our Federal agencies in this effort.

THE PHARMACEUTICAL EXPORT AMENDMENTS OF 1986

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BROYHILL. Mr. Speaker, I am pleased to join our colleagues, ED MADIGAN, JIM SCHEUER, PHIL SHARP, NORM LENT, and others in introducing the Pharmaceutical Export Amendments of 1986. It is vital that Congress consider this legislation as soon as possible.

The Federal Food, Drug, and Cosmetic Act prohibits the export of drugs which have not yet been approved in the United States, even to countries which have approved the drugs. Unfortunately, significant drug therapies are frequently approved abroad first. In 1980, the General Accounting Office reported that 13 of 14 important drugs it reviewed were approved by at least one foreign country before they were available in the United States.

When a drug is approved in a foreign country first, a U.S. drugmaker has only three choices under the present law: First, not selling the drug in the foreign country even though it has been approved there, until the drug is approved in the United States; second, manufacturing the drug in a foreign country with a loss of jobs in this country; or third, if the U.S. company cannot afford to build a plant overseas to manufacture the drug, which is the case for biotechnology companies and small pharmaceutical companies, licensing the technology to a foreign competitor with a loss not only of U.S. jobs but also of our technological advantage.

The Pharmaceutical Export Amendments of 1985 would permit the export from the United States of human and animal drugs and biologicals which are made in this country, but are not yet approved by the Food and Drug Administration, only to developed nations which have approved the drug. Mr. Speaker, it is time that we stop throwing U.S. jobs, and investment dollars away because of this unfair, senseless, restrictive policy. The Senate Committee on Labor and Human Resources has already approved a near-identical measure.

I urge my colleagues to support this legislation.

CZECH DISSIDENT REFUSES TO GIVE UP

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KEMP. Mr. Speaker, despite the repression suffered by citizens of Czechoslovakia, it is encouraging to note that flame of freedom still burns in the hearts of many Czechs.

I would like to bring to the attention of my colleagues an article which appeared in yesterday's Wall Street Journal about Anna Marvanova, spokeswoman for Czechoslovakia's human rights movement, Charter 77.

It is interesting to note that Charter 77 sent a message to the Budapest Cultural Forum and detailed the extreme repression practiced in Czechoslovakia in all cultural areas, particularly that of publishing. I applaud Anna and her colleagues for having the courage to continue the fight in the face of such tremendous obstacles.

CZECH DISSIDENT REFUSES TO GIVE UP

(By Ken Seigneurie)

PRAGUE.—Anna Marvanova, 57 years old, is an active member of Charter 77, Czechoslovakia's independent human-rights movement. Although in poor health, Mrs. Marvanova has been the group's spokesman twice and has taken part in the publication of some of its best documents. She was interviewed in her small flat.

How do you make your living?

I'm a retired journalist. I worked for 20 years at Prague radio and was chief of foreign broadcasts to underdeveloped countries until 1968. After 1968 I worked in a restaurant washing vegetables and then as a cleaning lady.

What did you do in 1968 to put yourself in disfavor with the authorities?

We refused to make broadcasts declaring that our government had invited the Warsaw Pact forces into the country.

Is your case unusual?

The Czechoslovak Communist Party purged 500,000 people in the aftermath of 1968.

Most of these people, as I understand it, have led quiet lives since then. You, on the other hand, have been at the forefront of the human-rights movement and have suffered greatly for it. You've been in police custody in countless occasions; you've seen your children's careers and personal lives disrupted, not to say ruined. Why didn't you just keep your beliefs to yourself after 1968—buy yourself a little house in the country and garden on the weekends—instead of drafting Charter 77 documents?

My father taught me to read and to think. He was a member of the party—I was, too, until 1968—but he respected the truth beyond all else. He taught me to think critically, to ask the embarrassing question.

For example, how can I accept the notion that there are two kinds of nuclear missiles and that only Pershings are bad while SS-20s are good? It should not be possible to let such a lie be passed off. Somebody has got to say something about it.

Charter 77, the oldest human-rights movement in Eastern Europe, is sometimes said to be falling into a "ghetto existence," that is, tolerated by the authorities as long as its activities and documents remain isolated. The chartists, in turn, the thinking goes, "oblige" the authorities by not seeking to become a popular movement. Is there any truth to this speculation?

First, you speak of the Charter as if it's supposed to be in opposition to the government. It's not. Political power has never been an aim of the charter movement. Its signatories want only respect for human rights.

As for the Charter's "ghetto existence," we don't want that—closed societies are ghetto enough if you ask me. The work of the charter goes on. It's the authorities' reaction that changes. In 1982, my first year as spokesman, I was summoned to the police station at least once a week from 8 a.m. until 1 p.m. for the first six months of the year. In 1983 I was again spokesman but the police left me alone. How do you explain that?

If the Charter rejects banishment to the ghetto, are there any plans to reach a wider audience?

That's something the police would like very much to know as well.

What keeps people from joining?

Fear. They are afraid for their jobs, their standard of living and for their children's opportunities in life.

Is there anything that can be done to attract people to the movement in spite of the consequences?

There are now about 1,300 signatories to Charter 77. If we wanted sheer numbers, we could probably get more, but that's relatively unimportant.

A young man came to me not long ago asking to sign the Charter. He was a student. I told him, "Finish your studies first." He'd have certainly been expelled from the university for signing and then he'd have been given a job cleaning sinks and toilets. . . . In fact, even if he decides later not to sign, he can still contribute greatly to the human-rights movement by being an active sympathizer.

What can be done in the West to help the human-rights movement in Eastern Europe?

Without a doubt, official contacts with Charter 77 and other human-rights representatives is the most important help we can get. Recently, we have had visits by foreign ministers of both Britain and France. both of these diplomats made an effort to see Charter signatories. . . . These meetings do not go unnoticed by the authorities. Public opinion is important to our government and the mere fact that a foreign diplomat wants to meet with us implies that we are a legitimate movement.

What do you think is the greatest threat to independent thought in Czechoslovakia today?

The indoctrination of children. today, the average 20-year-old has only a vague idea of what happened in 1968. Even [older people] are terribly uninformed about the recent history of their own country.

The schools teach children a "history" that never existed. As a result, the nation is losing its memory.

THE LEADERSHIP OF JOHN W. McCORMACK

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. JACOBS. Mr. Speaker, our former colleague, James Quigley has given a fine biography of our dearly departed former Speaker of the House, John McCormack. It is right that it be recorded for history.

(By James M. Quigley, President of the Association of Former Members of Congress)

I am pleased and proud to be here. It is an honor to be inivited to be part of this evening set aside to remember John McCormack.

I suspect that many, perhaps most, of you knew John McCormack longer and better than was my privilege. My association with him was in the Congress of the United States. All the time I served in the House, John McCormack was my leader. That is the way I think of him and remember him. Yet that view provides only a snapshot of his long and distinguished career.

John McCormack had served in the U.S. House of Representatives 26 years before I got there and he served for another 10 years after my constituents qualified me for membership in the Association of Former Members of Congress. When I was a freshman Congressman, John McCormack had already served as House Majority Leader for over a decade. And his career as Speaker did not begin until two years after I left the House.

All of this may suggest that, if this were a court of law, objections might well be heard that your speaker this evening is not qualified to testify as an expert witness on the life and career of John W. McCormack. Having come this far, I can only hope that the ruling from the bench might be, "let's hear what the witness has to say and we'll let it in for what it is worth.

I can begin by testifying to the truth that, for all practical purposes, John McCormack's entire career was in politics. As a young man before and after World War I he practiced law, but I suspect that even then his mind and heart were in politics. When he was elected to Congress at the age of 36 he was already an experienced legislator; having served two years as a state representative and four years in the Massachusetts State Senate.

John McCormack ran unsuccessfully for Congress in 1926. That statement is technically correct but not accurate. That campaign was only unsuccessful in the sense that he did not win. But John McCormack conducted himself with such impressive civility during the campaign and after his defeat that it all but assured his election to the House 18 months later when the incumbent Congressman died.

As I hope to be able to demonstrate, the fact that John McCormack went to the Congress in 1928 was a highly determinative factor in his career. Had he been first elected to the House in 1930, his career, might have taken a different path. I am certain this would have been true had he not become a Congressman until 1932 or '34. We might still be here paying tribute to him but remembering him, perhaps, as the Mayor of Boston or Governor of Massachusetts rather than as Speaker McCormack.

I can testify further that John McCormack's political career was in the House. As he himself put it, "My life was in the U.S. House of Representatives. I was a legislator, and mightly proud of the fact. That was the life I loved."

And thanks to the appreciation and good judgment of his constituents, not to mention a strong Democratic party organization, John McCormack was able to live that life and pursue that love from 1928 until he retired in 1970.

The 42 years he served in Congress represents approximately ⅛ of our history as a nation. And what a slice of history it was. John McCormack came to the House a year and a half after Lindy flew to Paris. Thirty years later, in the wake of sputnik, McCormack was the chief sponsor of legislation which created NASA and established a House Committee on Science and Astronautics. It was my privilege to serve with him on that committee as we set about laying the foundations for what ultimately became this nation's very successful ventures into space.

From Lindy to walking on the moon suggest the size of the frame that encompassed this man's remarkable career. When John McCormack first came to Washington, Herbert Hoover was about to replace Calvin Coolidge in the White House and both houses of the Congress were firmly in the hands of the Republicans. All indications were that this was a situation that could only endure.

Question: What if it had? What would John McCormack's career have been? Would he have remained in the House indefinitely? Or would he, chafing under seemingly perpetual minority status, ultimately decide to run for mayor or governor or the U.S. Senate or, might we be remembering him tonight as Judge McCormack? In my lifetime I have watched scores of Congressional careers turn, for better or for worse, in such directions.

We know that this did not happen to John McCormack. This was not his fate because shortly after he arrived in the House of Representatives a revolution happened and the young Congressman from Massachusetts was quickly caught up in it. His life and the nation's would never be the same.

John McCormack was in Congress for less than 13 months when the stockmarket crashed and the fuse was lit on a political bombshell. The first shock wave was felt in the midterm election of 1930 when the Democrats took control of the House. It was not fully understood at the time but this was the beginning of one of the nation's historic political realignments. With F.D.R. in 1932 the Democratic tide became a tidal wave. The Democrats kept increasing their House seats in each subsequent election. By 1936 the ranks of the Republicans in the House had been reduced to a corporals guard of just 89 members.

Having only eighty-nine Republicans meant one thing: an awful lot of Democrats on the other side of the aisle. Many of these new members never expected to find themselves in Congress. Very few had any legislative experience. Those that did were mostly from the South.

Looking back, it is obvious why John McCormack would at this point in time become one of the small cadre of leaders who would form the power structure in the House for the next generation. McCormack's unique qualifications were abundant. He was an experienced, intelligent, legislator from the North. He came from and had an understanding of big city organization politics. And, on top of all this, he was a good Catholic and a true progressive in a group that was basically Southern, Protestant, and conservative.

In ways that will never be known, John McCormack through all of his years in the House, served as a bridge between the poles that divided the Democrats. It was often a thankless job, one frequently not understood and one which all too often invited criticism of him from all sides. He rode out many a storm. But he loved it. He was a legislator. He knew that compromise is the essense of the legislative process.

In ways large and small, John McCormack helped shape much of the legislation that changed this nation and the world. The legislation that created much of the New Deal, the Fair Deal, the New Frontier, and the Great Society worked their way through the Congress when John McCormack was either the House Majority Leader or its Speaker.

For 30 of his 42 years in Congress, John McCormack was a leader in the House. From 1940 on, except for the 4 years—during the Republican controlled 80th and 83rd Congresses—he served as House Majority Leader. In 1962, he was elected Speaker of the House. McCormack's span of leadership covered the years of World War II; the Marshall Plan; setting up the United Nations. He served through the Cold War with its varying temperatures; Korea and McCarthysim to detente. His hand was on the Congressional tiller as the nation moved through the turbulent waters churned by the Warren court, the Civil Rights movement, and as the nation moved into and began to move out of Vietnam. I submit that any nation that could work its was through that agenda has an element of greatness. And the one national leader who was there helping America work its way through it all was John McCormack. He also had an element of greatness.

It was a greatness that was not always readily apparent. John McCormack's role as a national leader is both underestimated and unappreciated. It is likely to remain that way. The explanation for this contradiction is bound up in a combination of two things: personalities and geography.

John McCormack served in Congress under F.D.R., Truman, Ike, Jack Kennedy, Lyndon Johnson, and Richard Nixon. Whatever the merits or demerits of their respec-

tive administrations, all of them were Presidents who knew how to use the "Bully Pulpit" that is the White House and each, in his own way, managed to pretty much dominant events in Washington.

It was also John McCormack's fate to have been Majority Leader in the House during the years when Sam Rayburn was Speaker. Rayburn served longer as Speaker than anyone in history and in the process managed to put his imprint on the job. Speaker Rayburn may not have dominated events in Washington, but he clearly was a dominate force in the House of Representatives for a full generation.

Last, but not least, on the matter of personality was the fact that John McCormack served all but the last two years of his Speakership during the presidencies of John Kennedy and Lyndon Johnson. Both strong personalities. Kennedy was a master of the media and Lyndon was a past master of the legislative process. As a consequence, credit for the much legislative accomplishments of the early and mid-sixties tended to be given to—or grabbed by—the White House. In all candor, this process was enabled by the fact that up on Capitol Hill the leadership was in the hands of two quiet Irishmen, Mike Mansfield on the Senate side and John McCormack in the House. By training and temperament both were deferential gentlemen not given to hogging the spotlight.

And then there was the matter of geography. The reality is that John F. Kennedy and John W. McCormack both happened to come from Massachusetts. In this auditorium and to this audience, I do not have to dwell on the tremendous impact that J.F.K's life and death had, not just on this city and this state, but the entire nation and much of the world. A thousand years from now students and playwrights may still be combing through the ruins of Camelot seeking meaning and purpose and reason for that brief moment in history. They are not likely to be doing the same with the long, productive career of John McCormack. And to all of that I can only recall President Kennedy's sage observation; "Life is not fair."

And mentioning fairness, causes me to remember the criticism that was directed at John McCormack as House Speaker. At the bottom much of that criticism seemed to be that he wasn't Sam Rayburn. And he wasn't! And that he didn't run the House the way Rayburn did. He did not! Nor has anybody. Nor is anybody likely to ever again. Check with Carl Albert and Tip O'Neill to verify this new reality.

Once again a revolution has occurred. The House of Representatives is a dramatically differenct institution than the one in which I served a generation ago. It was then an institution sorely in need of change. It is now an institution that many believe has changed much too much for its own and the nation's good.

Not unlike Pope John the 23rd, John McCormack sensed the need for change in an institution he loved. In 1958, the youner liberal Democratic House members brought into being something we called "The Democratic Study Group". Ostensively the role of the new organization was to inform its members about issues and to study ways by which the House could be made to operate more efficiently. Its founders had other goals in mind and I, for one, am sure that John McCormack sensed what they were. From the beginning, the Democratic Study Group had McCormack's left-handed blessing and during his speakership it more and more became involved in the process of change that has been the hallmark of the House for the last 25 years. Just how involved is demonstrated by the fact that in 1977 Tip O'Neill, one of the charter members of the Study Group, was elected Speaker of the House.

It is fair to say that as Speaker, John McCormack underestimated the momentum for change that was finally unleashed after 20 years of being under Sam Rayburn's tight reign. He was not alone in this regard. When John McCormack became Speaker in 1962, he was seventy-one. A wild decade of sit-ins, demonstrations, riots, and assassinations was about to burst upon us. Men half McCormack's age failed to sense the velocity of the winds of change that were about to sweep through our country and all of its institutions, including the government.

There was one other possible flaw in John McCormack as Speaker of the House. John could be kind, fair, and considerate and that's exactly what he was 99% of the time. But, boy, could John be partisan! Many a time during his 18 years as his party's leader he would go into the well of the House and deliver one of his stem winders, a powerful speech which would not only stem the tide of opposition but roll it back. this was a wonderful ability for a Majority Leader but it may have handicapped him as Speaker.

A final note. One of life's most difficult decisions is knowing when to get off stage. In show business there is always the urge to sing one more song, tell one more joke. In sports it is the temptation to play one more season, fight one more fight. In politics there is always the lure to run for one more term. With the benefit of 20/20 hindsight it might have been better if John McCormack had resisted that lure. In any case, his was a long and distinguished career, his was a lifetime devoted to public service.

Maybe the hardest decision of all is knowing when to end a speech. So let me conclude by confessing that as I look back on my own unplanned and less than distinguished career, the most satisfying years were the ones spent in public service. I am proud to have been part of the Kennedy Administration. I can say the same about my Johnson years. But most of all I am proud of having had the privilege of serving in the U.S. House of Representatives. It was there that I knew John McCormack. I benefited from his friendship and leadership. So did our country.

IMPROVING CHILD SUPPORT ENFORCEMENT

HON. JOHN H. CHAFEE

OF RHODE ISLAND

IN THE SENATE OF THE UNITED STATES

Thursday, December 19, 1985

● Mr. CHAFEE. Mr. President, I am pleased to cosponsor and lend my fullest support to S. 1889, a bill to prevent the discharge of certain child support debts.

This bill represents another long stride toward ensuring that child support obligations are met. By closing a loophole in bankruptcy law which allows some absent parents to escape their financial responsibilities, it caps recent congressional actions to tighten child support enforcement.

Last year, as part of its amendments to Federal bankruptcy law, Congress broadened the category of child support obligations that may not be dismissed in the event of bankruptcy. This change has afforded much-needed protection to many children of absent parents.

Simply through oversight, however, the bankruptcy amendments did not extend this protection to cases in which a child support debt is established through administrative—as opposed to judicial—proceedings.

This bill aims to correct that oversight, thus closing a loophole which seriously undermines child support enforcement.

Sixteen States now use administrative proceedings to establish child support debts. Other States are being encouraged to follow suit, in order to reduce costs and lighten overloaded court schedules.

If we do not adopt this measure, more and more children will be left unprotected as a growing number of States adopt administration process, an efficient and cost-effective means of securing child support. In addition, by allowing this loophole to persist, we will inadvertently deter States from taking this step.

S. 1889 would protect children in all States—even in those that have not yet adopted administrative process. Many such children are covered under the administratively ordered child support arrangements of neighboring States. This bill would ensure that these children as well are provided for in the event of bankruptcy.

Mr. President, Congress last year took a giant step toward better child support in adopting a series of amendments to the Federal child support enforcement program. This bill would cap those efforts by giving administratively ordered child support obligations the same protection that court-ordered obligations now enjoy. For that reason, I urge my colleagues to give this proposal their overwhelming approval.●

TRANSPORTING MILITARY PERSONNEL SAFELY

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. VISCLOSKY. Mr. Speaker, I wish to bring attention to an excellent point made by my colleague from Indiana, ANDREW JACOBS, JR., regarding the need to improve safety in transporting our military personnel. I am submitting an article from the Indianapolis Star in order that my colleagues in the House may consider this fine idea.

[From the Indianapolis Star, Dec. 19, 1985]

JACOBS URGES MILITARY NOT TO USE CHARTERS

WASHINGTON.—Rep. Andrew Jacobs Jr., D-Ind., proposed Wednesday to Secretary of Defense Caspar Weinberger that loss of life in chartered airline crashes could be avoided if the Air Force were to fly United States military personnel.

Jacobs recalled being a 19-year-old Marine going to Korea in 1951 aboard a privately owned World War II victory ship.

"The contractor made the unjust portion of his profits by virtually feeding the Marines nothing at all for two weeks," Jacobs said.

"That outrage was one of the principal reasons I ran for Congress the first time . . . I thought that if I could go to Congress I might be able to find that contractor. I never did find that contractor, but I believe I heard from his shirt-tail cousin in the crash of the contractor's airplane in Canada and the unnecessary death of our young soldiers," the congressman said.

Jacobs observed that, considering the size of the federal deficit and outlay for defense, the country should have enough military transport places with pilots in need of regular flying time.

"It is quite clear that our own military personnel have major incentives to do proper maintenance on our own military aircraft. It is equally apparent that these fly-by-night contract airlines do not," he said.

"Surely, it is time to adopt a safer policy for our young men in uniform."

ARTHUR SCHLESINGER ANALYZES FUTURE OF THE PHILIPPINES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MILLER of California. Mr. Speaker, the continuing deterioration of the Marcos regime in the Philippines offers a textbook example of how U.S. foreign policy strategy repeatedly places this Nation at variance with popular anger toward governments which are vicious toward their own people, while amiable toward Washington.

Past administrations have followed the same sadly mistaken course now pursued by President Reagan toward the Marcos government. This myopia knows no ideological or party limits. In each case, it has pushed America toward an unholy alliance with an unloved dictator whose preeminant attribute is his undiminishable affection for American weaponry and dollars.

The embarrassingly bogus trial of those accused of murdering opposition leader Benigno Aquino demonstrated "justice, Marcos-style." In a few months, in all likelihood, we are going to be treated to "elections, Marcos-style." As the commission which just returned from Manila has reported, there is a slim possibility that the forthcoming elections will afford Filipinos an opportunity to demonstrate their attitude toward the Marcos government. More likely, the election will supply the veneer of democracy that Marcos desperately is seeking to dilute growing condemnations of his rule.

Of course, the elections are flawed by their very nature. If they were truly free and open, they would obviously violate a cardinal axiom of the political absolutism by which Mr. Marcos rules: Never yield power. Respect for that axiom is why Mr. Marcos has declined to vacate the presidential office, as required by the constitution, prior to the election. It is highly unlikely that Mr. Marcos will permit any outcome which threatens to disrupt his authority.

We in the Congress must keep in mind that the election in February will not seriously address the complex problems which are endangering the future of the Philippines as a democratic nation and an important ally of this country. If the growing insurgency of the New Peoples Army represents a threat to those goals, so, too, does the continued stewardship of Marcos. Yet after years of propping him up, there is little the United States can do at this point to change either his policies or the leadership of Philippine politics.

The distinguished historian Arthur Schlesinger, Jr., of the City University of New York, has recently reviewed with his typical astuteness the dilemma which now confronts the United States with respect to the future of the Philippines. I would like to share Professor Schlesinger's insights with my colleagues on this subject, which certainly will be one of the key issues in our own foreign policy in the new year.

[From the Wall Street Journal, Dec. 18, 1985]

SEND MARCOS PACKING

(By Arthur Schlesinger, Jr.)

There is a certain grim irony in the vacillations of the Reagan administration as it confronts the decomposing Marcos regime in the Philippines. Only five years ago during the presidential campaign, Mr. Reagan and his neoconservative intellectuals condemned President Carter for abandoning our great "friends" the shah of Iran and Anastasio Somoza and in consequence "losing" Iran and Nicaragua. The implication was that a stronger president would have pursued tougher policies and that these policies could easily have preserved those wonderful friends of the U.S.

A conservative administration in Washington, the argument ran, would never have undermined pro-American regimes by insistence on human rights, social reforms, a peaceful transition to democratic government and other such sentimental nonsense. It would have given these friends of America unconditional support and would have done whatever was necessary to rescue them. If only there had been a Republican president, the shah and Somoza would still be in power, and their countries would still be in the Western camp.

BY NO MEANS CLEAR

This line of argument raised questions, then and now. Assuming for the moment that it might have been in the national interest of the U.S. to preserve thieving despots in Iran and Nicaragua, it is by no means clear that it lay within U.S. power to do so. Rhetorical assistance will not do it. Mr. Carter tried that, congratulating the shah in 1977 on "the admiration and love which your people give to you" and praising Somoza as late as 1979 for his progress on human rights. Military assistance will not do it. The U.S. sold $19.5 billion in arms to Iran from 1972 to 1979, and Somoza's National Guard never languished from lack of weapons.

We always overrate the capacity of the U.S. to shape the destiny of other countries. The balance of internal forces generally decides the future of nations. If President Carter had never opened his mouth on the subject of human rights, the shah and Somoza would have fallen all the same. It seems most doubtful that any U.S. policy short of military occupation could, have saved them. And one wonders whether it serves long-term American interests for the U.S. to intervene militarily in other countries in order to protect hated regimes against the wrath of their own people.

These questions remain speculative in relation to Iran and Nicaragua. But the Reaganite assumption that there was an easy alternative to the Carter policy now comes to the test in the Philippines. For Ferdinand Marcos is in the same position today that the shah and Somoza were in during the late 1970s. This surely is the time for those brave solutions that, according to neoconservative myth, Mr. Carter so softheadedly rejected a few years back. Instead, one finds the Reagan administration pursuing the same policy toward the Philippines that the Carter administration pursued toward Iran and Nicaragua.

Ronald Regan, like Jimmy Carter, began with an effort to reform a disintegrating regime by fulsome rhetorical blandishment. This is the famous policy of "constructive engagement" with repressive governments. Vice President George Bush declared that he loved President Marcos for his "adherence to democratic principles." President Reagan said in last year's presidential campaign that the choice was between Mr. Marcos and "a large communist movement to take over the Philippines." Mr. Marcos naturally interpreted such tender words not as a signal to change his ways but as a license to intensify his course of domestic plunder and repression.

But the more his men have harassed and murdered political opponents, the more money they have stolen from their country, the stronger the opposition has become. As disintegration continues, the Reagan administration, like the Carter administration before it, is changing its course. Now we are urging on Mr. Marcos the need for human rights, social reform and a peaceful transition to democratic government. Mr. Reagan today is duplicating in the Philippines the policy for which he so righteously denounced Mr. Carter in the cases of Iran and Nicaragua.

He is doing so because he has no more real choice in 1985 than Mr. Carter had in 1979. He is learning now what Mr. Carter learned then: that there is no virtue in tying the U.S. to a despotic regime doomed to collapse. The course of unconditional commitment to unpopular despots is not likely, in the absence of military intervention, to save the despots—and it is quite certain to alienate the inevitable successor regime and in the meantime to strengthen Marxist revolutionaries.

Can reform pressure salvage the situation? The best hope in the Philippines would be the orderly transfer of power to the moderate opposition. So the U.S. is calling on Mr. Marcos, as President Carter called on the shah and Somoza, to do things that, if he carries them out, will destroy the

bases of his power. It would be foolish to count on Mr. Marcos to collaborate in bringing about his own downfall. His interest lies not in strengthening the moderate opposition but in destroying it. His hope lies in polarizing the nation so that he can present himself as the only alternative to communist takeover.

Mr. Reagan, like Mr. Carter before him, is impaled on a dilemma. The longer he waits in the vain expectation that Mr. Marcos will voluntarily undertake reforms and relinquish power, the more radicalized the situation will become and the less likely it is that the moderate opposition will inherit. Mr. Carter waited too long in Iran and Nicaragua. The democratic alternative, such as it may have been, melted away, and we were left with Ayatollah Khomeini and the Sandinistas.

But what can we effectively do to help the democratic alternative in the Philippines? Secretary of State George Shultz in London the other day delivered a paean in praise of covert action. By this he meant aid for guerrilla bands in Nicaragua, Angola, Cambodia and Afghanistan. Actually the history of covert action shows that it has had its enduring triumphs when employed for political rather than for military ends—not to kill communists but to support democrats, as in Western Europe in the late 1940s.

There is not much the U.S. can do to control the destiny of the Philippines. The moderate opposition, though it has finally agreed on a ticket in the presidential election, has not shown much unity of purpose so far. But it does enjoy widespread popular support. The U.S. should distance itself even more unequivocally from the Marcos disaster and do what it discreetly can to help democratic Filipinos make a strong showing in the elections that the regime at this very moment is planning to rig against them.

EXPLOITED FAVOR AND AID

I trust we will not be diverted from a realistic course by talk about how much the U.S. "owes" to Mr. Marcos. Talk about sentimentality! Mr. Marcos has never sacrificed his own interests to help the U.S., anymore than the shah and Somoza did before him. Like the shah and Somoza, Mr. Marcos has systematically exploited the favor and aid of the U.S. to amass personal power and wealth. Rep. Stephen Solarz's House Foreign Affairs Subcommittee on Asian and Pacific Affairs is documenting this point in its current hearings. As The Economist crisply puts it, "The only aid (or 'rent for a base') that should be given to people like Mr. Marcos is a one-way ticket to an anti-assassin-guarded holiday resort."

It has taken the Reagan administration a long time to learn the lesson the Carter adminstration learned so painfully about the unprofitability of trying to prop up doomed despots. As the Reagan people begin to learn the lesson in the Philippines, one hopes that they will apply it in other parts of the world.

There is every indication that Gen. Augusto Pinochet in Chile stands today about where Mr. Marcos stood in, say, 1983. Constructive engagement will not reform Gen. Pinochet any more than it did Mr. Marcos. Effusive words will only encourage him in a course of repression. Let us move to divorce the U.S. from the brutal dictator in Chile before the situation is hopelessly radicalized and while there is still time for a democratic alternative to emerge.

THE AMERICAN PEOPLE WILL ALWAYS SUPPORT FREEDOM FOR THOSE WHO ARE OPPRESSED

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KILDEE. Mr. Speaker, I would like to express my personal outrage over the Government of South Africa's apparent refusal to allow a message of freedom from more than 1,000 citizens of my district into their country.

Several weeks ago, I joined with many of my colleagues in obtaining the signatures of concerned Americans on a letter expressing our outrage over the system of apartheid in South Africa and our dedication to seeking an end to that abhorrent practice. This freedom letter was to be personally delivered to the South African Anglican Bishop Desmond Tutu and the people of South Africa by the Free South Africa Movement. But the South African Government has been unwilling to act on visa requests by anyone who is planning to deliver the freedom letter. Over 50 United States citizens have volunteered to deliver the petitions to South Africa. However, none of them have been able to obtain the required visas to enter the country. Bishop Tutu has now decided to come to the United States to accept the freedom letter petitions in Washington, DC, in front of the South African Embassy on January 8, 1986.

Regardless of how hard the Government of South Africa tries, it will never be able to isolate its immoral policies from the scrutiny of world opinion. The policy of apartheid in South Africa has resulted in unbelievably cruel, repressive, and inhumane acts by the South African Government against the overwhelming majority of the South African people. Such state-perpetrated activity is in direct conflict with the ideals of self determination and personal freedom which we Americans hold dear. The American people will always support freedom for those who are oppressed, including those in South Africa.

GE BRINGS GOOD THINGS, FOR GE, TO LIFE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BROWN of California. Mr. Speaker, three events this past week, not at first glance obviously related, reveal the unfair and destructive fiscal policies of the Reagan administration:

General Electric's purchase of RCA;

Congressional passage of the Deficit Control Act of 1985 (the so-called Gramm-Rudman-Hollings bill); and

The House passage of the Tax Reform Act of 1985.

The GE purchase of RCA illustrates in microcosm the unfair fiscal policies of the Reagan administration. Citizens for Tax Justice has found that in the 1981, 1982, and 1983 tax years GE paid no taxes, and in fact received some Federal tax refunds. In 1984 it paid some taxes, but for the 4-year period the Government owed GE $98 in tax refunds. Had GE been taxed at the pre-1981 tax rates it would have paid about $4.5 billion in taxes instead of receiving refunds. By taking advantage of accelerated depreciation rates, purchase of tax losses by other businesses and other tax credits, it was able to accumulate nearly enough cash for the purchase of RCA.

Such tax preferences are unfair both to ordinary taxpayers and to other corporations. Salaried taxpayers, who usually cannot participate in such attractive benefits, have in effect made a direct transfer payment to GE for its RCA purchase—it's unfortunate that they cannot be part owners. Furthermore, other companies such as Whirlpool, a corporation with similar product lines similar to GE, paid 42 percent of its profits in taxes during the same period.

It is not clear that the GE purchase will increase jobs, capital spending for new equipment, or productivity. In fact Citizens for Tax Justice has shown that GE, again contrasted with Whirlpool, invested very little in capital equipment during the 1981–84 period. A merger, of course, will cost jobs over the near term where there is considerable duplication between GE and RCA. The long term remains unclear.

GE's purchase has been made possible because of the Reagan administration's tax cuts of 1981 which permitted the generous depreciation allowances and purchase of "tax losses" from other companies.

These tax benefits combined with greatly increased defense spending (from which GE, a major defense contractor, has benefited) has created record annual Federal budget deficits, more than three times larger than the largest deficits in the Carter administration, and his doubled the total Federal deficit from $1 trillion to $2 trillion in the 5 years of the Reagan administration. To the extent that present taxpayers have not paid for the GE/RCA merger, future taxpayers will have to by paying on the budget deficit.

In turn, record deficits, used to date with destructive effect on domestic programs, have forced on the administration and Congress the need for deficit reduction measures passed this week in the form of the Deficit Control Act. This bill, agreed by all, including most of its supporters, to be bad legislation, is certain to create more chaos in fiscal planning and to provide further excuses to cut many domestic programs. Congress and the administration have spent most of the past year wrangling over budget matters, and the Deficit Control Act seems certain to intensify such debates in the future to the exclusion of consideration of other legislation for the welfare of the country.

Funds for cities, education, scientific research, the Nation's infrastructure, health care, environmental and workplace health protections will be under tremendous budget cutting pressure. We should note where these funds will have gone should the domestic budget cutting occur: for military spending and for tax loopholes such as those of which GE took advantage.

Finally, the above facts indicate the desperate need for legitimate tax reform to correct entrenched unfairness, as well as more recent inequities created by the administration. The House Ways and Means Committee found that 3,000 millionaires paid no taxes in 1984 and half of the largest and most profitable corportions in the country paid no taxes in at least 1 of the last 4 years. The present tax bill which just passed the House is a considerable improvement on the status quo. But whether its virtues will survive Senate consideration remains to be seen. Let us hope the worst loopholes stay closed and some measure of equity, so flagrantly outraged by the tax preferences from which GE profited, is brought into the Tax Code.

Although events of the last week are of greater moment than "Death Valley Days," GE does bring good things, for GE, to life.

MRS. MAYBELL VINCENT, 94-YEAR-OLD TRENTONIAN SEWS, CANS, QUILTS

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. JONES of Tennessee. Mr. Speaker, I rise today to share with my colleagues what I think is an inspiring story. It recently appeared in the Trenton Tennessee Herald Gazette. It is about Mrs. Maybell Vincent. She is 94 years old and she is blind.

Despite her handicaps, she makes aprons, pillowcases, and has quilted eight quilts since the spring of this year. She cans her food, cleans, cooks, and washes herself. I think all of those things are remarkable for a woman of her age and even more remarkable when we consider that she is also blind.

Mrs. Vincent is an excellent example of someone who has determined that she is going to care for herself. She even tells representatives of the Gibson County Department on Aging that there are others that need help more than she does. I want to take this oppportunity to insert in the RECORD the story about Mrs. Vincent and hope that my colleagues will share with me great pride in what this American has accomplished and continues to accomplish.

BLIND SINCE AGE SEVEN—94-YEAR-OLD TRENTONIAN SEWS, CANS, QUILTS

It's an amazing phenomenon that Mrs. Maybell Vincent makes her own clothes on a sewing machine. She makes aprons, pillow cases and has pieced 25 quilt tops and quilted eight quilts since spring of this year. She cans her food, prepares food for the freezer, she cleans, cooks and washes for herself and prefers to hang her clothes on the line rather than using her dryer.

Why is this so unusual? Mrs. Vincent is 94 years old and has been blind since she was seven.

Lana Robinson, social service outreach coordinator for Gibson County Dept. on Aging, said she has visited and assisted Mrs. Vincent on several occasions, offering the department's services. "Mrs. Vincent feels that there are other senior citizens who need the homemaker and nutrition service more than she does," the coordinator said. "Her general health is excellent, and she takes no prescribed medication," she added.

Mrs. Vincent grew up near Birmingham and moved to Trenton in 1961. She has a stepdaughter and a stepson who live in Michigan.

She has traveled extensively and appeared on the Grand Ole Opry several times with the Carter Family. She is a member of the Church of God of Prophecy on Factory St. in Trenton where she attends services regularly.

Mrs. Vincent said she has to keep moving to keep her muscles active, because if she gives up, she woud not last long.

She is truly a remarkable woman.

BITTER HARVEST II: A STATUS REPORT ON THE NEED FOR EMERGENCY ASSISTANCE IN AMERICA

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SCHEUER. Mr. Speaker, as the business of this session draws to a close and Members of Congress prepare to return to their respective homes for the holidays, we would do well to remember those in our society who are hungry and have an urgent need for nutritional assistance.

Earlier this week, the Food Research and Action Center released a report entitled "Bitter Harvest II: A Status Report on the Need for Emergency Food Assistance in America." This report clearly demonstrates that the number of Americans in need of nutritional assistance has increased under the policies of this Administration. One can only wonder how these individuals will fare under the bitter fruit of Gramm-Rudman in the next few years.

I commend to the attention of my colleagues the Executive Summary of this important report which is printed below along with two articles which appeared in the New York Times and the Baltimore Sun on December 17, 1985.

EXECUTIVE SUMMARY

Bitter Harvest II: A Status Report on the Need for Emergency Food Assistance in America provides an up-to-date look at the demand for emergency food assistance in the United States in 1985.[1] In Bitter Harvest II we have confirmed our earlier research (Bitter Harvest I) that the faces of hunger are varied and the numbers are growing. Emergency food providers tell us that people who come to their agencies most frequently are: families with children, people who have long since "given up looking for work" in communities of high unemployment, recently unemployed people who are experiencing hunger for the first time in their lives.

We received responses from 370 food banks, soup kitchens and emergency food providers in 47 states and the District of Columbia. The respondents are geographically distributed nationwide.[2] Since we were analyzing the status of "emergency food providers;" e.g., food pantries giving out bags or boxes of food on a periodic basis, our findings are based upon the 290 respondents who are in fact emergency food providers. All providers did not answer or complete every question. We have noted the actual number of respondents for each finding. Our primary findings are as follows:

(1) There was an average increase of 17 percent between 1984 and 1985 in the average monthly number of households served by these emergency food providers. 76.3 percent of providers reported that the average monthly number of households served increased from 1984 to 1985, 5.7 percent reported no change in caseload and 18 percent reported a decrease. The average increase in the number of households served per month by each survey participant between 1984 and 1985 was 37.1 (262 respondents). In Bitter Harvest I, in 1984 we found a 21.9 percent increase between 1983 and 1984 from a different group of emergency food providers.

(2) 89.8 percent of the respondents indicated that a significant number of people came for emergency food assistance because Food Stamps and other financial resources that they receive do not provide enough food to last the whole month (285 respondents). We did not ask this question in 1984, hence no comparison is available.

(3) 69 percent of the respondents stated that 50 percent or more of their caseload is made up of families with children (290 respondents). This compares with 61 percent in 1984.

(4) Almost two thirds (63.9 percent) of the emergency food providers responded that private charity cannot meet the current need for food assistance in their communities (277 respondents). This compares with 71 percent in 1984.

(5) 86.0 percent of all respondents received household referrals from Social Service agencies (285 respondents). The reason given for the referral 80.9 percent of the time was that the household was not eligible for expedited (immediate) issuance of Food Stamps. (256 respondents). This compares with 84 percent in 1984.

[From the Baltimore Sun, Dec. 17, 1985]

HUNGER RISING DESPITE DROP IN POVERTY RATE, GROUP SAYS

(By Mark Matthews)

WASHINGTON.—Increasing numbers of Americans are seeking help from emergency food programs despite a drop in the nation's overall poverty rate and stabilized unemployment, a Washington-based advocacy group reports.

The Food Research and Action Center released a survey yesterday showing a 17 percent increase between 1984 and 1985 in the

[1] All data is for 1984 and first 9 months of 1985.

[2] Respondents are listed by U.S. Department of Agriculture, Food and Nutrition Service Region (I—New England and New York, (II—Mid-Atlantic, (III—Southeast, (IV—Midwest, V—Southwest, VI—Mountain Plains and VII—West).

number of people served by emergency food providers.

It attributed to the increase to what it called inadequate food-stamp allotments, rigid eligibility standards for emergency government food aid, a still-high poverty rate among some sections of the population and exhaustion of unemployment benefits among the jobless.

Nearly 70 percent of the food providers said that more than half their caseloads involved families with children, the center said.

"Hunger in America was increasing in 1985," said Michael R. Lemov, executive director of the center, a non-profit research and advocacy group that lobbies for increased government food aid. Even though the number of emergency food outlets appears to be increasing, many report turning people away.

The report, Bitter Harvest II, drew from results of a survey distributed to 1,000 food banks, soup kitchens and emergency-food providers, 370 of whom responded. This group included providers in 47 states and the District of Columbia. Five Maryland groups responded.

The report was based on responses from 290 agencies that are called emergency food providers, meaning those who give out bags or boxes of food on a periodic basis.

The biggest increase between 1984 and 1985 was found in the New York-New England area. The lowest was found in the Southwest.

The survey followed an earlier report. Bitter Harvest I, that showed an increase of 21.9 percent between 1983 and 1984 in the number of people getting emergency food aid. The center said that it did not attach much significance to the slower rate of increase this year over last year.

Mr. Lemov said the latest report showed a continuation of "an alarming trend in malnutrition and hunger in the United States, even in a seemingly good economic year. We fear what will happen if the economy slows or turns downward."

The nation's robust economic growth and surging employment has stabilized the jobless rate at about 7 percent. The improved economy is also reflected in the poverty rate, which made its first major drop last year since 1976.

But with those improvements has also come an increase in two groups with high poverty rates—female-headed households and individuals living alone.

The center blamed the number of families with children seeking emergency food assistance on cuts in the federal food-stamp program. It cited Congressional Budget Office figures showing $7 billion in cuts between fiscal years 1982 and 1985.

"The effect of these cuts has been devastating to low-income families, particularly children, who make up over 50 percent of the food-stamp caseload," the report said.

The new multiyear farm program agreed to over the weekend by House and Senate negotiators calls for a small increase in the program of about $350 million over four years, according to a congressional source familiar with the agreement. Mr. Lemov described this as "an exceedingly modest restoration" of benefits.

No statewide figures have been kept in Maryland on the number of people seeking help from emergency-food programs—nor even of the exact number of such programs that exist—according to Ann Miller, director of the Maryland Food Bank.

Ms. Miller said, however, that volunteers from many of the more than 600 programs served by the Food Bank tell of higher demand this year.

Among them is Dominic Jollie, president of the Carroll County Food Sunday program, which distributes emergency groceries from centers in Westminster, Sykesville and Taneytown. Mr. Jollie said the centers provided food to roughly 115 families a week in 1984; this year, they are serving an average of 150 families a week.

In contrast, the food pantry run by Worcester County Hunger Action on the Eastern Shore has seen a drop in the number of clients this year. Catherine Walston, coordinator of the program, said she isn't sure what to make of the numbers.

[From the New York Times, Dec. 17, 1985]

17% RISE IN DEMAND FOR FOOD FROM PRIVATE GROUPS FOUND

WASHINGTON, December 16.—A report showing a 17 percent increase in the demand for food provided by private assistance programs was made public today by the Food Research Action Center, a Washington public interest organization.

The report surveyed 290 of 16,000 emergency food providers across the country, including churches and community groups that distribute food to the poor, according to the group's executive director, Michael R. Lemov. The survey did not include soup kitchens and other programs that serve prepared meals to the hungry.

But John W. Bode, Assistant Secretary of Agriculture for Food and Consumer Services, criticized the report as flawed by "deficient methodology and statistical unreliability." He said:

"The survey was not conducted in a scientific manner. Of the 1,000 surveys sent out, 63 percent did not reply."

BIGGEST RISE SEEN IN NORTHEAST

According to the survey, the Northeast showed the highest increase in demand for emergency food, 54.8 percent over 1984 levels, primarily due to increased demand for emergency food in New York City.

"Major segments of the population in New York are being bypassed by the economic recovery," Mr. Lemov said.

The survey reported that the total number of households receiving food from private assistance programs increased to 83,576 households served by 282 providers in 1985 from 71,510 served by 263 food providers in 1984. Over 70 percent of the agencies surveyed reported a limit on the number of people they could serve, and 42.8 percent reported turning people away for lack of food.

Sixty-nine percent of the respondents reported that more than half of the households they served include children, and 89.8 percent indicated that a significant number of people asked for emergency food assistance because their food stamps did not suffice.

FIGURES ON FOOD STAMP USE

Mr. Bode of the Agriculture Department said one out of nine Americans each month received food stamps, totaling approximately $1 billion a month, in addition to free school lunches available to low income children.

"The increased amount of food provided through emergency food outlets indicates an increase in charitable food activities that augment Government assistance," he said.

Congressional conferees working on the farm bill agreed Saturday to increase the amount of money given to the food stamp progam by $350 millon above current levels, over four years, restoring a portion of the $7 billion cut from the program in 1981 and 1982.

The bill now goes to the House and Senate.

MOURNING OUR SOLDIERS AND DEMANDING BETTER AIR SAFETY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DYSON. Mr. Speaker, today I rise in memory of the 248 American soldiers who were killed last Thursday, December 12, in a tragic airplane crash in Newfoundland. These soldiers were returning home to their loved ones after spending 6 months as peacekeepers in the volatile Middle East. These men who had served their country when asked, are now dead, perhaps unnecessarily.

Mr. Speaker, these men were flying home in a plane that may not have been safe to fly. The Federal Aviation Agency has stated that the airline involved, Arrow Air, was fined $34,000 earlier this year after failing to meet certain safety standards. I have watched the television news in recent days and listened to a tape recording that one serviceman sent home. I listened in shock and disbelief as this soldier told his family that he hoped he made it home from the Middle East. He was not afraid of dying in his role as a peacekeeper, he feared flying on the airplane because it was in such frightful condition. Today that soldier is dead.

The horror of this crash has left many questions which must now be answered. We do not know if this crash could have been prevented by proper maintenance or if it was due to a mechanical malfunction which was unavoidable. What we do know is that this was not a military aircraft. It was a chartered jet, chartered not by our military command but by the Multinational Force and Observers, an independent, international group which coordinates soldiers in the Sinai Peninsula.

Why was this airline chosen? Why are we risking our soldiers' lives as peacekeepers and then sending them home on the cheapest airline available, regardless of its safety record? Why doesn't our military command take responsibility for the movement of our troops?

Our Defense Department wastes billions of dollars on weapon systems that do not work. We cannot allow the Defense Department to pay for the worthless Sergeant York and other defense disasters by cutting corners in airline safety at the cost of American lives. We must adhere to stringent safety requirements if we are to avoid such air catastrophes in the future. We must review the current regulations and make all necessary changes to insure that the safety of our soldiers who defend world peace is not being compromised for any reason.

Mr. Speaker, this tragedy raises many questions of airline safety in the public sector as well. How many of these dangerous airplanes are currently in use? Are our air travelers risking their lives when they board planes across the country? In this era of airline deregulation, I have serious reservations about the condition of many of the planes we use on a daily basis. I believe that now is the time to reevaluate the aviation rules governing the airlines, both large and small. We must ensure that these rules are enough to insure air safety and we must also ensure that these rules are being followed.

There is nothing we can do for the soldiers of the 101st Airborne who perished last Thursday. Their time on this Earth ended approximately 1 minute and 40 seconds after their plane took to the air. This loss of life is mourned by the families of those involved and by our Nation as a whole. We cannot lessen the pain felt by those who loved these soldiers. We can only remember them as we seek to provide safe air travel in the future. We must not let these deaths go silently past us.

DIARY OF A CANCER PATIENT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KEMP. Mr. Speaker, I would like to share with you and our colleagues the diary of a courageous fighter and a good friend, Nathan Perlmutter, director of the Anti-Defamation League of B'nai Brith. Nate started keeping this diary when he discovered that he had cancer last June, and excerpts were published in the New York Times magazine on November 24, 1985. It is these excerpts which follow.

Nate's diary reflects the thoughts and observations of a person who is looking back on his life from a new perspective. He is funny and witty and incisive. He chronicles his reaction, and the reactions of those around him, to the increasingly bad news about his health in the manner of a true scholar, and lets us share his experience.

Best of all, the treatment Nate received was successful, and the growth was arrested. Nate continues to work full tilt at B'nai Brith, and his story should give heart to those who are diagnosed as having cancer, and insight to their loved ones.

Thanks, Nate, for your great example to all of us of courage and dedication to the cause of civil and human rights.

[From the New York Times, Nov. 24, 1985]

DIARY OF A CANCER PATIENT

(Last June, Nathan Perlmutter, national director of the Anti-Defamation League of B'nai B'rith, was told by his family physician, Dr. Elias R. Stoller, that he had lung cancer, a disease that is almost always fatal. For nearly two months he kept a diary, but stopped after X-rays showed the cancer's growth had been arrested. "Maybe the upbeat news relaxed the drama in my head and eased my need for an attentive, unquestioning confidant—my diary," Mr. Perlmutter says. "Maybe though, it was something else. Maybe stunned by the positive biopsy, the sheer act of talking with myself assisted my self-control. And now, 'accustomed' to my cancer, like people who adapt to living by live volcanoes, the drama has ebbed and my fascination with my stranger self too." In his entries, Mr. Perlmutter, author of three books and many articles on social issues, reflects on his medical experiences, his friendships, and his relationship with his wife of 42 years, Ruth, and their children, Nina and Dean.)

(By Nathan Perlmutter)

FRIDAY, JUNE 14, 1985

Yesterday Ellie Stoller told us it was malignant, cancer in the lung, but possibly elsewhere too. So Monday a CAT scan to look around.

Interestingly—at least to me—I'm so cool about it. Is that "strength" or just dumb?

I do have, or briefly had, a problem telling people. I'm so visible in the agency. And for weeks, the cough, the exams, and so they ask and I've been saying, truthfully, I'm taking tests. So now the tests have given an answer. At first I lied, but right away saw I couldn't. It was transparent. So you tell them: malignancy. And that's sticky too. The pity look is heavy.

I've got to start thinking about preparations. Does Ruthie own the bonds, stocks, etc., with me jointly? Do I own them alone? Tax implications? After the CAT and bone scans, maybe it'll wait, maybe it'll need acting on right away. We'll see.

SATURDAY, JUNE 22

So many callers. Touching. Funny how they sort themselves out, and not in predictable ways. Some are truly helpful in their conversation. Some can't handle it themselves. However, they still want to reach out, and the result isn't a good touching. And some you love are in the latter category, and some who are casual friends are in the former.

To go to Beth Israel or to Sloan-Kettering? To race at Garden State or Belmont? But it's not that simple. At Beth Israel, I have Ellie Stoller, and he's all for me on a personal level, all for Ruthie, who in so many ways needs him more than I do. But the Sloan-Kettering plant is better. Go to the man or to the plant. We'll see Monday. Meanwhile, time is pressing—I've got to start the treatment.

I'm not sure I really expected the direct—too definitive—answer I got to my question. I asked Dr. [John C.] Brown how long, on the average, do people at my age with this form of cancer live? And the guy answers me! A year and a half to two years is the average. Some do not live that long, some longer, it depends. It's like some soap opera, only you don't have a dial to turn the station.

From this news, I cabbed to the office to preside over Bob Kohler and Ben Zafrin's retirement party. It went well enough: me funny, talky, again just like the movies and the show-must-go-on script. I don't mean to be sarcastic. If you don't have a show to go on with, what would you do? Cry?

We went to dinner with Kenny and Ann and Harold and Denise after the party. It was nice, but, God, I was tired. Then to bed and no show to perform at, no friends to socialize with, and Ruthie in her own sadness in the den, I was left to myself and a deep sadness. I'm not "afraid." I do feel I've lived a "full life." God knows that in Ruthie and in my job I've had the best; more than most would have if they had it good till 90. But I went to bed sad, woke up several times feeling sad and was sad this morning.

It's good that we're getting so many calls. All day, dozens, repeat calls and new ones. I take few. It's good that Ruthie takes them, because it binds the caller closer to her and shows her the caring for her. She needs and will need it. Among all the good things of my work, the number of people who know me and care about me—whether for myself or for what I represent—is, in human terms, a real treasure. And Ruthie's so straight, and it's plain. Now it's coming back to her in affection and caring.

The last two days I've been sad. Probably predictable as a normal stage. Likely, in time, lightheartedness and depression, bravado and fear will set in. Funny how your uniqueness fades when you realize your reactions are all on graphs that can be predicted. I sure, however, don't feel like a "fighter." I seem resigned to it—with the feeling that I sure as hell don't want to hang on, medicated to senselessness, just to stay "alive." So it's not a feeling of "Why me?" or "I'm too young to die." But I am sad. I'd have to be a dummy to be glad.

TUESDAY, JUNE 25

Now [IN another doctor's opinion] it could be no more than six months. I smiled at my towel this morning. One with a small hole in it, and I've been waiting to make rags of it. Now it's going to outlast me. I will, however, return the N.Y.R.A. [New York Racing Association] form for check-cashing privileges at the track. These may be the longest odds I've played.

The calls are so good. Me who never was comfortable with expressions of warmth too plainly said, and now I am so moved. It's nice. Real nice.

WEDNESDAY, JUNE 26

Likely will have a bed tomorrow. Sloan-Kettering requires pajamas. I haven't worn pajamas in 50 years. Ah, modesty. I read the release. I can take traditional treatment or, being an advanced case of a malignant tumor, I can take experimental treatment. Sign here, guinea pig.

That's not fair. A big reason for choosing Sloan-Kettering is that it's experimental. Still, why are the warnings of side effects more resonant than the prospect of recovery? Because I really don't feel I'm going to recover?

"Advanced." How'd I get "advanced" so quickly? Two weeks ago, they concluded it was a tumor. For months, the doctors were 95 percent sure it was a pneumonia, and suddenly, so mind-bogglingly quick, I'm an advanced cancer statistic. It's so hard to grasp. Still, no anger, no "why me?" no fear (except of the side effects of chemotherapy), but sadness and wonder at how quickly such a storm forms, how quickly life darkens.

You're supposed to see your life go by at times like this. What did I do with mine? Funny, as my mind is smiling, what I feel I've accomplished. I married the prettiest girl. I made it to Marine infantry officer, wrote a few books and became director of the A.D.L.—my hill. What's amusing about it is that these are elemental, rawly physical achievements I think of, rather than accomplishments of the mind. I married Ruthie, and that's hardly an intellectual achievement. A million kids have become marines. That's hardly being a von Clausewitz, and besides I didn't even see action. The books? One was on horse racing!

It's not the "contributions" I'm pleased with as much as just having done them. I

take pleasure in simply having made it to the top, simply having written the books and articles, simply having passed the Parris Island and Quantico tests, simply being Ruthie's husband. Well, I never claimed to be an intellectual or a do-gooder.

THURSDAY, JUNE 27

And so the call, early this morning. Check-in time 12:15 P.M. I was going to go to the office with my overnight bag, stayed home instead. I feel that I'm on a ship, waiting to wade ashore and engage in battle. Battle? Yes. The chemotherapy scares me, and somehow the cancer (the Japanese?) is holed up in bunkers. . . . My point is that I'm waiting, like on a ship, feeling somehow suspended but hollow-bellied and nervously anticipating.

Yesterday's call from Abner was a good bracer. His telling me of Phoebe's having taken chemotherapy for four years strengthened me. She was loaded with dignity and displayed courage you had to be drawn to. His reminding me of her gave me a role model—for dignity and for bravery. Good friend.

SATURDAY, JUNE 29

And so I am landed—in Sloan-Kettering. Is it 24 hours now? I'm not sure. Eventful. The biopsy of lymph node is positive. Then I couldn't urinate. So I have a contraption connected to my penis and bladder. If I can't go when it's disconnected, then more surgery—prostate. That would put chemotherapy on a back burner.

I never did put much hope in the lymph node being clean. It would've been nice, but more than half believed it to be cancerous, too. I keep thinking you can't lose them all—and keep losing.

Such pleasurable luck in a roommate. Kossover is straight, intelligent, a Williamsburg boy and easily the best medicine I've had here.

I was feeling much better before I checked in than I do now or since I checked in—and it's all been preliminaries, without "chemo" having even begun.

MONDAY, JULY 1

Why am I keeping this diary? Is it the conceit or, more accurately, the ego of even a doomed man to be planning on being published? It likely is more this ego than any new insight for society. It amuses me. Like a sick woman who wants to look pretty for visitors, old cancerous me is writing not for posterity but for possible posthumous publication.

And these selections. Got to be careful. No cliches—self-pitying or macho. Also have to avoid making it an accounting of anatomical tsoris (Let me tell you about my prostate. Oh, do I have a prostate!). So you try to pick items you think will be of interest to those interested in you. And you hope you'll come through candidly, insightfully, real. Hoo, ha.

MONDAY, JULY 8

Been a long time, diary. Nothing personal. Just didn't feel like it. Seems less important than it did when we started meeting this way. But it's time now, I'm waiting to start, at long last, the chemotherapy. Signed away today all rights to complain later. I'm an advanced case (you only just told me!), and no guarantees—it's experimental. Fair enough, but please be gentle.

So what's happened since last we met? I forget. Had I told you I had a second operation? Prostate. It seems successful.

One day was memorable. When they took the catheter out following the lymph-node operation, I could urinate. I was elated, manic almost. Look, Ma, I can go by myself. And then that night, the bottom, the dark, deep bottom—couldn't urinate. Back again with the catheter.

But that's all over with, and now the main attraction: Cancer attacks Nate Perlmutter. Perlmutter fights back. We'll watch with interest, as they say.

What has been extraordinary has been Dean and Nina. We've not had our kids together forever it seems, and they're such good people—and wise. No surprise with Nina. She always was the steady girl scout. But Dean. Fantastic change. And what a warm comfort to know that Ruthie will have them.

MONDAY, JULY 15

Well, progress of sorts. I'm an outpatient now. Even in the cancer ward, as in the bakery, I had to take a number and waited to be called to get treatment.

In the obituary pages, which—surprise, surprise—I've been reading closer, 62 is a young age. Here in my bakery line, I seem to be older than the average.

So when I'm called, I have to remember what to tell Dr. [David P.] Kelsen:

(1) Gained back 8 of the 10 pounds I lost.
(2) Excellent appetite.
(3) Wall-climbing itch in my rectum.
(4) Light beard.

Coming back to work has been so interesting. Touching, more accurately.

WEDNESDAY, JULY 17

It wasn't a good day emotionally. It started with philosophical smiling and ended with my first cry. (Well, I've choked up several times, not in sadness but in affectionate response to expressions of love.) And what was the big deal?

Monday, the doctor told me I would be bald in two weeks. O.K., no tragedy. By yesterday, it began to sink in that although I'm prepared to play Yul Brynner, people coming into my office, seeing me bald, are going to well up with emotion. Who needs those kinds of heavy feelings? So we decided—to save friends embarrassment and my having to comfort them—I would get a toupee.

Today, Ruthie and I went to a wig impresario, a character right down to being Hungarian. I was fitted for a wig, and what started so casually. . . .

It was the ludicrousness of me in the mirror that I found so humiliating, even debasing. I looked like some Beatle or a Three Stooges character. I tried to be casual in saying I'm 62 and I didn't have such a thick mop of hair when I was 22. The woman kept assuring me to wait till they shaped it. Just waiting, and the mirror more than testifying to her bull—my image laughing at me—was heavy going. She finally saw that I was upset and, to her credit, backed off. Backed off? Sold me a $1,500 wig in place of the $325 she was trying to palm off on me.

So why talk about it in the diary? I've felt sadness and spoken of it. I've felt love, oh such love and gratitude, for Ruthie and the kids and for so many friends, more than I realized I had, and I've noted that, too. But humiliation is new to me. I looked and felt like a crazy, a clown. I've grown accustomed to my bald spot; I've grown accustomed to my thinning hair; I've grown accustomed, I suppose, to me—with my hair, my bowed legs, my paunch. They're all authentically, if imperfectly, me.

But the mop of hair—thick like an 18-year-old's or an overly virile gorilla's—was a mockery of me. It was there to avoid causing others embarrassment, and I would end up humiliating myself. If it hadn't been for Ruthie's sensing it all and acting accordingly, I might well have cried there, rather than later at home. But now that has been experienced and over with. I walked a mile today, and that has to be a good sign.

FRIDAY, JULY 19

I have the impression that these entries have all been about mundane things. A wig, operations, urinating. Curious. Here you are with one doctor saying you have six months, another a year and a half, and you really occupy yourself doing business as usual. I don't recall that I've pondered "the meaning of life," vowed saintly behavior in the time left me, etc. Inasmuch as I'm "honestly" revealing my thoughts (Isn't there something in law about a dying man's testimony being considered true?), is it that the mundane—the bladder and urination—occupies us more than questions of The Meaning of Life, Truth, The Hereafter? Maybe it's just a reflection of me. Maybe I'm dying. We'll see.

In any event, I'll ask Dr. Kelsen Monday about the odds on my going into remission.

SUNDAY, JULY 21

Yesterday drove to East Hampton and partied with the Bialkins. Today lunched with Kenny and Ann and the Wiesels and drove back to New York. I sure as hell don't feel like a dying man.

Nina's letter arrived with tape re how to have the right frame of mind—I'll not play it. No particular principle involved, just not interested. My frame of mind seems to surprise people. I'm naturally not a moper. It's just inherently me, like the color of my eyes.

Interesting the way some skirt the word cancer and others offer the experiences of friends who had cancer (I suppose to subtly let me know their friends are alive). I find it quite easy to talk about it, but at times, when the conversations follow one another too closely, I get bored.

Something I haven't been confronting: Dr. Kelsen had said that in six to eight weeks we'd know if the chemotherapy had arrested the cancer's growth. That's like setting a date for sentencing. Two weeks ago when he said it, six to eight weeks was a long way off. Now it's a month off. What if the cancer has grown? Will I be as strong emotionally as I feel I have been? Or is my "strength" just me thinking, really, this isn't happening to me—I'm just witnessing it as an observer. If it is still growing, do we change the chemo? The doctor? The hospital? I drove both ways to East Hampton this weekend, I'm scribbling these notes now. I'm on top of my office work. . . . I really don't believe I'm dying.

THURSDAY, JULY 25

I have to push myself to enter these diary notes. Loss of interest? Boredom? The germinating thought that it is another conceit of another dying man?

Am I dying? I mean, soon? Saw in yesterday's Washington Post that only 12 of 100 lung-cancer patients live longer than five years after being diagnosed. Doesn't leave me much time to go over the scrapbooks I've been saving for retirement—all those accounts of wins (and losses), press clips and pictures of Ruthie's Native.

[For a few years, Mr. and Mrs. Perlmutter raced thoroughbreds; Ruthie's Native won the 1977 Florida Derby.]

I'm tired today, and it's early morning as I write. Must be the chemotherapy's effect on

my red corpuscles, which carry oxygen. If they're out of whack because of the chemo, it would account for this enervation. Also, dear diary, my rectum still itches.

FRIDAY, JULY 26

I'm not sure but that I'm not beginning to "play on" this cancer thing. David [a colleague] asked me at lunch what chemicals I was getting. I explained, vindesine and carboplatin, and threw in that I wasn't being charged. Why? I signed up as a guinea pig. But why? Traditional chemotherapy wouldn't, the doctors feel, be as good a bet.

Boom, boom, boom. All the heavy implications of the dying man making a desperate stab at magical potions. I really don't think I did it to get pity—more likely to seem heroic. That's interesting. I mean the odds do say I'm not a good bet for making advance paid reservations. And I show off about being on experimental drugs. We don't much change, do we, even in these circumstances? Mamma used to say the older we get, the more we get like what we are. I wouldn't have thought that it was true down to the wire. What on earth is the big deal in impressing people with your medication and its desperation prescription? The pleasure of attention, the habit of subtly showing off—see how brave I am no matter the overwhelming odds, no matter the life-and-death stakes? Cue the soft and schmaltzy music.

SATURDAY, JULY 27

I looked long at Ruthie today, and she looked sad. I felt so bad for what I'm doing to her. She's having it tougher than me in some real ways.

I look at my shoes. The top of one of the browns is beginning to crack. Do I postpone buying new ones? I mean why spend $70 for shoes that may outlive me? Cheapo.

Now to watch the Mets-Astro game. That's interesting to me. I keep reading The Times, keep caring about the Mets and Yanks, keep caring about the office and the people there. Death, or the contemplation of it, is much heavier for the young.

Just a second, 62 ain't all that old. Mature enough though to not go into a tailspin and to still care about the Mets and the news of the day.

SUNDAY, JULY 28

Sunday, and I took walks. It's good to get out of the house. The sense of being an invalid feeds on itself when you sit and sleep, sit an sleep. Being outside, like being with people, takes you out of yourself—and when yourself is in this shape, that's good.

I note something interesting in my response to people I pass in the street. At the beginning of knowing I had cancer, when I passed young people, I felt smilingly kind toward them—youth, innocence, that kind of thing—and I quietly wished them well. I still do, but now I'm conscious of people older than I. I indulge in what it has to be called—self-pity. "They're that old, and I'll likely not make it" stuff. I'm not really resentful, just mildly self-pitying.

I'm also conscious that I've been reading the obits closer than ever before. Looking for the deceased's age and if he, she, died of cancer? Lung cancer? Sloan-Kettering? Long illness? Short illness?

MONDAY, JULY 29

Well, we're in a stretch of sorts. Monday, a week from this afternoon's therapy, I get the full treatment. The X-ray will tell us whether the tumor is growing still, stopped growing or in remission. Countdown week.

Got the calendar of treatments through August today, structured around our Maine vacation. It'll make a difference in Maine what the pictures show on Monday.

I feel good. Walked home from the hospital, 17 blocks. But on the other hand, the cough is worse. I'll not be devastated if the picture is bad news. I hate the thought, but I can't fall apart. I have to be strong for Ruthie, for the kids who have been such beautiful discoveries for us. Hell, got to be strong for me, too. If it's bad, we'll have to try a new protocol.

THURSDAY, AUG. 1

I suppose it was comical. At least, I sure hope that in retrospect it will seem that way. But I was furious. Ruthie even wondered how sick could I really be if I had the strength to be so angry.

Dr. Kelsen finally referred me for an examination with a rectum and colon specialist. Before seeing this guy, you may not eat dinner the preceding night and you have to take a strong laxative and you have to take an enema. I go to sleep starving. Next morning, no breakfast and another enema. I'm ravenously hungry, and added to the chemotherapy's effect on my red corpuscles, I'm faint.

Finally the appointed hour, 1:15 P.M. By 1:30, the doctor makes his grand entrance, tells me to undress from the waist down and that he'll be right back. Forty-five minutes later he still hasn't returned. For 45 minutes, I'm standing around like a half-dressed baboon, shirt, bow tie on and everything else taking the breeze. Twenty-five hours of no eating, and this strutting pomposity disappears. His nurse doesn't know what happened to him; his secretary doesn't either; he doesn't answer pages.

We left. More accurately, I stormed out.

He might have been called on an emergency, but if he wasn't callous to dependent patients, if he wasn't indifferent to the dehumanizing effects of nakedness waiting for word — more cancer?—more surgery? — if he wasn't indifferent to my aching hunger, he would have told someone, "Look, I've run into an emergency call."

This morning, I wrote him a letter — I laid on him what was on my heart, copy to Sloan-Kettering's president. Ninety-nine percent of the time, after a night's sleep, you don't write "Dear Sir: you cur" letters. This was the 1 percent. In some measure, it was self-pity; in larger measure, virtuous indignation.

Now I have to get another doctor, more not eating, more enemas and let's hope, not more cancer.

Countdown: three more days to Monday and the new X-rays for comparing with the old.

SUNDAY, AUG 4

I'll say this for cancer. It gives you time to arrange your life, gives Ruthie and the kids time in which to adjust to the possibilities, not like getting hit by a car or a heart attack. How lucky can you get!

Tomorrow, D-Day, verdict. Sentencing? Reprieve? What?

MONDAY, AUG 5

Good news. Not great news, but still good news. The cancer did not grow. Didn't recede but didn't grow. First good news on the cancer we've had.

Why do I say "not great news?" Of course, it's great news?" It could have easily been terrible news. And so two cheers for Dr. Kelsen, two cheers for carboplatin and for vindesine. And three cheers for Ruthie, the kids, all the caring people who've cheered me and prayed for me. And now, let's go to work on the next month's chemotherapy—and, yes, don't be embarrassed, to thinking positively.

POSTSCRIPT

X-rays taken of Mr. Perimutter this month continue to show no additional tumor growth.

THE SEEP RIDGE PROJECT

HON. JAKE GARN

OF UTAH

IN THE SENATE OF THE UNITED STATES

Thursday, December 19, 1985

● Mr. GARN. Mr. President, before members of this Congress leave to go home for Christmas, I want to outline for my colleagues the way in which the overzealous and misguided efforts of some Members of the Congress have raised new questions about the credibility of the U.S. Government and its ability to keep its word.

Five years ago, when the Congress reacted to the energy crises by creating the U.S. Synthetic Fuels Corporation [SFC], SFC was supposed to be the answer to our energy problems through a process of open solicitations of private sector synthetic fuel technologies on a commercial scale. Since that time however, several things have happened to dash the hopes of a credible synthetic fuels industry in the United States. First, until this year, the SFC failed miserably to take the initiative and move forward with a clear plan of intentions for the development of synthetic fuels. Second, the declining price of oil made the economic viability of the several projects which it considered, very unattractive. Those projects died. But, some projects, like the Geokinetics/Peter Kiewit Seep Ridge oil shale project weathered all of this and still moved forward with a very credible project proposal. The Seep Ridge project sponsors invested over $4 million over a period of 3 years in an effort to meet the stringent SFC requirements. On September 19, 1985, the department of the Treasury responded to SFC's announced intention to move forward with Seep Ridge and certified that sufficient unencumbered appropriations were available for SFC to go forward and approve the project.

I should point out, that throughout the discussion of SFC, opponents have claimed that killing the Corporation will somehow help reduce this year's budget. This simply isn't so. The fact is that in the case of Seep Ridge, we are talking about $184 million in a combination of loan and price guarantees. Any expense to the Government would come after the project was constructed to pay the difference between the market price at that time and the guaranteed price, assuming the market price continued to be lower. The loan guarantees would only be paid if the project defaulted. So, I

hope it is clear that no money has been saved in this budget year and probably none saved for several years until the price guaranteed are utilized.

Unfortunately, on September 17, 1985, the Tenth Circuit Court of Appeals in Denver, CO, overturned a lower court judge and held that the late 19th century boundaries of the Ute Indian Reservation were in fact, still valid. The effect of this decision was to triple the size of the modern Indian Reservation boundary, and call into question, the title to State, Federal, and private lands within the reservation. Included within that boundary are the State leases for oil shale held by the Seep Ridge Project.

The Department of the Interior after 2 months of investigation concluded that the leases in question were still valid State leases and that the SFC need not be concerned that its investment would be in question. That problem resolved, the SFC in November of this year announced its intention to consider the Seep Ridge project for approval on December 17, 1985, during a regularly scheduled board meeting.

With that, the people of the Uinta basin in Utah finally thought they would receive their long-awaited oil shale project. They thought the new roads and schools they had built in anticipation of this development would be worth the investment their community planners had made.

Mr. President, Utah did more than any other State to encourage development of this kind because we believed the Federal Government would keep its word and support projects that met the requirements. Certainly, the sponsors of the Seep Ridge project thought the U.S. Government would keep its word or they would not have risked over $4 million of their own money.

Sadly, they were wrong.

On December 12, 1985, OMB Director James Miller sent to the Congress a letter specifying that the administration would no longer support any activity by the Synthetic Fuels Corporation. This action sparked an almost lynch-mob atmosphere in the Congress which resulted in legislative actions which had the effect of undermining commitments the Government had previously made and to pull the rug out from under the SFC.

Portraying the regularly scheduled meeting of the Synfuels board as an 11th-hour attempt to raid the Treasury by approving projects in the final days of the board's existence, House members secured the passage of an amendment to the continuing appropriations resolution adopted on Monday of this week. That amendment prohibited the board from acting on any projects during the life of that resolution.

Naturally, the board cancelled its scheduled meeting, in the face of that mandate, which was also accepted by Senate conferees.

At that point, several of my western State colleagues and I began an effort to reverse what was, in fact, the real 11th-hour move: The OMB letter and the related action on the continuing appropriations legislation. We stressed to the administration and to our colleagues that these actions were a violation of good-faith efforts to close down the Synfuels Corporation in an orderly manner, as had been previously agreed to by the administration. In addition, we pointed out the inequity of denying due process to the projects under consideration by the Board, which were not dreamed up overnight to raid the Treasury, as has been suggested, but had been carefully considered and brought to the threshold of approval, as I have described in the case of the Seep Ridge project.

The administration recognized the value of its prior commitments, and eventually stated that fact in a follow-up letter to the Appropriations Committee chairman of both bodies. Unfortunately, due to questionable and, I believe, deliberate, delays in the Office of Management and Budget, that statement came as too little, too late. The damage had been done by Members in the House and Senate who refused to listen to the merits of Seep Ridge in their frenzy to attack the Synfuels Corporation. Certain House Members literally resorted to threats and intimidation of Synfuels Board members, when they thought a loophole had been found in the restrictive language adopted by the Congress, with regard to the expiration date of that language.

Mr. President, several of these Members even recognized that they were doing an injustice to the Seep Ridge project. They called me personally to apologize, but to say that they felt they had no alternative but to attack the whole process, without regard to the merits of an individual situation. And without regard to what their action would mean about the credibility of the Federal Government.

This situation is deplorable; it is unconscionable, and should not be allowed to have the effect of destroying the hopes and plans of people who answered the call of their Government, at a time of crisis with respect to the availability of oil products, and invested their time, talents and millions of dollars, only to see the train leaving the station as they stepped onto the platform.

I will not let this matter rest here. There is nothing that can be done, now, to allow the Seep Ridge project to be approved by the Synfuels Board, short of asking the President to delay signing the new continuing resolution until after the present one expires and the Board can meet. But that would be roundly denounced as some sort of skullduggery and would raise again the spectre of the Government operating for a day without appropriations.

But I believe strongly that the honor and integrity of the U.S. Government is tarnished by this series of events. I will do everything I can to right the wrong that has been committed. And I will ask those who committed it, who have admitted to me their personal regret for the outcome for Seep Ridge, to join me in finding a way, through some other program, to demonstrate that the Federal Government can be counted on to keep its word.●

GILMAN LEGISLATION TO REINSTATE BURIAL BENEFITS FOR VETERANS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GILMAN. Mr. Speaker, I would like to call my colleagues' attention to H.R. 3926, the Veterans' Burial Benefits Act of 1985, legislation which I have recently introduced, extending and improving the funeral benefits currently provided to our deserving veterans.

Prior to 1981, section 902 of title 38 of the United States Code provided for a burial allowance of up to $300 in all cases where a veteran died: First, of service-connected disability; second, who was a veteran of any war; third, who was discharged for a disability incurred or aggravated in the line of duty; or fourth, who was in receipt of—or but for the receipt of retirement pay would have been entitled to—disability compensation. The Omnibus Reconciliation Act of 1981 (P.L. 97-35), however, severely limited eligibility for the $300 burial benefit to veterans who at the time of death "were in receipt of compensation—or but for receipt of retirement pay would have been entitled to compensation—or in receipt of pension, or who die in a VA hospital or facility."

My legislation: First, restores the pre-1981 eligibility for veterans for the purposes of receiving funeral benefits; second, increases the amount of those benefits from $300 to $400; and, third, increases the plot allowance from $150 to $250. It is my sincere hope that this legislation will help our veterans and their families defray a portion of today's escalating funeral costs, easing the added financial burden that so many of these families find themselves facing. It seems only right that we reinstate these benefits and meet the obligation that we made to these veterans at the time of their commission into the service of their country, to provide them with reasonable compensation for their funeral costs. Veterans have been dealt a severe injustice; an injustice that is within the power of this body to rectify.

Since 1981 countless veterans have been denied a proper burial. Current law does

not extend funeral benefits to our most impoverished veterans, only those veterans who at the time of their death were receiving disability compensation or retirement pay are eligible for the benefits. There is no safety net for the poor and working poor who die without insurance.

When testifying on behalf of the American Legion before the House and Senate Committees on Veterans' Affairs, Robert E. Lyngh best expressed the indignance of the veterans community when he stated:

The reduction [of the burial benefit] placed an economic value on a benefit that was freely given by Congress to insure that all veterans would be buried with dignity and respect, regardless of their income or social standing at time of death. The present restrictions violate the Legion's long-held principle of equal benefits for equal service.

It is important to bear in mind that the average cost for a funeral, not including a casket, headstone, or grave, is $1,980. While State and local governments sometimes provide funds for indigent funerals, this by no means covers all of our veterans and is not a viable option for the families of many of our veterans.

The death of a loved one is always a difficult, trying time. Whether that individual suffered from a long, lingering illness or was taken suddenly, it is very difficult for families to prepare emotionally and financially for such a loss. By reinstating the eligibility for funeral benefits, and increasing that allowance from $300 to $400 to reflect current costs, we would be meeting our obligation and be alleviating, in part, some of the burden being felt by the families of veterans. The increase in the burial allowance from $150 to $250 is necessary and long-overdue.

Following is the text of H.R. 3926, "the Veterans' Burial Benefits Act of 1985" which I commend to my colleagues' attention and which I hope that they will share with the veterans groups in their congressional district. I invite the support of my colleagues of this important legislation.

H.R. 3926

A bill to amend title 38, United States Code, to extend eligibility for burial allowance to certain additional veterans and to increase the burial plot allowance for veterans from $150 to $250

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Burial Benefits Act of 1985".

SEC. 2. ELIGIBILITY FOR BURIAL ALLOWANCE.

Subsection (a) of section 902 of title 38, United States Code, is amended to read as follows:

"(a) Where a veteran dies—

"(1) of a service-connected disability; or

"(2) who was—

"(A) a veteran of any war;

"(B) discharged from the active military, naval, or air service for a disability incurred or aggravated in line of duty; or

"(C) in receipt of (or but for the receipt of retirement pay would have been entitled to) disability compensation;

the Administrator, in the Administrator's discretion, having due regard to the circumstances in each case, may pay a sum not exceeding $400 to such person as the Administrator prescribes to cover the burial and funeral expenses of the deceased veteran and the expense of preparing the body and transporting it to the place of burial. For the purpose of this subsection, the term "veteran" includes a person who died during a period deemed to be active military, naval, or air service under section 106(c) of this title.".

SEC. 3. INCREASE IN THE BURIAL PLOT ALLOWANCE.

Paragraphs (1) and (2) of section 903(b) of title 38, United States Code, are amended by striking out "$150" each place it appears and inserting in lieu thereof "$250".

BILL NELSON'S SPACE SHUTTLE

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BONKER. Mr. Speaker, on January 4, 1986, our colleague, Representative BILL NELSON of Florida, will be orbiting our planet on the space shuttle *Columbia.* He is uniquely qualified to be the first House Member astronaut because of his position as chairman of the Subcommittee on Space Science and Applications. Appropriately enough, BILL NELSON also represents Florida's 11th Congressional District, location of the Kennedy Space Center, so he has spent much of his life in the shadow of the launching pad.

The space shuttle is destined for a 5-day mission during which BILL NELSON will participate in a total of 12 experiments, some unique in the history of the American Space Program.

First, BILL will attempt to grow protein crystals in space for the Cancer Research Program at the University of Alabama at Birmingham. Protein crystallography is an important technique in determining protein structure and function, knowledge which may enable scientists to understand the causes of molecular malfunctioning which can lead to cancer and other diseases. Growing crystals in a gravity-free environment should produce larger crystals with fewer imperfections, characteristics that are helpful to researchers using x-ray diffraction equipment. BILL will be expanding on techniques developed during earlier missions as he attempts to grow 40 protein crystals that can survive reentry and landing.

In another experiment, which has never been performed by the American Space Program, BILL will be given a medical stress test in space. He will be wired to sensors on his chest for an EKG reading which will be sent to Houston via a data link on the TDRSS satellite. BILL will increase his heart rate to 70 percent of its maximum rate by running on a treadmill aboard the shuttle. Medical researchers have already observed that space flight causes occasional abnormal heartbeats during both rest and the exertion of space walking. They hope to determine reasons for this phenomenon by monitoring Mr. NELSON'S heart. BILL was instrumental in developing this experiment after a recent trip to the Space Medicine Institute in Moscow where he learned that the Soviet cosmonauts presently in orbit take a stress test every 10 days to monitor their heart condition.

In another first experiment, BILL will monitor his blood pressure during space flight. To do this, he will listen to his jugular vein blood flows with a listening Doppler device and will interrupt blood flow by blowing into a pressure gauge. Using this technique, researchers have been able to measure the central venous pressure.

Our colleague will also participate in a number of experiments to monitor the human physiological response to zero gravity. In one experiment, Mr. NELSON will measure the circumference of his legs to determine the microgravity effect which causes bodily fluids to move out of the legs and into the upper torso. Mr. NELSON will also be monitored to determine how quickly he adjusts to and recovers from a lack of bodily signals which are dependent on gravity and give us our sense of vertical and horizontal planes.

Finally, BILL will monitor an experiment designed to find an explanation for the rapid deterioration of human blood. Deterioration of blood is thought to be caused by numerous factors including cell damage from the Earth's gravitational pull which brings heavier elements of the blood to the bottom of blood storage bags. By putting blood in space, researchers can eliminate the effects of gravity, enabling them to determine other important factors in the deterioration of blood. A total of 42 tests will be done on the blood samples immediately after the *Columbia* lands.

I know my colleagues in the House join me in wishing BILL NELSON and his fellow astronauts a successful and safe flight on the space shuttle *Columbia.*

CONGRESSMAN GILMAN INTRODUCES LEGISLATION TO IMPROVE HOME HEALTH CARE FOR OUR ELDERLY VETERANS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GILMAN. Mr. Speaker, as our population ages, we, as a Congress, and as a nation, will have to find ways to improve the delivery of health care. One health care option that has become increasingly attractive over the past few years has been home health care. In that regard, I have recently joined my colleagues in the Senate, Senators HEINZ and SPECTER, in introducing legislation, H.R. 3927, the Elderly Veterans Care Act, to insure that our veterans will be able to receive health care in their homes.

H.R. 3927 will allow our older, chronically ill veterans to take a credit against their

taxes for the expenses they and their families incur in providing home-based health care. My legislation covers respite care, nursing care, adult day care, home health aides, and medical or health related equipment and supplies. Similar to the dependent care tax credit as mandated under the Economic Recovery Act of 1981, credit amounts under H.R. 3927 are determined by a sliding scale based on annual income. In accordance with this formula, the families most in need receive the greatest relief and home health care becomes more equally accessible.

Under H.R. 3927, families with $10,000 or less in income receive a credit for 30 percent of their home-health care expenses, up to a maximum of $1,050. The maximum amount of the credit is gradually reduced for families with income in excess of $10,000. Families with adjusted gross income of over $50,000 are not eligible for a credit under my bill. Low-income families who do not pay enough taxes to reap the full benefit of the credit, would have any unused credit refunded directly to them.

Mr. Speaker, numerous studies have shown us that home health care is not only cost-effective, but patients receiving care in their homes are happier and in that regard, healthier. As we see our veterans' hospitals and other health facilities strain under this Nation's increasing health care needs, it is important that we continue to explore and utilize viable options for providing these services. By providing our veterans a tax credit for home health care, these deserving individuals who so bravely served our country will be able to choose the type of health care service which best suits their particular needs.

Accordingly, I urge my colleagues to join in sponsoring this important health care initiative. Following is a copy of the Elderly Veterans Care Act which I commend to my colleagues' attention:

H.R. 3927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Elderly Veterans Care Act of 1985".

SEC. 2. CREDIT FOR CARE OF ELDERLY VETERANS.

(a) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to refundable credits allowable against tax) is amended by inserting after section 34 the following new section:

"SEC. 34A. EXPENSES FOR CARE OF ELDERLY VETERAN.

"(a) ALLOWANCE OF CREDIT.—

"(1) IN GENERAL.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the applicable percentage of qualified elderly care expenses paid by such individual for the care of a qualifying veteran during the taxable year.

"(2) APPLICABLE PERCENTAGE DEFINED.—For purposes of paragraph (1), the term 'applicable percentage' means 30 percent reduced (but not below 20 percent) by 1 percentage point for each $2,000 (or fraction thereof) by which the adjusted gross income of the taxpayer (and the spouse of the taxpayer in the case of a married individual filing a separate return) for the taxable year exceeds $10,000.

"(b) LIMITATIONS.—For purposes of this section—

"(1) LIMIT ON INCOME OF TAXPAYER.—No credit shall be allowable under subsection (a) for a taxpayer with an adjusted gross income of $50,000 or more for the taxable year ($25,000 or more in the case of a married individual filing a separate return).

"(2) DOLLAR LIMITATIONS ON AMOUNT OF CREDIT.—

"(A) MAXIMUM QUALIFIED ELDERLY CARE EXPENSES TAKEN INTO ACCOUNT.—The amount of qualified elderly care expenses taken into account under subsection (a) by any taxpayer for any taxable year shall not exceed $7,000 and not more than $3,500 of qualified elderly care expenses may be taken into account with respect to any qualifying veteran.

"(B) SPECIAL RULES FOR MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—In the case of a married individual filing a separate return, paragraph (1) shall be applied by substituting '$3,500' for '$7,000' and '$1,750' for '$3,500'.

"(C) 2 OR MORE INDIVIDUALS MAKING EXPENDITURES WITH RESPECT TO SAME QUALIFYING VETERAN.—If 2 or more individuals have qualified elderly care expenses with respect to any qualifying veteran during any calendar year, then—

"(i) the amount of the qualified elderly care expenses taken into account with respect to such qualifying veteran shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year, and

"(ii) the amount of such expenditures taken into account by each of such individuals for the taxable year in which such calendar year ends shall be equal to the amount which bears the same ratio to the amount determined under subparagraph (A) as the amount of such expenditures made by such individual during such calendar year bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(c) DEFINITIONS AND SEPCIAL RULES.—For purposes of this section—

"(1) QUALIFYING VETERAN.—The term 'qualifying veteran' means any individual (other than the spouse of the taxpayer) who—

"(A) is a veteran within the meaning of section 101(2) of title 38, United States Code,

"(B) is related to the taxpayer by blood or marriage,

"(C) is at least 65 years of age, and

"(D) has a family income of $15,000 or less for the taxable year.

"(2) FAMILY INCOME.—The term 'family income'—

"(A) in the case of an individual who is not married, the adjusted gross income of such individual; and

"(B) in the case of a married individual, the adjusted gross income of such individual and his spouse.

"(3) QUALIFIED ELDERLY CARE EXPENSES.—The term 'qualified elderly care expenses' means payments by the taxpayer for home health agency services (but only if provided by an organization certified by the Health Care Financing Administration), homemaker services, adult day care, respite care, or health-care equipment and supplies which—

"(A) are provided to such qualifying veteran,

"(B) are provided by an organization or individual not related to the taxpayer or to the qualifying veteran, and

"(C) are not compensated for by insurance or otherwise.

"(4) APPLICATION WITH OTHER CREDITS.—Notwithstanding any provision of this part, the amount of the credit allowable under subsection (a) shall be allowed as a credit against the tax imposed by this chapter before any other credit allowed by this part.

"(d) DENIAL OF DOUBLE BENEFIT.—No deduction or credit shall be allowed under any other provision of this chapter with respect to any amount for which a credit is allowed under subsection (a).".

(b) CONFORMING AMENDMENTS.—

(1) The table of sections for subpart C of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 34 the following new item:

"Sec 34A. Expenses for care of elderly veteran.".

(2) Paragraph (4) of section 6201(a) of such Code (relating to assessment authority) is amended—

(A) by striking out "or section 32 (relating to earned income)" and inserting in lieu thereof ", section 32 (relating to earned income), or section 34A (relating to expenses for care of elderly veteran)", and

(B) by striking out the heading and inserting in lieu thereof the following:

"(4) OVERSTATEMENT OF CERTAIN CREDITS.—".

(3) Section 6513 of such Code (relating to time return deemed filed and tax considered paid) is amended by adding at the end thereof the following new subsection:

"(f) TIME TAX IS CONSIDERED PAID FOR ELDERLY VETERAN CARE CREDIT.—For purposes of section 6511, the taxpayer shall be considered as paying an amount of tax on the last day prescribed by law for payment of the tax (determined without regard to any extension of time and without regard to any election to pay the tax in installments) equal to so much of the credit allowed by section 34A (relating to expenses for care of elderly veteran) as is treated under section 6401(b) as an overpayment of tax.".

(4) Subsection (d) of section 6611 of such Code is amended by striking out the heading and inserting in lieu thereof the following:

"(d) ADVANCE PAYMENT OF TAX, PAYMENT OF ESTIMATED TAX, CREDIT FOR INCOME TAX WITHHOLDING, AND EXPENSES FOR CARE OF ELDERLY VETERAN.—".

SEC. 3. EFFECTIVE DATE: REPORTS.

(a) EFFECTIVE DATE.—The amendments made by this Act shall apply to taxable years beginning after December 31, 1984.

(b) REPORTS.—

(1) IN GENERAL.—The Secretary of the Treasury shall prepare a report for taxable years ending in 1985 (and each of the 4 calendar years thereafter) which states—

(A) the number of individuals who were allowed a credit under section 34A of the Internal Revenue Code of 1954 for taxable years ending during such calendar year,

(B) the utilization of such credit by income group for such calendar year,

(C) the utilization of such credit by category of qualified elderly care expenses (as defined in paragraph (3) of subsection (c) of section 34A of such Code) during such calendar year, and

(D) the total effect on the revenues of the United States of allowing such credit during such calendar year.

(2) TIME FOR FILING.—Any report required under paragraph (1) shall be submitted to the Congress no later than September 15 of the calendar year following the calendar year for which it is required.

H.R. 2466

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. LOWRY of Washington. Mr. Speaker, I rise in support of H.R. 2466. H.R. 2466 makes a variety of changes in laws administered by or affecting the Coast Guard which includes the following:

First, extends for 5 years the current exemption for the *Delta Queen* riverboat;

Second, waives personnel ceilings at the Coast Guard Yard in Maryland and the Aircraft Repair and Supply Center in North Carolina. This waiver will increase the Coast Guard's flexibility in determining the most efficient use of its personnel and repair facilities;

Third, permits the Coast Guard to make improvements to a State-owned pier in New Bedford, MA, for the purpose of preparing to receive newly constructed medium endurance cutters that will be based there;

Fourth, creates an Offshore Vessel Safety Advisory Committee to study the adequacy of existing safety and health regulations;

Fifth, permits the Coast Guard to enter into a contract with a municipal electrical utility in Alaska;

Sixth, prohibits the Coast Guard from contracting out certain aids to navigation work on the New Jersey Intracoastal Waterway;

Seventh, issues certificates of documentation to several vessels; and

Eighth, modifies a condition for the conversion for two obsolete vessels.

I am very pleased that the provision that modifies a condition for conversion of two obsolete vessels is included. This provision is identical to H.R. 3978 which I introduced. One of these vessels, the *Arctic Storm*, is owned by ProFish International, Inc. of Seattle. The owners of this vessel plan to convert this vessel into the first U.S.-flag surimi factory trawler.

The Japanese are already heavily involved in surimi development in the North Pacific. Time is running out for getting the U.S. fishing industry into surimi production in the North Pacific. A U.S. operator needs to take the first step to prove once and for all that U.S. operators can successfully produce surimi on the high seas.

Because of the perceived financial risk of surimi production, favorable financing for conversion work done in a U.S. yard is not available at this time. However, if the conversion work is done in a foreign yard, with foreign financing and lower conversion costs, the project becomes possible. Enactment of this legislation will allow the U.S. fishing industry to enter the surimi business, and capture a share of a rapidly growing market for surimi-based products.

Some may argue that because the conversion work is not being done in a U.S. yard, jobs are lost. I believe just the opposite. If the conversion work cannot be done in a foreign yard, the work won't be done, so no jobs will be lost. However, if the vessel is converted, a million dollars worth of annual maintenance will have to be done in U.S. yards. But more importantly, this venture would provide a prototype to demonstrate that the United States can compete in the processing of surimi which would make available financing for other participants in the future. Because this vessel will prove that the United States can operate a vessel engaged in the production of surimi, from 15 to 20 surimi vessels could be built or converted in U.S. shipyards. In addition, each surimi vessel will provide 150 jobs in the fishing industry.

There is no cost to the taxpayer of this provision. U.S. taxpayers will only benefit. This provision will create jobs and allow the United States to compete more effectively with the Japanese surimi industry and will enable the U.S. fishing industry to more fully utilize the vast quantities of pollock fisheries resources which are available in the North Pacific and from which high-quality surimi can be produced. I am concerned that if this provision was not included, the Japanese would gain complete control of the surimi market and that at some time in the future we would be asked to pass protectionist measures to enable the U.S. industry to compete with the Japanese. It makes sense to let U.S. fishermen and shipyards get in on the ground floor so we can compete with the Japanese now and in the future.

THE IMPASSE ON GRAZING ON THE PUBLIC LANDS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SEIBERLING. Mr. Speaker, last year I, along with my distinguished colleague and friend MO UDAL, and Senators MALCOLM WALLOP of Wyoming and JAMES MCCLURE of Idaho, decided to try to work together to address some of the key issues affecting the management or our Federal rangelands in the West.

As the chairmen of the committees and subcommittees responsible for these issues in the House and Senate, we realized that two important legislative authorities affecting the management of the public rangelands were going to expire at the end of 1985. We agreed that this represented an important opportunity to work together to build a consensus for rangeland legislation amongst the many parties interested in and affected by these issues, by appealing to everyone's shared interest in improving the productivity of the Federal rangelands.

To that end, we asked the Congressional Research Service to convene a conference of all the parties interested in the public rangelands—ranchers, wildlife groups, wild horse protection interests, environmental protection advocates, the U.S. Forest Service and Bureau of Land Management, and many others. And through that process we came up with an outline of a package that would go a long way toward addressing the major concerns of all of those groups, to the benefit of all.

That package would provide for:

Increasing public participation in the management of Federal rangelands, by requiring the Bureau of Land Management to proceed with an open planning process—as provided for under the Federal Land Policy and Management Act—in a timely manner, and by restructuring the advisory boards and councils on Federal rangelands to insure representation of all interests;

A positive program to improve the range condition of riparian areas on public lands, including use of a portion of the grazing fee to fund that program; and

An agreement to continue the existing grazing fee formula, and to increase the amount of that fee to be returned to the agencies for on-the-ground range improvements.

When we got down to trying to transfer this outline to legislation, we found that it was not an easy task. Every time we tried to put our aims into legislative language, we found it under assault from all sides. Neither the environmental community nor the ranching community was able to put aside their fear that our intent was not to build consensus, but to take advantage of one group for the benefit of another.

Representatives of the environmental community were critical of the conditional agreement to keep the present fee formula. There is a large body of evidence showing that the present formula sells grazing on Federal lands for far less than its market value. The conservationists believe that this provides economic disincentives to good land management. But we believed that, in exchange for improvements in environmental policy, compromise on the fee issue was reasonable.

My response to my friends in the environmental movement who told us that no bill was preferable to one that did not raise the grazing fee was that I believe that it is far more important to protect the basic resources of the public lands, and to improve their overall productivity, than it is to raise the fee—because no fee, no matter how high, could adequately compensate the Nation for lost productivity of public lands.

On the other hand, what I thought were reasonable and moderate proposals to improve our environmental policy on rangeland management, met with similar resistance from representatives of the ranchers who graze their livestock on public lands.

These proposals were to set high goals for a riparian improvement program, and to require that the Secretaries of Agriculture and Interior manage grazing on public lands in strict compliance with the principles of multiple-use and sustained yield.

Riparian areas are not only critical for western wildlife and fisheries—they are also the areas of the public rangelands that

are most capable of increasing their productivity under good management. Not all of that improvement would go to livestock and the rancher. It will be shared, by all the users, and uses, of the public lands. But the rancher—as the person who lives adjacent to these lands, and whose livelihood depends on them, will unquestionably be the biggest beneficiary from improvements in the productivity and ecological health of the public lands.

Many public lands ranchers are in economic trouble. I firmly believe that the only hope for the long-term survival of public lands ranching lies in improving the productivity of the public lands. And the only way to achieve such a program, in this era of budget deficits and program cutbacks, is to build a coalition of all those who have a stake in improving the condition of the public rangelands.

I believe that acceptance by the ranching community of the strict application of the principles of multiple-use and sustained yield to public lands grazing, as well as to all other users and uses of the public lands, would be a key to the construction of such a coalition.

In the end, after more than a year of effort, a consensus was not achieved. I continue to believe that the proposals which evolved from this long process are something both ranchers and conservationists can live with. The ranchers would get the extension of a grazing fee formula that is highly favorable to them, and the continuation of the grazing advisory boards, through which ranchers exert considerable influence over Federal range management. The conservationists would get a new commitment of the Federal range managing agencies to act to improve the ecological condition of the public rangelands, particularly riparian lands. Both groups would share in the increased productivity of public lands.

I would like to encourage both these groups to look at those proposals in the new year, and consider whether they aren't reasonable, and in their respective interests. If they do find them so, or if they found some other package on which they could agree, I would be happy to help get range legislation moving forward again.

UNEMPLOYED VIETNAM ERA VETERANS NEED THE EMERGENCY VETERANS' JOB TRAINING ACT

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DASCHLE. Mr. Speaker, on May 20, 1985, the House passed H.R. 1408, the Veterans' Employment Amendments of 1985, by unanimous voice vote. This bill would extend and improve the Emergency Veterans' Job Training Act (Public Law 98-77) and provide $75 million in appropriations for fiscal year 1986. Although the other body did not act on H.R. 1408, I am pleased that similar legislation has finally received the support of both Houses and title II of H.R. 1538 will give new life to this important program for unemployed veterans.

The goal of EVJTA is to address the problem of severe and continuing unemployment among certain groups of veterans by providing payments to defray the cost of training to employers who hire and train long-term unemployed veterans. Since the program's inception, nearly 300,000 Vietnam era and Korean conflict veterans have been certified to participate; over 37,000 have gone to work under the program; and over 53,000 employers have been approved for participation.

On June 7, 1985, the Veterans' Administration submitted an extensive report regarding EVJTA, in accordance with Senate Report 98-275, which called for an evaluation of the program. The evaluation, which was conducted under contract by Centaur Associates, Inc., had high praise for virtually every aspect of EVJTA. Clearly, this program has been effective and is accomplishing its goal of reestablishing long-term unemployed veterans in our Nation's workforce.

Mr. Speaker, I am disappointed that the other body would not accept certain provisions approved by the House in H.R. 1408. This House-passed bill would have provided an authorization of $75 million for EVJTA and would have reduced the unemployment criteria for participation in the program from 15 to 5 weeks' unemployment. Additionally, H.R. 1408 would have made significant improvements to the Veterans Readjustment Appointment [VRA] program.

We on the Veterans' Affairs Committee are proud of the Emergency Veterans' Job Training Act, which originated in our committee in 1983. The House has consistently demonstrated its commitment to assist unemployed veterans and passed legislation reported by our committee to extend and improve this job training program. The Subcommittee on Education, Training and Employment has held seven hearings, in Washington and in the field, to monitor the implementation and effectiveness of EVJTA. It is a good, cost-effective program that deserves to be extended and adequately funded. The measure before us today, despite the shortcomings I have already mentioned, will continue this valuable program and assist thousands of unemployed veterans in their efforts to find meaningful employment.

WATCH ON SURINAM

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COURTER. Mr. Speaker, Libya is an African country of modest size and only 3 million people, but its reigning dictator has used oil money surpluses and Soviet bloc support to build international networks of global proportions. Sponsorship of international terrorists and the provision of military training to citizens and armies of the third world are Colonel Qadhafi's two specialties.

The Colonel may now be reaching across the Atlantic into the small coastal country of Surinam, according to reports of recent months. The reigning dictator in former Dutch Guiana is a pro-Castro military officer like Qadhafi; his name is Lt. Col. Desi Bouterse. In spite of continuing and generous Dutch assistance ($100 million a year until 1990, according to Jack Anderson) Bouterse is apparently incapable of carrying on without other aid, and has recently been promised $100 million by Qadhafi.

According to Michael van Notten, a consultant to a Surinamese opposition party based in Holland, money is only part of a Libyan package for the governor of Surinam. He states that there are 243 Libyans in the country, some of whom are training troops and others who may be training non-Surinamese guerrillas. The U.S. State Department is aware of 14 Surinamese training in Libya at present, though for unknown purposes.

While these charges are extremely important, none of them is very surprising. We all recall the varied internationalist mix of Eastern Europeans, Cubans, Soviets, North Koreans, et cetera present in Grenada when that Caribbean country was ruled by Marxist-Leninists. Colonel Qadhafi has been involved with radical movements and guerrilla and terrorist organizations in Central America, and once praised the revolutionaries there "who are going to follow the Vietnamese and Nicaraguan precedents and destroy the bases of U.S. fascism." The President of Costa Rica has complained of both Libyan and PLO interference in his democratic country. Qadhafi's relations with the Sandinistas are particularly warm, and have been the subject of a State Department study of last August; they include weapons transfers to Nicaragua.

The recent reports about Surinam thus deserve to be taken with gravity. Allow me to introduce into today's RECORD two articles detailing some of them in order that my colleagues will notice this quiet geopolitical change. The first is by the columnist Jack Anderson, as carried by the Washington Post. The second was an exclusive report by Vicki Rivera of the Washington Times.

[From the Washington (DC) Post, Dec. 2, 1985]

SURINAM BECOMING ANOTHER CUBA

(By Jack Anderson and Dale Van Atta)

Surinam is developing into another Cuba-style dictatorship in the Western Hemisphere. Marxist strongman Desi Bouterse, desperate for cash to keep his repressive regime afloat, has turned to two tainted sources of money: Libya's dictator and Colombia's drug dealers. But he's learning that there's no free lunch in foreign aid.

When the Netherlands granted its South American colony independence in 1975, the Dutch promised $100 million a year in aid until 1990. The stipend continued even after Bouterse's military coup in 1980 and his growing leftward tilt.

Bouterse cultivated and modeled himself after Maurice Bishop, then the Marxist

prime minister of Grenada. At Bishop's suggestion, Bouterse succumbed to Fidel Castro's overtures and welcomed a Cuban ambassador to Paramaribo in September 1982.

Cuban aid soon followed, as did the quid pro quo. Dozens of Cubans arrived in Surinam to assist Bouterse in setting up a Marxist dictatorship—which would be under Castro's control. The Cubans trained Bouterse's bodyguards, and even acted in that capacity themselves. Surinamese officials were sent to Cuba for indoctrination.

Both the Dutch and U.S. governments (the United States was also sending Surinam some modest aid) grew increasingly uneasy at the blossoming Bouterse-Castro relationship. In December 1982, when Bouterse rounded up and executed 15 opposition leaders, Dutch and American aid was cut off.

Castro, himself dependent on Moscow gold to bolster the shaky Cuban economy and his foreign adventures, proved slow in providing the money he had promised Bouterse. So, according to our CIA sources, the Surinamese dictator accepted the offer of a loan from Colombia marijuana and cocaine traffickers.

Meanwhile, Brazil, which borders Surinam on the south, woke up to the danger of this Castro foothold and sent a military force across the border in April 1983. Literally under the gun, Bouterse agreed to decrease the Cuban presence in his country in return for a $300 million aid deal with Brazil.

Bouterse dragged his feet on the bargain, until Bishop was deposed and murdered by Cuban-backed Grenadan Marxists. Blaming Castro for the death of his friend and mentor, and fearing for his own neck after the U.S.-led invasion of Grenada, Bouterse sent his Cuban advisers packing. Though he had previously claimed that there were only 15 Cubans in Surinam, about 100 were kicked out (leaving only eight, according to our sources).

This left Bouterse with nothing but his own poverty-stricken populace and the Brazilians to support his dictatorship. He needed more money, and gratefully accepted a promise of $100 million from Libyan dictator Muammar Qaddafi.

What does Qaddafi expect for his money? Our sources say he hopes to expand his influence in South America. He also wants Surinamese passports for Libyan assassination squads, and hopes to supply them to his Palestinian terrorist sidekicks as well.

[From the Washington (DC) Times, Oct. 24, 1985]

LIBYA REPORTED DRILLING TERRORISTS IN SURINAM

(By Vicki Rivera)

In return for the promise of $100 million in badly needed aid, Surinamese strongman Desi Bouterse is permitting Libya to train terrorists in his country to use against other Caribbean nations, according to a Dutch political analyst.

With the cutoff of Dutch aid after the 1982 execution of 15 prominent opposition leaders and the falloff in revenues from bauxite, the main export commodity of Surinam, Bouterse's regime is desperate for cash, said Michael van Notten, a consultant to the Council for the Liberation of Surinam, based in the Netherlands.

Mr. van Notten was to accompany a delegation of Surinamese resistance leaders in exile on a visit to Washington, but the members of the delegation were apparently intimidated after seeing some of Mr. Bouterse's men in New York and decided to return to the Netherlands.

Mr. Bouterse, a former sergeant who took power in a 1980 coup, addressed the U.N. General Assembly in New York on Tuesday.

The agreement between Libya and Surinam was reached in February, Mr. van Notten said, and a Libyan's People's Bureau was set up in July. A total of 243 Libyans are now reported to be in Surinam, 30 of whom came from neighboring Guyana, where they were believed to have conducted training in subversive activities, and 50 from Chad.

However, the State Department said it had no information to verify what it characterized as "rumors" of Libyan activities in Surinam.

"The Surinamese government is well aware of our concern about the development of relations with Libya," a State Department official said. "We made a point of saying that we don't want to see Libya using Surinam as a base of operations. They appear to be taking our concerns into consideration."

"The Libyans had learned to speak the local language, so they obviously planned a long stay," Mr. van Notten said.

About 40 Libyans are training Surinamese troops at the main airport, and another 200 set up a military camp in the western part of the country where they are reported to be training non-Surinamese, he said.

"Most likely they are training rebels from [neighboring] French Guiana who are opposed to French rule. We also assume they're in contact with the independence movement in Guadalupe."

A number of terrorist bombings have occurred in Guadalupe in the past year.

The Libyans have established contacts with sympathizers in Aruba and Curacao and are believed to be building up a network that would use Aruba (an island off the Venezuelan coast) as a springboard from which to launch operations in Venezuela and Colombia, Mr. van Notten said.

A TRIBUTE TO MARK EDWARD WINTER

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SHELBY. Mr. Speaker, I would like to take this opportuntiy to congratulate Mark Winter on his recent appointment as vice president and director—national operations for Steward Title Guaranty Co., a title insurance underwriter headquartered in Houston, TX. For the last 9 years Mark was the chief lobbyist of the American Land Title Association and through his efforts the title insurance industry's views and positions were skillfully presented.

In addition to Mark's lobbying responsibilities, he also edited the title insurance industry's newsletter, "Capital Comment." My colleagues and I found the newsletter to be an insightful source for insurance and housing legislative matters.

But, first and foremost, Mark is a government relations specialist—a person that can be counted on to provide a forthright assessment on legislative proposals. I understand that one of the responsibilities Mark will undertake in his new position will be to represent Stewart Title on Federal and State initiatives.

I wish Mark every success in his new position and look forward to his Capitol Hill visits.

THE NATIONAL BUREAU OF STANDARDS COMES IN FIRST IN THE NATION IN SIGNIFICANT NEW TECHNICAL PRODUCTS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. WALGREN. Mr. Speaker, one of the most important honors awarded in the international scientific community is to be included in the list of E–R 100 awards, a list of the 100 most imporant technological developments of the preceding year selected by Research and Development magazine.

This year, Research and Development magazine chose eight developments by the National Bureau of Standards for E–R 100 awards. These eight awards for work done by the National Bureau of Standards represents more than any other organization in the world, including the largest Fortune 500 companies heavily involved in research like IBM and other major international research companies.

NBS's achievement is all the more remarkable in light of the unfortunate budget cuts this agency has faced in recent years. When the 1986 NBS authorization bill came before the Rules Committee one member of that panel asked the rhetorical question: "If we cannot cut the National Bureau of Standards, what can we cut?" These awards should prove that NBS is a world-class laboratory which we cannot afford to undermine. Instead, we should hope that sometime there will be enough understanding of the critical role of the National Laboratories in keeping American competitive that we will ask ourselves the question: "How can we afford not to support Laboratories like the National Bureau of Standards."

The following press release announcing these awards further explains the breadth of this unique laboratory's accomplishments.

FEDERAL LAB WINS HIGHEST NUMBER OF RESEARCH AWARDS IN COMPETITION SPONSORED BY NATIONAL MAGAZINE

Inventions in computer science, microelectronics, and automated manufacturing were among the eight entries of the Commerce Department's National Bureau of Standard (NBS) given I–R 100 awards today in Chicago. Those eight awards represent the highest number given to any single participant in this year's competition.

I–R 100 awards are given annually by Research & Development magazine to honor the "100 most significant" new technical products of the preceding year. They are selected by a panel of technical experts from around the country.

Description of the award-winning projects follow.

TEST SYSTEM LINKING COMPUTERS

In July 1984, 14 computer manufacturers and communications companies demonstrated for the first time how computers from different manufacturers could communicate using international networking standards. A test system developed by an NBS-led team helped make that demonstration possible. The system, the first of its kind, is a set of complex software programs that allows vendors and users to self-test their computer systems to make sure they conform to international computer networking standards.

The winners of this I-R 100 award are Richard J. Linn, Jr., Wayne McCoy, J. Stephen Nightingale, Daniel Rorrer, and Jeffrey Gura, all from the NBS Institute for Computer Sciences and Technology, and Thomas P. Blumer and John C. Burruss from Bolt, Beranek and Newman, Inc.

AUTOMATED DEVICE FOR MEASURING COMMERCIALLY IMPORTANT "THIN FILMS"

George A. Candela and Deane Chandler-Horowitz of the NBC Center for Electronics and Electrical Engineering were honored for developing a fully automated, high-accuracy device, known as an "ellipsometer," for measuring the optical properties of thin films on various materials. The device—built mainly from commercially available components—can determine the thickness and refraction index of thin films more accurately and with greater ease than previously possible. This is important to industries such as semiconductor manufacturers which need accurate ellipsometers to produce quality products. The NBS instrument makes reliable measurements of commercially important films in integrated circuits that are not accessible to existing equipment.

IMPROVED ELECTRON GUN

A team of NBS researchers earned an I-R 100 award for the development of a new type of electron gun—a device to produce a beam of electrons—that is expected to have wide application in surface science, electron spectroscopy, and electron lithography, all areas of growing industrial importance. The new gun circumvents a power limit inherent in conventional devices, and has been tested to perform five times better than the closest competitive project.

The "high-current monochromatic electron gun" was developed by Daniel T. Pierce, Robert J. Celotta, Charles S. Feigerle, and Alfred Seiler of the NBS Center for Radiation Research.

ELECTRICAL MEASURING DEVICE TO AID IN CHEMICAL MEASUREMENTS

Ronald W. Shideler, an electronics engineer in the NBS Center for Analytical Chemistry, received his award to inventing a device designed to measure extremely low levels of current through the computer-controlled data collection systems of mass spectrometers. These chemical measurement instruments are used widely for medical, environmental, and industrial analyses. The NBS-developed electrometer is more sensitive than others and will help in performing highly precise and accurate mass spectrometric chemical analysis at low levels (parts per million or lower).

HIGH-PRECISION ELECTICAL CAPACITANCE DEVICE

Robert D. Cutkosky and Lai H. Lee of the NBS Center for Basic Standards earned an I-R 100 award for design of an automated, high-precision "capacitance bridge." Capacitance bridges are used in laboratories around the world for calibrating standards of electrical capacitance. Their device is the first such fully automatic instrument capable of the precision and accuracy required by standards laboratories. It operates at a basic accuracy 1,000 times better than that of its closest competitor, something that is critical for those performing work in a wide range of electronics.

FASTER CALIBRATIONS WITH ELECTRICAL STANDARD

Physicist Raymond S. Turgel of the NBS Center for Electronics and Electrical Engineering received an I-R 100 award for his development of a standard for phase meters that improves the speed of calibrations ten times or more. This device is designed to ensure reliable measurements of phase in applications such as testing aircraft navigational instruments, tracking satellites, and checking the operation of electrical power lines. The technology developed for the invention forms the basis for further developments in precision waveform generation.

ERROR-COMPENSATION SYSTEM FOR COMPUTERIZED MACHINE TOOLS

As part of their study of measurement and control systems for automation, NBS researchers in the Center for Manufacturing Engineering developed a microcomputer-based error-compensation system for automated machine tools that has earned an I-R 100 award.

Most computer numerical controlled (CNC) machine tools have software that automatically corrects for some positioning errors, but they are limited in several respects. The NBS system overcomes critical limitations in that process. The system has been tested on two different commercial machine tools demonstrating accuracy enhancements of eight to 10 times. It also makes it possible to eliminate the machine-tool warm-up period—up to 10 hours of unproductive operation—that was previously required for precision machining.

The CNC machine tool error-compensation system was developed by Kang B. Lee, Thomas Charlton Jr., James R. Shaver, Ralph C. Veale, and Bruce R. Borchardt of NBS, Alkan Donmez and C. Richard Liu of Purdue University, and William Zinn of Hardinge Brothers.

ABSOLUTE RADIOMETRIC STANDARD

Physicist Edward F. Zalewski of the NBS Center for Radiation Research, together with Richard Duda of United Detector Technology, Inc., earned an I-R 100 award for the development of a visible light detector and measuring device with a 100 percent quantum efficiency. Such a device converts all of the photons of light striking it into an electric current which can then be amplified and measured. The photodector greatly simplifies the task of making extremely accurate measurements of radiant light. It is expected to have wide application in the lighting industry and in related fields such as photographic equipment, lasers, photocopying and lithography.

P. ANTHONY RIDDER

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MINETA. Mr. Speaker, my colleague, DON EDWARDS, and I would like to ask you and our distinguished colleagues to join us in saluting P. Anthony Ridder, president and publisher of the San Jose Mercury News. Tony will be honored at a dinner on January 16, 1986, marking his departure from our newspaper in Santa Clara and Alameda Counties, the San Jose Mercury News, to new duties in Miami.

In 9 years as publisher of the San Jose Mercury News, Tony has distinguished himself as an expert administrator, concerned with balanced journalism, the integrity of the press, and an unrelenting commitment to the betterment of life in Santa Clara County. Under his leadership, daily readership increased from 200,000 to 260,000. His direction was instrumental in guiding the Mercury News into becoming a widely respected newspaper, known regionally and nationally for its balanced news reporting. The Mercury News will miss him.

The impact of Tony's departure can be assessed only in light of his numerous contributions to our community. Perhaps more than anyone else, Santa Clara County has turned to Tony Ridder for advice, guidance, and support for numerous civic and community projects. It was his determination that ignited support for the Technology Center for Silicon Valley, which in time will be a showplace for the Nation's high technology industry. His influence was instrumental in advancing a wealth of worthy projects, ranging from the bolstering of the San Jose Museum of Art to the construction of the Guadalupe light rail corridor.

He is a member of many boards and organizations—among them the Santa Clara County Manufacturing Group, the California Chamber of Commerce, and Santa Clara University. He is an ardent supporter of education, and was closely involved with a program of corporate sponsorship in area schools. In short, Tony has set an excellent example of corporate responsibility within the community.

His generous devotion of time and resources to our area is a reflection of his own personality. DON and I have known Tony for many years, and we've always been impressed with his sincerity, his spirit, and his high regard for the people around him. We've also come to know Tony as a friend—a friend willing at any time to devote himself to the betterment of our community and our Nation.

Mr. Speaker, on the occasion of the banquet honoring P. Anthony Ridder, he can be confident that our country is most grateful for his contributions and accomplishments. Therefore, DON and I ask you, Mr. Speaker, and our colleagues to join us in expressing our thanks and congratulations to Tony Ridder and to wish him continuing success.

AN ARMED FORCES MEMORIAL

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. ORTIZ. Mr. Speaker, I rise today to commend and pay tribute to a group of patriotic citizens from Brownsville, TX. This group of citizens, from all walks of life,

have seen fit to publicly recognize the past, present, and future sacrifices of our men and women in the armed services of this great Nation of ours in the form of an Armed Forces Memorial. The memorial is to be erected in the "Armed Forces Memorial Xericape Park" at the Fort Brown Historical Site, just as you cross the Rio Grande at the Memorial Bridge, in Brownsville, TX. It is being funded not by the Government, but by donations from its local citizens.

I can think of no more appropriate time than this, based upon the events of a week ago today when 248 U.S. Army soldiers of the 101st Airborne Division and other Fort Campbell units were killed in the crash of a chartered DC-8 aircraft, soon after takeoff from the Gander Newfoundland Airport. As you know, these soldiers were enroute to Fort Campbell and home, after completing 6 months of duty with the Multinational Force and Observers in the Sinai Peninsula, Egypt, to spend Christmas with their families and loved ones. Such is the nature of this memorial to not only recognize the supreme sacrifice of our men and women in time of war, but to recognize the sacrifices of the living and the dead in time of peace as well. My heart and wishes of God's blessings go out to the families of these brave soldiers, of comrades fallen in wars and conflicts of the past, as well as the many living service personnel whose scars and suffering are not as visible.

Expressed in a letter I recently received from Jose "Sparky" Esparza, historian for the group of volunteers embarked upon funding and having erected this Armed Forces Memorial, are these words: "Such a structure . . . would not only be fitting for members who participated in our Armed Forces, but appropriate to those who sacrificed their valiant blood for the cause of liberty. Their devotion to the democratic ideals of America carved their courage on those parts of the world that requested our help. Soldiers may inwardly complain, but never in the political arena of decisive discussions. They will obey the call, live for our flag, and if need be, die for our flag . . . Our system of government, despite varying opinions, is the most feasible structure in the preservation of justice, well-being and dignity. To all who trained, fought or died, there gently echoes the silent words of a great general, General Douglas MacArthur, 'Always for them . . . Duty, Honor, Country.' In such spirit we must not let patriotism become a shadow in the twilight of oblivion; nor, forget those who are active, were active, or are no longer there to answer rollcall. Soldiers are special . . . they are the guardians of our country, our freedom, and our lives. Could we do less than honor them with a memorial?"

The site for the memorial was approved on October 15, 1985, by the Brownsville City Council. The memorial itself will be pentagon shaped, approximately 5 feet high and 16 feet across with a base approximately 22 feet in diameter. The base, top, and each of the 5, 4 by 8 foot sides of the memorial, will be faced in blue-grey granite. A seal representing one of the five branches of the Armed Services will be affixed to each side of the memorial and the flag of that branch of service will be flown on a staff located on that service's side of the memorial. The flag of the United States of America will be flown on a staff erected from the top center of the memorial.

I appreciate the efforts of all the people of Brownsville and some of the following memorial committee members who have been instrumental in promoting this memorial, the unveiling of which is expected to occur on July 4, 1986: Jose "Sparky" Esparza; chairman Oliver Butler (COL USA Ret); secretary/treasurer, Jerry V. Ingle (SGT MAJ USMC Ret); Navy representative, Donnie R. Boykin (CPO USN Ret); Army representative, David L. Ervin (MAJ USA Ret); Air Force representative, John Cutney (LTC USAF Ret); and Coast Guard representative, Fred D. Mann (CPO USCG Ret).

Again, I commend the citizens of Brownsville who through their unselfish efforts have joined together to erect an Armed Forces Memorial honoring those who have served their country in the past, the present, and who will serve in the future. God bless each of you and each of the men and women who have, do, and will serve our country and the liberty for which we stand. God bless America.

KILDEE HONORS BISHOP ROGER LEE JONES OF FLINT, MI

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KILDEE. Mr. Speaker, today I would like to take a moment to recognize Bishop Roger Lee Jones of Flint, MI, who has attained the highest position possible in the Church of God in Christ. On November 11, 1985, approximately 30,000 persons witnessed as he was consecrated bishop of the Third Ecclesiastical Jurisdiction of Southwestern Michigan during the Church's 78th Holy Convocation in Memphis, TN, by Presiding Bishop James O. Patterson, Sr. His diocese headquarters is located in Lansing, MI, and includes churches in Flint, Saginaw, Ann Arbor, Niles, Benton Harbor, Muskegon, Lansing, Jackson, and South Haven.

Bishop Jones, the son of Donnie and Lena Jones, began his ministry at the age of 18 at the St. Paul Church of God in Christ in Rocky Mount, NC. Prior to being called to the ministry, he was a devoted lay church worker. During his teens he served the church in many capacities from junior deacon, who kept the church clean and the coal stove heated for a 500-member church, to junior Sunday school superintendent.

He was ordained an elder in 1958 by the late Bishop Wyoming Wells in Southern Pines, NC. He conducted his first revival at Bishop Well's church in Greensboro, NC, prior to being ordained.

At the age of 22, the future Bishop Roger L. Jones, already a nationally known evangelist, began his leadership role in the national church. He was appointed youth leader for the International Youth Congress in 1959. In 1961, he was appointed national platform chairman of the International Youth Congress, a position he held until 1965.

In November of 1963, the future Bishop Jones came to Flint, MI, where he became the founder-pastor of the Greater Holy Temple Church of God in Christ.

Bishop Jones not only became a very successful local leader, but also a very prominent figure in the State and national church. In 1977, he was elected chairman of the board of trustees of the national church, a position to which he was again elected in 1980 and 1984. On the State level he served as cochairman of the finance committee, chairman of the expediting committee, and vice chairman of the State elders council. In 1980, the late Bishop John S. Bailey appointed him chairman of the elders council, and in 1982 to the board of administrative assistants.

In the Flint community Bishop Jones has served as past vice president of the Concerned Pastors for Social Action and as a member for the City Advisory Council for Project Followthrough. He is a member of the Greater Flint Council of Churches and has served as youth minister for the Flint Chapter of Teen Challenge.

Bishop Jones completed high school and Saints College in Lexington MS. He has also studied at Mott Community College, Baker Junior College, Detroit College of Business and the University of Michigan—Flint. He and his wife, Margaret are the parents of three sons.

During his 29 years as a minister, Bishop Jones, through God's guidance and with His abundant blessings, has grown from a young man delivering his trial sermon into an eloquent and articulate messenger for the Lord. We in the Flint area are better because of his guidance and proud to be associated with him.

REEXAMINATION OF CONSENT DECREE

HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TAUKE. Mr. Speaker, last Thursday, December 12, 1985, Commissioner Mimi Dawson of the Federal Communications Commission delivered the following speech to the Practising Law Institute. The speech sets forth strong arguments as to why the consent decree in the AT&T divestiture case needs to be reexamined. I call it to my colleagues' attention as they consider during the next session the various bills which would change the consent decree.

The speech follows:

REMARKS OF COMMISSIONER MIMI DAWSON, FEDERAL COMMUNICATIONS COMMISSION

Thank you. I'm delighted to be here today to share my views with you on the evolving telecommunications marketplace. As you know, the industry, the Government and users have been greatly involved during the last several years in transitioning to a competitive arena. This process has generally focused on AT&T and the OCCs, and its history includes the Execunet decisions, ENFIA, the MTS/WATS docket, the divestiture, a number of court proceedings and equal access arrangements.

This morning the speakers addressed the issues of equal access and interexchange competition. Other sessions will address accesss tariffs, Computer Three, new lines of business for the BOCs and non-Federal issues. I would like to devote my remarks today to an issue which is extremely important to all the players in the marketplace: the future competitive role of the local exchange carriers and particularly the Bell Operating Companies.

What I would like to present to you is a slightly *different view* of *why* the restraints of the MFJ and certain FCC regulations need to be re-examined—if we are to bring additional service choices to American consumers and enhance our ability to rely on marketplace forces rather than governmental restrictions.

My "brief"—if you will—is that the nature and scope of competition in the provision of telecommunications services has gone through a substantial metamorphosis. Competition is not horizontal. It is not characterized by discrete and severable areas of competition—despite the inclination of many to view it that way.

The MFJ and the FCC have attempted to segregate services into distinct categories: manufacturing, exchange service, interexchange service, information service, enhanced services. And with the probable exception of exchange service, regulators assumed that competition would develop in each of those discrete categories.

But that doesn't fully explain the dynamics of telecommunications after the AT&T divestiture. It's true enough that competition has developed in these separate areas. But it's also true that competition is now being characterized more than ever by the integration of transmission, CPE and intelligence.

Perhaps the integration—or more accurately, the re-integration—of these services is inevitable—simply because many large users are not willing to separately shop for the exchange, interexchange, CPE and intelligence segments of their networks. Large users are demanding "one-stop shopping" and end-to-end offerings: Virtual private line networks, for instance, which integrate exchange and interexchange transmission functions with software and CPE.

In more traditional antitrust terms, it seems that the relevant product market or submarket for larger users has changed from the horizontal to the vertical. That is, the product market has changed from the provision of discrete services to the provision of integrated end-to-end packages.

What the market may be telling us today is that the ability and need to integrate all services into a users' network has changed the shape of competition from horizontal to vertical. Competition today is increasingly among providers of integrated offerings which include CPE, intelligence and transmission facilities.

There are several interesting aspects to this. One is the formation of strategic alliances—MCI & IBM, for example—between providers of "different" services in order to be able to offer an integrated product.

In addition, the most intense competition may occur over location of the intelligence in the network—whether the intelligence is placed in CPE, the exchange carrier's central office or the interexchange carrier's switch. It may well be that he who controls the intelligence has a significant marketing advantage and has perhaps captured the customer—or at least has a hand deep into the customer's pocket.

But, as is too often the case, the government's ability to regulate is two or three steps behind technology's ability to innovate.

As I alluded to a moment ago, the FCC now takes a horizontal approach to analyzing competition and classifying carriers as dominant or non-dominant. Thus, interexchange service is one playing field, and the cast of characters includes AT&T, MCI, Sprint, US Telecom and others. CPE providers, although generally unregulated, are on a second horizontal, and local exchange carriers are on a third horizontal.

If users have indeed changed the product market, then the Commission must be willing to modify its policies if it desires to rely on competition and market forces rather than regulation to drive down costs and maximize service options for users. New entry in the provision of these integrated service offerings must be encouraged, and existing yardsticks for identifying and regulating carriers with different levels of market power must be revised. It may now be appropriate to measure market power on an integrated services basis rather than on a component by component basis.

To promote competition in this evolving market, it is important to identify the existing participants as well as the possible entrants. Some interexchange carriers are obviously one group already offering—*or at least able and permitted to offer*—integrated, end-to-end services which combine intelligence with transmission. In an integrated service offering provided by the interexchange carrier, the local exchange carrier may be bypassed or merely used as a pipeline.

CPE providers form another group—limited somewhat in their participation since they generally do not own transmission facilities.

A third group is the local exchange carriers—and particularly the BOCs. But, unfortunately, the BOCs are restricted in their provision of transmission facilities, CPE and intelligence by the MFJ and the FCC's Computer two decision.

The solution—or at least one of the solutions needed—is to increase competition by giving the BOCs some flexibility to compete in this integrated end-to-end market. In some cases direct entry may be appropriate. In other cases forming strategic alliances with other service providers may be appropriate.

I have no doubt that the BOCs will be able to use their capital, expertise and operational efficiencies to provide a variety of services including some which may enable smaller interexchange carriers to better compete with larger interexchance carriers. And, ultimately that's good for consumers. The BOCs would also be able to keep large users on the local network, and lessen pressures on local rates.

That will benefit consumers, too. BOC entry into the integrated services product market, coupled with reasonable interconnection and access requirements, will reduce the cost of service for users. It will decrease the probability of the BOCs becoming the price victim of the upstream dominant carrier, and will lessen the BOCs dependence on their major competitors for carrier common line revenues. And all of these things ultimately will rebound to the benefit of the telecommunications consumer.

But what about the risks? BOC entry need *not* foreclose the operational choices *of other carriers* or users, need *not* increase market concentration, need *not* result in a supply squeeze and need *not* raise barriers to entry for other carriers. Of course, the FCC as well as the Department of Justice and the decree court will be able to and should monitor the BOC's entry to assure no anticompetitive results.

In looking to the BOCs to provide integrated service offerings, I do not necessarily conclude that the other interexchange carriers cannot provide these services. I merely conclude that additional entry would increase user options and would be *accompanied* by manageable downside risk to the public. The decree court would, of course, have to modify the MFJ and the FCC would have to revise its Computer two policies.

Having redefined, or at least refined, the product market and having removed artificial barriers to fuller entry for the BOCs, a new analysis may be appropriate to determine market power. This analysis would necessarily *also* address the issue of whether the relevant geographic market has changed. it is not impossible that the geographic market may now be regional rather than national. The market power analysis would identify dominant and non-dominant firms and regulatory requirements would be crafted for each classification. Additional policies could be fashioned for a transitional period if the market structure so warranted.

Assuming that AT&T and the BOCs,—are found to be dominant for the provision of integrated end-to-end services, the question then presented is at what point should those carriers be declared non-dominant.

I think that several things would set the stage for this eventual determination: curing the problems relating to the implementation of equal access; the easing of restrictions on the BOCs to lay the groundwork for their entry into the market. The exact timing would depend on the rate of development of competition and the loss of market power by AT&T or the BOCs.

Freeing the BOCs from operating restrictions should not be confused with giving the BOCs carte blanche to operate all segments of their business as they please. Accounting and reporting requirements should be fashioned to segregate the competitive large business services from the monopoly small business and residential services. The FCC must assure that all cost allocations are correct. And, state regulation would not be supplanted.

A further *quid pro quo* for permitting the local exchange companies to provide a full range of offerings is the achievement of equal access, not only in terms of physical feature group D facilities but also in terms of making sure that equal access works. After all, the OCCs are also viable competitors in this new environment. The BOCs must fully respond and remedy all legitimate complaints raised by the interexchange carriers. Some of these technical and operational issues are before the Commission in the TDX petition. The Carrier Liaison Committee also has an important

role to play in making sure that equal access works—not to mention the possible creation of the Commission's own equal access task force.

If our purpose is to maximize benefits to users through the introduction of competition, the full development of technology and the operation of market forces, then all carriers must be given the freedom and flexibility to compete in supplying the integrated product demanded by consumers. We must recognize that the competition is again becoming vertical rather than horizontal and assure that our policies and actions toward all carriers reflect this reality. Thank you.

IMPOUNDMENT OF JUVENILE JUSTICE FUNDING

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KILDEE. Mr. Speaker, as you are aware, the fiscal year 1986 Commerce, Justice, State, and Judiciary appropriations bill was signed into law 1 week ago, on December 12. This measure provides $70,282,000 for the Office of Juvenile Justice and Delinquency Prevention [OJJDP]. During the same time period that the appropriations bill was being approved, the Office of Managment and Budget developed a proposal to rescind the entire fiscal year 1986 appropriations.

The proposed rescission has not yet been sent to the Congress as required under the Impoundment Control Act of 1974. Yet, OJJDP has been prohibited from making any further program expenditures pending congressional consideration of the rescission proposal. This constitutes an illegal impoundement of funds.

I am strongly opposed to the Justice Department's actions. Congress, through both authorization and appropriations bills, has repeatedly demonstarated its support for the Federal leadership role which the Juvenile Justice and Delinquency Prevention Act provides in juvenile justice matters. Despite this strong bipartisan congressional support, this administration has consistently requested zero funding for juvenile justice programs, and opposed reauthorization of the Juvenile Justice and Delinquency Prevention Act. In every instance, the Congress refused to go along with their request to end assistance for troubled youth. Nevertheless, in the face of a recently signed appropriations act, the administration has refused to release the funds. Apparently they are trying to shelter this money until such time as a Gramm-Rudman sequestration order goes into effect. In the meantime, there are State agenices and private organizations which have successfully applied for assistance, need that assistance desperately, but have been told they cannot receive any money.

Mr. Speaker, I am strongly opposed to the rescission of OJJDP funds. I am also extremely concerned over the administration's disregard of the orderly process established by the Congress to consider the rescission of appropriations funds. Since the administration has not complied with the Impoundment Control Act, I strongly urge that the Department immediately release these funds for obligation.

DEADLINE EXTENSION FOR MINERAL LEASING

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. RAHALL. Mr. Speaker, the conference report on the continuing appropriation for fiscal year 1985 contains an amendment offered by the other body which delays the effective date of August 4, 1986, to December 31, 1986, after which holders of undeveloped Federal coal leases issued prior to 1976 will be prohibited from being issued new Federal onshore mineral leases under the Mineral Lands Leasing Act of 1920.

I did not object to this intrusion on the jurisdiction of the authorizing committee. In the Committee on Interior and Insular Affairs, we have been working on legislation in this area and will continue to pursue this matter during the next session of Congress. However, I must reiterate at this time my strong opposition to any further attempt to amend section 2(a)2(A) of the Mineral Lands Leasing Act of 1920 through the appropriation process. It is my expectation the authorizing committee in the other body will begin consideration of legislation regarding this matter and follow the normal course of deliberation. It is my strong desire to see this issue resolved next year, and to that end, I will continue with the effort commenced by the Subcommittee on Mining and Natural Resources.

AND JUSTICE TO ALL

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SOLARZ. Mr. Speaker, last Friday five Maryland rabbis went to prison for conducting a peaceful vigil in front of the Soviet Embassy. They are serving a 15-day prison sentence at the Federal Correctional Institute at Petersburg, VA. In addition, several others were fined and put on probation. The rabbis were protesting the harsh treatment of six Soviet Jewish prisoners of conscience.

Not only is this an excessive punishment, offensive to our moral conscience and sensibilities, but it is unfair and unjust, more in line with Soviet legal policy than with American. For nearby, outside the South African Embassy, similar protests are conducted against that Government, and there arrests also take place. But, unlike the protests at the Soviet Embassy, in these cases, all charges are dropped. This is selective justice, and it does a great disservice to both the American system of justice and to those Americans who fight to preserve justice for people in other societies.

Clearly we need to reexamine our laws surrounding peaceful demonstrations outside other nation's embassies. Alan Dershowitz, a professor of law at Harvard University recently wrote about this subject. I would like to insert his cogent article here and commend it to the attention of my colleagues.

The article follows:

Something is rotten in the city of Washington. Recently, two groups of demonstrators were arrested for violating the exact same law. But the cases against one group have been dismissed, while the cases against the other have been brought to trial.

The law in question prohibits anyone from demonstrating within 500 feet of any foreign embassy. The first group of protesters deliberately violated that law by demonstrating near the South African Embassy against that country's horrendous system of apartheid. The second group violated the same law by demonstrating near the Soviet Embassy against that nation's abominable treatment of Jews, especially Jewish "refuseniks," who have been denied permission to join their families in other countries.

Members of both groups were arrested, but all charges were dropped against those demonstrating near the South African Embassy. Those demonstrating against the Soviet Union were brought to trial, convicted and sentenced to 15-day suspended jail sentences, six-month probations, and fined $50.

Few are complaining about the severity of the sentences, but there is widespread outrage at the different treatment accorded the two groups.

Members of the anti-Soviet group have been found to be criminals, while members of the anti-South Africa group have been treated as law-abiding. Indeed, 35 members of the House Judiciary Committee have argued in a letter to Attorney General Edwin Meese that it was unfair to prosecute the anti-Soviet protesters, since it was decided not to prosecute the anti-South Africa demonstrators.

Certainly, the Justice Department can't hold the position that one group is more justified in its protests than the other. Both South Africa's treatment of its blacks and the Soviet Union's treatment of its Jews are inexcusable violations of human rights. It's futile to try to decide which is the worse evil, since each has its uniquely devilish aspect: the pervasiveness of apartheid's legalization of primitive racism condemns it in the eyes of the entire world; the Soviet Union's state-supported anti-Semitism, combined with its refusal to allow any but a handful of Jews to leave, has earned it a distinctive place on the dishonor roll of human-rights violators.

Nor is there any claim that one set of demonstrators was noisier or more disruptive than the other. Both groups were engaging in peaceful acts of civil disobedience to bring their views directly to the doorsteps of those diplomats who represent their countries' evils in our nation's capital.

The justification apparently offered by prosecutors in defense of their selective prosecution is that South Africa has decided not to press charges, while the Soviet Union insists that those who protest within 500 feet of its embassy must be prosecuted.

There could be no worse reason for the prosecutors to have acted as they have. It

cannot be our country's policy to allow foreign governments to dictate who we shall prosecute under our laws and within our legal system. For us to accede to the policy preferences of racist and anti-Semitic regimes is to abdicate our responsibility for making decisions about our laws.

What if the South African Embassy pressed charges only against black demonstrators, and not against white ones? Surely, we would pay no attention to their preferences. Why, then, should we pay attention to a public relations decision made in Pretoria and designed to produce a propaganda victory for the apartheid regime by showing how "sensitive" South Africa is to the rights of U.S. protesters? Let President Willem Botha show the same solicitude for protesters in South Africa.

Nor should we pay any attention to Soviet insistence that those Americans who protested near its embassy—mostly rabbis—be selected for prosecution. Either everyone or no one who protests within 500 feet of any embassy must be prosecuted. That is what "equal protection of the law" means.

But Judge Colleen Kollar-Kotelly of the District of Columbia Superior Court rejected all legal arguments made by the rabbis this month and convicted them. She turned down their claims of selective prosecution, as well as their argument that the defense of "necessity" permitted them to engage in non-violent peaceful protest within earshot of the diplomats, since all legal recourse had been denied. The judge also rejected the prosecutors' recommendation that no fine be imposed, and sentenced the defendants to pay $50 each, in addition to the suspended jail terms and the probation.

Several of the rabbis, acting in the spirit of the Rev. Martin Luther King Jr., refused to pay the fine or promise to stay away from the Soviet Embassy. These rabbis were then sent to jail for 15 days and were denied bail, pending appeal.

It is sad—indeed, a rotten—day for American law when our prosecutors adopt the very inequality against which all the Washington protesters were demonstrating. The anti-South Arica demonstrators can't be any happier that their fate was determined by Pretoria's racists than are the anti-Soviet protesters that their fate was determined by Moscow anti-Semites.

UNITED STATES HAS NO RATIONAL TRADE POLICY

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TALLON. Mr. Speaker, the President's decision last week to veto the textile and apparel trade bill was the culmination of misguided, ill-conceived trade policy that America has pursued for 5 years. This trade policy is causing the erosion of America's manufacturing base and our status as a world power.

As Roger Milliken, chief executive officer for Milliken and Co. observed, "We are talking today about the transfer of economic strength to other nations and the resulting decline in American power."

Our decline in economic strength is largely the result of a war of words on American trade policy taking place in Washington. On one side are the free traders; on the other side are the protectionists. They are both creating a great deal of noise, but unfortunately, both are defending a myth.

They argue textbook theories and ancient history without regard to the real economic world marketplace.

As a result, the United States has no rational trade policy that might reduce our $150 billion trade deficit and enable us to compete in new and constantly changing world trade.

First, to dispell the myth, pure free trade does not exist now and never has. Neither does its ideological opposite, pure protectionism.

To look at the real world:

At least one-half of world trade is affected by some sort of protectionism—tariffs, quotas, subsidies, or other measures that distort trade by preventing its free flow.

Fully 40 percent of the world trade is not between countries but between branches of multinational companies.

Almost every nation except the United States has a trade policy, and makes it part of its overall foreign policy.

In view of these practical realities, the administration's blind faith in free trade is ridiculous. Yet, on the other side, protectionists take a meat ax approach by proposing a blanket 25-percent tariff, as though all imports are equal and all countries deserve the same treatment.

The free trade theory stems from an idea of comparative advantage formulated almost 200 years ago. Under this theory, each nation has certain products it can make cheaper than other nations.

Thus, a nation should sell what it makes best and buy abroad what other nations make. In the perfect scheme, each nation uses its comparative advantage to its own profit.

But with today's technology and communications systems, modern factories can be built around the world, taking advantage of the lowest wages, while being directed by headquarters in New York.

Therefore, "comparative advantage" is no longer a natural occurrence, but can be created by any country or multinational corporation willing to go to the trouble. This is the biggest cloud on the U.S. trade horizon.

Some of our problems will disappear as the dollar weakens, but the threat of low-wage competition will continue. There is nothing inherently unfair about this. No simple, single measure aimed at "fair trade" will work here.

This is why we need a full fledged trade policy, based on world realities. Our Government policies on taxes, industry, and investment must be shaped to promote trade and expand industry and jobs.

Does this imply some protectionism? Yes, but aren't our industries, jobs, communities, our standard of living worth protecting? In economic defense, like in military defense, the question is not if, but how.

We have an arsenal of offensive and defensive weapons—duties, quotas, subsidies, tax incentives, bilateral agreements. The key is a set of rational, practical trade policies using what works best in specific situations.

A trade policy for our Nation is long overdue. It is time to jettision the myths and start dealing with the real world. If "protectionism" offends the ear, we can call it "managed trade" or "organized free trade" or some other fancy name. At this stage, what we call it is less important than whether we do it.

"ACCURACY IN ACADEMIA" ASSAILED

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BIAGGI. Mr. Speaker, recently a group claiming to be a watchdog of the "liberal bias" of campus professors, has come to the attention of a number of us concerned about educational issues.

Specifically, this group, calling itself "Accuracy in Academia," contends that it has signed up 150 college students from schools across the country to monitor professors who are giving one-sided lectures. This group is also publishing a newsletter which will name those it considers "violators".

I am pleased to note that a number of distinguished leaders in the educational field—from conservatives to liberals—have joined to denounce this ill-advised propoganda machine. Last month, in a Washington speech, the chancellor of the City University of New York, Joseph Murphy, this group nothing more than a "corps of thought police." Joining in this denunciation was Secretary of Education William Bennett, who called this group "a bad idea" in a speech before 300 college deans in Baltimore.

The most recent information on this group has surfaced in the form of an article in the New Republic, which details the inner working of this group. For the benefit of my colleagues who might be confronted by the issues raised by this group, I wish to insert this article into the RECORD.

[From the New Republic, Dec. 30, 1985]

I WAS A SPY FOR ACCURACY IN ACADEMIA—CAMPUS DOUBLE AGENT

(By James Ledbetter)

Professors to be monitored for leftism. That *Washington Post* headline caught my eye on August 4, 1985. I read that a new group called Accuracy in Academia (AIA) planned to weed out "10,000 known Marxists" on American college campuses. Malcolm Lawrence, president of AIA, vowed to publicize "political bias based on incorrect information" in the classroom. I found it hard to believe that there were that many Marxist professors in American universities, and wondered how AIA would decide which courses to monitor. So the next day I called Lawrence at home, told him that I was a senior at Yale, and asked if they planned to be active on my campus.

"You're a student?" he replied. "Would you be interested in being our Yale contact?" Lawrence didn't ask whether I knew of any instances of Marxism. He didn't ask

if I approved of the group. He didn't even ask about my political leanings. Not thinking it would amount to anything, I agreed, and gave him my phone number and school address. Lawrence assured me someone from the group would get in touch. For the next four months, I would be a spy for Accuracy in Academia.

AIA is a spin-off of Accuracy in Media (AIM), an organization created in 1969 to combat the purported liberal bias of the American media. AIM devotes its $1.7 million annual budget to monitoring the press and television for slanted coverage. AIM president Reed Irvine has gained respectability through appearances on ABC's "Nightline" and other television programs. Though best known for its two-hour rebuttal to the PBS series "Vietnam: A Television History" (which was labeled "good propaganda for the communists"), AIM is active on many fronts. For example, noting that polls reveal American women to be more liberal than men, AIM suggests that "one possible explanation . . . is the popularity among women of the Phil Donahue show."

In August AIM announced that it was "going to the source" of the media tilt—leftist academia—and created a new arm to "end the brainwashing." The group has thus far cited a dozen or so "biased" professors. The first student report concerned Dr. Mark Reader, a professor of political science at Arizona State University, who teaches a survey course of political ideologies. AIA's first newsletter, leaked to the press weeks before it was published, charges Reader with teaching only his own "obsessions: . . . anti-nuclear propaganda and fringe economics." An anonymous student also quoted Reader as saying that "the Soviet Union is no threat compared to the United State's imperial aggressions." Reader denied that he had said this, though he claims if he did, he had every right to do so. (AIA claims that "young, impressionable students" are reluctant to criticize a professor who might flunk them, so it promises to keep the identity of its students. . . .

Csorba told me that the "paranoid" professors resisting AIA's calls for "balance" weren't going to force the group out of business. "In a year or two we'll just be a standing presence and people will accept what we're doing as legitimate. We're not going to go away." He's probably right. The group's annual budget is $162,000, covering ten newsletters per year and the small staff. AIA's figurehead president is now John LeBoutillier, the author of an "expose" of alleged decadence at Harvard who once served a term in Congress. Scully was brought on as national director mainly to write about Reader. Thus he and Csorba alone lead the battle against the army of 10,000 Marxist academicians.

Csorba said that each issue of the newsletter would be sent to 40,000 people. Subtracting staff fees from the budget, there is no way AIA can affort mailing that many newsletters every month. It plans to charge nonstudents $25 a year for the newsletter, but it's doubtful it will get many subscribers. Other backers will have to be found, and no doubt will. There is plenty of conservative foundation money to be had.

Somewhat less secure is AIA's guise of fairness. If AIA is careless enough to allow a mole into its inner sanctum, imagine how it might misrepresent a professor it's already out to persecute for views expressed outside the classroom. As Marx, always the great social commentator, once said: "I wouldn't want to be a part of any club that would have me as a member."

THE SECRETARY OF STATE CALLS FOR INTERNATIONAL COOPERATION AGAINST TERRORISM

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BROOMFIELD. Mr. Speaker, I commend Secretary of State George Shultz for forcefully speaking out on the issue of terrorism during his trip to Yugoslavia. I encourage him and other Government officials to take a firm stand against the scourge of international terrorism. Hard-hitting comments such as his do help and are appreciated. Well done, George.

As my colleagues know, our Secretary of State is visting a number of Eastern European countries. During his visit to Yugoslavia, he clearly spoke his mind about the threat of international terrorism. He was responding to comments made by the Yugoslavian Foreign Minister. In an emotional presentation, Mr. Shultz told the news conference that the hijacking of the Italian liner, *Achille Lauro*, was not justified. He also said that terrorist acts were wrong and that the international community must face up to the problem of terrorism.

As we all know, Abu Abbas, the Palestinian who masterminded the hijacking of the *Achille Lauro* and the tragic murder of Leon Klinghoffer, was allowed by Italian authorities to go to Yugoslavia. Later, Yugoslavian officials allowed that terrorist to quietly leave the country for Iraq. Unfortunately, the Yugoslavian Government rejected a United States request for the arrest and extradition of Abu Abbas.

All of us must face the fact that terrorism cannot be justified as an expression of the frustrations of those who believe they have been wronged. Negotiations are the best way to resolve standing problems. Terrorism in all of its forms is criminal activity which cannot be justified by any country or any group of people. Terrorists are international bandits and pirates. They must not be given shelter in any country. We must do all that we can to have terrorists extradited and brought to justice. Abu Abbas and others like him must receive the punishment which they deserve. International cooperation among the nations of the world that have been affected by the scourge of terrorism is necessary. The Congress recently passed legislation calling for the establishment of an International Coordinating Committee on Antiterrorism. This organization would provide an international forum for combined action against terrorism. The group could serve as a coordinating body for antiterrorism efforts by concerned governments. Intelligence sharing and coordinated political action against terrorism could be discussed by the group.

Terrorism is an international problem and an international solution will be required to face up to this growing menace. I encourage our Secretary of State to call for the creation of this International Coordinating Committee. The time for concerted efforts against international criminals masquerading as heroes is now.

With these thoughts in mind, I commend the following Washington Post article on the Secretary's comments on terrorism to my colleagues in the Congress.

SHULTZ AMPLIFIES TERRORISM COMMENT

(By John M. Goshko)

Secretary of State George P. Shultz said yesterday that he was "speaking for the American people" when he angrily told a news conference in Belgrade on Tuesday that the hijacking of the cruise ship Achille Lauro was a terrorist act and had no political justification.

Shultz created a stir in Belgrade when he pounded a table and publicly disputed Yugoslav Foreign Minister Raif Dizdarevic's statements that incidents like the Achille Lauro piracy must be viewed in the context of the Palestinian people's struggle against colonialism.

Shultz, who had been sharing the podium with Dizdarevic, immediately interrupted to say that the hijacking, in which Palestinian terrorsts killed an elderly American and terrorized others, "is not justified by any cause that I know of."

Yesterday, while flying home after a 10-day European visit, Shultz said, "I just want people to see that in the United States we feel very strongly about this subject. I felt that by making an interjection at that point I was very much really speaking for the American people."

"I think that in the past year, we in the United States have seen the menace of terrorism more clearly. So support for doing something about it is stronger," added Shultz, who has been the most outspoken member of the administration in advocating a tough stance against terrorism.

He also insisted that there is no contradiction between his call Tuesday in Belgrade for giving terrorists "no place to hide" and the administration's reluctance to take measures against Iraq for harboring Mohammed Abbas, a Palestinian leader who allegedly masterminded the Achille Lauro piracy in October.

Shultz acknowledged to reporters Tuesday that Abbas, a member of the Palestine Liberation Organization executive committee, has been in Iraq and that the Iraqi government has refused U.S. requests for his arrest.

When he was asked yesterday whether Abbas is still in Iraq, the secretary replied, "I don't have any information otherwise." A State Department spokesman said yesterday that the United States would request Abbas' extradition if it is determined with certainty that he is in Iraq.

Although acknowledging that Iraq's apparent harboring of Abbas is "a problem," the secretary said, "I don't think we should feel that every time we identify a problem, we have to fire off a gun or break relations with someone. There are gradations."

Shultz again linked the PLO to terrorist acts in the Middle East.

He denied that his criticism of the PLO is at cross purposes with the efforts of Jordan's King Hussein to win PLO backing for a Jordanian-Palestinian delegation to enter peace talks with Israel. Shultz said the United States continues to back Hussein's search for those Palestinians who could play a role in the peace process.

However, the secretary added, "We have seen individuals who have associations with the PLO, including members of the executive committee, be associated with hostage-taking, acts of terror and murder. So you have to put that in the picture."

FOURTH MARTIAL LAW ANNIVERSARY IN POLAND

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HOYER. Mr. Speaker, December 13 marked the fourth anniversary of the declaration of martial law in Poland. For 4 years, the Polish people have lived under a state of seige by their own government. The initial violent aftermath of the imposition of martial law, the dark days when water cannon and riot batons were trained on peaceful demonstrators, has given way to pervasive and insidious efforts by the regime to institutionalize repression and eradicate all independent associations and activities.

Members and supporters of the outlawed union Solidarity, including activist priests, frequently fall victim to mysterious deaths, beatings, and kidnappings and threats by unknown assailants. Despite periodic, highly conditional amnesties, there are at least 265 prisoners of conscience in Poland today. The Jaruzelski government has passed a new law on higher education, aimed at suppressing free intellectual exchange and the development of independent culture. Last week, seventy university rectors and deans were fired for political reasons. All of this was done in the name of normalization and restoring order. Ironically, General Jaruzelski has taken to travelling abroad to the West to seek the legitimacy that the Polish people steadfastly refuse him at home. Jaruzelski is literally banking on the premise that memories in the West have faded about the devastating events of only 4 years ago. But for the Polish people, martial law is no mere memory. They cannot forget. Daily life serves as a painful reminder.

Yet, Mr. Speaker, 4 long years after the crackdown, Solidarity is still very much in operation above—and underground. It remains the inspiration for extensive unofficial publishing and other independent cultural and educational activity. As co-chairman of the U.S. Helsinki Commission, I would take the occasion of the grim December 13 anniversary to share with my colleagues the concluding paragraph from a report prepared for the Budapest Cultural Forum of Helsinki signatory states by the Committee of Culture of Underground Solidarity. It consists of a quote by Leszek Szaruga, that appeared in the independent literary publication Obecnosc from Wroclaw:

We live in a divided Europe brimming with steel and explosive devices, capable of wiping out the most minute trace of life from this continent. We can oppose this arsenal only with the delicate structure of culture which is always a structure of understanding. It is easily destroyed, and not only by force. One can easily destroy it by destroying lively and searching thought, which frequently goes astray, but which constitutes the only realistic chance for survivial.

Lively and searching thought is the target of regime repression in Poland and in other countries around the world today. Solidarity's tragic experience and its urgent message holds deep meaning for us all. We would do well to listen and to heed it. Thank you, Mr. Speaker.

MARTIN ANDERSON ON THE NEED FOR AN ABM SYSTEM

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COURTER. Mr. Speaker, Martin Anderson's essay from the Washington Post points once again the very real need for some form of defenses against ballistic missiles, even if such a defense is only partial or preferential in scope. We currently have no defenses whatsoever against any type of ballistic missile attack, a fact which many Americans find both astounding and profoundly disturbing. The SDI opponents have made a centerpiece of their attack the insistence that any system be 100 percent effective, virtually leakproof against an all-out Soviet first strike. In the same breath, they contend that such a system is impossible to construct and operate. Little attention is paid to the most likely nuclear threats, which are posed by accidental Soviet or Chinese launches and intentional launches by some future Third World nuclear weapons state. We dismantled the one ABM system we were permitted under the ABM Treaty, an action not met in kind by the Soviets. Certainly the Soviets know better than we that even an imperfect, limited system can have important utility against less than robust nuclear threats; this is a compelling case for initiating ABM deployments as soon as possible.

[From the Washington Post, Nov. 26, 1985]

WE NEED AN INSURANCE MISSILE DEFENSE SYSTEM

(By Martin Anderson)

The results of the Geneva summit prove that President Reagan's often lonely approach to dealing with the deadly issue of nuclear weapons is the right one. The final statement endorsing "the principle of 50 percent reductions in the nuclear arms of the U.S. and the U.S.S.R. appropriately applied" was an extraordinary achievement.

Even the combined foreign policy wizardry of Nixon and Kissinger could produce only a controlled, but farily high rate of growth in the nuclear arsenals of the two superpowers. And the most radical proposal the international left has seriously proposed in the last decade was a mere freeze on existing nuclear stockpiles. Yet here were the two great nuclear powers endorsing the idea of a one-half reduction.

The weeks and months ahead will tell whether our negotiators have the skill and patience to fashion an arms control agreement that is in our national interest. In the meantime there is something we can and should do that would reduce the degree to which the United States is at risk from nuclear attack and would also give added momentum to the arms control talks. We need to build an insurance missile defense. It is something the Soviet Union has already done.

Under the terms of the ABM Treaty signed in 1972, both the United States and the Soviet Union have the right to build a limited missile defense system with up to 100 interceptor missile launchers. Almost immediately after the signing of the treaty, the Soviet Union began to deploy interceptor missiles around Moscow. Today they have the only operational missile defense system in the world.

Almost 100 interceptor missiles, mostly brand-new SH-08s, tipped with nuclear warheads, stand poised to blast off at a moment's notice. Because they intercept their targets high above the earth's surface, they can effectively protect a very large part of the Soviet Union from a limited missile attack. They cannot protect the Soviet Union from the combined assault of hundreds or thousands of nuclear missiles, but they can and do guarantee Soviet rulers that they need never fear the chilling assault of a nuclear missile launched accidentally, or being held hostage to a threat from a Third World power that has managed to build a few nuclear ICBMs.

In the early 1970s we began to build a defensive missile site to defend our regular missiles stationed in Grand Forks, N.D. In 1975 we stopped and tore down what had been built. Today we have nothing. If a nuclear missile or two, for whatever reason, were launched toward the United States today, we would be helpless.

Take the worst case. A Soviet missile targeted on Washington is fired accidentally. The Soviets frantically notify the White House on the hot line. The North American Defense Command in Colorado tracks the incoming missile with its sophisticated computers and informs the Pentagon that it will strike the city in 14 minutes. What should our response be? Do we answer with a nuclear attack of our own, even though the Soviets are apologizing profusely for their mistake? Do we passively wait while our country is "decapitated?" What would you do if you were president?

The real answer is that we should not even have to contemplate such questions and all their ramifications. The Soviets don't. If we mistakenly fired a nuclear missile at Moscow, they could tell us not to worry and blast it harmlessly out of the sky with one of their interceptor missiles. The tragedy of our situation today is that we cannot do the same.

Last year the U.S. Army successfully tested an interceptor missile that proved we could destroy an incoming ICBM more than 100 miles up in space and that we could do it by simple collision—without using a nuclear warhead. And that is something the Soviet cannot do. Today the technology is on U.S. shelves that would enable us to build an effective limited missile defense system, one totally permitted under the ABM Treaty, that could ensure the United States against the possibility of the most terrible accident in history.

The fact that we have not built any missile defense must be incomprehensible to the Soviets. Building and deploying a limited missile defense now would place us on a par with the Soviet Union in terms of oper-

ational missile defenses. Beyond that it would give the American people a chance to live in a nuclear world where at least you could protect yourself from an accidental attack.

And if both the United States and the Soviet Union possessed an insurance missile defense system, all of us just might find that we had created a measure of stability that we have not had since the Soviet Union developed nuclear weapons.

CONGRATULATING L.W. (BILL) LANE

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HEFTEL of Hawaii. Mr. Speaker, it gives me great pleasure to congratulate L.W. (Bill) Lane on his appointment as the new U.S. Ambassador to Australia.

Bill Lane, publisher and chairman of the board of Sunset Magazine, has long been a friend of Hawaii. He has promoted tourism in Hawaii and the Pacific through such positions as U.S. Commissioner General to the International Ocean Exposition in Okinawa and U.S. Government representative to the Pacific Area Travel Association. Bill Lane's familiarity and expertise with the Pacific Basin make him an excellent choice for the next ambassador to Australia. An editorial column about Bill Lane appeared in The Honolulu Advertiser on December 17, 1985, and I would like to share it with my colleagues.

The article follows:

U.S. AMBASSADOR LANE

L.W. (Bill) Lane, board chairman and publisher of Sunset Magazine and a longtime friend of Hawaii and the Pacific, soon goes to Canberra as the new U.S. ambassador to Australia.

He is an excellent choice, especially at a time when New Zealand's sag in relations with us makes the joint security alliance of America and Australia all the more important. Bill Lane has the talents and the knowledge of the region to further that bilateral commitment.

With a growing Soviet presence in the Pacific, Australian leaders are hopeful that the recent Geneva summit will lead to arms control, including nuclear non-proliferation and limits on chemical weaponry.

In commenting on the summit in speeches to Parliament late last month, both Prime Minister Bob Hawke and Foreign Affairs Minister Bill Hayden reaffirmed Australia's commitment to its alliance with the U.S.

The New Zealand issue has helped to focus more American attention on our relationship with Australia, with the realization that what we had largely taken for granted is really vital to our strategic interest in the region.

Of mutual benefit is a warm friendship of more than two centuries based on a common dedication to freedom and democracy. The founders of the Australian federation got the idea of federalism from this country and studied the American Constitution in drawing up their own.

Names of some Americans unfamiliar to most of us are important figures in Australian history—George Chaffey, who pioneered irrigation Down Under; J.C. Williamson, who played a major role in the development of the theater; and Walter B. Griffin, who designed the national capital.

Aussies have fought alongside Yanks in every war in this country in which we've been engaged—World War I, World War II, Korea and Vietnam, Australia is the only country to have done that.

Thousands of Americans own land in Australia. Many have business connections there, Bilateral trade is substantial, with Australia running a deficit with us but, interestingly, a surplus with Japan.

We have important military facilities in Australia, ranging from naval communications stations to a joint defense space research base.

Anzus, if New Zealand withdraws its rebuff of U.S. nuclear vessel visits, or a new bilateral treaty between Canberra and Washington will contribute to be the heart of Australia's defense structure.

That is as true of the Labor Party now in power as of the Liberal Party (which is conservative). When the late Arthur Calwell led Labor, he said, "We want the American presence, strong and powerful, in Asia and the Pacific. We want it because Australia needs it until all nations are prepared to disarm." Obviously, we need it there, too.

As the new U.S. ambassador, Bill Lane has links with Australia that go back to World War II when he was a gunnery and communications officer on troop transports in the Pacific.

Presidents Carter and Reagan named him the U.S. government representative to the Pacific Area Travel Association. He had ambassadorial rank when, on appointment by President Ford, he served as U.S. Commissioner General to the International Ocean Exposition in Okinawa 10 years ago. He has been active in the Pacific Basin Economic Council.

He and his magazine have staunchly promoted Pacific tourism. He is a supporter of the Travel Industry Management School at the University of Hawaii and of the HVB. He and his wife Jean, who is on the board of the Pacific Tropical Botanical Garden on Kauai, will be worthy representatives of the U.S. in Canberra.

NEW HUNGER STRIKE BEGINS IN NORTHERN IRELAND

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan ad hoc Congressional Committee for Irish Affairs, I am deeply concerned over reports that a new wave of hunger strikes may be beginning in Northern Ireland.

This concern is based on the decision yeaterday by a prisoner, Robert Tohill, age 26 to begin a hunger strike. Mr. Tohill was one of 27 men convicted in a highly controversial "supergrass" trial conducted in Northern Ireland. The supergrass process has come under fire from a number of international organizations and legal experts. It is a procedure by which the uncorroborated testimony of paid informants is made admissible and is often the main vehicle leading to conviction. Such was the case in Mr. Tohill's trial. His decision to embark on a hunger strike is in protest over this procedure which shows contempt for due process and makes a mockery of justice.

It is imperative that the British Government moved expeditiously to allow an appeal to be filed in this case. Such an appeal should also allow for a ruling on the use of supergrass and its degree of being inimical to the ideals of a democracy. Almost 4 years ago hunger strikes took the lives of 10 young men in Northern Ireland. British indifference and inaction contributed to this. Let us not allow history to repeat itself again in Northern Ireland.

TRAGEDY IN ETHIOPIA

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. ROTH. Mr. Speaker, I would like to read to my colleagues two headlines that have appeared in the Washington Times and the Washington Post in the last few days: "Ethiopian Officials Accused of Undermining Relief Work"; "Ethiopian Reported Missing: Relief Official Said to Seek U.S. Asylum."

We are silently standing by and witnessing a tragedy of historic proportions. Over a million Ethiopians are being forced at gunpoint to leave their homes and families and are being transported south under cruel and inhumane conditions. So far, over 100,000 Ethiopians have died in this death march. About half of the victims rounded up and placed in these concentration camps have died. However, and I quote from a December 17 Washington Post article:

Western relief officials fear that any public criticism of the relocation scheme could result in their expulsion from Ethiopia and cancellation of relief programs, many of which recently have spent millions of dollars in the country.

It is no coincidence that the head of Ethiopia's famine relief organization, Dawit Wolde Giorgis is seeking political asylum in the West, as once again the pace of this horrifying resettlement program has intensified. Undoubtedly even Mr. Wolde could no longer stomach the atrocities of his government.

I urge my colleagues to take a moment and review these three articles which are reproduced below. We cannot sit idly by and witness this holocaust. We must rally world opinion around this tragedy. And we must consider tough sanctions against this evil government.

[From the Washington Times, Dec. 19, 1985]

ETHIOPIAN OFFICIALS ACCUSED OF UNDERMINING RELIEF WORK

(By Curtis Cate)

PARIS.—Ethiopian officials more concerned with fighting rebels than combating famine constantly undermined the efforts of a French charity that was expelled from

the country, a nurse who worked for the charity says.

And Claire Couquiaud, a 24-year-old nurse working for the French medical-aid group Medicins Sans Frontieres (Doctors Without Borders), says she saw government officials force peasants into a resettlement scheme under conditions so harsh that many died each day.

Miss Couquiaud, a blonde Parisienne who says she went into nursing because she was inspired by her sister who is a doctor, volunteered in September to spend six months working in Ethiopia for MSF. Soon after her arrival, Miss Couquiaud found herself caught in a dispute between the Ethiopian government and the charity group, which organizes medical relief efforts around the world.

The dispute broke into the open with charges by the head of MSF, Dr. Rony Brauman, that the Ethiopian government had blocked the group from opening a children's nutrition center because it might interfere with the government's controversial resettlement program.

In a press conference yesterday, Dr. Brauman charged that forced migration has killed more than 100,000 people in Ethiopia and is leading to another 300,000 people being threatened with death. He said refugee centers in Ethiopia resemble concentration camps and said the camps for famine victims in northern regions are "the No. 1 cause of death in the country."

Angered by MSF's repeated allegations, the Ethiopian government has charged the charity is more interested in politics than relief. More than a score of MSF doctors, nurses and other staff were expelled from the country this month.

In an interview with The Washington Times, Miss Couquiaud rejected Ethiopian allegations that MSF was "politically motivated." She described how her assignment became "disheartening"—and even "nightmarish"—as she and her colleagues saw how Ethiopian officials dealth with peasants.

She and her team—which included one doctor, two nurses, and a "logistician" whose job it was to clean out dirty wells and water holes and to build latrines—operated at Kelala in northern Wollo region, about 250 miles north of the capital. There, she says, their efforts were thwarted by the refusal of the Ethiopian authorities to let them open a clinic where critically undernourished infants could be allowed to stay overnight for emergency feeding.

"All we were allowed to do in our feeding center was to give the most critically famished a ration of 'hypercaloric' food—an enriched powder composed of dried milk, sugar, and oil which we had to mix with water into a kind of porridge—to supplement the normal daily pancake diet, after which the poor devils were sent back to the villages they had come from," she said.

"As a result, of the 10,000 persons who came to see us every month—some of them having had to walk seven full hours from their village homes—3,000 are estimated to have died," she said.

Miss Couquiaud, who arrived at the village on Oct. 12, said about a month after her arrival tents began to spring up around Kelala's main building—a small, dirt-floored hall known as the "theater." Soon the tents were filled with a haggard group of some 500 "voluntary migrants" for the resettlement program.

But far from being volunteers, she said, the "migrants" had been singled out by village mayors, often as a way of settling personal scores, and rounded up by armed Ethiopian troops.

"These poor people, many of them husbands arbitrarily separated from their wives and families, were kept pinned up in the theater and surrounding tents for almost two weeks in utterly appalling conditions," she said. "There were no lavatory facilities, there was excrement everywhere, and the stench was indescribable.

"Every morning we saw a score or two of litters carrying out the corpses of people who had died during the night."

On the night of Nov. 27, Benoit Tullen, the Geneva-born doctor who headed the MSF team, visited the theater. Appalled by the spectacle of excrement and lice-infested straw, he persuaded the local administration to let him remove the most stricken cases for emergency treatment.

"By this time, people were no longer trekking in from the countryside with their starving children to receive our emergency rations, being scared stiff of being rounded up by militiamen for shipment south to some resettlement area, " she said.

Miss Couquiaud said that other "voluntary migrants" were encountered by another MSF team near the northern Wollo village of Sekota. The team came upon a group that had been locked into a church, where many of them were dying. While trying to obtain their release, a French nurse was assaulted by an Ethiopian militiaman who knocked her to the ground with his rifle butt, Miss Couquiaud said.

"Right up to the last moment, we had trouble with the militiamen," she said. On Dec. 13, when she and her colleagues were informed they were being expelled from Ethiopia, the militiamen would not let them distribute any of their food stocks to the 50 local helpers in the relief effort.

She said a militiaman broke a leg of one helper.

[From the Washington Post, Dec. 16, 1985]

ETHIOPIAN REPORTED MISSING—RELIEF OFFICIAL SAID TO SEEK U.S. ASYLUM

(By Blaine Harden)

NAIROBI, KENYA, December 15.—Dawit Wolde Giorgis, head of the Ethiopian government's famine relief program, is reported to have been missing for more than three weeks since completing a fund-raising tour in Western Europe and the United States.

Western relief officials in Ethiopia, who are in contact with senior members of the government there, said Dawit is widely believed to be seeking political asylum in the United States.

A spokesman for the the U.S. Embassy in Addis Ababa said it had no information on Dawit's where-abouts and is not aware if he has asked for asylum. [At the State Department, a spokeswoman said she had no report of Dawit being in the United States.]

As commissioner of Ethiopia's Relief and Rehabilitation Commission, Dawit has become one of the most visible and widely quoted officials in Marxist Ethiopia during the past year. He has been an outspoken critic of western governments, charging they responded too slowly last year to Ethiopia's famine.

His defection would be likely to embarrass the Ethiopian government, which is a close ally of the Soviet Union and a frequent critic of the United States.

Dawit left Ethiopia Oct. 25 for a trip intended to raise aid donations for the famine, which is expected to continue through 1986. He reportedly visited Britain, Belgium, West Germany and the United States. He met officials in Washington and at the United Nations in New York. He was last heard from in Belgium and was expected to return to Ethiopia Nov. 23, relief officials in Ethiopia said.

Dawit's brother defected from Ethiopia to the United States in September, according to diplomatic sources. The sources said he went to New York where his wife had been given a job, through Dawit, with the Relief and Rehabilitation Commission.

Dawit's absence from Addis Ababa has delayed planning among the 35 countries and 47 nongovernmental organizations working there for next year's relief effort, aid officials say. The Ethiopian government has not made an official statement on Dawit.

A graduate of Columbia University Law School and a major in the Ethiopian Army, Dawit has been important to the government headed by his friend, Lt. Col. Mengistu Haile Mariam. During the early 1980s, Dawit served as governor of Eritrea, where rebels have been fighting the government since 1962.

Dawit headed the "Red Star" campaign against the rebels, which was unsuccessful and in which there were more than 30,000 government casualties. He subsequently was named to the number two position in the Ministry of Foreign Affairs.

Two years ago, Mengistu named Dawit as head of the government's agency responsbile for coordinating famine relief. As commissioner of the Relief and Rehabilitation Commission, he was widely respected by western relief officials, who said he worked hard and was decisive.

In recent months, however, these relief officials said Dawit's influence in the government had waned. They said regional leaders of the ruling Workers' Party frequently overrode decisions made by the relief commission.

Dawit, who is divorced, is believed by relief officials to own a home in California.

A MARTIAL ARTS LEGEND

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MCEWEN. Mr. Speaker, for the past two decades Al Conaway of Hillsboro, OH, has been a master teacher or Sensei of martial arts. His record of accomplishment which follows speaks for itself, but as someone who has known and followed Mr. Conaway's career I can personally attest to this legend of Ohio martial arts.

Following are a few of Al Conaway's martial arts achievements: Over 100 trophies and personal awards; personally trained 60 black belt 1; recognized by 2 U.S. Presidents, the Ohio House and Senate and the Governor of Ohio; trained Ohio State karate grand champion (1983); and named one of the most outstanding Senseis of mid-America (1976–85).

Mr. Speaker, to enter an endeavor, a field of study, a business and do the best you can is the mark of a successful career. On his retirement from the martial arts field, Al Conaway can feel comfortable in the fact that he did his best.

THE SMOKING LADA: NICARAGUAN SUBVERSION IN ACTION

HON. WM. S. BROOMFIELD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BROOMFIELD. Mr. Speaker, Concrete evidence is finally available showing Nicaraguan support for the rebels in El Salvador. A Russian-built vehicle crashed in Honduras earlier this month. The war materiel and other equipment cleverly hidden in that vehicle provide proof that Managua is assisting rebel groups in El Salvador. The claims that the administration has been making over the years are true. Commandante Ortega and the Sandinistas are involved in actively supporting and supplying the Communist insurgency in El Salvador. The Nicaraguan Government is intentionally promoting subversion and terrorism in the region.

According to one of the men injured in the wreck, the vehicle came from Managua and was going to El Salvador. The driver of the vehicle admitted that he had been trained in Cuba and had made a similar delivery run earlier this year.

The wrecked car contained six hidden compartments stuffed with $27,000 in U.S. dollars and 450 pounds of clandestine military equipment. Included in this equipment were 7,000 rounds of ammunition, 21 grenades, 12 radios, and 86 blasting caps. Also found were cypher pads for putting secret messages in one-time-only codes that are impossible to break. Medical supplies, written instructions to FAL—Armed Liberation Forces—rebel field commanders and letters to rebel soldiers from relatives in several countries, to include Cuba and the Soviet Union, were found. The letter from the Soviet Union was apparently written to a rebel soldier. It was written in Russian which indicates that the soldier was probably trained in the Soviet Union long enough to learn the language. I also understand that there is a videotape showing Honduran officials opening up the secret compartments in the car and removing the hidden equipment.

In spite of Nicaraguan claims that it has not provided arms or ammunition to the guerrillas in El Salvador, the truth has finally come out. Even Miguel D'Escoto, the Nicaraguan Foreign Minister, had denied to the World Court that his government was assisting the Salvadoran rebels.

For 5 years, the administration has been telling the American public that the Sandinistas have been arming and supplying the Salvadoran rebels. While sensitive intelligence sources and methods have always clearly shown the close support which Managua gives to the groups which make up the FMLN, unclassified concrete evidence was admittedly scanty.

I commend Honduran authorities for their professionalism in detecting the arms cache in the "Smoking Lada" and the administration for quickly calling this convincing evidence to the attention of Congress.

With these thought in mind, I suggest that all Members read the following press briefing concerning this incident by Elliott Abrams, Assistant Secretary of State for Inter-American Affairs. This entire affair is food for thought.

SUMMARY—EVIDENCE OF NICARAGUAN SUBVERSION IN CENTRAL AMERICA

An auto accident in Honduras on December 7 led to the discovery by Honduran authorities of ammunition, grenades, communications and encrypotion material, and other items being sent from Managua to guerrillas fighting in El Salvador. The evidence, which came to light only by chance, provides further proof of the continuing role of Nicaragua in support of regional armed subversion and terrorism and factually demonstrates that Sandinista Foreign Minister Miguel D'Escoto and his government lied to the World Court when they said they are not engaged in provision of supplies to the guerrillas in El Salvador.

INTRODUCTION

Honduran authorities have already issued a statement concerning the incident we address today. On December 7, in Honduras, a serious accident occurred involving a Soviet-built Lada automobile. As Honduran investigators at the scene of the accident discovered, the vehicle had six concealed compartments containing grenades, ammunition, communications and encryption materials, instructions, money, medical supplies, and personal letters to guerrillas fighting in El Salvador from relatives in the Soviet Union, Cuba, and other countries. The documents, including instructions addressed specifically to nine guerrilla commanders, revealed that the shipment came from the Managua headquarters of the Armed Liberation Forces or FAL, the military wing of the Communist Party of El Salvador and one of the five main guerrilla groups that make up the FMLN. The other four groups are the National Armed Resistance Forces (FARN), the Popular Liberation Forces (FPL), the Central American Revolutionary Workers Party (PRTC), and the Popular Revolutionary Army (ERP).

The shipment we are discussing today was sent by the FAL Communications Section in Managua and was destined to nine field communications chiefs in El Salvador. The text of the FAL letter of instructions is being made available.

BACKGROUND: ARMS TRANSFERS

Since the Sandinistas took power in Managua, arms and other supplies, including dollars, have been shipped from communist bloc countries and elsewhere through Nicaragua to the guerrilla groups of the Farabundo Marti National Liberation Front (FMLN) in El Salvador. Nicaragua and Cuba are the central participants in this support network. The Sandinistas provide warehouses for storing arms, ammunition and other supplies awaiting onward transportation to El Salvador. Nicaragua territory is used for training camps for guerrillas from El Salvador and other Latin American countries. The FMLN central command's radio and logistics system is in Managua.

It was no accident that the negotiations with the Salvadoran guerrillas for the release of President Duarte's daughter and twenty-two mayors and municipal officials has to be conducted via the FMLN's central radio in Managua.

The pattern of arms shipments through Nicaragua to El Salvador has gone through several stages since 1979. From small-scale deliveries early in 1980, the shipments became massive in period November 1980 to January 1981, when large arms shipments from the communist bloc, particularly Vietnam, were sent to Nicaragua for transshipment to El Salvador. It was at this time and for this reason that President Carter suspended U.S. economic aid to Nicaragua and commenced military aid to El Salvador. At that time three rather open methods were used for shipping arms: aircraft—for both airdrops and landings in El Salvador; large semi-trailers—for the overland route from Nicaragua through Honduras; and small vehicles for transport into El Salvador. (Photographs of one of these trailer trucks are printed in the State Department publication, "The Sandinista Military Build-up.")

After the arms shipments of late 1980 and early 1981 were exposed, the Nicaraguans and Salvadoran guerrillas turned to other means. The emphasis switched to transportation over the Gulf of Fonseca, and automobiles and small vans on the overland route. As with the earlier trailer trucks, license plates and vehicles registered in other countries, such as Costa Rica, Guatemala and Honduras were frequently used to allay suspicions of border guards.

As Salvadoran surveillance on the Gulf of Fonseca improved and arms were seized after landings, the Sandinistas and the FMLN have again changed the sea routes, using larger boats on blue water outside the Gulf of Fonseca, then transferring shipments under cover of darkness to small boats which are unloaded at safe locations on the Salvadoran coast. The arms smugglers are informed by guerrilla radio of the locations of Salvadoran army patrols as the boats approach the coast.

Today, the transport of arms by vehicle has become quite sophisticated. In Managua, there is a shop for modifying vehicles to add small secret compartments like those found in the Lada. Frequently, vehicles begin their trip in Costa Rica, pick up their cargo in Nicaragua, pass through Honduras into El Salvador or go to Guatemala before going to El Salvador, and finally, after unloading, on to Mexico. Then after a week or two the vehicle returns to Costa Rica. For example, according to its driver, the Lada vehicle captured on December 7 would have gone into El Salvador after passing through Honduras. Another variant on the routes used is to off-load the arms and supplies in Honduras for storage and subsequent shipment to El Salvador via small vehicles, pack animals, and in backpacks.

THE ACCIDENT

On December 6, a Lada automobile bearing Costa Rican plates crossed the border of Costa Rica into Nicaragua. On December 7, the same vehicle entered Honduras from Nicaragua on the Panamerican Highway between Nicaragua and El Salvador. Shortly thereafter, it suffered a blowout and crashed in the small town of La Leona, Honduras. Both the driver, Elias Solis Gonzalez, and his passenger, Martha Espinoza Espinoza, were injured, and the woman is hospitalized in serious conditon in Honduras.

Local police, noting the Costa Rican plates, notified the Costa Rican consular representative. During the police inspection of the vehicle several wires were discovered protruding from the air conditioning duct. The wires turned out to be parts of blasting caps. Later, in the course of a more detailed examination in Tegucigalpa, the authorities found several concealed compartments in the Lada, which contained ammunition, gre-

nades, communications and encryption material, money—$27,400 in U.S. currency—medical supplies, personal letters to individual guerrillas fighting in El Salvador from relatives in the USSR, Cuba and other countries, and instructions to the front communications officials from the head of the FAL Communications Section.

The driver of the Lada was a Costa Rican and a member of Costa Rica's communist Popular Vanguard Party. He was acting as a courier for the Salvadoran Armed Forces of Liberation, the FAL. The driver, now under detention, has admitted to having been trained in Cuba in "political subjects" from September 1981 to June 1982, and to having made an earlier courier run in the same vehicle in July 1985. His route on the previous run went from Costa Rica to Nicaragua, to Honduras to El Salvador.

These photographs show the concealed compartments and the following materials contained in them:

Ammunition: 7,000 rounds, sufficient to equip a platoon sized unit (30-50 men) for a major assault or several smaller operations;

86 electric blasting caps, which can be used to make 86 home-made bombs or improvised explosive devices. There have been over 400 bombings in El Salvador in 1985 alone, with an increasing shift to urban actions;

20 fragmentation grenades used to kill or incapacitate personnel, or as mines and boobytraps. Also a terhmite grenade used to destroy machinery or as an incendiary device;

17 grenade fuses;

Communication gear: Two base station radios used for communication over long distances with units in the field and ten walkie-talkies for use between platoon leaders. Computer-generated Encryption pads: used to encrupt and decode communications;

US$27,400 in hundred dollar bills. Worth over a quarter million Salvadoran colones on the black market, enough to support 250-500 combatants for a month;

Medical materials, typically associated with combat field hospitals; and

Over 20 assorted documents, mostly personal letters from Argentina, Spain, Nicaragua, Cuba, and the Soviet Union.

The use of autos and other vehicles for the transport of explosives and communications equipment, as well as ammunition and other small-scale items, has been known for some time. The sophisticated construction of the concealed compartments, as seen in the photos, has eluded normal detection measures. Short of the actual dismantling of every vehicle crossing a border, it is hard to identify which vehicles are smuggling materials for the guerrillas. It is, in fact, completely fortuitous that this physical evidence of something we have known through intelligence for a long time has come to light.

In a similar incident last month, Guatemalan authorities picked up an individual, arriving by air from El Salvador, who had in his possession $30,000 in U.S. $100 bills. He was turned over to Salvadoran authorities, who have determined that he is an intelligence officer for the Communist Party of El Salvador (PCES) and was trained in the USSR and Cuba. He had been a resident of Managua for five years at the time of his arrest, and since September 1984 had been traveling to Guatemala City approximately every three months to deliver between $20,000 to $30,000 to the PCES. He is continuing to cooperate with Salvadoran authorities, and we cannot share with you all the information he has provided thus far. However, what is clear is that he was a highly trusted member of the guerrilla movement, and no mere courier for the Salvadoran Communist Party.

The Sandinista regime will undoubtedly deny its involvement in this incident, as it has always denied any involvement in logistical support for subversion, from arms transfers to provision of command and control facilities for various terrorist groups.

In his April 21, 1985, affidavit to the International Court of Justice in the Hague, Foreign Minister Miguel D'Escoto claimed that his government "is not engaged, and has not been engaged, in the provision of arms or other supplies to either of the factions engaged in the civil war in El Salvador." He insisted that the policy and practice of the Sandinista regime is to prevent the use of Nicaraguan territory as a conduit for arms or other military supplies to guerrillas, and assured that the policy would continue in force. Nevertheless, the evidence that puts the lie to those denials and assertions continues to mount. The vehicle that I have shown you is only the latest evidence which demonstrates that D'Escoto and the Sandinista regime simply lied to the World Court. The Sandinista regime is the vital link in the transfer of weapons, supplies, and money to the Salvadoran guerrillas.

STANLEY BURNS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HOYER. Mr. Speaker, I would like to bring to my colleagues' attention the attached article from the Baltimore Sun magazine on Stanley Burns of Chase Manhattan Bank. As you are probably aware, Maryland has had a significant problem in the past months with the failure of a few savings and loans. The Governor and the Maryland General Assembly have been working diligently to remedy the problem and have looked to the banking and savings and loan industry for assistance. During a special session of the Maryland General Assembly the Chase Manhattan Bank was given banking privileges in Maryland in return for their assuming control over and the liabilities of three of the State's troubled savings and loans.

The attached article is an excellent story about Chase's new president in Maryland, Mr. Stanley Burns. We in Maryland welcome both Mr. Burns and Chase to our State and look forward to a productive and longlasting relationship with them.

CHASE'S MAN IN MARYLAND

(By Susan Antilla)

NEW YORK.—It was the start of the July 4th weekend, and Stanley T. Burns and an entourage from Chase Manhattan Corp. had one thing on their minds: to get back to their families in New York and carry through on promises of weekends in the mountains or at the shore. Late negotiations with S&L officials in Bethesda caused them to miss the last shuttle out of Washington on Wednesday night. The trip to National Airport the next day meant even further frustration as the ride through the capital placed them in the middle of a 6 a.m. traffic jam—the Beach Boys were setting up for a July 4th concert. They finally got to National Airport only to discover there would be no flights for another 2½ hours.

"There were other times when we missed the last shuttle or train out, and those things get to be wearing," Mr. Burns says. "You get into a long negotiating process and it burns up a lot of mental energy."

Mr. Burns, 41, was chief of the Chase team that finally tied up deals with the Maryland State Legislature, Friendship Savings and Loan of Bethesda, Chesapeake Savings and Loan of Annapolis, and Merritt Commercial Savings and Loan of Baltimore. The three banks have been merged into the new Chase Bank of Maryland, now headquartered at 300 N. Charles St.

His long hours and personal frustrations apparently paid off: Chase honchos named the Tennessee native president of the new Chase Bank of Maryland on Oct. 31, rewarding the 19-year Chase veteran for his moves to quicken the bank's entry into the lucrative Maryland market.

"He endeared himself with all of those with whom he was working," said senior vice president Joseph Harkins, Mr. Burns' boss, who had a big say in the decision to tap him for the job. "Stan was always the guy to run it. He's got managerial capacity and a warm, comfortable style that fits in with the community. He knows the innards of the banks he acquired. And he is familiar with the network in Chase Manhattan."

A big plus boosting Mr. Burns was his quintessential Chase style. For this interview, his pinstriped suit, white button-down collared shirt and tasseled loafers left little doubt that he favors a classic banker's uniform. His office in New York is a textbook example of what ex-Chasers refer to as "the Chase Look"—a spartan, no-frills image that dictates everything down to the paintings on the wall.

The image is also that of the totally organized person: blank yellow legal pad, message slips neatly stacked and sharpened pencils, all pointing up from a nondescript pencil holder. A polished apple offers a lone splash of color in Mr. Burns' otherwise stark surroundings. Even Mr. Burns jokes that one friend at Chase has said he'd prefer having emergency surgery on Mr. Burns' immaculate desk to any other flat surface.

Current and former Chase insiders say the corporate culture dictates other behavioral principles. "You'll find that Chase will tell you nothing about anything—you'll never know where anyone stands," said one defector. Indeed, Mr. Burns, who launched the Chase ethics program, would not discuss his views on ethics in American business generally. And despite his involvement with programs that marry the liberal arts graduate and the corporation, he did not wish to talk about any business world shortcomings in the hiring of liberal arts grads, either. One former Chase manager describes Mr. Burns as the ultimate Chase politician—an exec who's made it his business never to step on toes or make an enemy.

Right now, it is in Mr. Burns' interest to make sure that things go smoothly—perhaps to rock the boat even a little could distract from a high corporate priority. The Maryland venture is extremely important in a larger Chase plan to expand regionally, and many management eyes will be focused on Mr. Burns as he develops his plan to make this region profitable.

Said Mr. Harkins, "This is a very significant step [for Mr. Burns] simply because it is on the cutting edges of the way in which the bank is moving to expand itself nationally." Chase recently announced an agreement to acquire Continental Bancor of Arizona, which owns Arizona's sixth largest bank. New York-based Chase Manhattan Corp. owns the Chase Manhattan Bank, which is the third largest bank in the United States, with more than 300 branches in New York state. The bank has assets of $88 billion and is represented in more than 100 countries.

Stanley Burns first became involved in a potential acquisition of the Maryland S&Ls because, as vice president and eastern regional manager of Chase's commercial sector, Maryland was within his jurisdiction. (The appointment to president of Chase of Maryland is considered a significant step because it puts him in charge of all banking activity in a major market.) His group already had decided that the Maryland market would be a priority for bank expansion, so when the S&L crisis erupted last May, they saw it as "an alternative entry route," Mr. Burns says. Chase representatives testified at the special legislative session from the very start, and both the bank and the government set ground rules.

"We were told we would have to acquire either Old Court or Merritt," Mr. Burns remembers, explaining that Merritt became Chase's choice because Old Court "was a lot bigger and more complicated." The ground rules set by Chase for the state were that the bank wanted more than one S&L, "in order to put together a reasonable package" with a mix of assets, geographic diversity and a strong deposit base.

In the months between May and the end of October, when Chase's deal was finally sealed, a big point of disagreement was whether Chase should get $25 million from the Maryland Deposit Insurance Fund Corporation.

On Oct. 17, which happened also to be Mr. Burns' birthday, the deal's potential took a negative turn, as a frustrated Chase group picked up and returned to New York. "We finally got to the point in Annapolis of saying our deal is on the table and it's our best deal," Mr. Burns remembers. "There was a certain view that Chase was unwilling to compromise. . . . But there had been quite a lot of compromise from the beginning."

Some colleagues of Stan Burns say it was a particularly tough time for him. "When you're a business person and you see logical business reasons for doing things, but you're operating in a political environment, it can be frustrating," said Chase senior vice president Fredric Figge II, who started his Chase career with Mr. Burns 19 years ago.

While the slow-moving political process continued to threaten Stan Burns' business plans, the chorus of those accusing him of an uncompromising stance grew louder. Mr. Burns, however, says many compromises had been made along the way. "It was very hard for me personally to hear people say that Chase wouldn't compromise when I had spent two months negotiating and we really had done a lot in that regard," he says. "For one thing, we did not want the Merritt Tower and ended up agreeing to take it."

Chase did not want to take over an unfinished, unleased building, Mr. Burns explained. But Chase went along with the state's request anyway, agreeing to take Merritt if no bidder could be found for a minimum of $30 million. Ultimately, the building was sold for $31.5 million to a New York construction company.

Although Mr. Burns will tell you, "I believed we would be back" after heading back to New York and leaving a Chase deal on the legislative table, Mr. Harkins confesses "it was very hard to tell if it would go through." State Senate President Melvin A. Steinberg, D-Baltimore County, challenged the idea of Chase getting $25 million from the Maryland Deposit Insurance Fund, part of the deal agreed to by state officials.

The negotiations became such a regular part of weekend conversation that Mr. Burns' young son became familiar with the players. "One weekend Bryant, who's 4, came in and handed me his toy phone," mimicking the familiar weekend scene of seeing his father in constant business discussions. "He said, 'Dad, it's Mickey [Steinberg],'" Mr. Burns remembers. "Bryant started carrying his own phone around the house," he says—in classic child-imitating-parent style.

All the Burnses—Sarah, 8; Anna, 2; Bryant, and Mr. Burns' wife, Christa—are looking forward to the move to Maryland, he says. Though Mr. Burns is already spending most of his time in Maryland, the rest of the family will head south in January, after Mrs. Burns leaves her job as minister of the Plymouth Congregational Church in Brooklyn Heights, where they now live. (The two met at the Madison Avenue Presbyterian Church, where Mr. Burns was an elder 10 years ago. Christa was a graduate student at Union Theological Seminary. He says the family has "a very strong commitment to the church," but lest their zeal be misunderstood, a friend adds, "They're normal, level-headed people. They are not handing out pamphlets on the corner.")

To Mr. Burns, the new project is a natural, because it draws on his natural business instincts to build—something that has gained him professional recognition from Day 1 at Chase. Consider these roles: Mr. Burns revamped an out-of-date Chase training program to turn the focus from old-fashioned commercial lending to a more up-to-date financial services orientation; he walked into Chase's real estate investment trust mess in the 1970s and helped clean that up, and he built a financial analysis division in the late 1970s to examine problem loans in the bank's portfolio and decide how to handle them.

In fact, Mr. Burns likes to describe himself as a builder, and says that Chase—which hired him right out of Duke University (B.A., political science) in 1966, gives him the chance to do what he does best. "One of the things I like about Chase is that you can go into different kinds of places and do different kinds of things. It's different than going to one place and becoming a master of one thing and doing that same thing better than anyone else year after year after year."

In this project, he plans to zero in on medium-sized Maryland companies for corporate lending, he will expand real estate construction lending on the commercial side, and shoot for "a variety" of products to woo the retail customer, from auto loans to mortgages to deposit-based offerings.

While the Maryland move means the tradeoff of leaving New York (riding the Beltway each day as opposed to walking across the Brooklyn Bridge) and relocating a wife who is advancing in her ministerial career, Mr. Burns says it's the perfect opportunity right now. "I like moving around a little bit and doing new and different kinds of things. I enjoy building new things no matter what the new thing is. And Chase Maryland is clearly gonna be a new thing."

EXTEND GRAZING FEES

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DASCHLE. Mr. Speaker, I rise to call the attention of this body to the need for an extension by the President of the grazing fee formula for livestock on Forest Service and Bureau of Land Management lands, as set forth in Public Law 95-514, Section 6(a).

The grazing fee formula, which expires on December 31, was devised in 1978, after extensive negotiations involving agriculture, environmental groups, Congress, and the executive branch. It is designed so that as livestock industry income increases, so does the fee received by Government. In difficult times when the income of the industry is down, the fee is adjusted downward so the industry can survive.

Bipartisan negotiations have been going on in the Congress for many months, involving interest groups as well as public officials, in an attempt to devise a legislative solution for future grazing fee policy. These negotiations, which affect grazing fees and rights on more than 307 million acres of Federal land, have not been successful. It is my concern that the lack of a fruitful outcome to these negotiations not have a negative impact on an important part of our economy already facing hard times.

I know that other Members feel as I do, and have joined in the effort to persuade the President to direct that the fee system be extended. I hope that other Members will add their voices to this end as well. Livestock producers who are dependent on access to publicly owned grazing lands have not escaped the problems facing other segments of agriculture. The livestock industry is undergoing its worst economic condition since the Great Depression. Extension of the current grazing fee formula would provide it with the opportunity to plan for the future and find ways to survive the current crisis.

FAIR LABOR STANDARDS AMENDMENTS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HAWKINS. Mr. Speaker, the House recently adopted the Fair Labor Standards Amendments of 1985 following the resolution of certain differences in the committee of conference which are discussed in the conference report (report No. 99-357). As

you know, the President has signed this legislation into law.

As chairman of the Education and Labor Committee and the chairman of the conference, I played a lead role in the drafting of the language of the bill. Throughout that process, I was particularly concerned about the antidiscrimination provision in section 8. Specifically, I and other members of the committee wanted to ensure that the new language contained in the Fair Labor Standards Amendments of 1985 did not result in a narrowing of the current court interpretations of section 15(a)(3) of the Fair Labor Standards Act. That provision has been consistently construed to protect victims of discrimination or retaliation who had, prior to such treatment, taken formal steps to challenge alleged violations of that act as well as individuals who had not taken such steps.

A number of discussions were held concerning the rights and protections afforded employees under section 8 of the bill and under section 15(a)(3) of the Fair Labor Standards Act. It was, and is our intent that these statutory provisions be applied in a liberal fashion to safeguard employees from discrimination, consistent with the remedial purposes of the statute.

In this regard, I wish to include in the record a letter I received from the office of the general counsel, International Association of Fire Fighters, which examines the liberal construction given to section 15(a)(3) by the courts. I believe the analysis in this letter, and the courts' decisions mentioned in the letter, properly reflect the broad coverage and intent of section 15(a)(3). The letter follows:

INTERNATIONAL ASSOCIATION
OF FIRE FIGHTERS,
Washington, DC, November 8, 1985.

Hon. AUGUSTUS F. HAWKINS,
Rayburn House Office Building,
Washington, DC.

DEAR CHAIRMAN HAWKINS. I am writing to confirm discussions held with members of your staff during the last several weeks concerning H.R. 3530 and S. 1570 in which the general viewpoint was expressed that a liberal construction should be given to the employee protections against discrimination afforded under Section 15(a)(3) of the Fair Labor Standards Act (FLSA). This viewpoint is supported by the remedial purposes of the FLSA and a growing body of court decisions.

Although the precise statutory language in Section 15(a)(3) addresses discrimination against an employee who has filed a complaint with the U.S. Department of Labor of instituted proceedings or given testimony in proceedings under the law, the courts have broadly interpreted Section 15(a)(3) and extended its protections to the victims of employer discrimination who have not taken such formal steps. In essence, a number of courts have determined that the important safeguards available under Section 15(a)(3) should be applied to an employee's unofficial assertion of rights, such as complaints to his or her employer.

Court rulings in cases brought by the Labor Department and individual workers illustrate the liberal reading given to Section 15(a)(3) in a wide variety of circumstances. For example, in *Marshall* v. *Georgia Southwestern College,* 489 F.Supp. 1322 (M.D. Ga. 1980), a plaintiff complained to her employer of a possible violation of the Equal Pay Act (a part of the FLSA). The employer fired her husband who was also an employee. The Court agreed with the Secretary of Labor's position that the discharge contravened Section 15(a)(3), expanding that provision to encompass not only a complaint to one's employer, but also retaliation aimed at the worker's spouse. In *Hodgson* v. *Yinger,* 20 WH Cases 78 (S.D. Fla. 1971), the court held that the FLSA protected employees who merely declined to return their back pay checks which were given to them as a consequence of their employer's earlier violation of the Act. In *Berry* v. *Andrews,* 535 F. Supp. 1317 (M.D. Ala. 1982), the plaintiff worker had "contacted" the Labor Department about nonpayment of wages but there was no indication that he had filed a complaint with the agency. Nevertheless, the court ruled that the employee could maintain an action for wrongful discharge under Section 15(a)(3). Similarly, in *Bonham* v. *Cooper Celler Corp.,* 475 F.Supp. 98 (E.D. Tenn. 1979), the district court concluded that Section 15 (a)(3) is violated if a factor in an employee's termination is the individual's assertion of rights, either officially or in complaints at work.

The circuit courts of appeal have also construed Section 15(a)(3) in a broad manner. in *Love* v. *RE/MAX of America, Inc.* 738 F.2d 383 (10th Cir. 1984), an employee sent a written note to the employer's president alleging that men were being paid more than women and appended a copy of the Equal Pay Act. The court found that her subsequent firing violated Section 15(a)(3) because that provision covered an employee's unofficial assertion of statutory rights including complaints to an employer that later turn out to be mistaken. In *Marshall* v. *Parking Co. of America-Denver, Inc.,* 670 F.2d 141 (10th Cir. 1982), the court held that Section 15(a)(3) safeguards workers who refused to release their employer from back pay claims and were terminated. The Eighth Circuit Court of Appeals determined in *Brennan* v. *Maxey's Yamaha, Inc.,* 513 F.2 179 (8th Cir. 1975) that Section 15(a)(3) governed a situation where an employee was fired following her refusal to endorse her back pay to the employer. In *Bush* v. *State Indus, Inc.,* 599 F.2d 780 (6th Cir. 1979), the Sixth Circuit indicated approval of Section 15(a)(3) protection where an employee was discharged after he complained to his employer about not being given overtime compensation.

The foregoing decisions are consistent with the well-established principle that the FLSA, in general, is a remedial statute which should be construed broadly in favor of the employees it was designed to protect. As the Supreme Court has stressed, the rights guaranteed by the FLSA should not be applied in a narrow, grudging manner. *Tennessee Coal, Iron & R.R. Co.* v. *Muscoda Local No. 123,* 321 U.S. 590, 597 (1944). Accord: *Goldbert* v. *Bama Mfg. Corp.,* 302 F.2d 152 (5th Cir. 1962); *Wirtz* v. *Home News Publishing Co.,* 341 F.2d 20 (5th Cir. 1965).

In the context of section 15(a)(3), it would clearly be inappropriate if an employer was insulated from liability if it quickly retaliated against a worker prior to the individual's actual pursuit of enforcement measures with the Labor Department. Carrying that notion to its logical extremes, an employee who first informed his or her employer about possible FLSA violations would not be protected from discrimination as long as the employer acted before the filing of a formal complaint. The provision, however, would protect an employee who chose not to try to resolve the matter first with the employer and instead submitted a complaint directly to the Labor Department. Such a result defies common sense and is plainly inimical to the purposes of Section 15(a)(3).

As stated in the discussion with your staff, the language adopted in Section 8 of H.R. 3530 providing protections against discrimination to employers who "asserted coverage" under the FLSA should be given at least the same liberal construction that the courts have generally given to Section 15(a)(3). Accordingly, the second sentence added in Section 8 of the bill as reported out of the Conference Committee (concerning the scope of protection after August 1, 1986 for employees who have taken actions described in Section 15(a)(3)) will not reduce the range of employee protections in light of the broad reading the courts have given to Section 15(a)(3).

We trust this confirming letter will be helpful to you and the other representatives who fashioned the anti-discrimination provisions of H.R. 3530.

Sincerely yours,

THOMAS A. WOODLEY,
Office of the General Counsel, International Association of Fire Fighters, AFL-CIO.

THE TEXTILE BILL

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TALLON. Mr. Speaker, during recent weeks, the attention of the American public has been focused on critical legislation involving tax reform and a balanced budget which will have an effect on the lives of all Americans. And, Mr. Speaker, in the midst of all the rhetoric and debate, the tragic and costly decision to veto the textile bill went almost unnoticed.

With one stroke of a pen, the jobs of thousands of American textile workers and the well-being of their families and communities were sacrificed. The bill that the President vetoed was a bill of practicality—a bill which would merely protect and enforce already existing trade agreements. To justify this sacrifice, the administration summoned up the tired and outdated myth of free trade.

The theory of free trade has been made a mockery by the unfair trade practices of other nations and the reluctance of our own Government to enforce our existing trade laws. Where do unemployment, foreign quotas, controlled foreign markets, and unenforced customs regulations fit into this theory of free trade? The administration needs to understand that the stakes involved in this struggle to pass the textile and apparel trade bill are much larger than theory. I would like to refer you to remarks made by Roger Milliken, chairman of Milliken & Co., on Friday of last week.

We are talking about the transfer of economic strength to other nations and the resulting decline in American power. Our

cause is the cause of two million workers in textiles and apparel and two million more who gain their livelihood from serving them. The majority of elected representatives from all over the United States have supported the textile/apparel bill. We may be ahead of our time with this bill, but I think not. If the bill is vetoed, and I pray it will not be, we, the coalition, are determined not to stop fighting. We will go back and try to get an override, first in the House and then in the Senate. This will be very difficult. If we cannot, we will be there all next year. I want you to know this is a total commitment. We will prevail.

Mr. Speaker, this veto suggests an uncaring attitude toward this tragic situation. More than 300,000 American workers have lost their jobs over the last 5 years due to the surge in imports of textiles and apparel. The veto also completely ignores the workers in our Nation's remaining textile and apparel factories—many of which are barely holding on against the tide of imports flooding our markets.

I believe the President got some very bad advice this time. His advisers claim that the bill is protectionist. I don't know about you, but it doesn't bother me at all to try to protect our communities and standards of living. I don't see it as protectionism; it really is bordering on desperation now.

In South Carolina alone, over the past 5 years, 56 textile manufacturing plants have closed and 33 apparel plants have been forced to shut down. Moreover, 45,000 people have lost jobs in the industry over the last 10 years. It is clear to anyone that we have got to do something or we are not going to have a textile and apparel industry.

I want to go back to the question of protectionism, which seems to be the administration's biggest problem with this bill. Last year, imports captured nearly 50 percent of the U.S. apparel market. With all the agreements in place, combined imports of textiles and apparel increased by 32 percent. In 1983, imports increased by 25 percent. Meanwhile, the big five exporters still control over half of the U.S. textile and apparel fabric market at the expense of developing countries that were to benefit from the agreements. Obviously the agreements are not working. They cover only about 65 percent of imports and set quotas only on some products from certain countries.

The agreements are full of loopholes allowing fraud, mislabeling, transshipment of garments from one country to another and other violations of the letter and spirit of international trade agreements. This legislation just closes some of those loopholes and enforces existing agreements.

Sadly, I watched the national news reports with stories from countries like Singapore, Hong Kong, and Taiwan, and they were all praising the President's decision. There sure isn't anything for the American textile and apparel worker to be happy about. This is an absolute tragedy, not only for their industry, but for the entire Nation as well.

It's up to the President now. He has promised that he will look into the charges that our trading partners are not living up to the original agreements. He said he would tighten administrative and enforcement procedures if the charges are found to be true. The ball is entirely in his court now, but I can promise you that I am going to be watching closely to see if the administration lives up to its promises. If they don't, I for one, will be working hard to get my colleagues to join me in a bipartisan effort to override this veto.

A SALUTE TO TOM WINEBRENNER

SPEECH OF

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. MILLER of Ohio. Mr. Speaker, it was with mixed emotions that I treated the recently announced retirement of my good friend Tom Winebrenner.

I can recall, as if it were only yesterday, my first visit to the Cloak Room as a newly elected Member. Like most new Members without past legislative experience, the system at first appears a little overwhelming. There are a lot of questions to ask and a lot of rules and procedures to learn. I found early on that a good person to guide me through the maze was Tom. Always accessible, always available to lend a helping hand, Tom quickly proved to be a reliable and responsible source of information and assistance, and he has remained so ever since.

But, as they say, all good things must come to an end, and so it is with Tom's outstanding and dedicated service to the House of Representatives and to the minority party with which he was associated. Tom has richly earned the retirement upon which he is about to embark. I wish him nothing but the best as he leaves this body.

May his retirement be as rewarding as his many years of service here in the House have been.

THE WALL STREET JOURNAL'S REJOINDER IN THE YELLOW RAIN DEBATE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. COURTER. Mr. Speaker, an important extension of the debate over Soviet and Vietnamese use of chemical warfare was published recently by the editors of the Wall Street Journal, and the essay deserves the attention of all the Members of the House. I ask that it be read into today's RECORD.

[From the Wall Street Journal, Nov. 4, 1985]

WHO SPEAKS FOR SCIENCE?

Several science magazines have been beating up on us for having the presumption to notice that a prominent scientist wears no clothes. They demand to know what credentials we have for making such a statement.

The scientist in question is Harvard biochemist Matthew Meselson, intellectual godfather of the 1972 biological-weapons treaty and also of the "bee feces" thesis. This holds that "yellow rain" in Southeast Asia is nothing but bee droppings and therefore the Soviets haven't violated Prof. Meselson's treaty.

Mr. Meselson and his co-authors recently reasserted this thesis in Scientific American. But in "The 'Bee Feces' Theory Undone" (Sept.6), our William Kucewicz observed the real significance of this article: that the Meselson group had failed in its efforts to find yellow-rain toxins in bee droppings, that it failed to report these negative findings in its article, and that the notion that the toxins were natural products had collapsed.

This "materially misrepresented" the article, wrote Scientific American editor Jonathan Piel in a complaining letter. Mr. Piel denies that "Prof. Meselson once took the position that trichothecenes are a naturally occurring contaminant of bee feces. Prof. Meselson cited this as one of several possibilities in 1983."

"The Journal has succeeded in missing the main points of the scientific arguments involved," Chemical & Engineering News editor Michael Heylin wrote in an editorial. "As indicated in the Scientific American article, there is no clear proof of widespread mycotoxin poisoning in Southeast Asia from any source."

"The Wall Street Journal, widely acclaimed as one of the best newspapers in the world, seems to have a quirky streak that it should exorcise," advised an editorial in Nature magazine. In Journal editorials, it observed, "President Reagan often comes through as a kind of 'pinko.'" It concluded, "What the bee theory does however do is to discredit the investigations on which allegations of the Soviet use of biological weapons have been based."

The wisdom of science, as recorded by these magazines, then is this: (1) The theory that bee feces contained trichothecene mycotoxins never existed, (2) there were no trichothecenes, and (3) no one died.

Now, part of the problem here is epistemological. The methods of science are very good at dealing with the replicable events of nature, but we do not usually apply the scientific methods of evidence to practical human affairs. Unlike planets or atoms, humans can change their behavior. The yellow-rain attacks have apparently stopped, for example, an accomplishment for which the Reagan administration and The Wall Street Journal can claim some credit. In dealing with the deviancies of human behavior, mankind has not usually applied science but has over the centuries evolved different systems of proof and evidence.

The American Bar Association convened its House of Delegates in July, and among the business was a report and recommended resolution from its Standing Committee on Law and National Security. For two years the committee has had a working group studying the treaties on chemical and biological warfare. The resolution, unanimously approved, expressed concern over "the substantial evidence" of chemical attacks in Afghanistan and Iran, and "of the illegal use of lethal and incapacitating chemical weapons and toxins by Vietnam and Laos in Southeast Asia."

Lawyers, unlike scientists, are accustomed to dealing with human testimony. The

Standing Committee's report details the accounts of H'Mong tribesmen being attacked by airplanes and helicopters showering them with sprays of various hues, but mostly yellow ones. It describes how the symptoms reported by these stone-age peoples correspond to those of obscure trichothecene poisoning. It descibes the detection of trichothecenes in environmental samples from attack sites. It notes that "blood and urine samples of H'Mong refugees who had reported exposure to yellow rain and experienced the symptoms were found to contain traces of these toxins."

By the standards of evidence we usually apply to human affairs, this is an overwhelming case. The ABA report notes that "Dr. Meselson's theory is that yellow rain is nothing more than pollen excreted by bees in their cleansing flights and trichothecenes are probably a natural phenomenon infecting good in Southeast Asia." But it adds that this does not explain away the testimony: "there never have been a single, report of bee feces causing deleterious effects to humans or animals in Southeast Asia, or any other region of the World."

In all, the Standing Committee concluded, "A review of the available evidence indicates that a variety of chemical and toxin agents have been used against the H'Mong people in Laos, the Khmer groups fighting the Vietnamese in Kampuchea since 1979, and the Mujaheddin in Afghanistan." This conclusion—which to our knowledge is shared by a bipartisan consensus of informed congressmen, throughout the political spectrum of the defense community and privately by foreign governments—is what any practical man would conclude after looking at the body of evidence.

Some questions do seem worth debating. For whom do these science magazines speak? What is science, anyway? Can it really be so dense?

The burden of the Meselson Scientific American article is this: The H'Mong testimony is not consistent. The number of samples testing positive for trichothecenes is small, only six environmental samples. Positive tests have not been achieved in Army laboratories, only by two university investigators. Indeed, one positive sample tested a year later by the Army came up negative. The samples include pollen. Cleansing flights of bees result in pollen deposited in yellow spots. Therefore, "We conclude that yellow rain is the feces of honeybees, not an agent of warfare."

Let us first of all record a few facts: The Army lab has found trichothecenes on a Soviet gas mask taken in Afghanistan; it has not been examined for pollen. Chemical & Engineering News itself reported a finding that a related mycotoxin decays in samples held for long periods. In addition to the six environmental samples there are blood, urine and other biological samples from at least 20 people, briefly mentioned but never discussed in the Meselson article. But cavils aside, what in the Scientific American article can be proved one way or another by science?

The one thing readily accessible to the methods of science is whether trichothecenes were found by the university laboratories. This is of course no small point, especially now that everyone agrees that the trichothecenes found in Southeast Asia are not a natural product. Indeed, the real question becomes, How did trichothecenes get into the blood of the same people who say they were attacked by yellow rain? To deal with this, the Scientific American article has to suggest that the university scientist may have detected trichothecenes where none existed. How does a scientific discipline determine such an issue?

First, science would examine the credentials of the scientists for relevant expertise. The Meselson group had to send its samples out for analysis because none of its members claimed the laboratory competence. Chester Mirocha of the University of Minnesota, who ran the positive tests for the government, has long been recognized as a leading authority on trichothecenes. Joseph Rosen of Rutgers, who also got positive tests, was first involved in the issue when ABC News chose an independent scientists solely on the basis of laboratory skill. Their labs routinely test dummy control samples and have never reported a false positive.

Second, science would submit the results of the experts' tests to review by their peers—that is, by other scientists with a similar kind of expertise. If the tests passed peer review, they would be published in the scientific journal dedicated to the particular specialty involved. If all this happened, we could say that the findings had been authenticated by the best standards of science.

Mr. Mirocha's basic results have been published, along with the Army's Sharon Watson's, in the Journal of the Association of Official Analytical Chemists and in Fundamental and Applied Toxicology. Mr. Rosen's results have been published in Biomedical Mass Spectrometry. Also, an autopsy report on a yellow-rain victim by Charles Stahl and Christopher Green, formerly of the Army and the CIA, respectively, has been published in the Journal of Forensic Science.

The editors of some magazines that profess to speak for "science," it seems, are too busy to read the peer-review journals. Perhaps they are spending too much time scouring our columns for accusations that Ronald Reagan is a "pinko." Alongside we publish the abstracts or relevant excerpts from the appropriate journals, in the hope that the science editors may find them here. Other readers may want to take a peek as well, if only to judge how much credence to lend to the claim that our critics are above political viewpoints or clan interests and speak from a purely objective expertise mere laymen dare not challenge.

TRIBUTE TO IRISH AMERICAN ORGANIZATIONS FOR THEIR EFFORTS IN DERAILING THE UNITED STATES-UNITED KINGDOM EXTRADITION TREATY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BIAGGI. Mr. Speaker, in anticipation of the sine die adjournement of the 1st session of the 99th Congress, I wish to take note of something which the Congress did not give final approval to and fortunately so. I refer to the proposed Supplementary Extradition Treaty between the United States and the United Kingdom of Great Britain and Northern Ireland.

As chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs, I have worked very closely with a coalition of our Nation's leading Irish American organizations to keep this tready from being ratified by the full Senate. This effort has resulted in the tready, despite being signed by our two governments in late June, remains pending before the Senate Foreign Relations Committee.

I wish to especially salute three Irish American organizations for their effective and hard work in raising concerns about this treaty to the members of the Senate Committee and to all the Congress. The first of these groups is the Irish National Caucus. This organization headed by Father Sean McManus methodically and with great depth analyzed this treaty and presented its many flaws in such a way as to create deep concerns about its ratification. Similarly, the Ancient Order of Hibernians, the Nation's oldest and largest Irish American organization, has been outspoken in their opposition and resistance to this treaty. I would especially salute their fine national president, Joseph P. Roche, for his leadership in this effort. Last but certainly not least is the Irish American Unity Conference under the leadership of James Delaney. They were the central organizing and driving force behind the coordinated undertaken by Irish American groups in opposition to this treaty.

It was this unprecedented degree of unity among Irish American groups which I feel played a key role in the successful nonconsideration of this treaty.

The Supplementary Extradition Treaty is legally, morally and politically flawed. It is an unprecedented effort on the part of the British Government to try and overturn recent United States court decisions which have recognized the right of a political offense exception as part of an Extradition Treaty between our two nations. The Supplementary Treaty has no disguise. It is an out and out effort to have the political offense category eliminated despite it being common to 90 other extradition agreements we are party to.

It is expected that the Senate will resume consideration of this treaty in the second session and may move to an early vote. However we will continue to work to have the treaty shelved or at the very least modified to reflect significant changes.

PERSONAL EXPLANATION

HON. BILL NELSON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting for certain rollcall votes on December 17 and December 19, 1985. Had I been present, I would have voted "aye" on rollcall No. 468, McHugh amendment to H.R. 3838, tax reform; "nay" on rollcall No. 470, Duncan amendment to H.R. 3838; "nay" on rollcall No. 471, motion to recommit H.R. 3838; and "aye" on rollcall No. 475, motion to approve the Journal.

RESTAURANT OWNERS SHOULD HELP IN KEEPING DRUNK DRIVERS OFF ROADS

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. SIKORSKI. Mr. Speaker, Minnesota Mothers Against Drunk Driving [MADD] recently held a candelight vigil of remembrance and hope for those who have died at the hands of drunk drivers on Minnesota's roads and highways. More than 600 family members and friends attended the vigil to speak words of remembance and sorrow for their loved ones. Through diligent and heartfelt grassroots efforts, MADD has made the public more aware of the devastatign effects of drunk driving. Their efforts have served as a catalyst for tougher State and Federal laws and tighter local enforcement of those laws to keep drunk drivers off the roads.

MADD's efforts have encouraged other groups such as DADD (dads), SADD (students), TADD (teachers), and most recently BADD (bartenders) to spearhead efforts to eliminate drunk driving. I would like to share with my colleagues an article from the Minnesota Star and Tribune by the president of TGI Friday's, Inc., Daniel Scoggin, which addresses the increased responsibilities restaurant owners and bartenders alike are taking upon themselves to reduce irresponsible consumption of alcohol. I commend the initiatives of TGI Friday's and hope that their efforts will serve as a precedence for increased involvement of restaurants and bars in reducing alcohol consumption and keeping drunk drivers off our roads.

The article follows:

RESTAURANT OWNERS SHOULD WORK TO PROMOTE RESPONSIBLE DRINKING

The urgency for tougher drinking laws is as simple as it is shocking: More than 25,000 Americans are killed each year in drunk-driving accidents. Congress has responded to that urgency by requiring all states to legislate a minimum drinking age of 21 by October 1987 or risk losing federal highway funds. Eight states have done so, and four have gone further, banning "happy hours" and other promotions that encourage irresponsible drinking.

Leading the push for new drinking laws on the national and state level are grassroots organizations such as Mothers Against Drunk Driving (MADD) and its acronymical relatives: DADD (dads), SADD (students), TADD (teachers). These organizations' names reveal their emphasis on teens and young adults, the age group whose members are most often killed—and kill others—in drunk driving accidents.

Not coincidentally, 18- to 30-year-olds also are the core-customer group for many restaurants and bars. They are the ones targeted by the drink discounters and "come on, get happy" advertisers. But as these young adults adopt more healthful life styles and express outrage over their friends' deaths on the roadside, restaurateurs may see their brisk sales drying up.

The pressure for the restaurant industry to reform its promotion of alcoholic beverages has been immense. Recently, owners have taken all of the painless steps to reduce alcohol-related traffic deaths: more training on how to prevent customers from getting drunk, designated-driver programs, free food and taxi rides when customers become intoxicated. The problem is that restauranteurs cite these meager, voluntary steps as the reason why tougher drinking laws are unnecessary.

I have a modest proposal for American restaurant and bar owner; Ban all promotions that encourage the rapid or irresponsible consumption of alcohol, then lobby your state legislatures to make such promotions illegal.

"Why would I want to cut my beverage sales?" restauranteurs may ask. The best and most obvious reason is that the customers are good for business only as long as they are alive. Another reason is that responsible demand for alcohol remains fairly constant. Through drinking promotions such as two-for-ones and all-you-can-drink specials, some restaurants derive more than half of their sales from beverages. Restaurants that do not rely on discount drinks typically maintain a steady food-to-beverage ratio.

A third reason for backing responsible-drinking laws is that social trends create business opportunities. For example, when consumers moderate their drinking habits. They create a demand for nonalcoholic beverages and low-alcoholic beers and wines.

A few months ago, another acronym joined the ranks of this cause: BADD, Bartenders Against Drunk Driving. BADD's common-sense position is to care for restaurant customers because, without customers, bartenders don't have jobs.

BADD also could be interpreted as Business Against Drunk Driving. Perhaps restaurant owners will pick up on what their bartenders have begun—accepting part of the responsibility to end drunk driving. After all, it is inside restaurants that customers decide how much they will drink.

Tougher drinking laws will not prevent all alcohol-related traffic accidents, but raising the drinking age to 21 and banning happy hours are easy, reasonable steps toward significantly reducing those accidents. It's a sober, healthy position.

—Daniel R. Scoggin, Dallas, Texas, President and chief executive office of TGI Friday's Inc.

SURPRISE MASS LAYOFF OF THE MONTH

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FORD of Michigan. Mr. Speaker, last month's narrow defeat of H.R. 1616, known by many as the plant closings bill, will not end my efforts or those of the bill's many supporters to enact legislation to protect American workers against sudden mass layoffs and plant closings. Sooner or later, a majority in Congress will respond to the desire of their constituents for the modest protections embodied in H.R. 1616, the most basic of which is 90 days' advance notice of the permanent loss of 50 or more jobs. Polls show that more than two-thirds of the American people support legislation that would require a full year's notice of a plant closing. The special interests and high-paid business lobbyists whose campaign of hysteria and distortion defeated H.R. 1616 will not be able forever to stifle the very conservative legislation we proposed and brought to the floor this year.

Officials of the Chamber of Commerce claim that the defeat of H.R. 1616 was a defeat for "union bosses." It is true that many union leaders were disappointed that H.R. 1616 did not pass, but their concern was for their members, not themselves. Union leaders don't need advance notice of plant closings any more than Members of Congress do. They lose their jobs by being voted out of office or by retiring, not through layoffs. The people who need advance notice are average working Americans whose jobs are threatened by imports, by plant relocations, by recessions, by subcontracting, and by technological change. They need advance notice because they depend on their jobs to feed their families, pay their rent and pay their medical bills. They need to know and deserve to know when their jobs and incomes are about to be eliminated.

In an effort to help my colleagues understand the need for advance notice legislation such as H.R. 1616, I am placing in the CONGRESSIONAL RECORD the first example in a series that might be called the "surprise mass layoff of the month."

Eastmet Corp., a Baltimore employer, is terminating 450 employees with less than a week's notice, 3 days before Christmas, leaving them in "utter confusion" and "bitter, to say the least."

I would ask my colleagues to take special note of the fact that the president of Eastmet knew "in recent weeks" that the layoffs would occur but refused to tell the employees, who finally learned of the mass layoffs through news reports.

Mr. Speaker, this kind of callous treatment is not rare. Businesses of all kinds shut down facilities and lay off hundreds of thousands of employees each year without any notice at all. To help bring this fact home to our colleagues, Mr. CLAY and I intend to present "surprise plant closings and layoffs of the month" each month until the House shows enough concern for American workers to pass legislation like H.R. 1616.

I request that the following two articles from the Washington Post be printed in the RECORD.

The articles follow:

[From the Washington Post, Dec. 19, 1985]

CHRISTMASTIME LAYOFFS OF 450 STUN WORKERS AT BALTIMORE AREA STEEL PLANT

(By Susan Schmidt and Michael Abramowitz)

Workers at the Eastern Stainless Steel plant just outside of Baltimore got an unseasonal jolt yesterday when Eastmet Corp. announced that 450 of its employees at the plant should be laid off Sunday, three days before Christmas.

"I feel sorry for the people with families and kids who believe in Christmas," said Jim Kyle, a 54-year-old plant electrician who said he does not yet know whether he will be among those laid off. Kyle and sever-

al co-workers who gathered at Ruggieros bar near the plant after their shift ended yesterday said they did not expect to learn who would be laid off until today, when next week's schedules are posted.

The work force is in "confusion, utter confusion, because nobody knows what's going on," said Kyle.

Eastmet, which has been forced to the brink of insolvency in recent years by the high costs of production and soft demand for American steel, said the layoffs were an effort to scale back operations and cut costs. The cuts will leave 500 people employed at the plant.

William F. Dausch, Eastmet's president, said in a statement that the company "deeply regrets this action but believes it is required in order to provide the company the opportunity to return to profitability."

The cuts were especially bitter for workers at the plant because, in an effort to bolster the ailing firm, they accepted a $4.50 an hour reduction in wages last year.

David Wilson, district director in Baltimore for the Steel Workers of America, the union representing many of the Eastmet workers, said grimly, "Even if we worked for nothing, it wouldn't matter."

"There's just a feeling of total frustration," he added. "The problem, as I see it, is that people in Washington don't understand what is happening in the country or just don't give a damn."

That frustration showed through at Ruggieros yesterday. Edward Morris, 50, a switchman who has been with the company for 33 years, said he was upset that the employes learned of the planned layoffs through news reports.

"I think the company should have notified the unions to let the men know ahead of time," he said.

Jim Chmielewski, a 51-year old millwright, said many of the younger workers who are likely to be laid off "are bitter to say the least. They've made commitments that they're not going to be able to meet by the company doing what it's doing."

Chmielewski, who lives in Dundalk with his wife and 17 year-old son, also said he does not expect to be cut from the work force. But he and other Eastmet workers said they are concerned about the company's prospects for long-term survival.

Eastmet President Dausch said that the company had hoped that an agreement with its lenders would have allowed "the survival of the entire operations of the company." But he added that the "inability of the company to maintain certain price increases and other factors made it clear in recent weeks that the plan . . . would not be achieved."

A company spokesman said Eastmet losses were running at $14.5 million through the first nine months of the year, compared with losses of $5.1 million for the same period in 1984.

And the workers feared that the layoffs were another sign of a growing exodus of manufacturers from Baltimore and especially from its industrial area of Sparrows Point.

"All these industries are leaving this town—Western Electric, Esskay, Black and Decker, the Point's down to nothing," said Chmielewski. He said he faults the Reagan administration for failing to restrict foreign imports. "This country is turning into scrooges," he said.

A JOYLESS SEASON AT STEEL PLANT: MARYLAND LAYOFFS JAR HOLIDAY

(By Susan Schmidt)

BALTIMORE, Dec. 19.—It's going to be a blue Christmas for steelworker Donald Bobbitt and his family.

Bobbitt, 37, had back surgery after he was injured on the job a year ago, and recently returned to work after 10 months of recuperation. But earlier this week, he and his co-workers at the Eastern Stainless Steel plant here learned that 450 of them won't have jobs to come back to after the holidays.

Bobbitt, who is married and has a 12-year-old son, said he has been working at Eastern Stainless for eight years and earns about $13.50 an hour, one of the highest wages in the plant. He and other workers said they have been told that employes hired since 1972 will be laid off.

To all appearances, it was business as usual this afternoon, as employes trickled out of the giant Eastern plant, a faded structure with stacks belching steam into the frigid air. But many of the workers, including Bobbitt, said the layoffs spell the end to their days as steelworkers.

"I have no way of figuring out how I'm going to pay my bills," said Bobbitt, as he left the plant at the end of his shift. "Its sad, and I know I'm not the only one in this position."

He said he hopes his family can get by on his wife's salary and his unemployment insurance while he takes courses in air conditioner and refrigeration repair.

Richard Bosnick, 31, said he has no illusions about the difficulty of finding another job as a steelworker. Bosnick, who has also worked for the credit union during his 12 years at Eastern, said he will look for work with a bank or finance agency.

But, with his wife in college and a 9-year-old son to support, Bosnick said he expect hard times ahead. "We're just not going to be able to make it," he said, adding that there won't be any money for college tuition next semester.

"My standard of living may never be back to where it has been," he said.

Some employes, including 30-year-old Ray Wrarthen, said they expect that, eventually, the company may recall some of the younger workers with little seniority who are being laid off.

Wrarthen said he believes many of the older workers who remain will be forced into retirement because they will be assigned to tough, physically demanding jobs to replace those laid off.

"They're going to take all those old timers and put them on jobs like the shears," said Wrarthen, referring to the dangerous and difficult job of cutting steel plates with pneumatic shears. The plant will continue to make steel plates but is discontinuing the making of steel and strip steel, used in the manufacturer of automobiles and appliances.

Eastern Stainless Steel, a division of Eastmet Corp., has been beset by the high cost of production and the diminishing demand for American steel. The company said the layoffs were an effort to cut costs and "provide the company with its best chance for long-term survival."

Many workers said they think Eastern Stainless Steel will soon go under, and they fear remaining 500 workers, many of whom are 50 or older, will find themselves in even worse straits than those being laid off now. Bobbitt said he has those fears for his father, who has worked at the Eastern plant for 29 years.

"I can find something else somewhere," he said, "I'm young. But my father—if the company doesn't stay around—he's too old to get retrained."

THE ELDERLY DESERVE FAIR PLAY

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 20, 1985

Mr. WEISS. Mr. Speaker, 1985 marks the 50th anniversary of Social Security and the 20th anniversaries of Medicare and Medicaid and the Older Americans Act. But it was also a year that has seen the continuation of the Reagan administration's persistent and malicious attempts to undermine these very basic programs.

In blatant disregard of his election year promises, President Reagan joined with Senate Republicans in proposing a 1-year freeze in the Social Security cost-of-living adjustment [COLA]. This proposal would have thrust hundreds of thousands of senior citizens into poverty. Yet the Reagan administration avidly supported a full increase for the cost of inflation for the Defense Department. These are the actions of an administration with a very distorted sense of priorities and I joined with House Members in firmly rejecting this administration's proposals for Social Security.

The Reagan administration's policy of attempting to reduce the deficit by cutting Social Security and Medicare benefits is morally misguided and cruel. Throughout the last year I have directed my best efforts not only to rescind such policies but to put forward solutions that are both equitable and workable and that look toward creating a balanced and better society for all of us.

CARING FOR VICTIMS OF DISEASE

In the area of diseases more likely to affect the elderly, I support the establishment of regional centers for the treatment of Alzheimer's disease and the passage of the Cancer Patients Employment Rights Act prohibiting discrimination on the basis of a cancer history. I have also joined with other House Members in overriding a Presidential veto to create a National Institute for Arthritis and Musculoskeletal and Skin Diseases as part of National Institutes of Health.

IMPROVING SOCIAL SECURITY

The Social Security trust funds should be removed from the unified budget in order to safeguard the Social Security system from reckless and shortsighted budget cuts and the Treasury Department should restore the money it borrowed from the Social Security trust funds.

I have introduced a bill guaranteeing a Social Security cost-of-living increase if inflation falls as low as 1 percent. Currently, COLA's are only paid in a given year if inflation is 3 percent or above. This year's COLA increase was 3.1 percent which

amounts to over $150 a year, but if inflation had fallen below 3 percent, there would have been no increase paid this year.

My bill would also prevent manipulation of the issue of Social Security COLA increases for purely political reasons. During President Reagan's reelection campaign, he raised the concern that the trigger in 1985 might fall below 3 percent, preventing an increase in Social Security benefits. He proposed a guaranteed increase but only for 1 year. His suggestion came in July, a full 3 months before any reliable data was available. It was not difficult to discern that the announcement was motivated by the upcoming Presidential election and not by a new found interest in preserving the Social Security system. After all, this is the man who proposed devastating cuts of more than $88 billion in Social Security soon after he took office in 1981.

HEALTH CARE REFORMS NEEDED FOR ELDERLY

In 1984, elderly individuals spent a higher proportion of their income on health care than they were paying before Medicare and Medicaid were enacted, and by 1989, the elderly will spend more than 18 percent of their income for health care. Today, more than 28 million older persons and 3 million disabled persons are covered under Medicare, the largest personal health care financing program in the United States. While Medicare provides millions of older and disabled Americans with the most basic of health care services, many services of vital importance are still not covered. Medicare should be expanded to cover the costs of annual checkups, routine vision, dental and hearing care, and prescription drugs in addition to long-term care programs such as adult day care and nonemergency medical transportation services for patients who use a wheelchair. Under a Medicare bill this year, I voted in favor of improved procedures for appealing denial of Medicare claims, payments for second opinions in the case of some elective surgical procedures, and incentives to doctors who accept Medicare payments. This bill imposes stiff new penalties on hospitals and doctors who fail to provide emergency care for poor patients.

The new Medicare financing system known as diagnosis-related groups or DRG's is also of concern to older Americans. Under this system, the Government pays hospitals a predetermined rate for each specific DRG rather than a share of the actual cost of treating the individual Medicare patient. Problems associated with this system include early hospital discharges, poor quality care, and denial of admission to the hospital. I am monitoring hearings on the problems associated with DRG's and am investigating legislative solutions.

In addition, I voted against the Gramm-Rudman budget balancing bill which I believe will hurt many Americans through the destruction of health, education, and other vital Federal programs. The new law exempts from cuts Social Security and low-income programs such as Medicaid, supplemental security income, food stamps, and veterans' compensation and pensions. Spending for a category of programs that include Medicare, veterans' health and community health could only be cut by 1 percent in 1986 and 2 percent in following years. But, essential programs like subsidized elderly and handicapped housing, the Older Americans Act, mass transit, pollution control, and law enforcement are likely to come under the budget ax.

Finally, many constituents are understandably concerned with the upcoming increase in Medicare's hospital deductible from $400 to $492, an increase of 23 percent. I have cosponsored legislation to limit increases in the hospital deductible and nursing home coinsurance.

I believe resisting the current administration's efforts to undermine the Social Security and Medicare systems and ensuring a respectable future for the elderly are among the most pressing issues confronting this Congress. These have been two of my highest priorities throughout my tenure in Congress and will continue to be so.

MY THANKS TO TOMMY WINEBRENNER

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. McKINNEY. Mr. Speaker, with the end of this session the House of Representatives sees the retirement of one of its most respected and well-loved individuals—Tommy Winebrenner. He has become an institution in his own right and the intuition of how this body operates which Tommy developed during his 32 years working in and around the Chamber will be sorely missed.

I dare not estimate how many times I have come to Tom during our 15 years of acquaintance. He has often been an island of tranquillity, a quiet voice of reason during tumultuous sessions.

In recent days so many Members have tried to put into words our feelings of what Tommy Winebrenner has been to each of us. However, there has been a redundancy because there are not enough words to give him the credit that Tommy so richly deserves. It seems woefully inadequate to say simply "thank you," but for your help, your advice, and your friendship, Tommy, I am deeply grateful.

I hope we will continue to see you often around the Hill. I wish you great success in your next career. Finally, I wish you a long and healthy life with your wife and children. No one deserves the best of everything good more than you.

ADMINISTRATION'S NEW ABM INTERPRETATION: DEFECTIVE AND COUNTERPRODUCTIVE

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 20, 1985

Mr. FASCELL. Mr. Speaker, the viability of the Anti-Ballistic Missile [ABM] Treaty of 1972 was recently challenged by an unprecedented new legal interpretation of its provisions issued by the administration this past October. I want to take this opportunity to provide my colleagues with information that I believe will help clarify the issues and events surrounding the administration's unsubstantiated new legal interpretation of the ABM Treaty.

As you know, the traditional, longstanding interpretation of the ABM Treaty—which bans the development, testing, and deployment of all air-based, sea-based, space-based, and mobile land-based antiballistic systems based on new physical principles—was first challenged publicly by National Security Adviser Robert McFarlane on a "Meet the Press" television interview—October 10, 1985. During the course of the interview, McFarlane volunteered the view that development and testing of anti-ballistic missile systems based on new physical concepts were approved and authorized by the ABM Treaty rather than banned. At an October 8 press briefing, McFarlane asserted that the new, broader interpetation was a fixed position of the administration.

McFarlane's statement was provocative: In effect, a highly placed Government official had reversed 180 degrees the 13-year-old reading of the treaty, which had been interpreted by every administration since 1972, including President Reagan's, as prohibiting the development, testing, and deployment of air-based, sea-based, space-based, and mobile land-based systems based on new physical principles. This new interpretation, if agreed to by both signatories, would allow the two countries to develop and test any space-based, air-based, sea-based, and mobile land-based ABM system right up the point of final deployment. This revision was immediately criticized by many of us in Congress, our key NATO allies, and the actual negotiators of the ABM Treaty.

A week later, in an apparent retreat from the policy espoused by McFarlane, Secretary of State Shultz announced in a speech before the North Atlantic Assembly, San Francisco, CA, October 14, 1985, that, while the administration stood by its new legal interpretation of the ABM Treaty, the SDI program would continue to be conducted in accordance with a restrictive interpretation of the treaty's obligation. Secretary Shultz' statement made it clear that the Reagan administration had formally declined to adopt as policy its new legal interpretation of the treaty. The Secretary of State announced that the President had affirmed as administration policy that the treaty would

once again be interpreted as prohibiting the development, testing, and deployment of SDI programs based on new and exotic physical principles. While the administration has indicated that, as a matter of policy, it would continue to abide by the longstanding interpretation, its assertion that a broader interpretation is legally justified leaves the door open for subsequent reversals—a prospect of grave concern to many of us in Congress as well as our NATO allies.

The administration's apparent attempt to stand the ABM Treaty on its head left many of us in Congress shocked and amazed. Accordingly, as chairman of the Committee on Foreign Affairs and its Subcommittee on Arms Control, International Security, and Science, I felt it imperative that a hearing be held to address the serious political and arms control implications of the administration's legal interpretation.

At the October 22 hearing conducted by my subcommittee, we received testimony from Ambassador Paul Nitze, special adviser to the President and Secretary of State on Arms Control Matters; Mr. Abraham Sofaer, legal advisor to the Secretary of State; the Honorable Gerard Smith, former chief of the U.S. delegation to the ABM Negotiations; the Honorable Ralph Earle, former director of the Arms Control and Disarmament Agency; and John Rhinelander, former legal advisor to the ABM negotiating team.

Mr. Speaker, the hearing raised a number of important issues that may be of interest to my colleagues:

First. During the hearing, it became evident that the administration had based its justification for the new, legal interpretation not only on a partial review of the negotiating record but also on an incomplete negotiating record. For example, the State Department's legal advisor, Abraham Sofaer, noted that no single agency had systematically collected and preserved the entire record in a readily useful form. Moreover, he told the subcommittee that, because we are still in the process of collecting material, I cannot tell you with certainty every step of the process. Mr. Sofaer's admission begs the question: Shouldn't a major realignment in administration policy, with far-reaching foreign policy and arms control implications, be based on a thorough, systematic, and painstaking reading of the negotiating record?

Later in the hearing, John Rhinelander, former legal advisor to the ABM negotiating team, informed the subcommittee that the Arms Control and Disarmament Agency [ACDA] could not locate his extensive files on the ABM Treaty negotiations.

Second. Ambassador Nitze and Mr. Sofaer alleged that the ABM Treaty is ambiguous on the issue of whether development, testing, and deployment of futuristic ballistic missile defense systems are allowed. In spite of this assertion of ambiguity, none of the former members of the ABM negotiating team or high-level officials of any administration, from the Nixon through Reagan administrations, have contended that this part of the ABM Treaty is ambiguous. Even Ambassador Nitze appears to have only recently accepted the administration's new legal interpretation when he stated at the hearing:

It is hard to be clear about one's recollection, but I have gone over part of the negotiating record, and from that, I agree with Judge Sofaer [State Department Legal Advisor].

Third. Numerous statements exist in the public record that express the view that development, testing, and deployment of space-based, sea-based, air-based, and mobile land-based systems based on new physical principles are forbidden by the ABM Treaty. For example, former Secretary of Defense Melvin Laird unequivocally expressed this point of view during Senate ratification hearings. This view was also clearly understood even by the treaty's critics like Senator Jackson, who ultimately voted for the treaty, and Senator Buckley, who voted against it largely because he recognized that article V "should have the effect, for example, of prohibiting the development and testing of a laser type system based in space * * *." This point of view was corroborated by every single public witness at the hearing as the correct reading of the treaty.

Fourth. Key former administration officials responsible for negotiating the ABM Treaty have made statements in opposition to the administration's new legal interpretation, ranging from Ambassador Gerard Smith, head of the U.S. delegation to the ABM Treaty negotiations, to John Rhinelander, former legal advisor to the U.S. ABM negotiating team, to Ralph Earle, former director of ACDA, to Spurgeon Keeny, former deputy director of ACDA, to Albert Carnesale, former member of the ABM negotiating team, and to Lt. Gen. Royal B. Allison, a former senior military official on the ABM delegation.

In addition, six former Secretaries of Defense—Harold Brown, Clark Clifford, Melvin R. Laird, Robert S. McNamara, Elliot L. Richardson, and James R. Schlesinger—recently signed a joint statement in support of the ABM Treaty that calls upon the United States and Soviet Governments to avoid actions that would undermine the treaty.

Fifth. The subcommittee learned during the hearing that every administration since the ratification of the ABM Treaty in 1972 has advocated the longstanding interpretation of the ABM Treaty. This fact is corroborated by every arms control impact statement [ACIS] since their inception as reflected in a CRS chart which follows my remarks. The chart illustrates that every ACIS prepared and submitted by the Reagan administration affirms acceptance of the longstanding interpretation of the ABM Treaty.

Sixth. Administration witnesses did not provide the subcommittee with any evidence that the Soviet Union had ever interpreted the treaty in a manner that permitted the development, testing, and deployment of space-based, air-based, sea-based, and mobile land-based ABM systems based on new physical principles or that the United States had ever encouraged such an interpretation of the treaty. Moreover, a recent statement made by Marshall Akhromeyev, the Soviet Union's Chief of General Staff of the Armed Forces and First Deputy Minister of Defense, further indicates that the Soviet Union adheres to the longstanding interpretation. On October 19, Akhromeyev said:

Such [re]interpretations of the ABM Treaty are, to put it mildly, deliberate deceit. They contravene reality. Article V of the treaty absolutely, unambiguously bans the development, testing, and deployment of ABM systems or components of space or mobile ground (systems) . . . that are based on existing or future technology.

Since the United States and the Soviets have operated under the longstanding interpretation of the ABM Treaty, which prohibits the development, testing, and deployment of space-based, air-based, sea-based, and mobile land-based ballistic missile defense systems based on new physical principles, a U.S. unilateral declaration to the contrary, 13 years later, is legally unsound and diplomatically untenable.

Seventh. It became clear from the subcommittee hearing that the administration's proposed new legal interpretation of the ABM Treaty raises several adverse consequences for arms control. Ironically, it could unwittingly result in undermining the administration's stated objective of reaching a negotiated transition to a defense dominated world.

Under the administration's new legal interpretation, the Soviets could develop and test a nationwide exotic ABM system while still claiming adherence to the ABM Treaty, an option not presently available to them under the longstanding interpretation. This would leave the United States with no other alternative than to increase its offensive nuclear forces, which is in complete contradiction to the administration's stated objectives of the SDI program. This is similar to what happened two decades when the United States, in response to Soviet ABM activities, deployed MIRV'd systems. We now find ourselves, two decades later, trying to rid ourselves of these destabilizing offensive weapons.

Eighth. Under the ABM Treaty, a joint United States-Soviet Standing Consultative Commission [SCC] was established "to promote the objectives and implementation of the provisions of the ABM Treaty" and "to consider questions concerning compliance with the obligations assumed and relative situations which may be considered ambiguous." Although issues considered by the SCC are properly classified, the testimony of administration witnesses at the October 22 hearing suggested that the administration has not vigorously pursued this avenue in an attempt to resolve questions surrounding the development, testing, and deployment of space-based, air-based, sea-based, and mobile land-based ballistic missile defense systems based on new physical principles. When asked whether the issue would be discussed in the SCC, Ambassador Nitze responded that the suggestion would be taken under advisement.

In conclusion, Mr. Speaker, many of us in Congress fully support the administration's reaffirmation of the longstanding interpretation of the ABM Treaty as expressed by Secretary Shultz on October 14 and Ambassador Nitze during our October 22 hearing. Our concern remains, however, over the acceptance of this reaffirmation as a permanent policy of the Reagan administration. This concern was most graphically reflected in the now-infamous November 13 letter by Secretary of Defense Weinberger to the President in which the Secretary characterized the administration's ABM policy as "wrong." As every administration since 1972 has concluded, the longstanding interpretation of the ABM Treaty is the right policy because it best serves U.S. national security and arms control interests. It is my hope that in the post-Geneva summit atmosphere of good will that the United States and Soviet Union will reaffirm their joint commitment to the longstanding interpretation of the ABM Treaty. I call upon the administration to pursue that effort and pledge my cooperation and support.

SUMMARY OF ARMS CONTROL IMPACT STATEMENTS CONCERNING PERMISSIBILITY OF RESEARCH, DEVELOPMENT, TESTING, AND DEPLOYMENT OF BALLISTIC MISSILE DEFENSE SYSTEMS [1]

Fiscal year	Research	Development	Testing	Deployment	Other comments
1979		Yes fixed land based (LB) [99, 231] No as to all others [231] Art. V	Yes fixed land based [99] [231] No as to all others [231] Art. V	No Art. III & Agreed Statement (AS) E. No as to everything other than fixed land basedc. Art. V [231].	BMD program provides hedge against Soviet abrogation; if U.S. made technical advances with appearance of breakout capability, U.S. could prompt destabilizing competition in defensive systems. [98–99]
1980	Yes [100]	Yes fixed LB [76] [100] No as to all others Art. V. [100]	Yes fixed LB [76] [100] No as to all others Art. V. [100]	No Art. III & AS–E [76] [100] No as to fixed LB [100]	Should either side make substantial technical advances that give the appearance of an impending breakout capability, a destablizing situation could result. [76]
1981	Yes [452]	Yes fixed LB [452] No as to all others Art. V. [452]	Yes fixed LB [452] No as to all others Art. v. [452]	No Art. III & AS–E [228] [452] No as to fixed LB [452]	The BMD potential of future DE weapons could eventually create a conflict with the obligations assumed by the U.S. under the provisions of the ABM Treaty. [451]
1982	Yes [393]	Yes fixed LB [195] [393] No as to all others (i.e. sea based etc.) [393].	Yes fixed LB [195] [393] No as to all others [353]	No Art III & AS–E [195–96] [353] No as to fixed LB [394]	Like other arms control treaties signed by the U.S., the ABM treaty makes provisions for withdrawal [93]. Absent the U.S. BMD R&D program, the prospects for Soviet advantage in BMD technology, or perceptions of Soviet advantages, could be increased. This would undermine strategic stability & could lead to an interactive offense-defense competition. [197]
1983	Yes [321]	Yes fixed LB [141] No as to all others [321]	Yes fixed LB [141] No as to all others [321]	No Art. III & AS–E [141] [321] No as to fixed LB [321–42]	U.S. BMD program hedges against Soviet breakout from ABM Treaty, & provides future deployment options. [139]
1984	Yes [265]	Yes fixed LB [133] No as to all others [266] No as to spaced-based when enters field-test stage [266–67].	Yes fixed LB [133] No as to all others [266] No as to spaced-based [266]	No Art. III & AS–E [133–34] [266] No as to fixed LB [266] No as to spaced based [266]	At the most recent 5-year review of the ABM Treaty in Dec. 1982, neither side proposed amendments to the Treaty at this time. [134]
1985	Yes [251]	Yes fixed LB [212] No as to spaced-based when enters field-test stage [252].	Yes fixed LB [212] No as to spaced-based [252]	No Art. III & AS–E [218] No as to space base [252]	U.S. BMD R&D program reduces possibility of U.S.S.R. gaining a meaningful advantage in BMD technology to match their unilateral and growing advantage in deployed capability. [214]
1986	Yes [38]	Yes fixed LB [36] No as to all others when entering field testing stage [36, 37] Art. V.	Yes fixed LB [36] No as to all others [36] Art. V	No as to sea based, space based etc Art. V. No as to fixed LB Art. III, AS–E [36]	The conditions under which the U.S. would consider withdrawal from the ABM Tresty have never been fully elaborated. However, it is clear that in signing the ABM Treaty, the U.S. envisioned a relationship between offensive weapons & ballastic missile defense. Any SDI related deployment, in view of Treaty obligations, would have to be a matter for negotiation. [37–38]

TRIBUTE TO TOMMY LEE WINEBRENNER

HON. BILL EMERSON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. EMERSON. Mr. Speaker, I join my many colleagues in paying tribute to a very valued and distinguished employee of this House, Tom Winebrenner, who, after 33 years of service, is taking leave of this institution.

With the exception of the Speaker, Mr. WHITTEN, the dean of the House, and several other Members of great tenure, Tom was here for the arrival of each of us and has seen the departure of many hundreds of our predecessors.

It is not unlikely that Tom has heard more words spoken in this Chamber than any other living person, with the possible exception of Luke Hicks and Lee Thomas, because the nature of his job required his constant attendance here. Members come and go to office and committee, but Tom was the constant "floor person," and he always knew what was "going on." "Part of the job," I'm sure he regarded it, but what a valuable service he has performed in his intimate knowledge of the workings here, his ability to sense the House, his knowledge of its history, the interaction of personalities, his ability to predict, to predict even the unpredictability of this sometimes temperamental body.

Tom's Hoosier upbringing is a matter of pride to him and well known to most who come in contact with him. It surprises many, therefore, when I tell folks that he and I first knew each other in high school. They say, "Oh, I thought you were from Missouri, not Indiana," or "If Tom is from Missouri, why does he tout being a Hoosier?" The fact is we both landed right here in this Chamber as teenage boys, pages in the 83d Congress. That was 1953. Ike was just beginning his Presidency. Our Speaker was a freshman that year, having taken the seat of John F. Kennedy who, as a result of the 1952 election, had just moved over to the other body. Speaker Joe Martin was commencing his second nonconsecutive term as Speaker, and Tom's benefactor, Charles Halleck, was the majority leader. The legendary Sam Rayburn was minority leader and the future Speaker, John McCormack, was the minority whip. Lyndon Johnson was a Senator, Richard Nixon the Vice President, Gerald Ford a four-term Representative, and the names of Jimmy Carter and Ronald Reagan were not yet exactly household words.

I cite this to establish more in terms of personalities than in years the frame in history during which Tom has served here in the people's House. What change he has observed from this special vantage. And what a wonderful, exciting role he has played, a part of it all, as a part of the unique fabric of the House.

Tom, you carry a wonderful lode of history with you, which I know you cherish. Your service will be missed. Please accept my heartiest congratulations on the accomplishment of such an outstanding first career, and all good wishes for all of your future endeavors.
